It would have been a difficult matter for President Doremus to have selected a more efficient or better-equipped committee. They are shooters who are intimately acquainted with nearly all of the trapshots in the country, for it is seldom that any member of the committee misses an important shoot. The Grand American handicapping is in good hands.

Other committees appointed by President Doremus, of the Interstate Association, are:

Tournament: John T. Skelly, chairman; F. G. Drew, T. H. Keller, Jr., L. J. Squier, Charles North, R. W. Clancey and H. E. Winans.

Gun Club Oragizations: J. Leonard Clark, chairman; L. P. Smith, Edward Banks, W. B. Stadtfield, C. J. Fairchild.

Trophies: C. R. Babson, chairman; A. F. Hebard, P. S. Keenan.

Classify Shooters: J. Leonard Clark, chairman; Elmer E. Shaner, L. J. Squier, P. S. Keenan, T. H. Keller.

The last-mentioned committee was appointed to assist in the classifying of trapshooters with the idea of having contestants of known ability shoot among themselves.

Class shooting is something that is coming. A great many of the active gun clubs of the country classify their shooters, and the clubs that do this have more genuinely enthusiastic members than the clubs that do not. Under the class system the trophies do not all find their way into the dens of the best shooters—the poorer shots having an opportunity of winning something and therefore maintaining interest in the sport.

Mary Montrose Wins Derby.—Mary Montrose, the handsome daughter of Comanche Frank and Lorna Doone, won the Derby Championship at Vinita, Okla., on February 2nd, and thus finished her marvelous Derby career in a blaze of glory. The win was not entirely unexpected by those who have been following the work of the Derbys of the past season; nevertheless, this race will go down in history as one of the greatest that has been seen in many and many a day. In fact, we are not overstepping the bounds of reason when we say that at least in the last dozen or more years, no Derby dog or bitch has ever run a race the equal of that which won the Derby Championship. Many of the old-timers, who have followed field trials for the past quarter of a century, go farther than that and freely state that another such race has never been run by any Derby dog at any time or at any place. As those who are credited with this statement were interested in the stake, it naturally carries considerable weight.

The other dogs all ran good races, and this particular one of Mary's so overshadowed the field that there was really nothing in her class, although her litter brother, Royal Flush, was easily the next best and thus won the position of runner-up. It was a great day for the Ziegler dogs and a still greater one for Bob Armstrong, who handled both. Ever since the field trial season began on the prairies of North Dakota last August Armstrong maintained that Mary Montrose was not only the best of all the famous puppies which he brought out this year, but that she was the finest flower that ever bloomed in dog flesh. Mary has been doing considerable winning, but her brothers have divided honors with her quite consistently, hence Bob was never given all the credit for his statements about Mary.

Vinita, Okla.

✤ ✤ ✤

Doc Got Mixed.—One of Portland's most ardent devotees of the trap game is Dr. A. K. Downs. Recently, while meditating in his office, Doc conceived the idea that he would like to shatter a few clay birds on the following day, and to make sure that he would not forget to take his gun home that evening, he put it in a case and placed it near the rack, where his hat and coat were hanging in the office.

Shades of night were creeping over when Doc realized that it was time to start for home, and with him went his trusty gun. Again making sure not to forget the firearm, Doc left it in his automobile when he locked his eight-cylinder up in the garage.

Bright and early the next morning he was up, ready for the conquest of the "mud saucers." On the way out to the Portland Gun Club grounds he picked up several friends and, upon arriving at the Everding park traps, proceeded to thaw out, as the cold east wind chilled him somewhat. While standing before the fireplace, dreaming of what was going to happen to the club pigeons, there was a call for squad one—"Morris, Everding, Downs," etc.

Doc got a hustle on and grabbed his gun case; three moves and he was ready to put his gun together, but, after trying several minutes, he looked over the stock very carefully and then turned his attention to the barrel. Alas, he discovered that he had brought the stock of his Winchester rifle and the barrel of his Remington scatter-gun.

However, Doc borrowed a 12-gauge and shattered a few of the blue rocks that day, but learned his lesson, and hereafter, he says, will keep his two guns together.

Field Dogs Going North—S. Christenson, secretary of the Pacific Coast Field Trials Club, has written to Portland that it is the intention of a number of Californians to send their dogs North this year to compete in the pheasant trials in British Columbia, Washington and Oregon.

As the California trials will not take place until January, 1918, there will be plenty of time in which to work the dogs on quail in that state after the Oregon trials, which will take place in September. Distemper has been prevalent in some of the Bear State kennels of late and a number of valuable dogs have been lost. There are enough left, however, to make things interesting in the Northern trials.

Carl Liebe's young dog, Liebe's King, a good performer in last year's Oregon derbies, is developing splendidly and those who have seen him work in the last few weeks believe that he will be a grand performer this year. Dr. E. W. Morse's Rowdy, winner of second place in the Oregon derby last September, has completely recovered from an attack of distemper and returned to form. He shows great promise.

Maurice Abraham's Count Moring, the Oregon derby winner, looks well and is receiving light work to keep in condition. He is a tractable dog, a consistent performer and is expected to show something out of the ordinary in the all-age races.

Dr. L. D. Ricks, of Washington, D. C., head of the United States Public Health Service, has sent out a promising English setter bitch to Fred Beals. She will be fitted for the Northwest trials this season. E. A. Parsons, of Portland, has sent his noted bitch, Irene Danstone's Marie, to Qualeyville, W. Va., to be bred to the famous sire, Prince Rodney's Count. He has also sent Theda Bara, another English setter bitch, to the same kennels to be trained.

NEW RULES FOR RIFLE MATCHES.

National Events at State Camp in Florida to Begin August 23.

By reason of the changes made by the National Board for the Promotion of Rifle Practice in the National Match rules, the 1917 annual competitions scheduled to begin August 23, at State Camp, Florida, should appear more attractive than ever to military and civilian shots. One of the most radical changes is evidenced in the new course of fire. The "changing position" fire will perhaps prove the most popular of any of these modifications among the marksmen of the country. All who attended the 1916 N. R. A. matches will recognize it in the "monkey drill" which scored such a decided success, and those who have shot the new N. R. A. qualifications course will identify it as being a Navy institution. The change was made in the 600-yard course, prescribing rapid fire instead of slow fire, and is also likely to prove beneficial and popular as well.

In the opinion of many rifle shots, the slow fire at 600 was too little different from the slow fire at 1000 yards to make the shooting of this course, as previously described, worth while. As the course of fire stands today, it provides much more of variety, and a greater training in quick, accurate shooting than it has in the immediate past. Through the provision which requires each team to stand ready to furnish three pit operatives, the holding of the National Matches are assured. Many rifle club members have apparently misunderstood the true significance of this section. It does not mean necessarily that each team must bring three supernumerary men in addition to its shooting members to the matches, whose only participation in the big shoot will be the hauling of targets. It does mean, however, that if for any reason an insufficient number of men are detailed from the regular establishment, the executive officer of the matches may call upon every team for a maximum of three men to assist in the operation of the range. These men may be either be brought as supernumeraries, may be team members, serving in rotation one day in every three or four and shooting the rest of the time, or may be hired from a waiting list which will probably be provided.

The new rules also provide for the participation of an increased number of teams in the National Matches, as next August it will be possible for each State, Territory and the District of Columbia to be represented by one National Guard, one civilian, and one school team. On this basis, at least 150 teams are expected to attend the matches. Last year, with much less than a month's notice, fifty-five teams were assembled at State Camp, and the greatest shoot in National Match history resulted.

In 1917, clubs will have seven months' notice, and the new rules provide a plenty of ammunition for practice at home stations for the teams selected to represent the different States. There is no reason why the riflemen of the United States, by making a united effort within their several States and Territories, cannot make the year's competitions the giants of their long line, demonstrate the value to the nation of such a congress of marksmen, and show to the government that the citizen and the National Guard shooters are eager to do everything possible to advance the cause of rifle practice.

It is up to the rifle club members to lose no time in arousing interest in the shoot of next August. Call representative gatherings of National Guard, civilian and school marksmen, get the newspapers interested, and through them point out the necessity of holding Statewide competitions from the high scores in which the State teams may be picked. There is little going on now on the outdoor range. The rifleman has plenty of time to devote to this organization and publicity work. This is the time to start things going.

Expect Bass Run.—Bass fishing in the vicinity of Tiburon island is expected to begin within the next ten days. Members of the Tiburon Club have tested out the waters with spoons, but have had very little success so far.

However, February of last year brought the gamy fish in numbers to the Tiburon section, and experts expect to find them returning within a few days. One of the best catches of 1916 was made at Tiburon.

Water conditions in the bay are such that spoon fishing should be exceptionally good. Cold weather in the upper reaches of the rivers has prevented the usual inflow of muddy water, and the bay is clear. Bass spooning should soon be calling many anglers to the boats.

There is a movement on foot to hold field trials in Yakima this year. A number of dog owners have signified their willingness to take part in the trials and it seems more than probable that there will be a large number of entries. The British Columbia trials will likely be the first in the Northwest. They will be held about September 1. Then will come the Washington trials, which will be held near Seattle. Following these will be the Yakima and Oregon trials, the four forming an attractive circuit.

✤ ✤ ✤

With more trophies and prizes already pledged and in the hands of the club, the prospects of winnings that will amount to considerable are in store for the many entries that will grace the benches of the big exhibit of the Seattle Kennel Club March 29, 30 and 31.

Stock and Farm Department

The first individual sale of pure bred Berkshires conducted in California was made by George M. York & Son, of Modesto, Cal., January 20. The sale averaged $23.

✤ ✤ ✤

John P. Daggs, of Modesto, Cal., has recently bought some prize winning Duroc-Jersey breeding stock in the East, among them a full sister to Iowa's champion sow.

✤ ✤ ✤

The River Bend Farm, St. Helena, Mont., makes a specialty of mail order business. Not that they are ashamed to show their stock to visiting breeders, for there are few herds in California whose stock will equal theirs. They believe in square dealing and this has brought about their extensive mail order business. By ordering by mail from the River Bend Farm, one not only gets the same stock but saves the cost of a trip.

✤ ✤ ✤

Among the recent sales of John P. Daggs, pioneer Duroc-Jersey breeder of Modesto, were: One boar to A. D. Cooldige of Modesto, $35; one boar and two bred gilts to C. C. Lester, Gilroy; three gilts and one boar to Jas. Hansen of Newman, $200; one boar and one gilt to Gen. A. J. Gootch, San Francisco, $80.

✤ ✤ ✤

Buyers for spring lambs have already made their appearance in California and are offering liberal prices. Few sales are reported, however, as breeders are expecting a bigger demand and stronger prices later on.

✤ ✤ ✤

Like the feeders of the cornbelt, California cattlemen are pushing young cattle and making a specialty of baby beeves.

✤ ✤ ✤

Wool selling at 40 cents is a reality for Montana flockmasters. Fred I. Long of Great Falls sold his 1915 clip at that figure. There was a total of about 160,000 pounds in the clip which had been in the wool warehouse since it was clipped in 1915. The sale was made through a Boston house.

✤ ✤ ✤

Merchants of Fresno have subscribed $3750 to date toward the packing house site which is proposed to be donated to the Universal Packing Company of Chicago if it will erect a $150,000 meat packing plant in that county. The site proposed to be given is a short distance south of Salwa and embraces 35 acres.

✤ ✤ ✤

Four hundred dollars per acre has been paid by A. Verkuyle for 80 acres of vines and peaches, adjacent to the Lucerne vineyard at Hanford, the total amount being $32,000. The ranch was the property of E. J. Hummell. Verkuyle will take possession of the ranch immediately.

✤ ✤ ✤

C. A. Robertson has agreed to give 100 acres to the Chowchilla Fair Association near the town of Chowchilla. It is understood that the land will be used exclusively for the holding of agricultural fairs.

✤ ✤ ✤

A San Francisco company is endeavoring to sign up 1000 cows in the Manteca section of San Joaquin county in the hope of establishing a casein factory at that place.

✤ ✤ ✤

Haden Smith, Duroc breeder of Yolo county, reports the sale of 17 bred sows to Chas E. van Barneveld, Glenn county; a boar to A. J. Gomes, of Calaveras county; and a service boar to Joe Hulen of Solano county and a gilt to F. W. Marstone of Shasta county.

✤ ✤ ✤

H. B. Thornberry, of Stockton, California's "Jack King," has recently returned from Missouri where he purchased a large consignment of mammoth jacks. He now has in his sale stables at Stockton a complete consignment of saddle horses, draft horses and jacks.

✤ ✤ ✤

The members of the Kings County Poland China Breeders' Association are sending out invitations to Poland China breeders in all parts of the State asking them to be present at Hanford March 7 when an attempt will be made to organize a State Poland China breeders' association. The Kings county breeders will hold their auction sale on the same date.

✤ ✤ ✤

With a production of 97.9 pounds of butter-fat from 2452 pounds of milk, Abbie, a purebred Holstein cow owned by H. E. Cornwell of Modesto reached the high mark of production for the month of January among the 673 cows tested for members of the Stanislaus Cow Testing Association. A purebred Jersey owned by J. M. Bomberger of Salida was a close second to the Holstein with a production of 92.38 pounds of butter-fat from 1276 pounds of milk, her milk making a test for the month of 7.2 per cent. The Holstein produced nearly double the amount of milk as the Jersey, but the quality of her milk was such that the Jersey butterfat record was nearly equal. Forty-seven cows won a place on the honor roll by producing more than 1:50 pounds of butterfat a day for the month.

Sixty-one cars of live stock were shipped from Tulare in January, according to figures given out by the local freight offices. These shipments included eight carloads of horses to Kansas City and Memphis, and a carload of pure blood holstein cattle to New York. The other shipments were about equally divided between cattle and hogs going to San Francisco, Los Angeles and other markets in the state.

✤ ✤ ✤

J. A. Franklin, of Durham, Cal., recently purchased the Percheron mare, Marie, that will be remembered as being shown by A. C. Ruby and among the prize-winners at the recent Pacific International. She is the daughter of the famous Illinois stallion, Grandeur, and her dam was by Voltaire, a stallion owned by the French government.

✤ ✤ ✤

Holstein Breeders' Sale Postponed.

The big semi-annual Holstein-Friesian cattle sale of the California Pedigree and Sales company of Sacramento has been postponed for a week and will be held at the University Farm, Davis, during Farmers' Week, which is being planned as a big event.

The Holstein sale was planned for May 25 and 26, which would be Friday and Saturday, at the State Fair grounds in Sacramento. Instead it will be held during the following week at the University Farm on days to be decided later.

Members of the board of directors of the company met in Sacramento last week and authorized the change of date. The change was welcomed.

President Frederick Kiesel of the California Holstein Breeders' association has named the advisory committee to prepare by-laws for the rejuvenated association and met in Sacramento last week with the members of the body. The committee is composed of W. J. Taylor of Santa Anita Rancho at Santa Anita; Gion Gibson of the J. S. Gibson company, Williams; A. R. Magruder of Ripon; A. W. Morris of Woodland; Frank Helm of Fresno; James M. Henderson, Jr., of Sacramento, and Owen Duffy, manager of the Napa state hospital, Napa.

Tuberculosis Rare in Small Dairy Herds.

Large dairy herds have more cattle infected with tuberculosis than small dairy herds, according to Dr. Chas. Keane, State Veterinarian. Out of 503 herds containing ten or fewer animals, 430 herds were found entirely free from tuberculosis, while out of 198 herds containing ten or more animals, but 51 herds were found free from the disease. These figures cover only the first three months of work under the new milk law, and the percentages of infected herds may change as the work advances, but it is certain that the small dairyman has little to worry him in the enforcement of the milk law. The State Board of Health, the State Dairy Bureau and the State Veterinarian share the responsibility for the enforcement of the law.

✤ ✤ ✤

Merced Is Assured County Farm Bureau.

That a county farm bureau and a county farm adviser for Merced are to be a reality before long is practically assured by the success that has rewarded the efforts to date of the Merced Chamber of Commerce. With the field but partially canvassed, 250 signatures of farm land owners desirous of having a farm adviser have been obtained already, which leaves but 120 of the required 370 names yet to be secured . Farm centers, which are the units in the farm bureau, have been organized in Merced, Stevinson, LeGrand, El Nido, and Winton, and signatures for membership in farm centers have been secured in abundance at Livingston and Amsterdam, where the centers are to be organized at once.

All the canvassing has been done to date on the east side of the county. Soon the work will be launched on the west side also.

Prof. V. C. Bryant of the department of agricultural extension of the University of California has supplemented very ably the work of the Chamber of Commerce in organizing the farm centers. He has given much time to the work of addressing rural meetings where centers have been formed and signatures obtained to membership cards in farm centers.

Col. L. M. Monsees, of Limestone Valley Farm, Smithton, Mo.

Col. L. M. Monsees, of Smithton, Pettis, county, Mo., is the Jack King of the world. Col. Monsees conducted his first public sale of jacks and jennets in 1881 and the total of his sale was $8,490. His 37th annual sale, conducted in March, 1916, totaled more than $90,000. He has the greatest herd of prize winning and producing jacks stock in America and his private sale business equals his annual public sales. He has sold more grand champion jacks than any other man in the country. He announces his 38th sale March 15, at Sedalia, Mo.

Swine breeders were advised to breed for utility first and for looks afterwards, by Prof. G. R. Samson of the Oregon agricultural college in an address on "Influence of Breeding on Profit" before the annual meeting of Oregon swine growers recently. The whole question of purebred breeding has hinged largely in the past on the appearance of the individual, he said. Consequently the success of the breeders in the show ring has been due to their getting their sows to farrow the first few days of March or September, rather than in getting their pigs up to market weight and condition and up to breed standard of excellence in a minimum time, and at a maximum profit.

✤ ✤ ✤

The Oregon Agricultural College has just completed a new hog barn and feed house that is probably the most modern to be found anywhere. Others are more elaborate, are better finished or more expensive, but none accomplish more in the way of providing comfortable and sanitary quarters for the pigs and in reducing the labor of feeding and handling. While this house was planned especially for the needs of the college, everything about the building is suitable for farm use.

✤ ✤ ✤

According to the annual estimate of the U. S. Department of Agriculture, the number of hogs in the United States Jan. 1, 1917, was 313,000 fewer than the number on Jan. 1, 1916. The average value of hogs per head was $11.73, against $8.40 on Jan. 1, 1916, an increase of 39.64 per cent, or $3.33 per head. While the total number of swine decreased for the year 313,000 head, the aggregate value increased $221,669,000.

✤ ✤ ✤

The Utah Agricultural College recently sent out a warning against "bull peddlers" to the cattlemen of the state, a warning that leading breeders of Utah say is fully justified by the quality of registered bulls that are being rushed into the state by unscrupulous speculators.

Cow Testing Association Report Shows Raising of the Standards.

The San Joaquin cow testing association has been reorganized under the able leadership of Carl J. Williams, who has been acting as assistant farm adviser in San Joaquin county. The coming year promises to be the most successful since its organization.

About 800 cows are on test at the present time with a promise of one or two more herds entering soon. The cream samples from two of the cream pooling associations are being tested as well. There is great rivalry among the different dairymen for individual honors, resulting in a gradual raising of standards. William F. Elder is the tester for the association.

Following are the five leading herds in milk production for the month of January, 1917:

No.	Owner.	No. of cows.	Average lbs. milk
1.	F. Kell, Stockton	9	808
2.	M. C. Gammon Estate, Lodi	27	803
3.	E. B. Goodwin, Ripon	51	785
4.	County Farm, French Camp	35	771
5.	H. Bailey, Lodi	37	749

Following are the five leading herds in butterfat production for the month of January, 1917:

N.	Owner.	No. of cows.	Average B. F.
1.	F. Kell, Stockton	9	32.1
2.	E. B. Goodwin, Ripon	51	31.7
3.	M. C. Gammon Estate, Lido	27	30.6
4.	H. Bailey, Lodi	37	29.4
5.	County Farm, French Camp	35	28.8

Pigs confined to small pens will not eat as much as will freely-running animals. That has been determined in a hundred instances. Moreover, their digestion will not be as good as if they were allowed to forage for some of their feed. Confinement to pens is only justified when finishing for fat. Exercise stimulates digestion and directly increases growth and the capacity to fatten up to the greatest extent.

THE FARM

Save the Trees.—Any fool can destroy trees. They cannot run away; and if they could, they would still be destroyed—chased and hunted down as long as fun or a dollar could be got out of their bark hides, branching horns, or magnificent backbones. Few that fell trees plant them; nor would planting avail much toward getting back anything like the noble primeval forests. During a man's life only saplings can be grown in the place of the old trees—tens of centuries old—that have been destroyed. It took more than three thousand years to make some of the trees in these Western woods—trees that are still standing in perfect strength and beauty, waving and singing in the mighty forests of the Sierra. Through all the wonderful eventful centuries since Christ's time—and long before that—God has cared for these trees, saved them from drouth, disease, avalanches, and a thousand straining, leveling tempests and floods; but He cannot save them from fools—only Uncle Sam can do that.—John Muir.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

¶ We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

AT THE 11th ANNUAL INDOOR TOURNAMENT of the INDOOR .22 CALIBRE RIFLE LEAGUE of the UNITED STATES, RECENTLY HELD IN PHILADELPHIA

WINCHESTER GUNS AND AMMUNITION

Again Demonstrated Their Reliability and Uniformity.

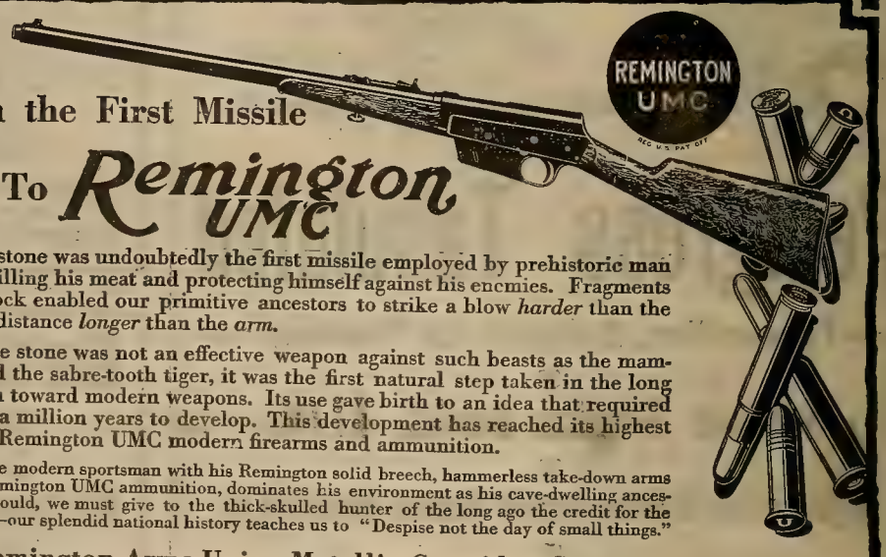
In the TWO SHOT MATCH, George W. Chesley, using Winchester Gun and Ammunition, won the prize, although it was necessary for him to make the possible (50) three times before he could defeat his nearest competitor, Mr. J. G. Schnerring, who also used Winchester cartridges.

In the 20 SHOT MATCH, shot from the prone position, W. H. Richard, shooting Winchester Gun and Ammunition, won the event with a score of 199. Mr. Raymond, shooting Winchester ammunition, was second with a score of 196.

In the 10 SHOT MATCH (shot prone), W. H. Richard (shooting Winchester), made three perfect scores. Mr. Raymond and Mr. Schnerring finished second and third, both using Winchester ammunition.

In the BULL'S EYE MATCH, the shooters of Winchester ammunition captured the first three prizes in the following order: Mr. Chesley, first prize; Mr. Schnerring, second; Mr. Richard, third.

The CONTINUOUS MATCH called for the best three targets to count for prizes. On the first three targets, Mr. Chesley and Dr. Hudson tied with three possibles (75). On the shoot-off Mr. Chesley won first place.



In all shooting events, superior accuracy and uniformity are absolutely necessary. The arms and ammunition that can be counted upon to invariably make good, bear the trade mark

WINCHESTER

Number 1 in a Series of Six Talks about the Evolution of Firearms and Ammunition

"Before Adam"—The Stone

From the First Missile To Remington UMC

THE stone was undoubtedly the first missile employed by prehistoric man in killing his meat and protecting himself against his enemies. Fragments of rock enabled our primitive ancestors to strike a blow *harder* than the *fist* at a distance *longer* than the *arm*.

While the stone was not an effective weapon against such beasts as the mammoth and the sabre-tooth tiger, it was the first natural step taken in the long evolution toward modern weapons. Its use gave birth to an idea that required possibly a million years to develop. This development has reached its highest mark in Remington UMC modern firearms and ammunition.

Though the modern sportsman with his Remington solid breech, hammerless take-down arms and his Remington UMC ammunition, dominates his environment as his cave-dwelling ancestor never could, we must give to the thick-skulled hunter of the long ago the credit for the beginning—our splendid national history teaches us to "Despise not the day of small things."

The Remington Arms Union Metallic Cartridge Company
Woolworth Building New York City

Parker Gun Records

MR HENRY PFIRRMANN, JR., with his 34-inch double barrel Parker made the
HIGHEST GENERAL OFFICIAL AMATEUR AVERAGE
on the Pacific Coast during 1916. He also won the
CHAMPIONSHIP OF CALIFORNIA
scoring 100 straight targets, and made the highest General Average at the Vernon Gun Club, July 2 to 4, 1916, scoring 493 out of 500 targets with the same gun.

PARKER GUNS

made the highest Official Averages in America in 1914 and 1915.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

VOLUME LXX. No. 8. SAN FRANCISCO, SATURDAY, FEBRUARY 24, 1917. Subscription—$3.00 Per Year

JOE PATCHEN 2:01¼.
The Most Popular Horse of His Day. Black Stallion, foaled 1889. Died Feb. 8, 1917.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¾, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 27625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

MARSE ABE
- Yankee
  - Hanover
    - Hindoo (Virgil, Florence)
    - Bourbon Belle (Bonnie Scotland, Ella D.)
  - Correction
    - Himyar (Alarm, Hira)
    - Mannie Gray (Enquirer, Lizzie G.)
- Halo
  - St. Blaise
    - Hermit (Newminster, Seclusion)
    - Fusee (Marsyas, Vesuvienne)
  - Ida K
    - King Alfonso (Phaeton, Capitola)
    - Lerna (Asteroid, Laura)

GEO. F. RYAN, Pleasanton, Cal.

DILLCARA 57462

Son of Sidney Dillon 23157 (sire of 9 in 2:10 list) and Guycara by Guy Wilkes 2867 (sire of 3 in 2:10 list), will make the season of 1917 at

PLEASANTON DRIVING PARK, PLEASANTON, CAL.

SERVICE FEE $50 TO INSURE

Dillcara is a full brother to Harold Dillon 39610, the leading sire of New Zealand. Last season the get of Harold Dillon won 41 races, totalling over $25,000.

AS THE BREEDING SEASON approaches, and the competition for business becomes more strenuous, it is up to the stallion owner and mare owners to get together. It is up to the owners of stallions to display their offerings in the most attractive manner; in much the same fashion as a jeweler displays his wares in the shop windows, with the approach of the holidays. The breeding season is the stallion owners 'opportunity . The results are directly proportional to the extent and intelligence of the preparation. The Breeder and Sportsman is the "show window" for the stallion owners of the West. The shoppers referred to as the "mare owners," are looking through this attractive "show window,' 'where in former years they have found the announcements of celebrated stallions; and the wise stallioneer will see to it that his stallion is here represented. It is unfair to a well bred horse to let him go through the breeding season not advertised. He may possess just the qualifications some mare owners desire; his breeding, his conformation, or his record probably are not known to as many mare owners as one believes. Unless a horse is kept constantly before the public he is soon forgotten. The most brilliant performers must be constantly kept in the SPOTLIGHT of they are to be remembered for their achievements. An announcement for the season—say, the price of one service fee—will put your horse before the interested public. Send that copy today.

THERE IS NOTHING that will attract so many people to a rural community as a monthly stock sale. In California, where public sales are as yet few and far between, only the big breeders and the pure bred breeders who are the members of some live organization have an opportunity to dispose of their stock in this successful manner. In Missouri, Kentucky and other states the monthly court day or stock sales day is an event of much importance. It is a means of bringing buyers and sellers together without extra expense to either. Have a certain day once a month and advise the owners of horses, cattle, sheep or swine to bring their sale offerings to town that day, is a suggestion to some of the commercial clubs in small towns of California. The sale should be advertised in all the county papers; and after it is fairly established it will advertise itself. It will draw stockmen from every nook and corner of adjoining counties as well as from the county in which it is conducted. Live stock is just like any other merchandise—it must be moved and change hands occasionally, or it is likely to become stale; a monthly sale offers the owner of a few head a market where he is sure to find a buyer. In fact, the sales will grow to such an extent and to such prosperous proportions that, in time, it will keep sellers busy getting stock together for the monthly sale. It will create an impetus toward better feeding and caretaking of the herds and it will bring splendid crowds and new money into the community.

THE unanimous endorsement of the Santa Rosa Chamber of Commerce was given to the District Fair bill, which has been introduced into the legislature and which will come up for passage when that body opens again the latter part of this month.

At the annual banquet Thursday night of last week Walter F. Price, who has long been a consistent booster for district fairs, introduced a resolution, which was unanimously passed. The resolution reads:

"Whereas, The holding of agricultural district fairs is recognized as the best and most successful manner for the development of the farmer, fruit grower, stock man, poultry raiser, the hop and wine producers, and incidentally benefiting and stimulating the mercantile and manufacturing industries in our cities; therefore, be it

"Resolved, by the Santa Rosa Chamber of Commerce in annual meeting assembled, That we heartily endorse proposed legislation establishing agricultural diserict fairs in the several districts of the State of California, and providing suitable appropriations to maintain the same, and we most earnestly urge our representatives in the legislature to work for the passage of an agricultural district fair bill and when passed we respectfully ask the governor to approve the same."

IN MOST of the important beef producing countries of the world, cattle raising is on the decline. This condition obtains in Argentine, Australia, Austria, the Danube countries, Canada, Germany, France, New Zealand and European Russia. The United States is the only important producing country where cattle are increasing to the per capita of population, says the Northwest Farmer. Information is not complete as to the effect of the present war on the number of cattle in Europe, but it is believed that in the past year tremendous reductions have occurred in the herds of the central empires and in the smaller states of Serbia, Roumania and Bulgaria, with probably the complete destruction of the cattle of the territory occupied by the Germans in Belgium and France. Great Britain has barely held her own since the war began. She ranks as one of the countries where the industry is in a stationary condition. Italy and Spain and the northern European countries all have fewer cattle than in 1914.

For these reasons it is likely that cattle soon will become so plentiful they will be cheap. Also another factor, besides reduced stocks in nearly all parts of the world, insures that. One of the effects of war is to raise the living standard of the individuals experiencing it. A good many million men in Europe are now eating meat as a regular thing, to whom meat before the war was a luxury. That habit will persist, for it is a lot easier to raise the living standard than it is to lower it. The warring nations of Europe will become meat eaters as the United States became a meat eater following the Civil War. That war is said to have done more to stimulate consumption of meat in the United States than anything else that ever happened and directly started the great boom in the cattle industry in the republic.

It is a certainty that this war has greatly reduced the number of cattle in the areas affected by it. It is true that in every important producing country, save one, cattle are either stationary in numbers, or actually on the decline. It is probable that meat consumption in Europe succeeding the war will be higher per capita than before. If these facts do not establish for the cattle industry some surety for continued prosperity, factors more potent than demand and supply are going to shape the values put on cattle in the future. At present, for no industry is the outlook more favorable than for the growing of beef. For it, the future, as it may be read from present conditions and the past, holds every factor that should make for prosperity for years to come.

CONCERNING CALIFORNIA FAIRS.

Breeder and Sportsman,
Pacific Bldg., San Francisco, Cal.

Dear Sirs: I notice in your issue of the 17th inst. that there is to be a meeting held at the Hotel Manx in this city, Saturday, the 24th inst., at 1 p. m., of persons interested in the promotion of district fairs for the year 1917. I am greatly interested, among other things, in seeing that there are a number of Horse Shows given. There is nothing more attractive nor a greater drawing card than such shows. Your Mr. Cauthorn will tell you that such shows are the greatest drawing feature of the Middle West States, and it is in the Middle West where fairs have reached their greatest perfection.

I trust there will be present at the meeting to be held Saturday a large number of representatives of fair associations and that they may be made to see the great value of these shows. They are growing more and more popular throughout the East as well as in the Middle West. So mote it be on the Pacific Slope. Yours truly,

E. A. BRIDGFORD.

San Francisco, February 21, 1917.

MISSOURI NOTES.

[By Rufus Jackson.]

The writer is enjoying some very fine tobacco of the homespun variety from the big plantation of Wilson Bros., of Cave City, Ky. The tobacco arrived with the compliments of our good friend Tom Wilson, the popular and efficient horseman who was never known to forget a friend or take an unfair advantage of an enemy. The tobacco is white burley and of the choicest quality. With our Missouri meerschaum settling at the proper angle and in a halo of smoke we are wishing every good thing for our thoughtful Kentucky friends. May the tribe of Wilson never grow less, is our heartfelt wish.

✤ ✤ ✤

The sympathy of the farmer-stockmen generally in this section is extended to Jack Harrison, whose big barn at his home three miles east of Auxvasse, Mo., burned last Monday afternoon, full of live stock, with a loss of approximately $20,000. Mr. Harrison was arranging to have a sale February 28. Friends of Jack Harrison will recall his gameness a few years ago, when experiencing a run of hard luck he refused to "duck' 'and paid himself out—every dollar. Many a man, with less nerve, would have taken advantage of the bankruptcy laws. The writer doesn't know how badly this loss hits Jack Harrison at this time, but he asserts Mr. Harrison will recoup his losses, by honorable means, and come out maintaining his position as one of the most substantial farmer-stockmen in Northeast Missouri.

Marshall Chief Back in Audrain

The superb saddle stallion Marshall Chief, formerly owned by "Jump" Cauthorn, now of San Francisco, at present the property of William Wallace of Philadelphia, will make the season at Hill View Farm, southeast of Mexico, Mo., under the handling of Ed. N. Hamilton, the well known breeder and developer. This will be good news to owners of mares in this section of Missouri. In Marshall Chief 2765 this country is afforded a saddle horse sire whose breeding alone is sufficient to satisfy the most exacting breeder. Marshall Chief's sensational show ring record is familiar to horse lovers all over the Middle West. He won the stallion class at the Missouri State Fair last year, "hands down," over a field that included some of the finest in the world. He won third in the big stake in Sedalia; third at the Mexico Fair, first at Montgomery and was in the money in all the other shows. Hans Berg, proprietor of the Central Riding Academy, Milwaukee, is manager of Marshall Chief this year. Mr. Berg is quite well known to the horsemen of this section and is recognized as a keen judge of the merits of a saddle horse. Ed. N. Hamilton said that he intends to give his entire attention to the handling of Marshall Chief during the breeding season. Mr. Hamilton has bred and developed some of the best saddle horses that ever went out of Audrain, including Thornton Potts, by Thornton Star, sold to Crews Bros., of Jacksonville, Ill., for $1250; Joe McDonald, sold to Col. C. C. Judy, of Tallula, Ill., and others. He also owns the great young saddle stallion, All McDonald, now under "Splint" Barnett's tutelage at Lee Bros.' stables in Mexico. All McDonald will make his start at the Commencement Horse Show at Columbia in May.

The seventh annual holiday number of the Saddle and Show Horse Chronicle, to be known in the future as the Show Horse Chronicle, has been received and it is even more attractive than the former numbers published by Herbert J. Krum. It is, mechanically, about the consummation of preservative art. The illustrations in color and in plates are a work of art and attractiveness, being clean cut and portraying the most noted show horses and horsemen in America. 200 pages of facts and figures include a complete list of the winnings and records of every show horse and stable in the United States. The statistics, which probably will be preserved by every interested reader ,alone are a work of genius and bespeak many weeks of painstaking efforts and hard work.

✤ ✤ ✤

Ruby and Bowers, noted horse dealers, who perhaps have sold more high priced draft stallions than any firm in California, are arranging to embark in the beef cattle business, handling pure bred Hereford and Shorthorns on as extensive a scale as has characterized their horse business. The new firm will operate from Davis, which is fast becoming one of the leading live stock centers of the West, due to the good herds established there in early days; the splendid climate, soil and shipping facilities, and the home of California's great experiment station. The firm last week purchased a fine Percheron stallion from Senator Rush, which has been one of the attractions at the Senator's good ranch near Suisun.

✤ ✤ ✤

One of the welcome callers at the Breeder and Sportsman office this week was L. L. Cannon, a leading stockman of Santa Rosa, and an old and valued friend of the Breeder and Sportsman. He reports conditions in Sonoma county as brilliant as has has always characterized that splendid section. Plenty of good feed with lots of high class stock to feed it to, makes Sonoma county one of the leading live stock and agricultural centers of the state. Mr. Cannon says they will have "prosperity galore" there this year.

AN ACT THAT SHOULD PASS.

Bill Introduced by Senator Slater of Sonoma County Forming Fifteen Agricultural Districts

Following is the text of the bill introduced in the California Legislature by Senator Herbert Slater of Sonoma county and which every farmer and live stock breeder should aid in having passed:

AN ACT

To Form Agricultural Districts, Providing for Boards of Directors for the Government Thereof, and for the Management and Control of the Same by the State, and Making an Appropriation Therefor, and Repealing All Acts and Portions of Acts in Conflict with This Act.

The People of the State of California do enact as follows:

Section 1. The several counties of this State are divided and classified into agricultural districts, and numbered as follows:

District No. 1—County of San Francisco (no appropriation requested).

District No. 2—Counties of Napa, Solano, Marin, Sonoma, Lake, Mendocino.

District No. 3—Counties of Humboldt, Trinity, and Del Norte.

District No. 4—Counties of Siskiyou, Shasta, Tehama, Glenn, Butte, Yuba, Sutter, Colusa, Yolo, Nevada, Placer, El Dorado.

District No. 5—Counties of Alameda, Contra Costa, Santa Clara, San Mateo.

District No. 6—Counties of Amador, Calaveras, San Joaquin, Tuolumne, Sacramento and Stanislaus.

District No. 7—County of Los Angeles (no appropriation requested).

District No. 8—Counties of Monterey, San Benito, Santa Cruz, San Luis Obispo, Santa Barbara, Ventura.

District No. 9—Counties of Kern, Tulare, Kings.

District No. 10—Counties of Fresno, Madera, Merced, Mariposa.

District No. 11—Counties of San Bernardino, Riverside, Orange.

District No. 12—County of San Diego.

District No. 13—County of Imperial.

District No. 14—Counties of Mono, Inyo and Alpine.

District No. 15—Counties of Modoc, Lassen, Plumas and Sierra.

Sec. 2. For the purpose of holding fairs, expositions or exhibitions of all of the industries and industrial enterprises, resources and products of every kind or nature of the district for which they are appointed, or of the state, with a view of improving, exploiting, encouraging and stimulating the same, there shall be a board of directors for each of such agricultural districts, consisting of one member from each county within the district, to be appointed by the governor of the State of California, but no district shall contain less than eight directors. In such districts as are composed of less than eight counties, one director at least shall be chosen from each county constituting the district. No person shall be appointed to the office of such director unless he is a citizen of the State of California and is actively engaged in agricultural, mining, manufacturing or stock raising pursuits within the district from which he may be appointed.

Sec. 3. The term of office of said directors shall be four years from and after the date of their appointment; provided, however, that within ten days after their appointment, the members of the first board of directors appointed under the provisions of this act shall so classify themselves, that two of them shall serve only one year, two of them two years, two of them three years, and two of them four years. All directors appointed under the provisions of this act shall qualify by taking the usual oath of office, as required by the constitution and any vacancy occurring in any such board of directors shall be refilled by the governor of said state, as hereinbefore provided for the appointment of the members thereof.

Sec. 4. Within thirty days after their appointment, the members of each said board of directors shall meet at a place within their respective districts and organize by the election of one of their number as president of the board, who shall hold office for the period of one year and until his successor is elected; they shall also elect a secretary and treasurer not of their number, who shall hold office at the pleasure of said board.

Sec. 5. Each board of directors appointed and organized under the provisions of this act shall be known as "California Agricultural Association No.——" (Inserting the number of the district for which such board was appointed), and by such name and style shall have perpetual succession, shall have power to contract, to sue and be sued, to have a seal, to purchase, to hold and to lease real estate and personal property and may sell, lease, beautify and dispose of the same, and do any and all acts and things necessary to carry out the objects and purposes for which said associations are formed, and the board of directors so appointed and qualified shall have the exclusive control and management of such institution for and in the name of the state, and shall have possession and care of all the property of the association, and shall fix and determine the salaries and duties of its secretary and treasurer. They shall have the power to make all necessary by-laws, rules and regulations for the government of the association and the management of its public, industrial and financial affairs. They must provide for an annual fair, exposition or exhibition by the association of all industries and products in the district or state at such time as they by majority vote may determine upon, and at the place in each of their districts, respectively, which may be selected, chosen or designated as hereinafter provided; provided, that the state shall in no event be liable for any premiums offered or awards made or on account of any contract made by any district board of agriculture or agricultural association; provided, further, that any such agricultural association having a speedway or race course upon any lands owned or leased by it under its control, shall maintain the same for the purpose of holding speed contests and training and speeding horses thereon. All moneys received or collected by said board for admission fees, or by ways of gifts or donations shall be under the sole control and possession of said board and shall be expended under its direction.

Sec. 6. The legislature shall, at each session hereafter provide in the general appropriation bill, or otherwise, for the maintenance and support of the agricultural districts created by this act.

Sec. 7. The fairs or exhibitions to be given by the district agricultural association shall be given at such place or places within such districts, as the board of directors of the said district may elect. But only one of such district fairs shall receive state aid in any district during any given year, and the money provided by the state as premium money shall be applied to exhibits at this one fair; provided, however, whenever the board of directors or two or more agricultural districts shall, by a majority vote of each board elect to unite, the several districts may associate and combine as one district, and hold a fair in any one of said districts that may be agreed on by the board of directors of said associations so combining ,and may for such purpose draw the appropriation for all the said districts and expend the same for said fair.

Sec. 8. Any sum appropriated by the state for aid to the district agricultural associations herein provided for and created or for any of them, shall be used exclusively for the payment of premiums upon bona fide exhibits of agricultural, horticultural, viticultural and mechanical products, or of manufactures, or mining or forestry products, and for the payment of premiums upon exhibits of domestic live stock, except as hereinafter provided in section thirteen of this act.

Sec. 9. The board of directors of the district agricultural associations hereby created, and each of such boards, in preparing their premium lists and in the offering of premiums for the annual fairs, exhibitions and expositions to be given by them as required hereby, shall classify the premiums to be offered for live stock exhibits in the same way as the same are offered and classified by the state board of agriculture in the same department, so that the classes for animals shall be uniform for the state fair, and each of the district agricultural association fairs, provided for herein; provided, that such uniformity need not extend to the amount of the premiums to be offered.

Sec. 10. No free passes shall be issued by the board of directors of the district agricultural associations herein provided for or by any of them, to the grounds of such associations during the fairs, exhibitions or expositions to be held by them, except the bona fide exhibitors and accredited newspaper correspondents, and all other persons shall be admitted thereto only upon paid admissions, to be uniformly and equally assessed.

Sec. 11. The sum of one hundred thousand dollars is hereby appropriated for the purposes of this act, fifty thousand dollars of said sum to be available during the sixty-sixth fiscal year and fifty thousand dollars thereof to be available during the sixty-seventh fiscal year and said total sum of one hundred thousand dollars to be apportioned annually as follows:

For aid to agricultural district number one (no appropriation requested).

For aid to agricultural district number two, five thousand five hundred dollars.

For aid to agricultural district number three, two thousand five hundred dollars.

For aid to agricultural district number four, four thousand dollars.

For aid to agricultural district number five, five thousand five hundred dollars.

For aid to agricultural district number six, five thousand five hundred dollars.

For aid to agricultural district number seven (no appropriation requested).

For aid to agricultural district number eight, four thousand dollars.

For aid to agricultural district number nine, four thousand dollars.

For aid to agricultural district number ten, five thousand five hundred dollars.

For aid to agricultural district number eleven, five thousand five hundred dollars.

For aid to agricultural district number twelve, three thousand dollars.

For aid to agricultural district number thirteen, two thousand dollars.

For aid to agricultural district number fourteen, one thousand five hundred dollars.

For aid to agricultural district number fifteen, one thousand five hundred dollars.

Sec. 13. Each board of directors herein provided for, together with the members hereof, shall serve without pay, but each board shall be allowed its reasonable expenses, including the traveling expenses of the members thereof; and for advertising, printing, salaries and general office expenses of the board of directors, secretary and treasurer; provided, that the total of such allowance for all purposes does not exceed twenty per cent of the annual appropriation to any one such board.

Sec. 14. All sums of money appropriated by the state for the support of the district agricultural associations herein provided for shall be paid to said associations and collected by them in the same manner in which sums now provided for the support of the state board of agriculture, or state agricultural society, are paid to and collected by it.

Sec. 15. All acts and parts of acts in conflict with this act are hereby repealed.

"Phenom" at Hanford Track.

Hanford, Feb. 17.—Some time ago I saw an account in the B. and S. of a fast Best Policy trotter at Pleasanton. We have here in Hanford a green trotter by the same sire that I think the best trotting prospect I ever saw, excepting none. This is a six-year-old gelding in Javob Brolliar's string. He was never tracked until this winter and yesterday (Feb. 16) he trotted a full mile on this half mile track at its very worst condition, in 2:17¼, and is surely able to trot in 2:14. He can rtot an eighth through the stretch in 14½ seconds. There does not live a trotter that is more abundantly blessed with every quality essential to a really great one than is this horse. He stands 15:3 hands, and will weigh 1050 pounds in track condition. He wears no boots, but speedy cut and scalpers and does not hit hard enough to leave a mark; 7-oz. bar shoe forward and 5-oz. behind, open bridle, plain bit and harness is all his equpiment. He does not pull, only enough to steady him, and he has never yet made a speed break in his work. This horse was bred by J. C. Snyder, breeder of Jonesa Basler 2:05¾. He is inbred to Allerton 2:09¼, his dam being by Milord, son of Albenard by Allerton, second dam a mare called Contrary by Stoneway 2:23¾ that is the dam of Amanda S. (a green pacer in Jake's string that is to be raced the coming season and has been a trial of 2:09 two years ago and only recently paced a quarter in 31 seconds); third dam Black Diamond, dam of Jonesa Basler 2:05¾.

Moody Leggett and Jake Brolliar are the only trainers here. Moody has three head, all pacers and very fast, which will be sighted for the California circuit. Jake has five head in all, two pacers and the trotter above mentioned, which he will head for the races when the run opens. Jake will ship to Pleasanton about April 1st, while Moody will likely go to Fresno.

The outlook for members of the California circuit is very encouraging down here and is already having its influence even here. The horses that are being worked are such as show fast enough to race. Never in the history of this track has there been as much extreme speed for the number of horses as can be shown at the present time. There are no less than six head that can show right around 30 seconds for a quarter of a mile, and it need not surprise anyone if something jumps out and equals the performance of Clara Mac 2:04½ of three years ago.

TONY SIMAS.

A Few Words From Hemet Stock Farm.

Fred E. Ward, general manager of the Hemet Stock Farm (incorporated), writes that the horses on that farm are all in fine shape. The colts, fillies and aged horses that raced last year have been running in paddocks all winter during the day time, and Ward commenced to jog them on the first of February. The colts have all grown well this winter, and there are about ten head of as nice ones as one ever saw on the farm. Louise Carter 2:24, dam of Wilbur Lou 2:10¼ and four more in the list, has a fine filly by Kinney de Lopez 2:23 that arrived February 11th. Louise Carter is the only mare that ever produced two yearling trotters to beat 2:20. They have been having fine weather at Hemet and everything in the valley gives promise of a good year. Mr. Ward is feeling fine again since his operation for appendicitis and says he is as well as ever. He had the sad misfortune to lose his mother on January 17th. She had lived to the good old age of 86 years. Since Mr. Whittier's death last month, Hemet Stock Farm is for sale. It is one of the best appointed breeding and training farms in the United States and there is no place where horses can be worked so many days in the year. Ward hopes we may have a good circuit in California this year as he would much rather race here than across the mountains, although he won over $13,000 on his campaign in the Middle West last year.

"The Story of Lee Axworthy 1:58¼" is the title of a handsomely illustrated and splendidly worded story that has been issued in pamphlet form by the Houghton Sulky Company of Marion, Ohio. Tom Gahagan of the Western Horseman, who saw Lee Axworthy in every race and performance against time he ever made except once, when he started in a three-year-old race, is the author of this story and it will interest any horseman who loves to read about a great horse.

FROM WASHINGTON TO CALIFORNIA.

C. A. Harrison Writes News and Gives Opinions That Are Worth Reading.

Items From Salinas.

Henry Helman has a nice lot of horses in his stable at the Salinas Race Track of which Mr. Helman is the lessee and manager. The big black free-legged pacing stallion Prince Zolock 2:04½ by Zolock is the star of the Helman stable. This big racer is owned by H. A. Gardner of Walla Walla, Wash., and is a reliable, game race horse. Mr. Gardner is also the owner of the nice green trotter Alma Jay by Alconda Jay. Mr. Helman thinks well of this mare and she is certainly a promising trotter.

Mack Fitzsimmons 2:07¾, the big chestnut pacer, is owned by Ben F. Jagger, a Portland, Oregon, business man. Big Mack is wintering well and when just right is a dangerous horse for anybody's pacer to fool with. Mr. Jagger is also owner of a good-looking green trotter named Warren Jay by Alconda Jay.

Ed Lyons, a Walla Walla wheat raiser, is the owner of a green trotting mare by Zolock. This mare has speed, size, and the benefit of a real race horse sire. Helman likes this lady.

Fred Aldrich of Walla Walla is the owner of a green trotter in the black mare sired by Bonnie McK., son of McKinney and Bonsaline by Stamboul. This black girl can trot fast.

James Dacres, the richest man in Walla Walla, owns a green trotter, a filly three years old sired by Blue Peter 2:16¾, the big son of Peter the Great and Kahlia Belle by Pilot Medium. Mr. Dacre's filly is out of Louisa Carter, full sister to John A. McKerron 2:04¾, and acts as if she will be as good as her royal breeding.

Bowman & Maurer, owners of Blue Peter, also own a three-year-old filly by him whose dam I could not locate, but the filly is a sure-enough classy young miss and has the correct trotting notion.

John Ankeney, the Walla Walla banker, is the owner of a beautiful brown two-year-old stallion, a fast trotter sired by Blue Peter. This is a good colt and I am glad of it, for Mr. Ankeney will be a good owner.

Hallie D. 2:08¼ is a pacing mare by Walter Direct out of a John Dilard dam. She is a fast mare and a real race mare, quite up to her speedy pedigree. She is owned in Salinas and is now eligible to the 2:14 classes.

Warren Dillon is a green pacer of the Sidney Dillon family. He is a nice horse and has the Sidney Dillon speed bug in his head; he is owned in Salinas, as is a grand-looking two-year-old colt by The Bondsman, a nice one. Keep an eye on this Bondsman; he will be heard from in 1917.

S. H. Cowell of Santa Cruz is the owner of a grand-looking brown colt sired by California's great race horse Jim Logan 2:01¾. This fast young pacer has a few blessings showered on him. One is his having been sired by Jim Logan 2:01¾; another is his good looks, and next comes the fact that he is owned by a good owner, a man who will be and who is able to have his horses trained. And next comes the fact that this young pacer is in the hands of a first class and successful trainer, namely, Henry Helman.

Paul 2:15¼ is a pacer sired by Kinney Lou 2:07¾, dam by Gen. Benton. Paul carries good looks, a good gait, is sound and sensible, and what he did in 1916 was not sensational for the reason that he was not himself nearly all last season; but Paul will show racegoers in 1917 that he does not belie his good race horse lineage. He is owned by P. Johnson of Salinas.

A Few Words About Walla Walla.

While making a hurried visit to Walla Walla I was informed that the fair and racing association were contemplating giving a first class fair and race meeting this year. This announcement will be joyful news to the many harness horse fans in Washington, Oregon, Idaho and many other places, as Walla Walla is one of the best racing places in the great North Pacific country, and the men behind the association are all men who pay 100 cents on the dollar of all their obligations. I hope these men will push aside the Wild West show game and again put Walla Walla where it rightfully belongs in the front as a harness and thoroughbred horse centre, for no city in the west is any better adapted or located to be a great fair and race meeting place than Walla Walla. Both the county and city are rich in material wealth, rolling in money, have good railroad facilities, plenty of good hotels, good street car service, good roads and as good a half mile track, stalls and general accommodations for the comfort of the audience as any city in the great northwest. I believe all Walla Walla has to do is to begin by having every business man in the city do the boosting act; every farmer, boy and girl should be made a booster; every minister, priest, lawyer, doctor, politician and newspaper man in the great country of Walla Walla should be engaged in working for a greater Walla Walla County Fair than was ever before held in that beautiful city.

There are quite a few horses being trained at the Walla Walla track. However, as I was rushed for time, the only man I saw was my friend William Hogoboom, and I was pleased to see genial Billy busy with a big stable of good horses. The good race horse Joe Buckley 2:11¼ by Bonnie McK. looks like ready money for his owner any time he is called on. Mr. Hogoboom has a number of nice young horses sired by Blue Peter 2:16¼ and the Blue Peter colts are certainly a grand looking lot. I find that my notes of the names and breeding of the horses in Mr. H.'s stable have either been lost or accidentally destroyed by me, so I will have to omit that portion of my story, and in conclusion will say that Billy Hogoboom is an active and successful harness horse trainer, and in looking over the list of men in the Northwest who have put horses in the 2:10 list, his name is well up in the front row. He is a good booster in season and out of season for the game he has given the best years of his life to, and he is also a real booster for his home town, Walla Walla, Washington.

Indian Hill Stock Farm.

Some weeks ago I sent you a story about Cavalier Gale, and thinking about this nice roan horse brought to my memory the recollections of a visit I made to the Indian Hill Stock Farm last fall at the request of, and accompanied by, John B. Stetson. I went out to this farm with Mr. Stetson who was buying the brood mare, Adiola Mack, the beautiful daughter of McKinney, for E. D. Gould. The Indian Hill Stock Farm is situated a quarter of a mile from the city limits and end of street car service at Salem, Oregon. It is the farm where the late Homer Davenport kept his beautiful Arabian horses and also kept a good son of Brown Hal.

Arriving at the farm we were told that Mr. Davidson, the owner, has just left for town. We were, however, well entertained by Mr. Davidson's ten-year-old son. This very bright and intelligent boy gave us the breeding and correct status of every mare and colt, cow and calf, on the Indian Hill Farm. And the way this boy explained the breeding and good points of his father's horses would really make many so-called horsemen and farmers ashamed of their lack of intelligent information on the general subject of horses and livestock.

The Indian Hill Stock Farm is a well equipped place with a fine barn filled with box stalls. I saw first class bike carts and first class harness, and when we began to look the horses over the first one we saw was a big and flashy looking three-year-old Bonaday filly out of Adiola Mack. Mr. Stetson knew a great deal about this filly and told me that she had with a very little training shown a great deal of speed. We then saw Adiola Mack. Both Mr. Stetson and myself were pleased with Adiola. So much so, that Mr. Stetson purchased her for E. D. Gould, and in doing so I think he purchased a mare that will go down in horse history as being a first class brood mare, as she is already the dam of the good young trotter Bonniola (3) 2:15¼, race record. Beside Bonniola was one of the most perfectly formed weanling colts that it has ever been my pleasure to see. This roan colt was sired by the good roan horse Cavalier Gale. After seeing this young scamp trot through the peach orchard I told Mr. Stetson that he might buy Adiola Mack, but I was going to buy her Cavalier colt. But in making my statement I had reckoned without my host, for when owner Davidson appeared on the scene and I asked him for a price on the roan weanling he very promptly said, "That colt is not for sale, at any price." And the way young Davidson stepped out in front of me and flashed an angry eye, I decided that he had something to say as to the welfare of the good looking roan colt. We were then shown a two-year-old from Adiola Mack sired by the great Hal B. This bay colt had all the good qualities of his dam blended with those of his great sire Hal B., so that there is no necessity for any further description. A big flashy bay three-year-old filly, sired by the good horse On Voyage, the son of Bon Voyage and Sarah S. 2:09½. In looking over this grand filly I could see the strong resemblance to her good and game trotting mother. For Sarah S. in her day was truly one of the greatest campaigning trotters ever trained or raced through the great western country, and the sire of this filly is a grand horse; many in Oregon can testify that he has at all times on hand plenty of speed of the two-minute variety. Unfortunately On Voyage is owned by a man who does not believe in advertising or the proper use of printers' ink.

The filly by On Voyage is out of a daughter of the great horse, Diablo 2:09¼. Mr. Davidson told me that it was his intention to have his young horses developed, commencing during 1917. I hope Mr. Davidson will see his way clear to develop the well-bred horses that he has on the Indian Hill Farm, for the reason I think Mr. Davidson will be a good owner. I am sure he has good horses and I know that they are worth little unless they are properly developed.

And I know of several other farmers in and around Salem, Oregon, who are the owners of well bred colts sired by the mighty Hal B., On Voyage, The Bondsman, Cavalier Gale, The Patchen Boy and many other first class horses. And it is up to the few trainers that are at present loafing around Oregon, to seek out the owners of these colts and do their best to induce the owners to have them trained during 1917. Also, to begin now with this campaign. And I strongly advise the owner, or owners, of every first class harness bred horse in Oregon, to either train their horses themselves, or give them to the best trainer they can find in their immediate vicinity, for there is not a farmer in the Willamette Valley but who is rich enough and can afford to have their colts trained and raced in 1917. I hope that the Oregon farmers who may read this article will take my advice and send their colts to a trainer, and in so doing they will also pay the trainer a satisfactory charge so that he can properly feed and care for their colts. And that the farmer owners will go to see their colts and see to it that the trainer is giving them honest care and intelligent training and it is up to the trainer to give their patrons, be they farmers, bankers, or store keepers ,an honest return for the money invested in their colts.

I believe if the trainers and owners of Oregon will follow out my plan the results will be very satisfactory to both the trainers and the owners. I furthermore believe that it is part of the business of every secretary and director in every county and state fair racing association to get a line on every owner of either a colt or an aged horse in their particular district. Let them do everything in their power to encourage the owners to have their colts trained and gotten ready for the 1917 races, for if the trainers, the secretaries and owners of race tracks, and the owners of harness horses do not get together and systematically promote and encourage the welfare of the harness horse sport, why, the sport must naturally die. And I, for one, want to see it kept alive. Therefore I believe that every well-wishing horseman should get busy, and keep busy, for inactivity and bad management will kill any business and any sport.

Yours truly,

C. A. HARRISON.

Trying to Avoid Conflicting Dates.

A meeting of representatives of the Kern County and Fresno County fair associations will probably be held at Fresno today to see if some action cannot be taken by which one or the other association will shift its date so that the two fairs will not be held during the same week. That both associations should have selected the same date is indeed unfortunate, and it will be still more unfortunate if the conference should end with both declining to accept a change of dates. Fresno gives the largest fair held in California outside the State Fair, and the Kern County Fair at Bakersfield is next in importance. In the natural order of things Fresno should follow the State Fair not later than one week, which would give San Joaquin county a week between the two if that county should decide to hold a fair at Stockton. After the Fresno fair Kings county should have a week as that county has held successful fairs for many years at Hanford, then the Kern county fair should follow with a week at Bakersfield. By holding these fairs in the order named exhibitors would have a succession of fairs at which to show their livestock and other products, at the least cost for transportation and other expense. This would not only benefit the exhibitors but would bring more exhibits and greater attendance to each and all these fairs. It will be a pity if the Fresno and Kern county associations cannot at least arrive at an agreement by which there will be no conflict of dates.

Fresno Fair Has New Directorate.

Increase in number of the board of directors from seven to seventeen and amendment of the by-laws so that a quorum from the executive committee can transact all business relating to the organization, were the principal items of business transacted by the stockholders of the Fresno County Agricultural Association which held its annual meeting last week. Directors for the ensuing year were also named. The executive committee will consist of seven members who are to be selected from the board of directors when they meet March 3d to organize. This committee was created at the above mentioned meeting. The association conducts the Fresno District Fair each year. Directors chosen for the new year are: George L. Warlow, J. E. Dickinson, H. E. Vogel, Al McNeil, W. A. Collins, S. E. Williamson, H. E. Patterson, Frank Helm, all of Fresno; J. A. Poytress, of Easton; Levi Garrett, of Kingsburg; M. Dineen, of Reedley; I. G. Maxson, of Sanger; George Hensley, of Clovis; H. K. Dickson, of Kerman; John C. Rorden, of Selma; Mrs. A. B. Armstrong, of Fowler; T. C. Robinson, of Raisin City.

A total of 9,225 shares of stock out of 18,000 shares was represented at this meeting. George L. Warlow acted as chairman, and C. G. Eberhart as secretary.

Great Western Circuit Allots Dates.

Chicago, Feb. 20.—At the annual meeting of the Great Western Trotting Association today F. J. Curtin, of Deorah, Iowa, was elected president, and W. H. Smollinger of Iron Mountain, Missouri, secretary. The racing dates were allotted as follows.

Peoria, Ill., week of August 6; Burlington, Iowa, week of August 13; Omaha, Neb., week of August 20; Des Moines, Iowa, week of August 27; Hamline, Minn., week of September 1; Milwaukee, Wis., week of Sept. 7; Peoria, Ill. (second week), week of Sept. 22; Sedalia, Mo., week of Sept. 24.

Tommy Murphy bought an eight months old colt by Moko this week for $5000. Of course the colt is well engaged in the big stakes, but when a colt less than a year old can be sold for $5000 it shows that prices on good colts with earning capacity are not going down, as no colt of that age has brought such a price for many years.

SADDLE and SHOW HORSES

Philadelphia has claimed April 12 to 14 for their annual indoor horse show.

✣ ✣ ✣

A new horse in the stable of O. J. Mooers, Columbia, Mo., is Troublesome Tommy, a runabout crack, and he will surely be troublesome for the good horses of this class with a few more shows under his belt.

✣ ✣ ✣

Daisy E., one of the best matrons on the Sierra Vista Farm, Chino, Cal., last week foaled a beautiful stud colt by Highland Squirrel King. The colts that have made their appearance at this farm this year are as fine a lot as have ever been foaled there, and Mr. English declares there will be some colt shows in California this year.

✣ ✣ ✣

Noble Rex, the attractive black stallion owned by D. Schilling of Aroya, Colo., won the class for registered saddle stallions at the Denver show, which was his first public appearance and was greatly admired for his beautiful conformation and good manners. Noble Rex is by Rex Hardwick, one of the best breeding sons of Rex McDonald.

✣ ✣ ✣

The Missouri horseman, O. J. Mooers, who has led the exhibitors of heavy harness horses a merry chase for several years, did not get his usual share of blues at the Denver Horse Show. His stable undoubtedly needs strengthening in most classes. His walk trot mare, Chloe Malone, is of the most desired Eastern type and with a little more manners and schooling will be a top notched.

✣ ✣ ✣

Willie McDonald, the five-gaited mare; Picadilly, the Hackney pony, and two polo ponies, recently shipped from Mexico, Mo., to Walter Hill, the popular Minnesota sportsman and son of the late Jas. J. Hill, empire builder, who with Mrs. Hill is spending the winter at Pasadena, have reached their destination and Mrs. Hill is now riding the mare through the parks and over the good mountain roads adjacent to Pasadena.

✣ ✣ ✣

D. Schilling, well known Chicago sportsman-horse lover and Colorado rancher, has sold the good three-year-old stallion, Mary's Artist, to J. A. Osner, a well known Denverite. This young stallion was second in the stallion class at Denver and won his three-year-old division. He was purchased by Mr. Schilling at the Longview Farm sale and is considered the making of a great show horse in the eyes of such an expert as John Hook, who has handled him up to this time.

✣ ✣ ✣

P. W. Ray, of Bowling Green, Ky., the developer of My Major Dare, Sun Flower and others, writes that he has the best stable of prospects for the good shows of 1917 he has banded together in many years.

✣ ✣ ✣

Peter M. Voggetzer, of Taylorville, Ill., the man who made Marshall Chief and other good ones, has twelve head of high class saddle horses in his stable. "Pete" has been working Young Rex McDonald, a horse that will soon be five years old, for P. J. Donnelly, of St. Louis, who, it is said, paid Hamilton Bros., of Mexico, Mo., $3,500 for him, unbroken. Mr. Donnelly visited the Taylorville training quarters recently and declared such satisfactory work had been done that he intended for Voggetzer to has his entire stable. The result of that decision is that the good bay mare Bohemian Actress, the young stallion Denmark Peavine, and others of Mr. Donnelly's stable are now in Taylorville. Tom Bass, of Mexico, had Bohemian Actress this year and was very successful with her; however, she will be best remembered as the sensational two-year-old Col. Press Ray, of Kentucky, showed through the Missouri and Kentucky circuit in 1915. Another horse at Taylorville of which there has been much speculation is Rex Reighley, a full brother to the once famous Joe McDonald. Peter declares, in a recent letter to the editor of the Breeder and Sportsman, that this horse has rounded to and made an extremely well proportioned, fine horse, with speed and action. He is also working two geldings by Marshall Chief that he is putting a lot of faith in, and several youngsters of promise.

SAN VICENTE RANCHO.

It is impossible to do justice to the saddle horses of San Vicente Rancho by picturing them in prosaic words and figures. Even the camera fails to bring out the fullness of the beauties being bred and educated there. Truly, we have to go to the uttermost parts of the earth to find all the good things, and one traveling out of Los Angeles into the picutresque Santa Monica Canyon would hardly expect to find one of the most celebrated families of saddle horses in existence there. However, the horses owned by Mrs. Adelaide Gillis McCormick are worthy of a place in the honor roll of all great stables, for here one sees what great things can be done in five short years toward the establishment of any good breed of live stock. Not only are the great horses selected by the owner of this farm for foundation stock up to creating amazement and inspiration in a horse lover, but the youngsters which have been foaled on San Vicente Rancho are, in my opinion, in the class with many establishments of fifty years' duration.

Starting in the saddle horse business was something of an accident for Mrs. McCormick, and yet, one of the things intended by the Master of things. Her father, R. C. Gillis, a prominent capitalist and land owner of California, went to Kentucky and selected a saddle horse for his personal use. Upon his arrival at Los Angeles his daughter immediately became infatuated with the horse and his type, and the first time she rode this good gelding—called Kentucky, in honor of the state of his nativity—she demonstrated that she could be just as much at home on a highly developed five-gaited horse as on the hill-climbing ponies and native cow horses of the West. So enthusiastic a reception was given Kentucky that the idea was immediately conceived to own and breed saddle horses the equal of those in Kentucky and Missouri.

Unlike the all too-common occurrence of one not well informed, Mr. Gillis selected real horses, stallions and mares that were not only good individuals, of superior breeding and education, but horses that possessed the qualifications to breed on, and the result is that they have at San Vicente Rancho highly finished saddle horses of their own breeding which would do credit to the breeders of many years' study. If every wealthy horse lover who determined to establish a breeding farm would "get off on the same foot" that R. C. Gillis did, there would be less dissatisfaction and every one would continue in the business. The thing that impresses me most is that they are breeding better horses than they bought to start with; a declaration that very few breeders can make after only five years in the business.

I should say the purchase of Undine, a proven brood mare by Chester Dare10, the peer of all brood mare sires, was the most fortunate event in the establishment of this stable; the fact that she was in foal to the illustrious Rex Peavine, making it doubly so. However good Undine has proven, the selection of Don Castano, to head the stud, was another important feature and evidence of good judgment. Being sired by Golden King, recently selected to head the stud at Powelton Farm, Newburgh, N. Y., and out of Indian Dream, a good producing daughter of Red Cloud, Don Castano possesses the blood which, combined with his splendid conformation, quality to do, level head splendid legs and feet, makes him all that is needed for a stallion to head a great stud and show stable. He has produced some of the most promising youngsters I have had the pleasure of looking at for some time, and there will come a day, when these youngsters have reached maturity, when California will boast of having one of the really great sires of saddle horses.

Realizing at the start that two stallions were needed in order that the produce of one could be profitably mated with the others, Mrs. McCormick purchased Highland Monarch, by Indian Rexie and out of Edith Lawrence, by Monarch. He, too, has proven a good sire and many of the best informed horsemen believe he is the equal if not the superior of Dan Castano in the stud. At the last state fair, colts of Highland Monarch, in many instances, defeated the entries by his stable companion, as well as those of many other good stallions.

The result of the mating of Undine with Rex Peavine was the four-year-old stallion, San Vicente. In San Vicente Mrs. McCormick, and the manager, L. S. Rollins, have pinned their faith, and so far it has been justified. San Vicente is a rich chestnut, possessing the most desirable qualifications for a "whiz" of a show horse. He has speed galore, action to spare, conformation and beauty of line from end to end. His back is short and made to carry, as a saddle horse is intended, rather than to draw; his under lines denote a big bread basket with room for feed and water, good lung power and wonderful constitution. His feet are the right size and shape and his legs, of flat and clean bone, are free from end to end of any unsoundness. With these qualifications he has a beautifully carried, unspoiled tail, and an abundance of air and charm that will attract the attention and admiration of horsemen anywhere. Barring accidents, and with the right kind of an education, which I believe he will get, San Vicente is destined to become one of the truly great show horses of the day. If he develops as I expect him to, his accomplishments probably will not be confined to the West, but he will be taken to Missouri and Kentucky where he will "show them" that the climate of California, with plenty of out-of-doors and feed, can play its part in the production of "better stock."

The first horse foaled on San Vicente Rancho was the mare, Rain Cloud, by Cloud King—Dolly Rex by Rex McDonald, which after being successfully shown for several years in junior events, has been retired to the matron ranks. Her retirement from the shows was not because of her not being qualified, for she is; but rather on account of her qualifications as a brood mare.

For the three-year-old division of the futurity, Mrs. McCormick has nominated Tamarack, by Highland Monarch—Undine, and while I did not get to see him work, Mr. Rollins assured me that he was all that he could hope for, and it is with a great deal of just confidence that they will see him go into the futurity stake at the California State Fair this year. They will show Santa Ynez, by Don Castano and Santa Monica, by Highland Monarch, in the two-year-old futurity, and if no other entries were made the show, between these two fillies, would be worth the money. They are receiving all possible care and attention, and when the bell taps they will be ready.

I saw yearlings, two-year-olds and three-year-olds of class and attractiveness; among them, as is always the case, one or two of outstanding class and that will be heard from as soon as they make their first public appearance.

With Undine, by Chester Dare 10; Rain Cloud, by Cloud King; Dona, by Golden King and Pasadena by Cecil Palmer, in the matron ranks; Don Castano and Highland Monarch at the head of their stud and several other great stallions in the state at their service; with Miss M. Freeman, one of the best informed and enthusiastic horse lovers I have ever seen directing the policy of the establishment; Mrs. Frederick McCormick and her father, R. C. Gillis, interested as only true and born horse lovers can be and satisfied with every purchase they have made; and L. C. Rollins, one of the most capable horsemen and conscientious trainers in the country in charge, San Vicente Rancho, as a saddle horse nursery, is in its infancy and destined to become of nation-wide fame.

Mrs. Grace Maxwell, of Denver, has sold her high jumper, Shamrock, to Capt. Theo. Schultz, U. S. A., located at Fort Collins, Colo.

✣ ✣ ✣

The students of the Missouri College of Agriculture, Columbia, Mo., are being urged to conduct their annual Commencement Horse Show, this spring. This is one of the most successful horse shows in the country and attracts the leading exhibitors of the South and Middle West. The attendance is large and is drawn from every section of Missouri. In fact, it has been said that the Commencement Horse Show is the most attractive open air horse show in the United States.

SAN VICENTE

Notes and News

Homer Rutherford, who is at present at Pleasanton, expects to race through the California circuit his year.

✤ ✤ ✤

There are 445 horses catalogued for the Midwinter Horse Auction that will open in New York on Monday next.

✤ ✤ ✤

The number of horses in training is increasing weekly at every California track where harness horses are trained.

✤ ✤ ✤

The re-soiling of the Salinas track has made it one of the safest and fastest tracks in the State. Its record will be lowered this year.

✤ ✤ ✤

Charles Johnson, of Woodland, has a few youngsters in training by his horse Airlie Demonio 2:05½. Ed Parker is doing the training.

✤ ✤ ✤

We call the attention of all horsemen to the half-page advertisement headed "Winter Treatment" in this issue of the Breeder and Sportsman.

✤ ✤ ✤

The majority of the associations on the Grand Circuit are not taking kindly to the proposed "Battle Royal" and will not give a purse for such a race.

✤ ✤ ✤

The largest purses for the fastest class, if rigidly adhered to by every association giving race meetings, would remove a lot of objection to time allowances, and so forth.

✤ ✤ ✤

A. T. Jackson of Stockton has already bred several mares to his stallion Royal McKinney, sire of Peata J., etc., and anticipates a good season with the son of McKinney and Hattie Hero.

✤ ✤ ✤

The Midwinter Auction opens Monday next at Madison Square Garden, New York. The Walnut Hall Farm youngsters will probably furnish the leading feature of the sale.

✤ ✤ ✤

Ohio is a great state for the man who likes to race a trotter or pacer. There were no less than 115 harness race meetings held in the Buckeye State last year. New York held 92.

✤ ✤ ✤

Walnut Farm has given the name "Paicines" to a colt by San Francisco out of Belmo, dam of five in the list, by Moko. Paicines is the name of the Clarkness farm in San Benito county, California.

✤ ✤ ✤

The California Fair and Racing Association will meet at one p. m. today at the assembly room in the the Hotel Manx. All interested in fairs and a racing circuit are invited to attend.

✤ ✤ ✤

Don't forget about that payment of $10 due next Thursday on your three-year-old in the Pacific Breeders' Futurity. There is $2500 for the trotters and $1500 for the pacers in this stake this year.

✤ ✤ ✤

Jos. Huber, who trains a stable of good horses at Bozeman, Montana, will very likely be seen on the California circuit this year, although he will race at the meetings on the Montana circuit also.

✤ ✤ ✤

"Farmer" Bunch has a yearling by Royal McKinney, dam by Bronze McKinney, in his string at the Stockton track that is showing such remarkable speed for a baby trotter that everyone is talking about him.

✤ ✤ ✤

David M. Look, owner of Castleton Stud, Lexington, Kentucky, where Lee Axworthy 1:58¼ and Ottawah 2:03 are in the stud, is the newly elected president of the American Trotting Register Association, succeeding the late William Russell Allen.

✤ ✤ ✤

J. W. Linnehan, of South Weymouth, Mass., has announced that he will match his trotter M. L. J. 2:05¼ against any trotter owned in New England, over the South Weymouth half mile track, for $1000, best three in five, during the week of July 4.

✤ ✤ ✤

Dixon will probably give its regular May Day celebration this year at which several purses will be offered for harness races at half mile heats, best two in three. Dixon has been holding these gatherings for the past thirty years or more and there is always a crowd of several thousand people present to enjoy the sport.

✤ ✤ ✤

The Western Horseman of February 14th contained the following item of interest to all Californians who knew genial Dick Wilson when he was training horses at Pleasanton: "Dick Wilson, now engaged in farming near Jackson, Miss., is visiting his many horseman friends in Indiana. Dick reports the particular part of the South in which he lives as being rapidly forging ahead in an agricultural way and says there is no other place like it when digging money out of terra firma is concerned."

Bernice R. 2:07¼, one of the good trotters trained and raced by Charley Spencer, but now a broodmare on Mr. C. K. G. Billings' Curles Neck Farm in Virginia, dropped a bay colt by The Harvester 2:01 on February 6th.

✤ ✤ ✤

A horse distancing his entire field or any part of it, shall in the future receive the moneys that would have been awarded his competitors had they not finished behind the flag. This rule is now mandatory on all tracks that race under either American or National rules.

✤ ✤ ✤

Louis Titus, of Piedmont, California, owner of historic Stony Ford Farm, New York, which he purchased and stocked with trotting bred horses a few years ago, has sent all these horses to the Midwinter Auction at New York next week, making an absolute dispersal sale. Among them are the stallion Justo 2:08¼ and a number of fine broodmares and youngsters. Quite a number of these were purchased by Mr. Titus at the dispersal of the Woodland Stock Farm, California.

✤ ✤ ✤

The Sonoma Driving Club at Sonoma, California, elected officers last Wednesday evening with the following result: Sam Lewis, president; E. T. Lindley, secretary; Joe Ryan, treasurer. At the conclusion of the business meeting a banquet was enjoyed by the members. There is a half mile track at Sonoma which is kept in shape during the entire year and matinees are held frequently during the spring and summer months. The club took steps to organize a circuit of matinee races with the Petaluma and Santa Rosa clubs and also decided to hold some races when the Sonoma High School holds an agricultural fair during the fall.

✤ ✤ ✤

K. Nagasawa, proprietor of the Fountain Grove Vineyards, Sonoma county, left for Japan on Wednesday of this week on the steamer Korea. On March 20th, the eight Arabian stallions recently purchased by him from the Hingham Stock Farm, Hingham, Mass., will be shipped to Japan. A number of thoroughbred mares purchased in this State for Mr. Nagasawa by Sam Norris, and now at the Fountain Grove farm, will not be shipped to Japan until fall as they are nearly all with foal or have young colts at foot. These horses are to be used to found a breeding farm in Korea where horses will be bred for the Japanese army.

✤ ✤ ✤

Several big appropriations are to be asked for the State Fair grounds at Sacramento by the State Board of Agriculture this year. An appropriation of $62,000 is asked for the purchase of 20 acres of land adjoining the fair grounds, which is said to be absolutely necessary for the space demands which are now more than the association can supply with satisfaction. The buildings planned and which the State will be asked to appropriate money for are a $300,000 pavilion to replace the one destroyed by fire, a $185,000 grand stand, a $75,000 educational building, a $45,000 addition to the machinery building, a $45,000 addition to the manufacturing building and a $100,000 coliseum.

✤ ✤ ✤

The California State Agricultural Society held a meeting this week and re-elected John M. Perry president, I. L. Borden treasurer, and Chas. W. Paine secretary. The board decided to offer Stanford-Occident Stake No. 3 and guarantee its value at $3,000, of which $1800 will be given the three-year-old trotters and $1200 the three-year-old pacers. The stake will be for the foals of mares covered in 1916, to trot or pace in 1920. The payments will be $2 to nominate mare April 1st, 1917, $3 July 1st, 1917, $5 December 1st, 1917, $5 on yearlings April 1st, 1918, $10 on two-year-olds April 1st, 1919, and $10 on three-year-olds April 1st, 1910. Starting payments will be $55 on trotters and $25 on pacers.

✤ ✤ ✤

This afternoon, at the Hotel Manx in this city, every person interested in the success of the recently organized California Fair and Racing Association should be present and take part in the completion of its organization. Secretary Joseph Waddell, who has visited fifteen or more towns since the initial meeting held a few weeks ago, will have a most interesting report to make and will be able to show that with a little further energetic effort one of the best circuits that California has ever had will be held this summer. A general invitation is extended to all persons interested in fairs and race meetings to attend. The meeting will be called to order at 1 p m.

✤ ✤ ✤

The eight months old colt for which Thos. W. Murphy, the leading reinsman, paid $5000 to A. K. Knight of Nicholasville, Kentucky, this week, is by Moko out of the greatest of all broodmares, Nervolo Belle, dam of Peter Volo (4) 2:02, Volga (3) 2:04½, Donna Volo 2:18¼ and Petress Volo 2:27¼. Movo is the name that has been given to this weanling trotter and those who have seen him say he is as promising as any of Nervolo Belle's foals were at the same age. Movo is by Moko, sire of Real Lady 2:04½, world's champion two-year-old trotter, and his dam Nervolo Belle is dam of Volga 2:04½, world's champion three-year-old filly, and Peter Volo (3) 2:03½, (4) 2:02, world's champion three and four-year-old colt.

Charley Spencer received five new additions to his string of horses at Santa Rosa last week. He says he received these horses because their owners have heard there is to be a good California circuit and they want to have some of the fun and get some of the money. There will be many more as soon as the purses are announced.

✤ ✤ ✤

Sir Albert S. 2:03¾, the pacer bred by the late William G. Layng, former editor of the Breeder and Sportsman, is now owned at Morrisville, Vermont, and was a starter in the ice races held at Montpelier February 10th. The races were one-quarter mile heats, best three in five, and Sir Alfred S., who is now more than twenty years old, evidently has some of his old-time speed, as while he did not win he was third three times in :31¼, :31 and :31¾. Montpelier has a fine straightaway course of a little over a quarter of a mile which is kept in shape for winter racing by the town authorities. Purses of $25 and $50 are hung up for these quarter-mile ice races, and the sport draws large crowds.

✤ ✤ ✤

Hemet Stock Farm advertises the services of the famous young stallion Wilbur Lou (3) 2:10¼ at $50 for the season of 1917, and will keep mares sent to his court at $60 a year. No stock farm anywhere ever kept its mares in better condition than this well known farm in Riverside county. Wilbur Lou was a great race colt himself and at six years of age is the sire of a world's champion yearling. Breeding and individuality of the very highest order are his, he was a world's champion himself as a yearling, an unbeaten stake winner at two and a State champion and three, and is now siring champions at six. Send your best bred producing mare to Wilbur Lou this year and get a colt or filly that is worth owning.

✤ ✤ ✤

It seems that Secretary Knight and Secretary Gocher do not agree in their construction of the new rules which govern winrace records and time allowances. Mr. Gocher holds that Hal B. Jr., that made his mile track winrace record of 2:02½ in 1913, and his half mile winrace of 2:05½ in 1916, is entitled to three seconds allowance on both mile and half mile tracks. In other words, he can race in the 2:06 class on mile tracks and the 2:08 on half mile tracks. Mr. Knight holds that 2:06 on a mile track is all right for a horse that made a record of 2:02½ in 1913 and has not lowered or equaled it since, but that he should get no allowance on a half mile track if he made a mark of 2:05¼ in 1916, but should be confined to the 2:06 and faster classes when raced on the twice-arounds in 1917. If these two opinions hold, horses will be raced in different classes on N. T. A. and A. T. A. tracks.

✤ ✤ ✤

Every person in California who is interested in the revival of district fairs should immediately write a personal letter to the senator and assemblyman from his district and request them to vote for Senate bill No. 349, a copy of which will be found on page 4 of the Breeder and Sportsman this week. Letters should also be addressed to the Governor and the State Board of Control requesting them to look with favor on this bill, which if passed will do as much to build up the resources of California as any measure that has been before the legislature in years. A big State Fair is being built up by state appropriation which is giving full value for every cent expended, and these district fairs, with only a total of $50,000 a year, divided between 13 districts, will do much toward improving the live stock, horticultural, agricultural and manufacturing interests of the State as well as each district where these fairs are held. District fairs are being encouraged by all the big farming and stock breeding states in the east and middle west, and California will be behind the times if it does not encourage these institutions. Write to your representative today and tell him you are in favor of this bill and willing to pay the almost infinitesimal amount of taxes on your property which will be required to carry out this measure if it becomes a law.

✤ ✤ ✤

Death of Joe Patchen 2:01¼.

Joe Patchen 2:01¼, probably one of the most popular horses ever raced in harness, died last Monday at Midfield Farm, near Goshen, New York, aged 28 years. He was sired by Patchen Wilkes, dam Josephine Young by Joe Young, and was bred by Charles Rathbone of Peabody, Kansas. This leaves John R. Gentry the only survivor of the Big Four (Star Pointer 1:59¼ and Robert J. 2:01½ being the other two) whose races filled the sporting pages of the daily press twenty years ago. Whether it was his attractive markings, he being a black horse with a white face and legs, or his do-or-die way of racing, that made him a popular idol, Joe Patchen never failed to get a round of applause from the grandstand when he came on the track, and more people cheered when he won than any other horse could arouse to a pitch of enthusiasm. In the stud Joe Patchen has been very successful, siring nine pacers in the 2:10 list, among them the world's champion Dan Patch 1:55¼, Joe Patchen II 2:03¼ and other noted winners. He also sired Fan Patch 2:09, a trotter, and was the sire of the dam of Belford Bell 2:06½, another trotter.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Capital City Coursing—George Heintz of Oakland and his string of choice hounds carried off all the honors at the coursing meet of the Capital City Coursing Club, held on Elliot's ranch at Franklin Sunday. Heintz's Oakland Beauty and Oakland Girl divided first and second honors in the championship event, and his Oakland Beauty won the 16-dog membership stake.

In spite of the threatening weather a large number of coursing fans journeyed to Elliot's ranch. The recent rain put the field in good shape.

In the first tie in the championship event, Oakland Girl beat Napa Jack, Young Royal Gold beat Verlie N., Oakland Beau beat Jem Long, and San Pablo Girl beat Pepper Kid.

In the second tie Oakland Girl beat Young Royal Gold and Oakland Beau beat San Pablo Girl. Inas much as it was up to Heintz's two dogs to settle it for first and second places ,the final dash was not run off.

In the first tie in the membership stake Blue Bird beat Oakland Dandy, Blue Streak beat Billie Blue Ears, Young Gold Musk beat Mayhew Boy, Oakland Beauty beat Los Molinos, Country Boy beat Pride of Richmond, Shamrock Kid beat Peppernut, Albert M. defaulted to Big Ben through non-appearance, and Little Pal defeated Yolo Girl.

In the second tie Blue Bird beat Blue Streak, Oakland Beauty defeated Young Gold Musk, Shamrock Kid won from Country Boy, and Big Ben beat Little Pal.

Oakland Beauty beat Blue Bird by default, and Big Ben beat Shramrock Kid in the third tie.

Big Ben withdrew from the final dash, giving Oakland Beauty first honors.

Twenty-Five Extinct Species.—Ithaca, N. Y.—More than twenty-five species of American birds and animals have become extinct within the memory of persons now alive, according to Louis Agassiz Fuertes, speaking before the Cornell Farmers' Week audience last week. Mr. Fuertes, who is widely known as a naturalist and as a painter of birds and mammals, showed the extent to which the extermination of wild life has gone, mainly through the wantonness of the American people.

Further, he pointed a warning finger toward those species which seem likel yto be the next to go, saying that the animals which live in the open are sure to pass out first, while those of the forests have a better chance to survive.

Among those he named as having been utterly destroyed during the past 75 years are the passenger pigeon, the last specimen of which recently died in the Cincinnati Zoological Museum; the great auk, the Labrador duck, the Carolina parakeet, the Eskimo curlew, a number of the macaks of the West Indies. Men now alive remember when the passenger pigeons literally darkened the skies in their annual migrations up and down the eastern states. The American buffalo, or bison, he regards as extinct in so far as its wild life is concerned¼ and he counts the prong-horned antelope as one of those plains inhabitants which is sure to go in the near future.

The extinction of the wood duck, he says, is seriously threatened. This is a tree-nesting species, and reputed to be the most beautiful of the many American species of wild duck. The woodcock also is in danger, with many other shore birds that once were plentiful, even the well-known kildeer plover, or kildee, being on the list of doubtful survivors.

To save the remnants of our wild life, Mr. Fuertes advocates widespread educational measures, the full support of the federal migratory bird law, the establishment of game and bird refuges, ano a wholehearted public opinion to back up the protective measures now upon the statute books.

Seattle Casters Meet.—With the largest meeting held since the club was organized, last week's assembly of the Seattle Fly and Bait Casting Club was of big interest to sportsmen. The new assembly hall of the Seattle Chamber of Commerce in the Arctic Club building was packed to the limit.

Lewis Treen, Jr., supervisor of the Snoqualmie National Forest, addressed the club on "The Forest Service and Its Relation to the Sportsman." Many points in Treen's talk were of special importance to the "out-of-doors" man. He stated that the service had constructed many trails through some of the best hunting and fishing districts, which had been marked withs igns giving directions and distances, that it had co-operated in the planting of fish and game and also that special sportsmen's maps had been placed for the service of the public. A series of these maps are in the making that will cover all the western part of the state.

Business of the evening appointed various committees for the work of the club during the coming season. Probably one of the most important of these is the tournament committee that will handle the events of the season, there being several special tournaments planned for this summer, among these being the Northwest fly and bait casting tournament.

Thesecond half of the evening was given over to the meeting of the united sportsmen's clubs in legislative questions.

Many questions of importance, together with an interesting talk by a noted sportsman, will be the feature of the next club meeting to be held in the Seattle Chamber of Commerce assembly hall Mar. 1.

BRITISH CONSERVING FOOD; KILL GAME.

Deer and Foxes May Be Exterminated to Save Crops They Eat.

The subject of deer and crops was discussed at a meeting of farmers in Glasgow recently. One speaker declared that the only effective method of exterminating deer would be by utilizing a regiment of soldiers, systematically beating up lands infested by deer, and have experts rifle shots stationed at the different passes. It was said that deer not only ate crops, but in winter and spring large quantities of feeding stuffs were transported on the Highland railways to feed the animals. Another point was that deer were developing their liking for cultivated crops to such an extent that ere long all cultivation would be put an end to in the highlands. We think that if an estimate were taken of the various herds and their owners notified that it was advisable to reduce numbers of deer by, say, one-half or three-fourths, it would be far better than wiping out all the animals at one fell swoop. If the plan we suggest were adopted, the meat could be disposed of to advantage, and it would not be difficult to kill the deer if they were enticed to feeding-places.

Having made an attack on the pheasants, it is now the turn of the foxes. An astute food-saver has made the following calculation. He says there are 240 packs of foxhounds in this country. "I calculate that there are 20 foxes to a pack of hounds—a moderate estimate. This will make 4,800 foxes. I am going to allow two rabbits and one hen to support him a week, and I shall not fatten him up very quickly. I will allow two rabbits, at 2 lb. each, and the hen, 3 lb., making a total of 7 pounds of meat a week. With 4,800 foxes we have the enormous weight of 33,600 pounds of meat every week. Now, for 52 weeks, 1,880,002 pounds, or nearly two million pounds of meat for the year—a most ridiculous thing." Continuing, these are the tons of barley meal, horseflesh, trotters, etc., eaten by the hounds, and thus depriving the people of a lot of good food. It must be admitted that fox-hunting is a luxury, and, in contrast to game, it consumes food without producing any. Probably the kennels will be occupied by pigs before long, and a reward put on the head of each fox.—[British Sportsman.

Tacoma Casters—Arrangements are being made for regular monthly meets between the Tacoma and Seattle bait and fly casting clubs. It is the plan to have these competitive events alternate with the home meets, placing the two at an interval of two weeks apart. Scores made at both home and outside meets will be kept to apply toward securing the efficiency medals provided by the club.

At the annual meeting of the Tacoma club held Feb. 12th officers were elected and medals for the last year awarded to H. J. Nason, 2d class in accuracy bait; to William J. Bailey and R. B. Nason, 3d class in accuracy bait, and to B. B. Perrow, 3d class in distance bait. Officers for the ensuing year were elected as follows: B. B. Perrow, president; Carl Coon, vice-president; Dr. Ralph Hutchinson, captain; W. L. Richards, secretary, and William J. Bailey, trustee for three years.

Game Wardens Dismissed.—North Yakima, Wash. Chief Deputy Game Warden R. B. Wales of Spokane has fulfilled his threat. He has summarily fired W. A. Bell, I. H. Dillis and James Henderson, members of the game commission of Yakima county, and, in accordance with the law, has asked the county commissioners to recommend persons suitable to be appointed by him as their successors. If the county commissioners fail within 10 days to make recommendations for game commissioners, the deputy game warden then has power to name commissioners of his own choosing.

Anticipating that the county commissioners may recommend the present game commissioners for reappointment, Wales has, in advance, advised them such action will not be recognized as complying with his request. The fight is over the retention of Frank Bryant as Yakima county game warden. Wales ordered Bryant transferred to Pend D'Orille county and when Bryant did not go his dismissal as county warden was directed. Yakima sportsmen have called a meeting for Saturday night to consider the situation.

COMMISSION REPORTS ON CONDITIONS.

Interesting Fish and Game Bulletinls Issued For the Sportsmen in California.

The California Fish and Game Commission has issued an interesting number of the quarterly bulletins. It contains many instructive articles and reports of the conditions during the past season. Some of the articles follow:

The only place where duck disease has appeared in the Lower San Joaquin Valley this fall (1916) is on a small lake, formed by the overflow from Bull's Slough, on the northern border of Kern county. The lake is located just north of the old Fowler House, a landmark of the country, and is about one mile wide and three and one-half miles long. On the banks along the border of the lake I estimated there were fifty dead ducks to every one hundred feet. When visiting this section on the 21st day of July, 1916, no birds were found. Apparently, therefore, the ducks began dying some time during August.—Tipton Mathews.

✤ ✤ ✤

Two dozen Gambel quail (Lophortyx gambeli), obtained from Mr. Kenneth Hayward of Thermal, Riverside county, were liberated on Mount Rubidoux, near Riverside, the last of September. The birds were obtained under permit from the Fish and Game Commission. The transplantation was made in the hope that these desert quail would increase and add interest to Mount Roubidoux. The birds will be carefully protected and fed regularly.—J. S. Logan.

✤ ✤ ✤

The coming few months are especially set aside as a closed season when no hunting is allowed. The most fundamental law of conservation is that animals must be protected during the breeding season. If the parents are killed at this time the young are left to starve. Animales during the breeding season become remarkably tame and the killing of them at this time is not sport but wanton murder. Do your share to protect all wild life on its breeding grounds and see that all your friends and neighbors do likewise.

✤ ✤ ✤

The following evidence bears on the food habits of the mountain lion. Evidently lions do not confine their attention wholly to deer.

On November 8, 1916, our shepherd dog treed a young California lion a short distance below our ranch, near Coulterville, Mariposa county, California. My father, on approaching the lion, which had taken refuge in a live oak tree, noted an odor of skunk. After the lion had been killed the stomach was found to contain a half-chewed skunk, a striped one, judging from the black and white hair found. The lion was only a small one, weighing in the neighborhood of thirty-five pounds.—Donald A. McLean.

✤ ✤ ✤

Forest officers reported 128 deer killed during the 1915 open season within the El Dorado National Forest, and five without the forest, or a total of 133 reported by forest officers who are deputy fish and game commissioners. This number does not equal the number killed during the open season of 1914, which is a strong argument that deer are decreasing in number, and there were many more hunters in the mountains this season than during 1914. A rapid increase in the number of hunters may be expected in the future for the reason that the automobile furnishes rapid transportation to and from the valley towns. It is recommended, therefore, that deer be further protected by allowing only one buck per man per season, and if in one or two years a slight increase in the number of deer is not seen, a closed season for at least three years should be enacted—E. L. Scott.

✤ ✤ ✤

Ducks arrived very early this season. Several canvasbacks were seen on San Pablo Bay August 20, 1916. Pintails were unusually abundant at this time of year, and a few bluebilles were also seen. Deputy Hoen reported to me that canvasbacks were seen on Tomales Bay during the latter part of August.—H. E. Foster.

✤ ✤ ✤

Mountain and valley quail are getting scarce, valley quail being found in large numbers only in the southern portion of the Stanislaus National Forest. This is probably due to the increased number of hunters who go into the forest each year, and to the use of modern firearms. Also it is a well known fact that hawks get away with a large number of birds, especially in the high country. It is believed here that the mountain quail law should open with that for valley quail, since in some districts the young birds are hardly able to fly on September 1st, when the present season opens.—E. D. Bach.

There were 175 shooters at Pinehurst and 143,000 targets were thrown. This is 50 more shooters than appeared in 1915 and nearly 20,000 more thrown targets. Good weather conditions in 1917 will make the tournament one to be remembered. It grows every year.

✤ ✤ ✤

The Connecticut State shoot will be held at Norwalk on May 25 and 26. Twelve clubs comprise the State association, which is one of the most progressive in the country.

TRAPSHOOTERS BECOMING PROFICIENT.

Nearly 4,000 Had Straight Runs of 50 or Better During 1916.

While in a way it is correct, the "increasing by leaps and bounds" phrase so often used, doesn't for a moment tell the story of the wonderful growth of trapshooting as a sport, nor of the quality of the shooters who have become affiliated with the King of Sports. There is quantity, but there is quality, too. There are more trapshooters, and better trapshooters, today than ever before.

Considerable attention has been paid to the statistics of the sport during the past two years, and these figures tell us many interesting things. They show that in 1915 the number of trapshooters who made straight runs between 50 and 75 targets were 2243; That the number that broke between 75 and 100 targets were 353, and that 195 made runs of more than 100. Contrast this to the performance in 1916 —3003 made runs that excelled 50 targets and failed of 75; 557 shooters are credited with runs between 75 and 100, and 284 made runs over 100, some of them exceeding 200. This shows the quality.

The longest run of the 1916 season was 283, and was made by Fred Plum of Atlantic City, N. J., at Maplewood, N. H., on July 4. In this run Plum had a run of 100 from 21 yards, which makes the performance all the more creditable. The only other amateur to break more than 200 targets in a straight run was R. D. Morgan, of Washington, D. C. He broke 233 at the Hogans' shoot in Atlantic City. Art Killam, of St. Louis, broke 252 straight at La Salle, Ill., and also smashed 379 out of 385 targets during the La Salle shoot. Walter Huff, of Macon, Ga., broke 244 straight at Birmingham, Ala., and pulverized 586 out of 600 targets in the four days' tourney.

Performances that stand out above all others during the 1916 season are the breaking of 100 targets from 23 yards at Springfield, Mo., by Charles Young, of Springfield, Ohio, and the five-man squad record of 497 out of 500 targets at Maplewood by C. H. Newcomb of Philadelphia, Ralph Spotts of New York, Arthur King of Toms River, N. J., the late A. B. Richardson of Dover, Del., and Fred Plum of Atlantic City. Plum and Spotts each smashed 100. The other three each missed one target. Classier performances will be hard to find.

Another way to fathom the quality that is now interested in trapshooting and to prove that trapshooters are becoming more proficient, is to look at the State championship performances. In 1914 two shooters went through with clean scores of 100. In 1915 three shooters made clean scores. In 1916 seven shooters totaled 100; eight others made 99, and eleven others broke 98. The winning of a State championship title takes considerable practice these days.—[Peter P. Carney, PPhila., Pa.

Tacoma Shooters Preparing.—Tacoma (Wash.)—Tacoma's army of trapshooters are anxiously awaiting the first call of the spring days when they can swab the oil out of their guns, which since the closing of the game season have been gathering dust in their cases, and journey out to the traps at Manitou and take another bust at the old tar-hawks. The prairies south of the city offer ideal grounds for the sport. At Manitou the club has a well equipped trapshooting plant and a background second to none in the country.

Ed Young, the popular railroad man, who was secretary of the club last season, will call the annual meeting later in the month. The time and place of the meeting have not been been decided, but at that time officials will be elected for the coming season and working plans laid out for the year. One change is almost certain to be made, that of shortening the regular program from 100 to 50 targets.

Some of those who are expected to answer the roll call are J. A. Dague, E. E. Young, A. Z. Smith, D. H. Bales, Fred Edwards, C. E. Werner, George Purdy, John McAleer, John Brady, E. W. Cooper, H. J. Scofield, F. L. Baker, L. S. Mellinger, V. V. Eisenbeis, Homer King, Carl Coon, A. A. Riehl, F. L. Griffin, Hugo Delin, Lee Railinger, Robert Berens, J. C. Jensen and others.

The first few tilts of the year are sure to be interesting, as final possession of the Majestic cafe trophy is still undecided. This is the big silver cup hung up last summer by Dave Bales, and before anyone can carry it home to be kept forever and a day he must win it in regular competition five times. J. A. Dague, one of the best handicap shots in the northwest, has four wins to his credit, but there are several of the members who have promised themselves that before the genial druggist can put this away in his cabinet with other trophies of the trap and field that he will know he has been through a shooting match.

A new ruling by the Interstate Association, the supreme power in the trapshooting world, allowing Sunday registered tournaments on the Pacific coast, is expected to result in making much greater and keener inter-city competition. With this end in view a league of six clubs throughout northern Washington has been proposed and is already being formed. The clubs of Blaine, Bellingham, Everett, the Green Lake and Harbor Island clubs of Seattle and the Tacoma Gun Club, will very likely comprise the circuit. The idea is to have regular monthly shoots at each club during the season and at all meets to have every club represented by a squad of at least five target smashers. Some fine exhibitions of wing shooting should be turned in on these occasions.

It is a good sport, the cleanest game on the calendar, and there will be a good turnout when the first squad lines up early in March.

Registered Tournaments—According to information received by the Breeder and Sportsman, clubs in California made application for dates for eight registered tournaments this year, not counting the Pacific Coast Handicap at San Jose, May 28, 29 and 30th, and the California-Nevada tourney.

The applications were filed before February 15th and the awards will be duly made by the Interstate Association. The clubs and the dates asked for are as follows:

Lindsay, April 15-17.
Fresno, April 27, 28, 29.
Golden Gate Club, Alameda, April 29.
Coalinga Club, May 6.
Vernon Club, May 13, 14, 15.
Alameda Elks Club, May 13.
Eureka Club, May 13.
Los Angeles Club, May 21, 22, 23.

Most of the events are being crowded into May, and it is possible that some of them will be shoved on until June or July. With the Coast Handicap in May and the California-Nevada the following month, the shooters will be kept on the jump.

Green Lake Club.—A large and enthusiastic crowd was out at the opening of the trapshooting season of the Green Lake Gun Club of Seattle, forty-three marksmen going through the regular program of fifty targets on February 11th.

R. S. Searle, George Scripture and Hi Follrich led the amateurs with fine scores of forty-nine out of fifty. L. H. Reid, as usual, topped the professionals with forty-nine breaks, I. M. Fisher coming a close second with forty-eight out of his fifty.

A large delegation from Harbor island helped swell the formal opening of the club for this year. J. H. Davis and C. F. Rinehard shot with the club for the first time and became members.

The twenty-gauge event of 25 targets, a new feature at the club, proved quite an attraction. I. M. Fisher, who originated the scheme, has donated to the club a suitable trophy, which will be awarded to the one making the highest score in twenty-five, at the end of the season.

A team shoot between L. H. Reid and George Scripture, and C. E. McKelvey and H. S. Gibson, to settle a contest for a dinner was won by Reid's team, 49 to 47.

Hi Follrich, who was one of the high men in the amateur class in the regular program, also outshot a special squad at doubles, breaking twenty-one out of twenty-four.

Regular shoots will be held from now on, at least until after the state tournament in May, each Sunday morning, promptly at 10 o'clock. The scores:

At 50 targets—R. S. Searle 49, L. H. Reid* 49, George Scripture 49, Hil Follrich 49, I. M. Fisher* 49, D. Rhodes* 48, A. Riehl 47, John Ruppe 47, Dr. King 47, R. W. Kinzer 46, C. E. McKelvey 46, D. R. Baker 45, C. B. Fitzgerald 45, E. K. Van Vleck 45, W. H. Carsten 45, C. W. Bandy 44, Matt Grossman 43, Hugh Fleming 43, D. Reid 42, S. Martin 42, Fred Landwehr 42, G. A. Conklin 42, A. W. Mathis 41, W. B. Taft 41, H. S. Gibson 41, L. S. Barnes 40, Dr. R. V. Mills 40, J. H. Hopkins 39, J. W. Geltz 39, W. B. Cook 38, Dr. A. B. Kidd 38, Dr. S. W. Case 37, Dr. S. W. Griffin 37, E. W. Eller 37, A. L. Hall 37, S. Bert 36, F. E. Bronson 36, Dr. J. F. Hill 36, George B. Baker 36, C. F. Rinehard 35, J. H. Davis 34, H. E. Gleason 33, E. Chantrel 33.

At 100 targets—L. H. Reid* 98, I. M. Fisher* 96, George Scripture 96, D. Rhodes* 96, John Ruppe 93, C. E. McKelvey 92, D. Reid 89, H. S. Gibson 89, Fred Landwehr 89, High Fleming 86, Matt Grossman 86, J. H. Hopkins 82, W. B. Taft 82, J. H. Davis 79.

Twenty-gauge event, 25 targets—I. M. Fisher 23, W. B. Cook 21, J. Trimmer 21, L. S. Barnes 20, G. A. Conklin 19, C. E. McKelvey 12.

Shoots on Sunday.—Probably the greatest revision in the rules of the Interstate Association for the Encouragement of Trapshooting made at the recent annual meeting was the one to permit the sanctioning of trapshooting tournaments on Sunday.

This change was made at the urgent solicitation of the trapshooters of those sections where the "blue laws" do not exist. In many of the States west of the Ohio River, Sunday is the big day for sporting events—and with the Interstate Association for many years refusing to register a tournament on the Sabbath hundreds of the Western trapshooters failed to appear in the official averages of the Interstate Association—said averages only carrying the names of the shooters who shoot at 2000 or more registered targets during the season.

Now this is all changed. The trapshots on the Pacific Coast seldom ever broke into the averages under the old rules of the Interstate Association, but under the new ruling they expect to break in in a very forceful manner. Many places where the gun clubs held club shoots registered tournaments will now be held, as trapshooters will come out for registered tournaments in the Western States on Sunday as thickly as their fellow-shooters in the East do on Saturday. The revision of this rule should go a great way in encouraging trapshooting in the cities and States.

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Share Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 nd a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Vernon Club.—Although a very cold wind blew over the Vernon Gun Club grounds Sunday, a large crowd was in attendance at the weekly shooting program. The wind did not prevent excellent scores from being made. J. F. Dodds and Bob Bole were the two contestants who had their breaking guns despite the wind. The two cracks smashed 57x60 in the trophy event. Following are the complete scores:

	Practice	Trophy
J. C. Famechon	50x60	52x60
C. W. Fish	38x40	53x60
Fred Grewell	56x65	55x60
S. A. Bruner	54x60	..x..
Edward Bohring	30x40	..x..
A. W. Bruner	38x40	..x..
William Pugh	37x40	53x60
J. F. Dodds	38x40	57x60
Keeney	..x..	40x60
J. Dierdoff	18x20	56x60
D. E. Llewellyn	36x40	53x60
Rucker	11x20	..x..
Jones	36x40	..x..
D. Payne	11x20	40x60
P. Payne	34x60	..x..
C. E. Groat	38x45	54x60
Mrs. C. E. Groat	19x20	56x60
Robert Bole	39x40	57x60
Moore	30x40	..x..
A. N. Van Nest	27x40	46x60

Los Angeles Club.—From the way the trapshooters turned out at the Los Angeles Gun Club Sunday it appeared as though the scatter gun artists rather fancy shooting on a cold bleak day. Fifty-eight shooters took part in the weekly shooting program.

W. A. Cornelius was the high man of the day in the prize shoot. He made a total of 95x100 smashes from the 19-yard mark. E. K. Mohler and R. E. Allen tied for second place with 94x100 smashes.

Probably the most sensational happening of the day was the shooting of Mrs. Pfirrmann. In the prize event the fair trapshooter smashed 91x100 targets. This is quite remarkable when the wind is taken into consideration. Mrs. Pfirrmann is the only feminine shooter who has won points on the Cline trophy.

Harry Cline managed to win two points in the shoot, so he is no wtied with Frank Mellus for the most points on the handsome Cline charm. Both have seven digits. W. A. Cornelius is a close third with six points. The shoot for the Cline prize will continue for four more weeks.

Heine Pfirrmann and Frank Mellus got a notion in their heads that they were better shots than any two professionals on the grounds. Ed Mitchell and Hugh Poston immediately took up the challenge and the four engaged in a friendly shoot. In the end the pros were the easy victors with 96x100 breaks to their credit, while their rivals smashed only 91x100.

During the day 5295 targets were thrown. Since February 2 there have been 25,185 thrown. Following are the scores of the day:

W. A. Cornelius 95, E. K. Mohler 94, R. E. Allen 94, F. H. Mellus 93, E. Mitchell 92, H. C. Cline 91, Mrs. Pfirrmann 91, L. J. Micka 90, H. E. Poston 89, F. H. Mellon 89, Lee Garnsey 89, Geo. Oliver 89, F. H .Hall 89, A. Pachmayr 88, L. J. Petit 88, H. Pfirrmann 88, E. C. Crossman 88, O. Council 87, Geo. Melford 86, R. H. Morse 86, L. M. Packard 86, P. E. Peterson 86, G. Holohan 85, H. E. Sargent 85, V. A. Rossbach 84, O. A. Evans 84, R. O. Pool 82, L. R. Mellus 81, Wm. Kennedy 81, S. E. Miller 81, C. S. White 80, R. Thornby 79, P. C. Carter 77, P. J. De Hetre 77, B. H. Carnahan 70, N. Bill 66, F. H. Teeple 68, G. L. Pulley 65, A. Hartmann 49, C. W. Fish 47, J. F. Dodds 47, T. B. Sloan 45, Seth Hart 44, J. H. Bishop Jr. 44, J. C. Collins 42, R. C. Hartmann 40, M. D. Towne 40, A. L. Rowe 40, F. Hartmann 35, F. G. Schreiver 35, Mrs. F. Mellon 33, J. H. Wearne 29, J. B. Joslyn 28, F. C. White 17, R. Chenoweth 176, W. Koerner 14.

Practice shooting—Mohler 99, Morse 95, Petit 92, Garnsey 87, Kennedy 87, Sargent 86, Famechon 85, H. Cline 72, Poston 74, Mitchell 72, G. Holohan 49, Pachmayr 49, Evans 48, H. Pfirrmann 48, Teeple 46, Mellus 24, Cornelius 24, Pool 24, Allen 23.

Sportsmen's Row

Clarence A. Haight made a trip up as far as Redding last week and found the boys all along the line enthusiastic over the coming season. The game looks to be in for a banner year.

✤ ✤ ✤

Eight registered tournaments for California so far and more clubs yet to be heard from.

✤ ✤ ✤

Since the inauguration of the long-run trophies by the duPont company, 1686 watch fobs, 4947 gold bars and 116 gold watches have been given to shooters. Eighty of these watches were won by amateurs and 36 by professionals. Art Killam, of St. Louis, with four watches, is the greatest winner.

✤ ✤ ✤

Bill Price has developed into a bug on wrestling. He almost passed up the opening shoot on Washington's Birthday to see Santell and Stecher on the mat. At that the traps got Eilly, for he is for his first love first, last and all the time.

✤ ✤ ✤

It is learned on good authority that there will be no dog shows held in England during the next twelve months. Private advices received here state that the British government has issued the order placing the ban on such exhibitions. This should mean a big influx of thoroughbreds into the United States if there are the requisite transportation facilities.

✤ ✤ ✤

A bill has been introduced in the Legislature of New York to compel owners of cats to license them at 85 cents a head. Why the cat, who makes the night hideous and who is a frequenter of the garbage cans, should go scot free while the dog is taxed is a mystery. Instead of putting a price on the head of a dog there is every reason why the prowling cat should be done away with on sight. For one stray dog there are probably a hundred stray cats, which are of no use to any one and whose chief vocation in life is to kill song birds and small animals that are of use to the farmer.

✤ ✤ ✤

Among the dogs who have been "doing their bit" in the war is Prince, a Newfoundland dog, who has been collecting $100 a month at Vancouver, B. C., for the Blue Cross fund. His master was called to the front at the beginning of hostilities, and immediately Prince donned the khaki, as it were. He attends the dances at the Empress Hotel Saturday afternoons and always comes away with a well filled box.

✤ ✤ ✤

Fred Plum, the Atlaltic City wizard, shot at 1300 targets at Pinehurst—650 from back handicap marks and 150 at doubles—and still averaged around the 90 mark, despite the rain, sleet and snow. He had one run of 67 from 20 and 22 yards.

✤ ✤ ✤

No one is allowed to carry a gun in Glacier National Park.

✤ ✤ ✤

Egg-gathering time has arrived for the Fish and Game Commission, and the first crews have been sent to streams where the trout spawn. Before the run is over—and it is very late this year—the gatherers will have taken millions of eggs. From these eggs, which are impregnated with the milt of the male as soon as taken, fry to replenish the creeks and lakes will be hatched. Men are now at work on the Klamath river, in Siskiyou county; at Scott creek, in Santa Cruz, and at the Snow Mountain station, on the Eel river.

✤ ✤ ✤

Frank and George Stall, wealthy mining men from Nevada, showed to good advantage. The former went forty-nine straight and had the misfortune to lose his last bird. George busted 48.

✤ ✤ ✤

Larry Middleton finished up in a blaze of glory, turning in 20 straight in the frame. Larry was happy as a kid and threw his hat high in the air.

✤ ✤ ✤

Manager Pete Ashcroft's new board walks to the traps was quite a stunt for the visitors and was highly complimented. The gang gathered on one section of it to have their pictures "tooked" and it sank a couple of feet. Guess Fred Willett, Toney Prior, George Thomas and several other heavyweights must have stood in the same spot.

✤ ✤ ✤

Bray Thorning was the moving spirit behind the improvements and is entitled to credit.

✤ ✤ ✤

Miss Gladys Reid was a visiting fair shooter from Portland. She made a pretty figure at the traps and showed that she knows how to handle a gun.

✤ ✤ ✤

Al Durney got back from the Honolulu trip O. K. and was banging the rocks in approved form.

✤ ✤ ✤

A side feature on the Alameda grounds was the wrestling match between Fred Willett and George Thomas. It was a draw—looked like a "frame-up."

✤ ✤ ✤

Clarence A. Haight, the veteran of the gathering, has a new gun. It is a sure peach for "Pop" has been going like a house a-fire this season. He snuffed out 4 8out of the 50.

Look at the way Bill Ellis is coming ahead. He missed only one, which is traveling some for a fellow just about to start his second year in the game.

✤ ✤ ✤

O. N. Ford was up from San Jose boosting the Pacific Coast Handicap in May. There will be a club shoot at San Jose tomorrow.

✤ ✤ ✤

Bids for the California-Nevada State tournament were put in by the Del Monte, Los Angeles and Vernon clubs. Secretary Clarence A. Haight submitted the applications to the directors and they will be duly acted upon within the next couple of days.

✤ ✤ ✤

A good one was put over on Henry R. Everding, the well known Portland trap enthusiast. Bill Stumpf, the German ball player with the Portland Coast League Club, had to take the steamer at Vancouver to sail with the team for Honolulu. Trouble loomed up in getting by the British officials with that German name so he up and signed to the effect that he was Henry R. Everding.

Fishing Prospects Bright.—Los Angeles, Cal.—With the time for heavy storms passing, and plenty of snow on the heights, there is at present the most pleasing prospect for a banner trout year that Southern Cailfornians have enjoyed in many a spring. Protracted spells of unseasonably warm weather may work mischief yet and so may heavy storms, but in the absence of these the flycaster bids fair to find himself most fortunate in 1917.

Every stream in the South is well stocked, thanks to the late opening which gave the gest spawning runs in history last year. These were augmented by the admixture of new blood in the hatchery output, heaviest plantings ever made being liberated in the San Bernardino and up-coast streams. With an average volume of rainfall and normal weather conditions, the water levels should be kept up to standard height, and fishing should start on May first on a fly-casting basis. It does not seem rash to forecast that 1917 is to be the year which puts the South upon the expert angler's map, both in lake and stream. Bear lake is so full of big and yearling trout that quite a few close observers expect them to take the fly this year, and add the cap-sheaf to the winderful attraction that pine-bordered body of mountain water now holds for the angler. This is wildest conjecture, but the trout in the lesser lake have been teased to the top for "feathers" and the right lure may yet work in the waters of Bear proper.

Surf fishermen along the seashore are an impatient lot and already have been plying their week-end art amid the exasperation of seeing thousands of corbina wallowing in the surf with scarcely a stray one to strike. What these wet-to-the-neck enthusiasts expect to do to them when they begin to take hold is only exceeded by their present inability to grease up the frying-pan.

Spring Shooting Prohibited.—Washington, D. C.—The United States Department of Agriculture has received inquiries from many sportsmen in the Middle West in regard to spring shooting of waterfowl. In response the Department has made the following public announcement:

"Under the Federal regulations there is a closed season from February 1 to September 6, inclusive, each year throughout the United States on waterfowl and other migratory game birds; the season for hunting is further restricted in various parts of the country to periods not exceeding three and one-half months. The open season on waterfowl in the States of Ohio, Indiana, Illinois, Iowa, Nebraska, Kansas, and Missouri is from September 16 to December 31, inclusive, and it is unlawful to hunt or kill waterfowl in those States at any other time. Persons committing violations of the regulations may be prosecuted at any time within three years after an offense is committed.

Telegraphic Trapshooting.—Spokane, Wn., Feb. 18. The Inland Empire Telegraphic trapshooting tournament, which will continue for eleven Sundays, began today, with twelve clubs in as many towns contesting. Kellog, Idaho, and Kalispell, Montana, turned in the high scores of the day, 117 out of a possible 125. The results of the first day's contest follow:

Spokane 115; Sunnyside, Wash., 97; Wallace, Idaho, 108; Plotlach, Idaho, 92; Kellogg, Idaho, 117; Pendleton, Ore., 112; Palouse, Wash., 116; Lewiston, Idaho, 111; Garfield, Wash., 111; Wenatchee, Wash., 105; Kalispell, Mont., 117; Pomeroy, Wash., 108.

In the contest of the individual trophy B. M. Hays of Spokane and T. Arland of Garfield, Wash., tied for the lead with a perfect score of 25.

Seattle Trap Officers—At the annual business meeting of the Seattle Trapshooters' Association the following officers were elected for the year: Dr. C. L. Templeton, president; R. S. Searle, vice-president; E. A. Fry, secretary, and Ralph Kinzer, treasurer.

A report of the past year's business given by the retiring secretary, W. B. Taft, showed the season's activities to be most successful and due credit was given the officers for their showing. Special programs will be held on the Harbor island grounds during the season.

AGAINST COMMERCIAL FISHERMEN.

F. M. Newbert Writes on Harm Being Done to Our Wild Trout.

By F. M. Newbert.

[President, Cal. Fish and Game Commission.]

Vandalism, nothing more, is market fishing for our wild trout. We have found the market fisherman snaring, snagging, fishing at night, and even using dynamite, destroying thousands of trout that they never recover, all for profit.

Think of having some of the most famous trout streams of our state dynamited for profit, but this is sure to happen if the sale is permitted. The handsome price of 35 cents a pound is some temptation. With our network of good roads and the automobile the market fisherman will have no trouble in getting his fish to market from heretofore inaccessible places.

The Fish and Game Commission have found the market fishermen snaring spawning trout off the spawning beds, plugging the vent so that the spawn would not run out. This cheating method was practiced so that the trout would reach the market looking nice and plump and would, as one fisherman expressed it, weigh much more and he would get 35 cents per pound for the spawn.

The Fish and Game Commission collected $33,500 in fines in the state in two years, yet the slaughter goes on every day. The commission confiscated nearly one-half ton of fish that were being illegally shipped from Lake Tahoe.

Last year eighty-seven trout market fishermen fished on Lake Tahoe, and the people have no assurance that 1087 market fishermen will not deplete the lake next year. Last year the eighty-seven market fishermen caught more trout in the month of June than all the tourists and people who have summer homes around the lake caught during the entire season.

The market fisherman will be found where lies the profit and he began his murderous work in Plumas county at the Big Meadows, Bear valley and many other places last year. No counties containing trout streams and lakes escape his murderous work. Nineteen seventeen marks the year that you will find the market fisherman in every nook of your great mountains, violating every law for profit. It is no fault of his, for his business demands it. So stop the business by the no-sale law, the last stand made by twenty-four states of our Union.

It will be lawful to buy in large quantities scientifically raised and domestically fed trout from California, Utah and Idaho trout farms, at a less price than the price of our wild trout. Remember, we are only trustees of our fish and game for the rising generation. Oregon, our sister state, has seen the light, so just fall in line and save one of California's greatest assets.

The angler's dollar made possible the building of the grandest modern trout hatchery in the world, the Mt. Whitney hatchery in Inyo county. It helps to maintain the sixteen hatcheries and egg-taking stations. It stocks the 157,000 miles of streams and lakes. Last year 17,688,000 trout were planted. Who for? For the man who enjoys his limousine, as well as the prospector who uses his pack animal; the farmer who uses his little old Ford, and the man and his family who still enjoy the old-fashioned camp wagon. To say nothing of the thousands of laborers of all kinds whose occupations take them to the mountains each year.

Portland Club.—Twenty-one nimrods were at Everding Park on Feb. 11th, practicing over the new cement traps. High gun in the regular event was James E. Reid, a professional, with 98 per cent, while the leading amateur was James W. Seavey, with 93 per cent.

A team race was held between a squad of six, captained by Peter J. Holohan and a squad led by J. P. Bull, both professionals. Mr. Holohan's sextet won with 126 out of a possible 150, while Bull and his teammates were good for 119. Henry R. Everding and Peter J. Holohan tied for first honors with 24 each out a possible 25.

A. Woelm had a poor day in trying to defend his right to the W. C. Bristol 20-gauge gun trophy, which is now being contested for by the 20-gaugers of Oregon. A. L. Zachrisson won the trophy.

Following are the scores in the regular event: J. E. Reid 98, J. P. Bull 96, J. W. Seavey 93, H. E. Dickerman 91, A. W. Strowger 90, Frank M. Templeton 90, A. L. Zachrisson 90, F. L. Loumans 88, P. J. Holohan 87, C. C. Kelly 82, Al Seguin 80, E. H. Keller 80, F. Sewall 80, Mrs. Ada Schilling 78, S. E. Bird 75, A. Woelm 72, A. G. Hawman 72, H. A. Pollock 70, Dr. H. E. Shoot 60, George Bertz 56, and W. J. Derthick 56.

The W. C. Bristol trophy contest: A. L. Zachrisson 22, Frank M. Templeton 19, C. C. Kelly 17, S. E. Bird 15, A. W. Strowger 15, James W. Seavey 15, George Bertz 14, A. Woelm 13, C. B. Handy 12, H. E. Dickerman 12, Henry R. Everding 12, Peter J. Holohan 11, E. H. Keller 12, A. G. Hawman 7, Al Seguin 7, W. J. Derthick 5.

Team race: P. J. Holohan (captain) 24, S. E. Bird 17, Mrs. Ada Schilling 21, H. E. Dickerman 22, Henry R. Everding 24, Dr. H. E. Shoot 18; total, 126 out of 150. James P. Bull (captain) 22, E. L. Youmans 12, F. Sewall 20, A. W. Strowger 18, James W. Seavey 23, James E. Reid 23; total, 119 out of 150.

NEW SYSTEM OF RATING DOG SHOWS

ıampionship Points Will Be Given According to Entries in Class.

The American Kennel Club's new scheme of rating, ıich will undoubtedly be adopted at the next meet-g, gives championship points according to the ıumber entered in each breed and not according to e total in a show. For instance, an exhibition here there are 1,000 dogs gives five points toward championship. Say there are 100 Boston terriers tered and one Italian greyhound. Both receive e same amount of points. Is this fair? A certain g won a championship and on his way to it he feated just one dog. There have been many cases these empty honors. Some fanciers argue that e new system is a bad one, for it will discourage e breeders of dogs that are not of great popularity om showing. They argue that if a man is game ough to take his dog to a show, going to the ouble and expense that is necessary, he should re-ive just as much as any one else. They argue that hen a man enters his dog he does not know hether there are going to be one or one hundred the classes against him.

This is all very true, but would it not be a good ing for a show superintendent to let an exhibitor ow just how many dogs were entered in the eed in which he was interested? At the last outhampton show an exhibitor came all the way om Philadelphia to find that there was no compe? on. This meant a trip of about four hundred iles, loss of time, hotel expenses and various inci-entals. Of course she got the points, but there was ttle fun in it.

Another argument by some of the old timers gainst the new system is that there might be only ne bloodhound, for instance, entered in a show, but s quality might be far better than any one of the ndred or more entered in the terrier classes or me of the other popular breeds.

Of course there will be a lot of discussion over the ling, especially among the fancy that favors the ss popular breeds, but a championship in the fu-re will mean far more than scurrying around to ery fly by night show for the simple purpose of ying to pick up a few points where the exhibitor ows there is going to be little or no competition.

The ratings for breeds as proposed by the Rules d License Committeess, and recommended by the ecial committee on revision of the rules are as llows:

DOGS COMPETING TO OBTAIN ABOVE RATING

Scale of Points—	1	2	3	4	5

SNOWY OWL INVADES CALIFORNIA.

Bird Appears Periodically in California; Was Here Twenty Years Ago.

It is a well known fact that the snowy owl (Nyctea nyctea) is of erratic occurrence in eastern states. It now appears that this bird occurs periodically in this state also. Just twenty years ago (1896) a number of snowy owls invaded the northern part of California. Specimens were taken as far south as Bay Farm Island, Alameda county (Cohen in Condor 3, p. 185), and Santa Cruz county (Thompson in Condor 3, p. 141).

During the same year snowy owls were reported as numerous in the state of Washington (Bowles in Osprey 1, p. 81). According to H. G. Smith (Nidologist 3, p. 76) snowy owls were taken in the state of Colorado in 1886.

The following additional data on the occurrence of the snowy owl in California in 1896 has been furnished by H. S. Prescott of Crescent City, Del Norte county:

Ely Charter of Crescent City, Del Norte county, secured two or more specimens in 1896. One of these was mounted and for many years was in the possession of Mr. Jeffrey, the keeper of the Crescent City lighthouse. H. J. Lattin, residing near Crcata, also saw a number of these birds in that year.

In November, 1916, a male specimen of a snowy owl, secured by Florence F. Williams on the ocean beach near the outlet of Talowa Lake, Del Norte county, was sent us by H. S. Prescott. A second specimen, a female, was secured by Mr. Prescott on November 25 between the north end of Lake Earl and the mouth of Smith River, Del Norte county. Along with this bird was a report to the effect that Ely Charter had seen nine snowy owls between Point St. George and the mouth of Talowa Lake. Two other specimens are noted as having been taken in the county in a newspaper item appearing in the Humboldt Times under date of November 23. Several applications for permits to hold birds in captivity have since been sent to the Fish and Game Commission by parties in the same vicinity who have secured snowy owls alive.

On November 18, through the kindness of George Neale of the Sacramento Division of the State Fish and Game Commission, we received another snowy owl, which was secured by Edward Bolt of Gridley, Butte county. The stomach of this bird contained parts of a mudhen.

The above is sufficient evidence to show that snowy owls have again made their appearance in California, probably for the first time since 1896. All three of the above specimens have found a place in the Museum of Vertebrate Zoology, where they will be of permanent value to the state.—H. C. Bryant, State Fish and Game Commission.

Highland (Utah) Club.—Weather conditions were favorable for trapshooting on February 11th, and as a result many good scores were made. C. A. Nelson, from the Highland Boy Gun Club of Bingham won honors at the traps by making a perfect score of 50.

Nelson did not carry off all the honors, however, as there were many others who made enviable scores. C. H. Reilley, Jr., won the club challenge trophy by completing a score of 50 straight. A. L. Cummings, representative of the Winchester company, performed in his usual style by breaking 50 out of 50.

Many new shooters were present at the traps, one of them being H. R. Smoot. Although it was Smoot's first trial at trapshooting, he shot very creditably, breaking 17 out of 25.

All of the members of the A. A. T. A. who were present won points on the medals. Many of the new members of the club have joined the A. A. T. A. and are exhibiting fine form in the race for the medals. Following are the scores:

Cummings (pro.) 50, C. A. Nelson 50, Reilley 50, Hood (pro.) 46, Palm 44, Bain 41, Heagren 41, Fisher 40, Anderson (pro.) 37, Nelson 30, Anderson 30, Smoot 28, Brown 26.

David Bales, well known sportsman, was elected president of the Tacoma Gun Club at their annual meeting last week. He is one of the live wires of the club and last summer offered a splendid silver trophy, which the club members are still competing for. Fred Edwards was elected vice-president and Al Riehl, secretary-treasurer.

LOCAL TRAP SEASON IS OPENED.

Eighty-Three Gunners Turn Out For the Golden Gate Club Merchandise Shoot.

The trapshooting season about the San Francisco Bay opened auspiciously on Washington's Birthday at the Alameda grounds of the Golden Gate Club. The day opened with threatening clouds but eighty-three shooters and their friends journeyed to the grounds and participated in the merchandise events.

Despite dark clouds overhead and a blowing wind, high scores were the order of the day. Frank Stall and Ted Handman knocked out 49 out of the 50-bird program and were high amateurs of the day. Bill Ellis showed that he has arrived after only a year in the game by topping a select field of professionals with a similar score.

A feature of the sport was the presence of three fair shooters in a race. Miss Gladys Reid of Portland carried of the laurels by breaking 44. Mrs. A. G. Wilkes was right there with 42, and Miss Meyers turned in 36.

After it was all over there was the drawing for prizes and everyone in the competition pulled down some useful and beautiful package to carry home. The initial shoot was run off in first-class style with no delays of any kind and a good time was in store for all. The complete scores were as follows:—

Events—	No. 1.	No. 2.	No. 3.	
Targets—	15	15	20	Total
Thomas, G. W.	13	11	13	37
Gearheart, A. N.	11	12	17	40

Record Berkshire Meeting and Sale

The Berkshire breeders of the West are setting a pace in Berkshire affairs that not only challenges the admiration of the breeders all over the country, but are showing enthusiasm and an activity that means a wonderful future for the breed in the West. At the annual meeting and sale of the Western Berkshire Congress, conducted February 13, 14 and 15, at the University Farm, Davis, California, the most representative lot of breeders that have ever attended a sale of this character in the West were in attendance, and the 44 head sold made the attractive and profitable average of $139.20 per head, or a total of $6,125.

The writer has attended pure bred stock sales in the cornbelt for many yea rs; sales that have made famous averages and created interest throughout the land. However, I have never attended a sale that was a better criterion of a successful organization, or that assured more for the future of the breed than this sale. There were many outsanding features of the sale, and most of all the friendly relations between the breeders was to me the secret of the success of the event. Every breeder was working for the success of the sale and for future sales, rather than for their individual herd. In many instances a combination sale proves disastrous, and when I see one make such a success I involuntarily take off my hat to the organization. The officers, too, declared it was the most successful sale they had ever conducted. It was a sale where the consignors made money; where the buyers will make a profit, and where the beginners will be encouraged to unknown possibilities and the breed at large grently benefited. No boosting prices, nor the usual swapping of high prices, like: "You pay $1,000 for mine and I'll pay $1,200 for yours," which has made disastrous inroads into the pure bred business, were made.

Many new and original features made this meeting and sale one that will be worth much to the future. The contest for students' judging, in which a gold watch and several trophies were offered for prizes, was one of those features, and it was the cause of every student taking an active interest in the meeting and sale. The most unusual contest ever conducted was the Woman's Judging Event, in which more than 40 women took part and 14 handsome silver trophies were awarded. This contest was in charge of L. E. Frost, sale manager, and he declared to the writer that he was never more surprised in his life than at the outcome of this contest. "They tied their ribbons and gave their reasons just as well as I could have done it," he said.

A business session was held Tuesday evening and officers were chosen for the ensuing year as follows: F. R. Steel, of Grants Pass, Ore., president, successor to W. F. Guilford of Willows; Arlington Smith of Visalia, secretary, succeeding Mr. Steel; Chas. M. Talmadge of Newport, Wash., vice-president. The president will appoint directors representative of the different states of the Pacific slope.

It was decided that henceforth the congress will meet twice annually. One time for show, the other the annual meet and sale. The next congress show will be at Salem, Ore., during the state fair, September 23d to October 2d inclusive. However, the next annual meeting will again be held at the University Farm, Davis. Another important matter of business considered was a recommendation or suggestion to the American Berkshire Association that it establish a "Register of Merit" for Berkshire hogs similar to the system used in dairy cattle associations. A committee was appointed to work out the proposition; Messrs. L. E. Frost of Chicago, editor of the Berkshire World; F. R. Steel, or Oregon, A. B. Humphrey, of Escalon, and Professor J. I. Thompson of the U. C. Farm at Davis.

Prof. G. H. True, head of the A. I. department, U. C. Farm, and A. J. Lovejoy of Illinois, suggested that the American association adopt an elimination pig system for the raising of the standard. Also a motion prevailed to the effect that the American association be asked to adopt rules for judging hogs.

Notes of the Meeting.

Col. W. H. Hord, on the block and L. E. Frost in the ring, made things lively during the sale, and they did not let up for one moment after starting the sale.

The good of giving trophies to the women was felt when many of the bigs came from the women visitors.

A. B. Humphreys, of Mayhews, Cal., owner of the Grand Champion boar, Grand Leader 2nd, had the honor of winning the sterling silver trophy offered by the American Association for the best sow consigned by exhibitor and then selling her for the top price in the sale, H. C. Moore of Indianapolis getting her at $500.

L. R. Smith, of Hawaii, was one of the best buyers of the sale. He bought some of the most promising offerings and got every one at a reasonable price. However, he did not get as many as he wanted.

The Sales.

No. 14. Escalon Fashion Princess, 224,400, consigned by A. B. Humphrey of Escalon. Sold to Harry Moore of Indianapolis, Ia., for $500.

No. 29. Penrith Belle 7th, sired by Laurel Champion, consigned by Charles M. Talmage of Newport, Wash. Sold to L. G. Smith for H. W. Rice of Makawao, Mauri, Hawaii, for $350.

No. 1. Peggy Queen 28th, 230,798, consigned Dean Beeman, Woodland. Sold to W. G. Wate house, Davis.

Brooding and green feed growing formed the su ject for discussion at the Santa Clara and San Mat Districts Poultry Association meeting.

✤ ✤ ✤

Denver had the greatest number of bulls on sa that were ever brought together, more than 4,0 head, mostly Herefords, being offered. Prices in t auction were high, but the private sale prices fe down by the end of the week, on account of the being such a large supply.

✤ ✤ ✤

The J. O. D. Ranch, of Aroya, Colo., has sold se eral head of Hereford cattle and Duroc hogs to wes ern ranchers this winter. This ranch makes a sp cialty of range bulls and herd headers. Their he is one of the best bred in the West. They have al produced several champion Durocs and annually fe out 3,000 head of this popular breed.

✤ ✤ ✤

The first item in the livestock notes of the Breed and Sportsman, issue of February 17, read: "Th first individual sale of Berkshires conducted in Ca ifornia was made by George M. York and Son, Modesto, January 20." This should have read "Th first individual sale of George M. York," as the have been a number of great Berkshire sales wit splendid averages conducted in California.

✤ ✤ ✤

Permanency of current hog prices is suggested b a sharp advance in values of American meats Liverpool. Production of pork in both England an Ireland has dropped to low ebb owing to scarcit of feed. Germany is taking the bulk of Danis product regardless of price, consequently England i dependent on the United States. Since January 1s the cost of American meats at Liverpool shows a average advance of 4 shillings per 112 pounds.

✤ ✤ ✤

Three royally bred Shorthorn heifers were pu chased by the University of California Farm, Davis, from Paicines Ranch Co., recently an together with two heifers recently presented th Farm by this ranch, are a valued improvement t the good herd now established at the farm. Th heifers presented, through the manager, D. J. Sto lery, are by Fond Lavender and Whitehall of Orang

✤ ✤ ✤

A. W. Foster, of San Francisco, owner of one o the valued Shorthorn herds in the West, has sen five heifers to the University Farm, Davis, to b mated with the premier herd bull, Sultan Mayflowe The object of Mr. Foster is to get some of thi grandly bred bull's blood into his herd. Sultan May flower is by Sultan's Stamp, by Whitehall Sultan, an his dam is an imported cow of Mayflower parentage He is a great looking bull with size, substance an every qualification for a good sire, which he ha proven to be.

✤ ✤ ✤

The yearling bull, Bertram Fairfax, purchase from Warren McCray of Kentland, Ind., last month by D. O. Lively for his California ranch, is by Mr McCray's King Fairfax, a son of the famous Perfec tion Fairfax, whose sons and daughters are raise exclusively for the Kentland herd, and is said by well-informed cattle men to be the best young bul in the McCray herd. Mr. Lively gave a big price fo him but when the quality, breeding and prospects ar considered, he is regarded as a bargain. More tha $174,000 has been realized by Mr. McCray from sale of the sons and daughters of Perfection Fairfax an he values those he now owns at $100,000.

✤ ✤ ✤

After a fight continuing many years the Swiss gov ernment has practically exterminated the foot-and mouth disease of cattle. For years the disease made inroads into the herds to such an extent that the Swiss agricultural interests suffered severely. Large numbers of cattle either perished or became so weakened by the malady that they lost their commercial value.

✤ ✤ ✤

With all present conditions confronting us, and the world looking to the United States for meat foods, it is hard to look for lower prices for hog products, and we feel as we have for a long time, that high prices have come to stay; at least, while foreign demand and present home conditions exist. Exporters are experiencing considerable trouble in getting space for shipments of meat abroad. One packer had arranged for five cars on a steamer and they cut his allowance down to one car. There is considerable hog meat in New York awaiting shipment abroad. The ocean rates have advanced to $3 per 100 on hog products, which is just double what it was previous to January 1.

Total packing of hogs since November 1 to date is estimated at 10,206,000, compared with 8,720,000 last year. The statement of stocks and provisions in Chicago at the close of business January 14 shows a very light stock of pork, and with the South soon to come to this market for ribs, we consider the stock of ribs not heavy. Also with a lot of lard ready to be shipped out on the Belgian border, we do not look upon the lard as very cumbersome.

—[National Live Stock Reporter.

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

¶We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

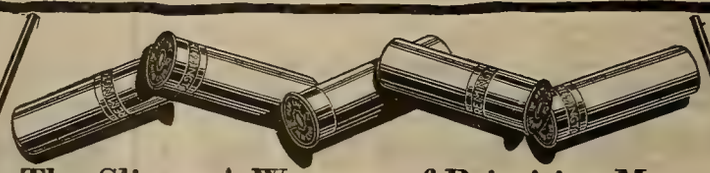
WINCHESTER

REPEATING RIFLES FOR HUNTING



When you see an animal like this silhouetted against the landscape, you like to feel sure that your equipment is equal to the occasion. It is, if it consists of a Winchester rifle and cartridges. You can bank on them just as surely as you can on receiving your tax bill. Their reputation was established years ago and has never failed. Winchester rifles are made in single shot, repeating and automatic models, of many sizes and calibers suitable for all kinds of shooting; and Winchester cartridges are made to fit all kinds and calibers of guns. Use Winchester rifles and cartridges

FOR A LONG, STRONG, STRAIGHT SHOT.

Number 2 in a Series of Six Talks about the Evolution of Firearms and Ammunition

The Sling

The Sling—A Weapon of Primitive Man

SOME primitive hunter, keener of mind than his fellows, found that he could hurl a stone with greater speed and accuracy with his skin girdle than with his hand. The sling was born. We find the sling or its modifications in use up to modern times. It was employed by the Assyrians, the Egyptians, the Israelites and even in the armies of Europe until a hundred years ago. It is used today by the Syrian shepherds upon their historic hills.

The sling represents the second stage in the evolution of modern firearms and ammunition. It is the link between the hand-thrown stone and the bow and arrow—very important because it gave prehistoric man the first differentiation *between* arms and ammunition.

For one hundred years the name Remington has been identified with arms manufacture. Eliphalet Remington welded the first Remington gun barrel in 1816. Since then, the Remington reputation has been growing with marked advancements from decade to decade. Remington UMC has become a general term, both for firearms and ammunition. Absolute accuracy and dependability characterize Remington UMC products.

VOLUME LXX. Number 9. SAN FRANCISCO, SATURDAY, MARCH 3, 1917. Subscription—$3.00 Per Year

EDITH CARTER 2:18¼ (by Kinney de Lopez 49954, dam Louise Carter), Champion yearling trotter of 1916. Owned by Hemet Stock Farm.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¾ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 53.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

AS SPRING APPROACHES, the minds of horse lovers, everywhere, are turning their thoughts toward the season of 1917. It will only be a few weeks before the first bell taps and the fleet footed harness horses will be getting the world. At this season the lovers of the sport are most interested in what their favorite driver will have out for the various classes. Every track in the West is now the scene of some memorable and interesting experiences. Some fast time is being made by the likely prospects; some awful battles are coming off between the trainers and colts; and, on rainy days, when the boys can not get out, instead of racing over some of last season's best battles, they are racing those that are to come. This is the news the readers of the Breeder and Sportsman are most interested in at this time, and the editor wants every trainer to send in a complete list of his 1917 stables, giving their records, breeding, engagements and other information that will acquaint readers with what you have. Every trainer, too, is interested in knowing what the other fellow has and what he expects from his stable, so start the ball rolling and fill the Breeder and Sportsman's harness horse department with good news of the game, while its really news. Send in your list today, as procrastination will bring about forgetfulness.

EASTERN BUYERS are reported to be making making their appearance in Missouri in search of good saddle horses, which, they declare, are harder to find than in many years. The cause of this scarcity in Missouri and Kentucky for the desired type, is that breeders, fearing the automobile had put the horse clear out of business, had not mated their mares as consistently as they should have, in many instances breeding a highly bred saddle mare to jacks; then, the unexpected demand that has come from the East in the last two years taking everything that was anything like what they wanted. Those breeders who stayed by the ship and continued to use good judgment, in mating their mares and taking proper care of the colts, have profited wonderfully and saddle horses, such as are now in demand are bringing higher prices than has ever been reported, and the breeders and dealers are unable to meet the demand. There is, however, an awful supply of the half-made kind, for which there is no market whatever, and the owners of this type are worse off than if they did not have a thing; they do not pay for their keeping and when sold do not bring half what it has cost to produce them. Breeding saddle horses in the future is going to be just as profitable as breeding hogs and cattle. It is up to the mare owner to select the horse that will, when crossed with his mare, produce a good, full-made horse that will give a man or woman a good ride: one that will be attractive, smart and have good sense. That is what the buyer of today demands.

THE THOROUGHBRED DEFENDED, by Wilf P. Pond of The Spur, New York, the leading magazine of its kind in America, will be of interest to all lovers of the Thoroughbred. Mr. Pond wrote the article expressly for the Breeder and Sportsman, and we call attention to it here because of the moral that goes with the story, "Why knock beer when drinking wine, both are good." Mr. Pond is one of the best known horsemen in America and has done as much for the progress of one breed as the other, but will not stand for mud slinging tactics.

ONE of the most important bills up before the senate of California is bill number 1002, providing for a large tent, with seats, etc., to be used by the State Fair for exhibitions of live stock, as a show pavilion. The shows of various live stock classes can be conducted in it during the day and horse shows and other mediums of entertainment in the evening. The most valued object of it, however, is providing for its being used by other fairs of the state when not in use at Sacramento. It would be an inexpensive way of providing a show pavilion for every district fair in California and would make the showing of live stock, horses and varied farm industries more interesting. Every fair association, stockman and horseman in California should use his influence in making this important bill go through. It is worth the appropriation to the state fair alone, however, the provision that it be at the disposal of other associations makes it more attractive and important.

AMBITIOUS PLANS for the California State Fair, designed to place the institution on a par with the far famed annual exhibitions of Minnesota and other states, were outlined recently in a statement by John M. Perry, president of the State Board of Agriculture.

"California should be ashamed of its present state fair," Perry said. "In its state university, its state farm and its capitol buildings the state has kept abreast of the times, but its state fair has lagged far behind smaller and poorer states. The state fair must grow."

A permanent building plan has been formulated by the directors, Perry said, providing for a 300,000 pavilion to replace the one destroyed by fire; a $185,000 grandstand, $75,000 educational building, $45,000 addition to the machinery buildings, $45,000 addition to the manufactures building, and a $100,000 coliseum.

The pavilion has been approved by the board of control and will probably pass this year. An appropriation is urgently needed, according to Perry, for the purchase of about twenty acres essential to fulfilling the space demands of the fair.

The directors are also working on a landscape gardening plan to beautify the fair grounds,, and may turf the infield of the race track as a polo field.

"A state fair is not a sectional activity," Perry declared. "Sacramento rightly possesses it as the capital of the state, but it embraces the whole state. A real state fair would send the lure of California over the whole land."

Missouri College Prepares Farm Building Plans.

The farmers of Missouri spend more than $20,000,000 each year on farm buildings. This expenditure justifies a great deal of time and proper planning and arranging of buildings. Too many farm buildings are erected without a thought as to the convenience or future needs.

The Missouri College of Agriculture has prepared plans for a number of farm buildings in response to inquiries received by the agricultural engineering department. Other plans are being prepared and the list which follows is growing. A list of these plans will be furnished to those who make application to the College of Agriculture at Columbia, Missouri.

The plans which are available are general barns, dairy barns, horse barns, and sheep barns, concrete block mold (home-made), cow manger and gutter, forms for concrete fence posts, machinery shed, concrete silos, concrete troughs, concrete round tanks, corn cribs, self-feeders for hogs, hog houses, concrete hitching blocks and posts, farm house, dipping vat for hogs, concrete floor and walk construction, concrete hog wallow, equipment for concrete construction.

These plans are furnished in the form of blue prints and contain all dimensions and necessary instructions for building. The lists of available plans include the numbers of the sheets and the prices, which range from 5 cents for the plans of smaller buildings to 20 cents for the barns and houses. The price in general is 5 cents a sheet. The house and barn plans, which cost 20 cents, comprise four sheets. These plans are furnished at cost.

Oscar Ryerson of Arcadia, Cal., has been employed by Henry T. Oxnard as manager of his Blue Ridge Stud, at Upperville, Va., a place made vacant by the recent death of W. Jardine. At Blue Ridge are King James, Sir Wilfred and Superman, together with a band of about sixty choicely bred mares, and Mr. Ryerson's years of experience on some of the most successful farms both in this country and Europe, render him well qualified for the place. Mr. Oxnard is to be congratulated in securing the services of such a competent man and a full measure of success may be expected at Blue Ridge under his management.

Stock Company Proposed by Horsemen

Overflowing with optimism, good-fellowship and the "do or die spirit" of the West, more than seventy men attended the meeting of the California Fair and Racing Association at the Manx Hotel in San Francisco, Saturday, February 24. Letters and wires stating their intentions, willingness to affiliate and assist in every way possible from at least 25 more persons, made a total of almost 100 "present." As is characteristic of every meeting of horsemen, a lot of valuable time was taken up by going over the same things several times and by unnecessary conversations and jollifications; however, when they finally got down to brass tacks, they certainly made things whiz; and though there was not a final schedule made as to the selection of dates for the entire circuit, as there were a number who were willing to move forward or back to satisfy the Association, nevertheless when the meeting adjourned at 4:00 p. m. the circuit was a certainty. More than ten good fairs and race meets coming in their geographical order were lined up, and a committee appointed to arrange for forming the association into a stock company with a $10,000 capital stock, to be subscribed by fair associations, horsemen and those interested in the sport. The committee appointed by President Cannon to draw up the plans for a permanent organization was: D. L. Hackett, Oakland; Elmo Montgomery ,Davis; and Joseph Waddell of San Francisco. Among the leaders of this organization were C. F. Silva, C. J. Berry, I. L. Borden, M. L. Woy and S. H. Cowell, who subscribed $500 each just as soon as the motion was made to form the company.

It is a certainty that the circuit will start in July and that Salinas will start the ball rolling. Another meeting will be called when the committee on permanent organization is ready to report, and it is expected that agreeable dates will have been selected and every fair that is coming in named at that time. Two of the best and most influential associations in the State, Fresno and Bakersfield, are still insisting on the first week in October; however, secretary Waddell this week received information which looks as though a conflict of dates between these places may be avoided.

The district fair bill which was published in last week's Breeder and Sportsman was endorsed by the association, and every man present consented to work for the passage of the measure, which provides for state aid to 15 district fairs.

The classification for the circuit was discussed thoroughly and this also will be definitely decided upon at the next meeting. Horsemen endorsed the motion of Mr. Silva to give the Free-For-Allers a chance and it is proposed to offer them a liberal purse for both pacers and trotters.

The three-heat plan with every heat a race was adopted by the members. There likely will be a 2:10, 2:12 and slow class trot, and a 2:07 or 2:08, 2:15 and slow class pace. The sizes of the purses will vary according to the size and financial ability of the community. It was also definitely decided that two good running events should close each day's program.

Phoenix, Arizona, is the logical place to wind up the circuit and every horseman present signified his intention to attend. "On to Phoenix" was every horseman's motto. The line-up of the circuit as proposed, including the doubtful ones, is as follows:

Salinas, San Jose (?), Pleasanton(?), Petaluma, Eureka, Ukiah, Santa Rosa, Dixon, Woodland, Marysville(?), Sacramento, Stockton, Hanford, Fresno, Bakersfield, Santa Maria, Ventura(?), Santa Ana(?) and Phoenix. There are several other associations in Southern California which Mr. Waddell has been unable to visit who have written him of their anxiety to come in, and the secretary declares there are more towns in Southern California who want in than there will be dates to offer them.

The catalogue for the 38th annual sale of Limestone Valley Farm, which will be conducted at the Missouri State Fair grounds, Sedalia, Mo., March 15th, has been received, and as one looks over the 50 pages illustrated with the superb offerings of Limestone Valley Farm's great jacks, one wonders how it is possible for an individual firm to produce and have ready for sale so many magnificent animals every year. The writer has attended the sales of Limestone Valley Farm ever since he was "knee high to a duck" and every year I have declared that the next year's sale would not compare with the present one; that it would be impossible for this man Monsees to have the 50 to 60 jacks and jennets of this class ready for his next year's sale and that the record sales established would naturally fall off; however, every sale has been a better one, and the catalogue this year assures one that this will be the banner sale of the Monsees tribe. The stock described in the catalogue is of greater class, of better age and if possible better breeding than any consignment yet made. The farmer or breeder looking for a jack or jennet to head a stud, start a foundation or secure the state's championship for him, and wanting to buy him at his own price, should arrange to attend this sale. The attractive catalogues will be mailed to any address upon request to L. M. Monsees & Sons, 321 South Ohio street, Sedalia, Mo.

Harness Horses and Horsemen

"Western Horseman" Praises Waddell.

The following letter to C. A. Harrison, from the Western Horseman, gives their opinion of Joseph Waddell, the secretary of the California Fair and Racing Association:

"Mr. C. A. Harrison,
Seattle, Washington.

Dear Mr. Harrison:

We thank you most cordially for sending us the clipping relative to Mr. Joseph Waddell.

It is a pleasure to have you send us this article, as it verifies all the good things that have been said about Mr. Waddell, and is in accord with our experience with him.

We think the California Fair and Racing Association is very fortunate indeed to get a man like Mr. Waddell to take hold of their association. We all have to admit that men of ability along these lines are scarce indeed, particularly those who will devote their time and best interests to a circuit.

We will be very glad to co-operate with him in every way to make this circuit a grand success, and we hope it will be the means of reviving the racing on the Pacific Coast to a large extent. Our only wish is that the other enthusiasts will back Mr. Waddell in his efforts.

Very truly yours,
THE WESTERN HORSEMAN CO.
FRED TERRY, Mgr."

A. B. Kinney, formerly associate trainer of the Woodland Stock Farm with C. A. Spencer, has sold his stallion True Kinney 2:12¼ to Paul Welt of The Dalles, Oregon. Mr. Kinney bought True Kinney at auction during the Oregon State Fair last fall from Frank A. Urban, a Seattle man. True Kinney is a son of Kinney Lou 2:07¾ and My Trueheart by Nearest, a son of Nutwood Wilkes, and is the sire of the young futurity winning colt El Paso (2) 2:18¼, owned by Mr. Roy Mayes, of Dixon, Salona county, California. True Kinney will be a public stallion at The Dalles, Oregon.

✤ ✤ ✤

At the meeting of the California Fair and Racing Association held last Saturday, and of which the membership is confined to harness horse men, it was decided to give purses for at least two running races daily at all tracks at which harness racing will be held during the summer of 1917.

FROM AUSTRALIA.

Editor Breeder and Sportsman:

The enclosed clipping from the Bendigo, Australia, Advertiser, gives an account of Adelaide Direct, by Directway by Direct, in which she lowered the Australian record. This is a coincidence in the fact that the world's champion Directum I and the Australian champion are both sons of Direct, not to mention Napoleon Direct, who shares with Directum I the honors of 1916. Directway 2:23 is the only son of "the little black devil" in Australia and has worthily kept his end for the honor of the distinguished family.

Yours very truly,
R. MATCHETT.

Bendigo, Australia, Jan. 30, '17.

A NEW MILE AUSTRALASIAN RECORD.

R. Matchett, the proprietor of the Adelaide Hill Stud Farm, as well as all other horse-loving sportsmen, is justly proud of the recent achievement of Adelaide Direct, a daughter of the farm's stallion, Directway, who has established himself in the front rank as a sire of extreme speed. Adelaide Direct is now the mile champion of Australasia, any sex, having on 30th December, 1916, at the Auckland Trotting Club's meeting, lowered the mile record to 2:06 2-5. In her record smashing mile she traveled the distance beautifully, without skip or break, and negotiated the third quarter at two-minute speed. She received a great ovation from the vast concouse, who cheered the new pacing queen, Adelaide Direct (2:06 2-5) as she returned to the saddling paddock. The club presented the owner with 100 sovs. for reducing the existing previous record. Her owner and friends fully expected she would accomplish her mission, as on the previous Monday she loitered a half mile in 1 min. 3-5 sec., which by the way was also a record for the track. Later on the same day Adelaide Direct came out for the 250 sov, 1¼ mile event, and starting from the back mark won easily by about 60 yards. Adelaide Direct is really a Bendigo production and reflects great credit on all connected with her. Mr. S. J. Lewis, the owner and breeder of her, lives at Baringhup, and is naturally a proud man. Directway has for some time been regarded as the greatest of our speed sires by quite a number of the best judges, and within the last few weeks his progeny have won in practically every State. Larry Direct won in Tasmania, Princess Direct in Sydney, Adelaide Direct in New Zealand, Allan Direct—Beeline and Little Hilton in Western Australia, and others in Victoria.—[The Bendigo, Australia, Advertiser.

Geers in the Battle Royal.

Ed Geers, the grand old man from Tennessee, has written the management of the Connecticut Fair Association that it can count on St. Frisco being entered in the Battle Royal Purse, and he is very much pleased to know that the association has decided to give such a race. In other words, he will be in Hartford at Charter Oak Park Labor Day to take the word in the new $5,000 event. This will, if the race fills, result in a magnificent struggle between Zombrect and St. Frisco, the fastest pair of racing stallions that have up to date been produced in California and Kentucky. Walter R. Cox, who has Mabel Trask and Mary Putney in his stable at present, also writes that he believes in the Battle Royal Purse, as the fast horses should have a chance to race for something. The owners of Volga have not as yet been heard from. She is a member of the Pastime Stable which has its winter quarters at Thomasville, Ga.

The automatic transfer clause for horses that acquire winraces of 2:04 to the Battle Royal Purse is causing considerable comment, regardless of the fact that a similar condition was in the Grand Circuit Rules until this season in connection with engagements of horses that forfeited their time allowances. It was inserted to protect associations from systematic "walk-overs" by horses that suddenly regained form or which trained on faster than anticipated. The condition was also introduced in the Battle Royal Purse to cover the same state of affairs as the present system of installment plan purses—a perpetual inducement for owners who can afford it to hold out a promising horse and train him to the highest state of perfection before starting. This may take one or two seasons while the owner of such a horse never fails to parade his "hold-over" as fast as possible, so that the public will have ample notice of what may be expected the following year. In fact, this became so common that several associations proposed abandoning early closing events, and several did, one of the most prominent being the Indiana State Fair.

It does not require a great stretch of imagination to recall the discussion that followed Direct Hal's successful trip down the line in pacing events, or what was said after R. T. C. performed a similar feat, while his stable companion, Charlie Mitchell, was practically idle and Balvasia was purchased to remove a dangerous competitor. Peter Scott was the next hold-over. He was purchased for $30,000 after he had won a heat in 2:05¼ to remove him from the path of Lassie McGregor. She broke down at Hartford, but nothwithstanding the fact that he had engagements all the way down the line, Peter Scott remained idle for the balance of the season.

During the Grand Circuit Stewards' meeting in Detroit, in 1915, an effort was made to have eligibility in early closing events fixed by the record instead of the winrace, in order to keep Peter Scott in the 2:06 class. Failing in that, members were requested to reduce the class for large purses to 2:08, and Peter Scott won all of them except his engagement at Detroit. They also remained in that notch last year, but now practically all of them have swung back to the 2:11 or 2:12, while the fast class has been cut to 2:07. There was a flurry in 1915 when Mabel Trask trotted in 2:04¼ and Peter Mack's owner drove him in 2:03½. One association went so far as to bar the latter. When the acid test was applied Peter Mac was missing while Geers dropped into line with St. Frisco and put up a magnificent series of contests with Mabel Trask. He is also coming back, and by opening the $5,000 Battle Royal Purse, the Connecticut Fair Association is giving the public another opportunity to see the "Old battler from Tennessee" and his greatest pupil in action against the best trotters in the world.

The automatic transfer clause in the Battle Royal Purse is fixed at a winrace of 2:04. It is a reality, not a theory, and but very few horses have ever been able to reach or cross that line. The returns for the past four years show that in 1913 Anvil and Dudie Archdale were the only horses that acquired winraces of 2:04 or better and both of them were made in specials. Etawah crossed the line in 1914 at Columbus when he won in 2:04¼. In 1915, Lee Axworthy acquired a winrace of 2:03¼ in a special race at North Randall but it was not a Grand Circuit engagement, while Peter Volo, whose mark as a futurity winner was so fast that he could not secure any engagements until he reached Lexington, where he won the Castleton Cup in 2:02½. In 1916, two horses crossed the 2:04 line. They were Mabel Trask and St. Frisco.

The limit of trotting speed has not been changed since 1912, when Uhlan trotted in 1:58, but the average rate of racing speed is rapidly drifting towards the two-minute point, so much so, in fact, that there are now more trotters in the 2:05 list than there were in the 2:10 list at the close of 1896, a period of twenty years. What the next twenty years will bring forth remains to be seen, but at the present rate of progress there should be a number of two-minute trotters at all of the mile track meetings, and possibly class events for them. Purses like the Battle Royal encourage the production and development of horses of the highest calibre. A series of them would, in a brief period, make it an object for an owner to have horses eligible to them instead of making a specialty of class races as they do at present, and the public will support such races as they represent the limit of achievement in light harness racing. North Randall has offered an event of this kind called a Jack Pot Purse, to which the association will add an amount equal to the entrance received. This is a starter in the right direction, although owners as a rule prefer to know in advance how much they can race for, and at Hartford the Battle Royal Purse is fixed at $5,000.

Fourteen Head With Hay Balers' Appetite.

[Henry Helman, the well known Salinas trainer, reports the following list of good horses in his table.]

Editor Breeder and Sportsman:

I enclose herewith the horses which I have in training for the coming season. It's an awful bunch to feed at the present prices of hay and grain, and they all have a hay baler's appetite, too.

Prince Zolock 2:07¼, by Zolock, dam Princess Direct; owned by H. A. Gardner, Walla Walla, Wn.

Alma Jay, green trotter, by Alconda Jay—Lady Mowry 2:09¼; owned by H. A. Gardner.

Mack Fitzsimmons 2:07¾, by Bob Fitzsimmons; owned by Ben F. Jaggar, Portland, Ore.

Warren Jay, green trotter, by Alconda Jay—Ada McKinney; owned by Ben F. Jaggar.

Patti P., green trotter, by Zolock, dam by Caution; owned by Ed Lyons, Walla Walla, Wash.

Mattie McK., green pacer, by Bonnie McK., dam by Lemont; owned by Fred Aldrich, Walla Walla, Wash.

Jessie Bidwell, three-year-old pacer, by Blue Peter, dam Lydia Carter; owned by Jas. Dacres, Walla Walla, Wash.

Bay filly, three-year-old trotter, by Blue Peter, dam Rebidan Dillon 2:12½; owned by Bowan & Co., Walla Walla, Wash.

Bay gelding, two-year-old trotter, by Blue Peter, dam by Antrim; owned by John Ankeny, Walla Walla, Wash.

Bay gelding, three-year-old pacer, by Jim Logan, dam by Dexter Prince; owned by S. H. Cowell, Santa Cruz, Cal.

Paul 2:15¼, p., by Kinney Lou, dam by Benton Boy; owned by Paul Johnson, San Juan, Cal.

Warren Dillon, green pacer, by Guy Dillon, dam by McKinney.

Hallie D. 2:08¼, p., by Walter Direct, dam Hallie Dillard.

Baron Mowry, two-year-old trotter, by The Bondsman—Lady Mowry. The last three owned in Salinas, Cal.

Respectfully yours,
Salinas, Cal. H. H. HELMAN.

Busy Days For Fred Chadbourne.

Among those well known horsemen of California who were in San Francisco for the meeting of the California Fair and Racing Association was Fred Chadbourne, of the well known firm of Sutherland and Chadbourne of Pleasanton. Mr. Chadbourne, who has owned and driven some of the best horses in the West, has 15 head at present, of which he has much to say. There are three or four he is particularly sweet on and he says there will be a few surprises when he hits the circuit. In addition to four head for I. L. Borden, of San Francisco, which are entered in the Breeders' stakes, two three-year-olds and two two-year-olds, Mr. Chadbourne is working the following:

Jake Logan, by Nearest McKinney, dam a daughter of Bert Logan, owned by H. G. Angevine of San Jose.

The Lie, a three-year-old pacer by Palite, owned by R. D. Mayes of Dixon.

El Paso, winner of the Breeders' two-year-old stake last year, by True Kinney, dam Ella J.

Donello, by Washington McKinney, owned by Dr. C. H. Sears of Bakersfield.

Howard's Comet, by Teddy Rey, owned by P. C. Howard of Alameda.

Verna McKinney 2:09¼, owned by R. D. Mayes of Dixon.

A. B. C. 2:07¼, by Young Monterey, owned by S. Comisto of Ferndale.

Baron C. McGregor 2:25, by The Bondsman, owned by J. J. Campbell of Pasadena.

Bon Ores, trotter, 2:10¼, by Bon Voyage, owned by J. J. Campbell of Pleasanton.

A three-year-old trotter by The Proof, dam Deviletta 2:10¼, owned by W. S. Harkey.

Zoetrix, the five-year-old by Zolock, dam Trix by Nutwood Wilkes.

That the breeding of trotting horses is not on the decline by comparison with other recent years would seem to be indicated by returns from the Kentucky Futurity for foals of 1916. The number of young trotters eligible to start is 803 as compared with 763 for the previous year's race. The nominations represent 274 breeders, among whom W. E. D. Stokes leads with eighty-one entries. This is more than three times as many as any other breeder except the L. V. Harkness estate, has entered. Among the eastern breeders having five or more entries are A. B. Coxe, of Paoli, Pa., with nineteen; David M. Look, of New York, with twelve; W. B. Dickerman, of Mamaroneck, with ten; Louis Titus, of Stony Ford, with nine; George W. Leavitt, of Boston, with eight; H. S. Crossman, of Goshen, with six; J. O. Winston, of Saugerties, with six, and H. N. Bain, of Poughkeepsie; A. H. Cosden, of Southold, L. I., and C. W. Lasell, of Whitinsville, Mass., with five each.

The Thoroughbred Defended

[By WILF. P. POND.]

When I read in the generally esteemed New York Herald, Sunday, February 18, that "The close relationship between the Kentucky saddle horse and the trotter has been recognized for many years," it was inevitable that, rather than use rough words myself, I should quote from Tennyson, "A lie that is all a lie may be dealt with outright, But a lie that is half a truth is a harder matter to fight."

The half truth rests on the fact which so few trotting horsemen are willing to admit even when they know—which few of them do—that the Standardbred trotting horse is really a trotting thoroughbred. No more, no less. Is it necessary at this late date to state that the foundation of the trotter was imported Messenger, a thoroughbred, and imported Bellfounder, a hackney, the latter being a "trotting thoroughbred" and nothing else; its nearest neighbor is the Morgan. Both are saturated with Arab blood and so, of course, is the thoroughbred. Granting that the modern American trotter is a manufactured animal—just as the modern St. Bernard is purely a manufactured type—the fact remains that there is the thoroughbred base and that little or no "cold" blood has been admitted to mar it since the days when Messenger sired Mambrino, he Abdallah, and he Hambletonian, and Bellfounder sired the Charles Kent mare, who, of course, was the sire of Hambletonian's dam.

As for the trotting blood in the Kentucky saddle horse, if one refers to about 1,000 animals in the Saddle Horse and Stud Book one finds the registered horses consisting of 3 per cent clean thoroughbred blood, fifty with 50%, two hundred and ninety-six with 25%, three hundred and forty-three with 12½%, one hundred and fifty-two with 6¼%, thirty-six with 3% and the rest unknown. This has been so since at least 1891. Further than this, Colonel I. B. Nall, one time secretary of the American Saddle Horse Breeders' Association, said: "We find today (about ten years ago) a trotting cross in the pedigree of many of the fashionably bred saddle horses. Sometimes it is well; sometimes it produces a coarseness altogether unsuitable to our purposes, as a saddler for the show ring must be handsome and stylish. Breeders have found out where these 'experiments' have proved disappointing and now get away from them."

To my mind this illustration of the half truth and the entire lack of truth is irrefutable, and it would seem that any unbiased man—alas! how rare is the type—must be convinced of the palpable fact laid before him.

Taken as it stands, just a bald statement, the ignorant error really would not amount to much if if it did not sedulously fan the fire of prejudice against the thoroughbred blood at its best. No one who knows anything of the thoroughbred would accept every specimen as perfect, or anything approaching that ideal state; but that is true also of the trotter, the hackney, the Arab and every other horse I have known.

Some one says "thoroughbred," and a number of biased or ill-informed individuals visualize a weedy, too much cut away, ill-tempered, high strung, blemished bag-o'-bones with "three legs and a swinger"; they never stop to visualize also some of the awful examples of "before and after taking" one can see at any trotting bred sale on earth.

No matter what the breed under consideration, there are several distinct types as when—to be perfectly impartial—one thinks of breeding to an Arab stallion and is confronted with the fact that the Maneghi Arabs have the thoroughbred characteristics, and the Kehilan Ajus, and other lines, have the automatic high action and the rounded, athletic type of the hackney. Those breeding from Arabs—and the number is steadily increasing in this country—carefully consider this point. When will the same breadth of view strike in upon the brain pan of those opposed to the thoroughbred, or—for that matter—any other breed than the one particularly fancied at present, to the exclusion of all others?

The fact that a thoroughbred foal is dropped in a trotter stable does not make it a distinct trotter type any more than if dropped in a Clyde stable it would be a Clyde. We have recently discovered—much to the surprise of many similarly minded people, that it's the same in humans. "You may break, you may shatter the race as you will, But the scent of the 'Hyphen' will cling to it still."

Although such anomalies as a Standardbred horse that can jump and run with hounds have been found at odd times it must not be overlooked that—totally apart from Mambrino, Abdallah and Hambletonian—there have been pure blood thoroughbreds that have not trotted so badly on the Circuit tracks. But when all is said and done the hunter that brings the money and delivers the goods is clean thoroughbred or near it, and the English people have stamped their approval of this type in no uncertain terms by stating in Parliament that the magnificent supply of hunting stock at the beginning of the war was an immense factor in the saving of the English lines in France.

Link that fact to the analysis of registered saddle horse blood given above and you come very near to the final and not to be dodged answer—when truth and fact are desired.

The thoroughbred at its best is the king of horses; when used in a cross, it inevitably improves everything it touches; as is ever the case when pure blood in horse, dog, cattle or birds is mated with the colder strains for obvious reasons. Who that ever knew the great Bend Or—who practically died snoodled in the arms of his faithful groom; who that saw the great Haggin stallions brought, one after another, into the sales ring, surrounded by strange crowds, direct from the harem to the arena, not one showing excitability, temper or anything but extreme affection for the man handling them [with countless other thousands of like cases], could imperatively cry down the type as "hot headed," "hot blooded," "unreliable" and "bad tempered"? The highly successful handler of the Haggin horses, by the way, had another hobby than his thoroughbreds; he was an ardent botanist and grower of flowers. Rather a curious conjunction—if one takes a vicious, anti-thoroughbred view.

Much of the trouble lies in not carefully selecting the thoroughbred stock to be bred from. Here in America we race our stock too much, too often and too long. They are kept at the top of condition, month after month, and natural secretions and developments are disregarded, so we have had to go continually to England and France for new stock to reinforce that which we should have bred ourselves. France, England and Germany know better than to do this thing. Their stock, the best of it, is lightly raced, carefully considered, and then bred from. If we did the same here there would be little ground for complaint.

Only a few years ago a certain Army man—an acknowledged capable veterinary, judge and master of the craft—was sent through Kentucky to unofficially report on what he saw. I will only mention one case. It was at the farm owned by one of the most prominent men and breeders in American racing; a man who has bought some of the highest priced and best pedigreed stock to be obtained in Europe; yet, when this officer looked over his yearlings, nearly every one had pronounced osselets and he remarked that "no Army veterinary would pass them" and that "apparently the owner has disregarded every disability and sacrificed everything to breed to speed." If this state of things is general, what is the final crystal of analysis? And, considered along this crucial line, now that our trotting racing is to be mainly done by three-year-olds and such young stock, what—say in five years—will be the physical status of the standardbred strain subjected to the intense muscular tax of this new early speed craze? The strains, remember, for which so much is unjustly claimed today by the ultra fanatics of the trotting world. Not by all, only the fanatics.

Surely there are enough great and glorious things to be said about the American trotter which are beyond question, without there being any need to try and discredit it with everything under the canopy, and with much less need to sling verbal mud at every other type.

Do not forget that the Standardbred is a grand animal. If it had been developed—say in Germany—there would have been streets named after it and statues erected in its honor. I, myself, have always thought that the Mare, Alix, and the stallion, Dare Devil (or was it Blue Devil?), were two of the most handsomely impressive things in horseflesh I have ever seen.

Do not overlook that in fifty years we have accomplished in the standardbred horse an improvement in foundation stock and type that more than equals what had been done in the thoroughbred in nearly thrice that period.

But—at the same time—for goodness' sake do not let imagination, favor or prejudice, run riot. Try to stick to the truth and the fact—not as one THINKS one SEES them, but as such truths and facts really and veritably are.

—o—

The Biennial Report of the Nevada State Racing Commission was presented to the Governor of the State of Nevada the first of January, 1917, and contains the following facts and figures: The total receipts for the year 1915 from all sources were $12,210.05; the expenses were $2,314.40, leaving a balance to be turned into the county road funds of $9,895.65.

From the figures for the year 1915 there passed through the pari-mutuel machines during the twenty-five days of racing a total of $773,764.00, of which amount one-sixth of 8 per cent went to the State for distribution to the county road funds.

During the year 1916 a summer meeting was held in Reno, during which the State received one-sixth of 7 per cent. Racing was also allowed on four Saturdays when the State received its one-sixth of 7 per cent. One-sixth of 8 per cent was received for the fall meeting which was held in Reno and for the meeting which was held at Fallon. The total amount of money passing through the machines for all these meetings was $1,152,818, of which amount the commissions to the State were $14,314.71.

From the figures which have been shown to Mr. Wingfield and from which his report was made up, he is convinced that the Reno Fair and Racing Association, during the year 1915 made less than $10,000, which was more than taken up in improvements and betterments to the State grounds at Reno. During the year 1916 this association lost upwards of $2,000, owing to the fact that during the summer and fall meetings of last year in Reno over $80,000 in purses was distributed among the horsemen, besides which the daily expenses ranged from $700 to $1000.

It is generally agreed among turfmen that no cleaner racing has ever been seen anywhere than that conducted in Nevada. Every effort was put forth by the Commission to see to it that both public and horsemen were treated in a fair and sportsmanlike manner. No mercy was shown to jockeys or others who attempted to violate any of the rules of the Commission, the jockeys being set down for periods ranging from a few days to indefinite periods, and others ruled from the track. Unquestionably Nevada racing has earned the reputation of being as cleanly conducted as any in the world.

✣ ✣ ✣

Many horses have been imported from England and France during the last year, and while the great majority of them have been shipped to New York and Kentucky, an exceedingly choice lot of high class colts and fillies have been purchased by S. Christenson of the Meadowbrook Stock Farm, Pleasanton, Cal., and by J. H. Rosseter, whose Wickeup Stock Farm is near Santa Rosa ,Cal. These horses were purchased at the recent December Sales, Newmarket, England, and those of them which have arrived at Pleasanton are now being handled by Geo. Strate. The list is as follows:

Harmonia, bay, 1901, by Martagon out of Hamptonia (winner and dam of Sempronius, Galveston, Miramar and Lily of the Valley, dam of St. Eloi, etc.) by Hampton; next dam Feronia (dam of ten winners, including St. Serf and Atlanta, dam of Ayrshire) by Thormanby. Harmonia is the dam of Swan Song, winner of six races, and is in foal to Roi Herode.

Frusquinglass, chestnut, 1907, by Isinglass out of Frusquinetta (dam of Piquet) by St. Frusquin; next dam Drill (dam of Vermala, Echelon and Accuracy, the dam of Accurate) by Chippendale; next dam Manoeuvre (dam of winners, including Sir Hugo (winner of the Derby) by Lord Clifden. Frusquinglass was a winner and is now in foal to Lomond, son of Desmond.

Adesmia, chestnut, 1912, by Simon Square out of Esparcette, by Sainfoin (sire of Rock Sand); next dam Lily of the Valley, by Martagon out of Hamptonia, by Hampton. Adesmia is in foal to Kildare II.

Bay filly, 1, by Fowling-piece out of Williamina II., by Collar; next dam Kentisk Cherry (dam of Strickland, Wild Gean and Cherry Pie) by Kendal; next dam Cereza (winner of Coronation Stakes and 7,000 sovereigns) by Petrarch.

Brown filly, 1, by Mushroom out of Penelope (dam of Martinsburgh) by Clipstone; next dam Alexandria, by Ptolemy.

These five are being left at Little Malgraves, the three mares to foal and be bred to suitable sires in Newmarket, which is close to the farm. They will be brought to this country sometime this summer and Mr. Christenson will purchase a young stallion in England to come over with them, to head his stud.

C. W. Christenson, his brother, who lives at Essex, England, where he maintains a stock farm known as Little Malgraves, is a very successful breeder, having bred among other good horses the Cesarewitch winner of 1912, Warlingham from Sunny South, one of his best matrons. Mr. Christenson is considered one of the best judges of thoroughbreds in England and to him has been left the selection of the horses for shipment to America. Last September he sent over six head, five being consigned to J. H. Rosseter. In this lot were Agnes Velasquez, dam of Volta, a high-class three-year-old in England in 1915; Berrill's Image, Berrill's Choice and Santa Malta, together with a weanling filly by Squire Jack. The last two mares are in foal to Squire Jack and Agnes Velasquez was again in foal to Valens, sire of Volta, but unfortunately slipped her (colt) foal on Christmas Day.

George Strate, who trains Mr. Rosseter's horses at Pleasanton, has Berrill's Image, b. m., 4, by Berrill—Proud Beauty, and the two-year-old War Shot, property of Mr. Christenson, that came over in the same shipment, now in training and they are going along in great shape. War Shot is by Mauvezin out of Berenice (bred in U. S. A. in 1907 and exported in 1909), by St. Simonian II., out of Isis, by Bend Or; next dam the Derby winner Shotover, by Hermit. Hence his name. His owner is particularly sweet on this youngster and has entered him in the Hopeful, United States Hotel and Grand Union Hotel Stakes at Saratoga.

✣ ✣ ✣

Two weeks 'additional racing, beginning a week from Monday, was announced last Saturday by President James W. Coffroth of the Tia Juana Jockey Club. If the racing during the two weeks extension justifies it, President Coffroth stated that a further extension would be ordered, thus making it indefinite when the racing season would end.

✣ ✣ ✣

A bill has been presented in the Canadian parliament to restrict any horse racing meeting in any one locality to nineteen days. This, of course, does not apply to harness races, but to the runners only.

LeGrand McDonald Is Worthy of the Name.

The more I see of California's leading saddle horses the more thoroughly convinced I am that this state is destined to take its place in the front ranks in saddle horse production, comparing in every way with the mother states of the industry, Missouri and Kentucky. At first, the interest manifested by the citizens in the American Saddle Horse; secondly, the ideal climatic conditions, and being from one end of the great commonwealth to the other a resort for wealthy pleasure-seeking people, who are now and for the future are to be the consumers, where saddle horses are concerned, caused this belief; lastly, the magnificent foundation already laid. Every state has to have a leader, some man who is interested and whose untiring efforts to interest others are responsible in a great measure for the advancement of the breed. This one man or these few men, who get together and give their time for the advancement of the cause, are, to any state, what a live breeders' association is to the entire country. In Missouri, such pioneers as "Mister" Joe Potts and "Uncle" Jeff Bridgford were, with a few others, regarded as the "Fathers" of the saddle horse industry. Both have recently died; however, the work they started still lives, and is being carried on by hundreds of others just as keen. In California ,the man most commonly referred to as "The father of the game" is Judge E. A. Bridgford, a prominent California attorney and rancher; a son of the late "Uncle" Jeff Bridgford of Missouri.

Judge Bridgford has lived so long in California that he is almost as good here as a "Native Son." He came out many years ago, and like those old pioneers who settled Missouri from Virginia and Kentucky, brought some good foundation saddle horse stock with him. The name Bridgford is as good as a government bond in Missouri, and so I have found it in California.

Judge Bridgford, who is the president of the Pacific Coast Gaited Saddle Horse Breeders' Association, owns a splendidly equipped ranch at Knightson, where he maintains a magnificent herd of Saddle horses, Draft horses and Holstein cattle. The Bridgford Company, Inc., have at all times the best stock in existence for their ranch. Time and money were not considered when this business was started and their herd of cattle consists of record breakers and merit leaders from the leading herds of the United States. Several years ago Judge Bridgford went to Missouri to buy the best looking and best bred Saddle horse he could find. After visiting the leading stables, he gave up; he couldn't find one that could be bought, that suited him. He was about to return to California when he heard of a colt that had attracted considerable attention and had won a number of valued premiums over the state, and went down in Monroe county to see him. "The moment I laid my eyes on him," Judge Bridgford said, "I knew he was just what I had been looking for, and I am going to see if a Bridgford really has 'hoss' sense." He bought the colt, Le Grand McDonald, and he has fulfilled every hope the Judge had for him.

Le Grand McDonald was bought from one of the Farrells at Holliday, who bring out a top-notcher every so often; having magnificent brood mares and the best stallions living being available for their service. He is sired by Grand McDonald, the horse that John Hook, now the most famous of American trainers, has the credit of having made; but which, some of his best friends declare, made Hook, instead. Grand McDonald was by Rex McDonald 833, the greatest Saddle stallion the world has ever known, and is believed by many horsemen, and all Monroe county people, to have been the best doing and producing son of his distinguished sire. Le Grand McDonald's dam was Mr. Farrell's best mare, Queen Alice 10649, by Forest Le Grand 2107, making him one of the most distinguished sons of the Denmark tribe.

More of his breeding is not necessary to repeat for everyone interested in this knows it well. Le Grand McDonald is what would be expected from such a pedigree and is the best possible evidence of the continued superiority and advance made by modern breeding methods. He is now classed among the four-year-olds, or junior stallions, is a rich chestnut, as much like the color of old Lucy Mack as two black-eyed peas. As an individual, he, is must be remembered, is a Rex McDonald, and they are never credited with being good individuals, at least those that amount to anything, until they are full aged. They do not get their fullness of conformation until five or six years of age, and Le Grand McDonald's beauty will not be fully appreciated for two more years. However, it is hard at this time to criticise his individuality. He is of the full-made, muscular type, suggesting masculinity at every point, and yet, with it the fineness found only in the best horses; and without a trace of coarseness or "bullness" in his outline. From his muzzle to the tip of his tail there is not a gross point. He is well and beautifully turned at every angle; the most expert mechanic could not turn out a more perfectly finished work. His eyes expressive, large and clear, are surmounted by graceful ears always well carried. He is keen cut at the throttle with a long, crested neck, right side up. His shoulders are sloping and broad, with high withers that are so essential to a real good saddle horse. He has a grand tail that is well carried, and has the action of his noted sire.

Le Grand McDonald has been successful in his shows among the more spectacular of his winnings being the junior championship at the P.-P. I. E. His first crop of colts, now yearlings, are proof that, like his sire, grandsire and great-grandsires before him, he is a breeder and will reproduce himself. To California saddle horse interests his value cannot be estimated. for he carries the blood, the quality and the power to produce his kind, and if crossed with the right kind of mares he will leave his impress on the saddle horses of this state.

At present he is at the Hulda stables, North Panhandle Park, San Francisco, but later will be sent to the ranch at Knightson, and it would be advisable for the owners of saddle mares who live near San Francisco to arrange for his services before he is removed t othe ranch. His services have been reduced to $30; last year he stood at $50. Judge Bridgford, however, wants to do his part in getting the breeders to raising saddle horses, and his making the services at such a figure is good evidence of his intentions.

Famous Morgan Stallion Goes to St. Lawrence County, New York.

The Morgan Horse Company of Ogdensburg, N. Y., has purchased from Joseph H. Reed of Pittsford, Vermont, the famous Vermont stallion, Larry Morgan, A. M. R. 5258.

Larry is a dark mahogany bay, standing 15.2 and weighs close to 1200 pounds.

It is stated by those in a position to know, that Larry Morgan is one of the best living Morgan stallions today, as he has the size, color, conformation, and an exceptionally good disposition, and runs back to old Vermont Black Hawk and Justin Morgan on both the sire and dam sides. His dam was sired by the best son old Daniel Lambert ever sired, namely, Lambert Chief, and his sire, Frank Allen, was sold by Mr. Hines of Fowler, Vermont, to John T. Wilkins of Connersville, Indiana, for $2,000.

Mr. Reed, of Pittsburg, Vermont, who raised Larry Morgan and who consigned him direct to the Morgan Horse Company of Ogdensburg, has been raising and showing Morgan horses for over forty years and states that Larry is a better horse today than he was at three years old, when at the Fair at White River Junction he refused $2,400 for him from a Wisconsin party.

W. M. Kirby, the dean of the "Pennirile" disposed of several fine saddle horses last week.

✤ ✤ ✤

Tom Jefferson, who is in charge of the saddle horses of Sierra Vista Farm, Chino, Calif., is well pleased with the youngsters he is training and reports his futurity entries especially good.

✤ ✤ ✤

Judge E. A. Bridgeford, the father of the saddle horse industry in California, has a number of splendid young saddle horses on his ranch at Kingston, which he is offering for sale. There are some old enough to go into immediate service, well gaited, mannered and ready to use or show and priced to sell for pleasure horses.

✤ ✤ ✤

Clarence B. Smith, of Shelbyville, Ky., has offered his great show horse and sire, Jewell Dare 3025, by My Dare, the sire of My Major Dare, Gipsy Dare and others of note, for sale. Jewell Dare and the colts by him which Mr. Smith wants to sell are among the most attractive in Kentucky and famous for their achievements in the show rings.

✤ ✤ ✤

A prominent Eastern horseman wintering in California is J. A. P. Ramsdell who, with Mrs. Ramsdell, is in Southern California until the middle of March. Mr. Ramsdell is the owner of Powelton Farms, Newburgh, N. Y., one of the leading horse nurseries of the country. The celebrated saddle stallion, Golden King, was recently acquired by this well known sportsman, and is attracting considerable attention in New York. He replaced the well known sire, Krosko, that died in the winter.

✤ ✤ ✤

Hugh C. Willoughby, of Lexington, Ky., reports the sale of his heavy weight three-gaited gelding, Jess Willard, to C. L. Whiting, of Rochester, N. Y. Jess Willard was one in the load of good horses purchased in and around Mexico, Mo., last spring by Willoughby, and with which he has been so successful in the shows and sale.

R. E. Moreland has repurchased the good son of King Lee Rose, Cascade, with which he was so successful two years ago. He will be fitted for the five-gaited stakes of 1917.

✤ ✤ ✤

Dr. W. C. Gadsby, of Kirkwood, Mo., one of the most talented horsemen in Missouri and one of the leading authorities in the country, has recently purchased several splendid saddle horses for Wm. C. Bush of Vermont. It was Dr. Gadsby that accompanied Mr. Bush and "Gerry" Parsons when the celebrated stallion, King's Rival, was purchased for Mountain View Farm.

✤ ✤ ✤

The Kentucky Saddle Horse Company, of Sedalia, Missouri, will conduct a public sale of registered saddle horses, consisting of 40 head of stallions, mares and geldings, mostly the get of Prince Rupert, a full brother to Chester Dare 10. The sale will be conducted Friday, March 16, the day following the Limestone Valley Farm jack sale, and will be conducted in the palatial live stock pavilion on the the Missouri State Fair Grounds.

✤ ✤ ✤

For the first time in fifteen years the Missouri Special Sales Company, of Mexico, Mo., the greatest individual saddle and show horse sale in the country, will not have their annual spring auction. The scarcity of high class horses caused by the extensive private sales in Missouri, and the personal business duties of the officers of the sale company has not permitted of their spending the time necessary in conducting the sale.

✤ ✤ ✤

S. P. Eastman, of San Francisco, has recently returned from a business trip to New York. It was Mr. Eastman's intention to stop over in Missouri and Kentucky on his return journey; however, he was called back to San Francisco and this long anticipated visit to the leading saddle horse nurseries of America was indefinitely postponed. In addition to a high class aged horse, Mr. Eastman owns several colts by E. A. Bridgford's magnificent stallion, Le Grand McDonald, of great promise and which indicate that they will be a source of pleasure to their owner and a great benefit to Le Grand McDonald in establishing him as a high class sire.

✤ ✤ ✤

Jas. Houchin, of Jefferson City, Mo., owner of the world famous Astral King, wants the name of every owner of a colt by his great stallion. He has orders for them and has sold all his own offerings. His great youngster, I AM King, winner of the junior stake at the Missouri State Fair last year, is reported to be working wonderfully and up to making good all the prophesies made of him by expert horsemen last year. It was a fortunate occurrence that Astral King should have a son to take his place in the show ring, just at the time he was retired.

✤ ✤ ✤

Manager C. J. Tucker, of Longview Farm, Lee's Summit, Mo., writes that the books of the great stallions, My Major Dare and Kentucky's Best are rapidly filling. He is particularly well pleased with the class of mares the stallions are commanding and the distance some of the patrons will come to get the services of these remarkable horses. Mr. Hook, the manager of the saddle horse department, was in Kentucky at the time the letter was written, looking for a "winner" of a certain age, which the Long stable needs.

✤ ✤ ✤

N. H. Fitzell, Denver's leading trainer and developer of show horses, has quite a string of saddle horses in his stable that he declares will be of interest to the leading shows of the country when the bell taps again. Among them is D. Schilling's good stallion Noble Rex, and Rexie Terry, a beautiful filly recently sold to W. L. Petrikin, a Colorado capitalist, by Bruce G. Eaton, of Eaton, Colorado, and exhibited under the Eaton colors last year. She was one of the most admired things in the Eaton stable and according to Mr. Fitzell, the year has brought about a great amount of maturity and other things that make her more beautiful and better than ever. She will be used by Mr. Petrikin personally and her shows probably defined to the Denver exhibitions, as the owner said when he purchased her; "I do not want her so much for other people to admire, as to have the pleasure of admiring her myself ,and I will not send her away from Denver."

Mrs. Grace Maxwell, of Denver, Colo., who is regarded by horsemen as being one of the most expert horsewomen in the United States, has arranged to take charge of the Revel Lindsay English riding academy at Pasadena and is due to arrive in California before the first of March. Mr. English has placed some of his best horses in his academy and it is one place where horse lovers have real saddle horses at their disposal. With Mrs. Maxwell as an instructor, those who are wintering at Pasadena can rest assured that they will be finished riders after being under her tutelage a few weeks. Mrs. Maxwell can ride a five-gaited horse with the perfection of the most noted exhibitors of the South; she can take a hunter over a six foot hurdle with more ease than any lady rider of the writer's acquaintance and on a three-gaited horse one would believe that she was "born in the saddle." She can team a high acting pair of heavy leather wearing horses; a tandem, or a four-in-hand, as few of the masculine members of the fraternity can.

Notes and News

Send the Breeder and Sportsman a list of your stable.

✤ ✤ ✤

It looks like there will be a hot time on the old tracks this year.

✤ ✤ ✤

The Spring Souvenir Number of The American Sportsman is a classic.

✤ ✤ ✤

I. L. Borden has offered $100 to start a guarantee subscription list for a good fair at Stockton.

✤ ✤ ✤

Aristotle, pacer, 2:17¼, is the first new performer for 1917. His record was made at Tampa, Fla., Feb. 8 in a sixth heat.

✤ ✤ ✤

Palo Maid, by Palo King, owned by H. Hershey of Oakland, has been sent to the court of Elmo Montbomery's good stallion, Jim Logan.

✤ ✤ ✤

Hettie T., by Stam B., owned by J. A. Neilson, has been mated to the good sire Jim Logan, owned by J. Elmo Montgomery of Davis, California.

✤ ✤ ✤

W. W. Percival, one of the best known horsemen in Oregon, died at his home in Independence on December 23, of cancer of the stomach.

✤ ✤ ✤

George Ryan, manager of the track at Pleasanton, reports a lot of interest being taken by mare owners in the stallions standing for service there.

✤ ✤ ✤

C. A. Durfee, the veteran of California's leading harness horse men, was another strong supporter of the big purses for the Free-For-Allers, at the recent meeting of the C. F. and R. A.

✤ ✤ ✤

Jack Sproule, formerly of Rocky Ford, Colo., has moved to Clovis, N. M., and is using his best efforts to have an association formed there and says he believes a track will be built this winter.

✤ ✤ ✤

The directors of the Yates County Fair, at Penn Yan, N. Y., decided to cut out the racing feature last year, but the attendance fell off so much that it is said they will put it back again this season.

✤ ✤ ✤

Henry Helman of Salinas attended the meeting of the California Fair and Racing Association Saturday. On another page of this issue there appears a list of the horses this popular trainer is working.

✤ ✤ ✤

If your stallion is worth advertising, advertise him now; if not, advertise him for sale in the Breeder and Sportsman, for he will eat his head off before he brings home any bacon.

✤ ✤ ✤

Albert Pendleton of East St. Louis, Ill., one of the most popular and efficient starting judges in the Middle West, has been signed up for a number of the important events in the Middle West, South and far West this year.

✤ ✤ ✤

Margaret M., by Chestnut Tom, dam Queen C. by Nutwood Wilkes, has foaled a beautiful chestnut stud colt by Jim Logan, that owner Elmo Montgomery declares will be a scream from the time he is a yearling until he is as old as C. A. Durfee.

✤ ✤ ✤

If you own a good mare, use good judgment in selecting a stallion and the chances are you will have a good foal. Five dollars' difference in a service fee, too often, makes a difference of $500 in the sale of a horse.

✤ ✤ ✤

Talk about the trotting horse business being a dead issue, the way the $500 donations toward forming a stock company for the California Fair and Racing Association poured in Saturday would make one believe it was only in its infancy.

✤ ✤ ✤

The Chicago Horse Sale Company reports the brightest prospect for their March sale in many years. In fact, the proprietors declare the advance correspondence shows those looking for speed horses of merit far outnumber those to sell.

✤ ✤ ✤

Charlie Silva, Woodland Stock Farm, made several spirited talks at the Fair and Racing Association meeting in San Francisco Saturday, in favor of a big stake for the free-for-allers. "Give a man a chance to get the money when he does happen to have a good horse," he argues.

✤ ✤ ✤

Mrs. Sarah Frances Marvin, widow of the late Chas. Marvin, former trainer and manager of the Palo Alto Stock Farm, died last week at her home in Meadville, Pa. Mrs. Marvin was very prominent in philanthropic work, and at the time of her death was a member of the board of directors of the Meadville Children's Aid Society and Home for the Aged and of the Women's Auxiliary of the City Hospital.

A. S. Thompson, of Paducah, Ky., will campaign a stable of trotters through Missouri and Kentucky this year. "Gussie" is getting them ready and says he will be there when the roll is called.

✤ ✤ ✤

T. R. Finley, a member of the State Legislature from Santa Barbara county, who represented that county at Saturday's meeting, is an ardent horse lover and stockman. He is strong for any legislative measure that will help the agriculturist and stock growers' interests of California.

✤ ✤ ✤

Brood mares from Mr. E. Cebrian's San Jose Stock Farm figure prominently as the dams of winning two-year-olds in 1916; no less than thirteen of them producing winners of races. The list is headed by La Poeta (by Hoduras, dam Paola by Rtherford) whose foal Rhymer won 6 races.

✤ ✤ ✤

It is said Jake Brolliar, of Hanford, Cal., has uncovered a new one that has speed, manners and soundness to make him a "whiz." He has only been worked three or four months and our informant says he saw him trot a mile on a two-lap track in seventeen and go a half in seven.

✤ ✤ ✤

Mr. Edw. Cebrian of San Francisco started a good filly of his own breeding at Tia Juana last week, Candelaria by Von Tromp—Candlewick, who won the opening event for two-year-olds on Friday. She hurried to the front at the start and was never headed, showing keen speed in the heavy going.

✤ ✤ ✤

At the annual meeting of the Alameda County Fair Association Saturday, the following officers were elected: E. E. Hall, president; N. S. Boone, vice-president; Chas. Schween, secretary; W. J. Dakin, treasurer. The stockholders decided to hold the fair September 19th to 22nd.—[Pleasanton Times.

✤ ✤ ✤

A meeting of the Nebraska Speed Association and the Midway Raving Circuit in Omaha, February 15, resulted in the combining of the two circuits, the Midway going out of existence. N. J. Robin, of Fremont, was made president of the newly strengthened organization and H. B. Swalley, of Nebraska City, secretary.

✤ ✤ ✤

M. L. Woy of Fresno has bred several good mares to Stanford McKinney 45173, which he recently purchased from Geo. L. Warlow. Stanford McKinney is one of the best bred stallions in California and has already proven, though he has had only a poor chance in the stud, that he is a sire of horses with speed.

✤ ✤ ✤

A. C. Dingle, better known as "Popular Ab," will again be in charge of the speed department of the Missouri State Fair. Mr. Dingle, who is one of Missouri's most distinguished citizens, has been at the head of the speed department of this fair for many years and next to his attractive family, takes more pride in it than any other event in his life.

✤ ✤ ✤

Jas. Erwin, formerly associate trainer at the Woodland Stock Farm, died at his home in San Francisco February 20, after an illness of nine months. Mr. Erwin leaves a wife and three children. He was well known to trotting horse men on the Pacific Coast, where he has been actively engaged in the business many years.

✤ ✤ ✤

"If the Standard bred horse had been developed in Germany, streets, schools and libraries would have been named after it and statues erected in its honor," writes Wilf P. Pond, editor of the Spur, in his eulogy of the Thoroughbred. Mr. Pond can write of one breed and still praise all others, instead of the usual mud-slinging methods employed by many when commenting on their favorite.

✤ ✤ ✤

An interesting item of news from Holland, which is worthy of the attention of anti-gamblers, is that the law which was passed five years ago forbidding bookmaking and the use of the totalisator on Dutch race-courses, is to be rescinded. The reason for the removal of the prohibition is that it has caused great injury to horse breeding in Holland. That racing cannot flourish unless accompanied by some form of speculation every one possessing practical acquaintance with the subject is well aware.

✤ ✤ ✤

Cheri Hebert of Salinas was one of the most enthusiastic visitors who attended Saturday's meeting. Mr. Hebert came with his mind made up and said what he wanted to when he wanted to say it. One visitor declared he was one man present who said something every time he opened his mouth, and at one time during the early stages of the meeting that was going some. Mr. Hebert is a business man, a stockman and a horseman, and he applies business methods to all three.

✤ ✤ ✤

The case of E. J. Weldon of Sacramento against T. W. Murphy of Poughkeepsie, which is before the Board of Appeals of the American Trotting Association, has been postponed until the May meeting of the Board. In the 2:12 pace at North Randall July 18, 1916, Murphy was awarded third money with Jay Ell Mack, and John Malcolm, driven by Lou Daniels, was awarded fourth money. Dr. Weldon protested the award on the ground that Jay Ell Mack was not eligible to the race.

Harry Downing of Marshall, Mo., one of the most distinguished citizens of Missouri and a live wire horse owner and fair manager, says the meeting of the Missouri Grand Circuit, which was conducted February 10th at the Baltimore Hotel in Kansas City, was the most harmonious and satisfactory meeting they have ever conducted. W. H. Johnson of Independence was made president and Miss Emma R. Knell of Carthage, secretary.

✤ ✤ ✤

Secretary Joseph Waddell, of the California Fair and Racing Association, met with prominent officials of Petaluma Monday and came away with the assurance that Petaluma would be in the thick of the fray this year. City officials, directors of the commercial club and officials of the Petaluma Driving Club were enthusiastic over the outlook for a good fair and racing program, and gave Mr. Waddell every assurance that they would affiliate with him in his endeavors. They will offer a liberal program and agree to accept any date in early July that would meet with the endorsement of the circuit managers.

✤ ✤ ✤

Lucien Lyne received a telegram from King Alfonso, of Spain, last week, completing negotiations for a contract for the local jockey to ride the horses of King Alfonso the coming season. The deal has been pending and was finally completed Thursday. He wired to Washington for passports and expects to leave as soon as these can be secured. Lyne was a successful jockey in this country and after becoming too heavy to ride here went to Europe, where he was equally successful. He was in Belgium at the beginning of the war and came home soon after the outbreak.

300 Mile Race for Army Horses.

Under the auspices of the Rough Riders Association and the alumni of the Norwich University an endurance race for cavalry horses is being arranged to take place next fall, with the finish at Madison Square Garden during the week of the National Horse Show. Its purpose is to test the merits of the various breeds and types of horses for military service under conditions as nearly as possible like those of actual warfare. The distance covered will be about three hundred miles, and it is expected that officers of the regular army and the National Guard will enter the race. The idea is to have teams start from various points so as to finish at the Garden on a certain date. One team will make the ride from Norwich University, at Northfield, Vt., which is just about three hundred miles from New York. For teams representing organizations stationed nearer the city an irregular course will be mapped out, so that all may cover the same distance. Checking stations are to be arranged, with every precaution to insure substantial uniformity of performance among the competing cavalrymen and their horses. Minimum weights will be prescribed and certain credits given to horses carrying more than the minimum. It is understood, also, that a marching schedule will be arranged on the basis of practical army service, fast enough to search out the soft horses yet slow enough to guard against cruel riding, which will not be permitted.

All military men and breeders of horses of the military types will be keenly interested in the test which is being arranged in connection with this year's Horse Show. The N. Y. Herald has advocated just such a race for ten years or more, with a view of putting to the test the real merits of the various breeds of horses whose admirers have made extravagant claims for them. If measures are taken to ascertain and verify the breeding of the horses entered in the contest it should throw much needed light on the disputed question, "What horse for the cavalry?"

Major Frank Thompkins, United States cavalry, who is now stationed at Norwich University as commandant, will enter the race on his Arab, Kingfisher, that he rode seven hundred miles into Mexico and back in pursuit of Pancho Villa, after the Columbus raid last year. This little horse—he is 14.3 hands high—crossed the boundary on March 15, 1916, and between that date and April 12 he was ridden 575 miles across deserts, over mountains and through the wilderness of Chihuahua, carrying his rider, rations for himself and master, besides the usual pack an officer must carry when operating in a hostile country far from the base. Major Tompkins says Kingfisher had little grain, and that was corn, which he had never before eaten, no hay, and only what grass he could get when staked out for the night. He lost a little flesh, but never lost his courage, never refused his feed and was an inspiration to his rider. He went lame once, when a thorn was in his frog, but he did his work just the same.

Kingfisher was bred by Colonel Spencer Borden, of Fall River, Mass., who presented him to Major Tompkins. His dam, Halcyon, won the endurance race given under the auspices of the Morgan Horse Club a few years ago, from Fort Ethan Allen to the Vermont State Fair, at White River Junction, doing her 154 miles in thirty hours and forty-one minutes. Her dam, Heiress, under 15 hands, won the high jump at the Crystal Palace, in London, in 1897. Heiress was by the famous French Arab horse Maidan, whose grandson, Hail, out of Lady Annie Blunt's Hagar, was the sire of Halcyon, so that she is inbred to Maidan. Imazada, the sire of Kingfisher, is a pure Arab.—[N. Y. Herald.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

War Exterminates Deer.—Our Stirling correspondent writes: "The deed is done. Word has gone forth from the Scottish Board of Agriculture that the 'occupier of any agricultural holding in Scotland may kill by any means available deer that are trespassing on his grazing or causing injury to his crops.' This order would bring joy to the heart of every old poacher from Kintyre to Cape Wrath were it not for the fact that venison is now out of season and not fit even for the humblest table. Why this panic Order at the wrong time, and the resulting waste of valuable food-stuff? It is entirely unnecessary and reprehensible. Of the so-called 'ravages' of deer among growing crops I have had long and intimate experience. On a certain West Highland estate three or four small farms were situated among hills which were somewhat heavily stocked with deer. Curious to state, three of the holdings were never molested by the ruddy herd, but the fourth was the object of frequent incursions from July to October. Complaints were constantly made to the proprietor, and he was often obliged to pay compensation. I know that he had sometimes to pay for damage done by the tenant's own young cattle! At length the laird engaged a retired shepherd to watch the crops at night—deer never giving trouble during the hours of daylight. Accompanied by his old and trusty collie ,the old man performed his huttes faithfully and well. When increasing infirmities caused him to resign his appointment the farmer offered to do the watching himself for £5 a year, and he was given the job. He was really vexed when, a few years ago, his crops were surrounded with a deer-proof fence, and the payment of the watch-money ceased. I am satisfied that the injury suffered by crops from the juxtaposition of deer preserves is invariably exaggerated; and I am equally convinced that one man with a dog is capable of protecting from the inroads of the antlered herd an area of from four to six square miles. Deer have a very wholesome respect for the shepherd's fiery collie."—[British Sportsman.

Still Plenty of Game—Every once in a while comes the howl of the pessimistic alarmist about the scarcity of big game.

You cannot escape the fact that game is getting scarce. There are certain inevitable laws of nature and progress that must in time seriously menace the sport of the hunter. Likewise it is also true that there is a time coming when deer will be as scarce as the buffalo and ducks may be likened to the ancient dodo. At the present writing, however, there is still enough hunting to satiate the nimrodic desires of any one willing to look for it.

According to reports, 1916 was one of the best of game seasons. In Maine, for instance, the bag of deer was more than 10,000. Going to the other extreme of this great country, the number of deer shot in California exceeded 9,000. Several thousand were bagged in Pennsylvania, while in the four days of New Jersey's open season 261 deer were taken.

Here is some more evidence: Four hundred elk were killed outside of the northern boundary of Yellowstone Park during the last two days of the hunting season. Two hundred and fifty bears were taken out of Pennsylvania and it is estimated that 4,000,000 rabbits were bagged in the same State.

Running to the other extreme again, California paid out over $60,000 in bounties for mountain lions at $20 per head, while Wyoming appropriated $60,000 to be paid for the hides of coyotes at $1.50 per hide. The above sum came nowhere near meeting the demand. Several thousand coyotes were killed, for which the men who bagged them could not collect.

These figures cannot fail to put somewhat of a crimp in the wail of the alarmist and go quite a little way to demonstrate that the man who wants some hunting badly enough to go after it will certainly be repaid for his trouble.

Uncle Sam's Official Hunters—On July 1, 1915, an appropriation of $125,000 became available for use on national forests and the public domain for destroying wolves, coyotes and other predatory animals.

Immediate steps were taken to organize the work on a permanent basis and eight districts were established: (1) Arizona and New Mexico, (2) California and Nevada, (3) Oregon and Washington, (4) Colorado, (5) Idaho, (6) Montana, (7) Utah, and (8) Wyoming.

An inspector was placed in charge of each district and an inspector at large has supervision of all field work. Hunters are employed who devote their entire time to the work. They are not permitted to receive bounties from any source, and the skins of all fur bearing animals taken by them become the property of the government. A considerable number of skins secured were retained for museum specimens, the remainder being sold and the proceeds turned into the treasury.

Three methods of destroying predatory animals have been adopted—shooting, trapping and poisoning. By the last method the bodies of the animals usually are not recovered, but the results accomplished have been very satisfactory.

During the year 424 wolves, 9 mountain lions, 11,390 coyotes, 1,564 bobcats and 2,086 miscellaneous wild animals were destroyed. This includes those destroyed under the project for the suppression of rabies among wild animals, an appropriation for which became available March 4, 1916. It does not, however, take into consideration animals poisoned unless the bodies were recovered.

Demonstrations and experiments also were carried on in localities other than on national forests and public lands where predatory animals are causing great losses of live stock. The capture of wild animals in such localities is attended with much difficulty, as they become wary when constantly hunted.—[N. Y. Sun.

FIGHT OPENS ON GAME LAWS.

Attempt to Bar Automatic Guns Draws Forth Some Sharp Criticism.

Perhaps never before in the history of California has such a concentrated attempt been made to get through the legislature so many radical changes in the fish and game laws. One measure is directed at the abolition of the State Commission and there are others that aim to prohibit the use of automatic shotguns, sale of trout and many other important subjects that have attracted the attention of sportsmen to Sacramento, where the second session of the Legislature convened on Monday.

This unfortunate congested condition pertaining to fish and game is laid to the door of J. B. Hauer by many hunters and anglers. Hauer represents himself as president of the California Fish, Game and Protective Association, which, according to reports, consists of a membership of less than thirty. Hauer is said to be out to get the scalp of Frank N. Newbert, president of the State Fish and Game Commission, and secretary Carl Westerfelt. That it is a personal fight is evident and the real issue has been sort of shoved into the background by those who do not understand the situation.

The arms and ammunition people charge that Hauer was instrumental in introducing assembly bills 269 and 680 and senate bill 510, which aim to prohibit the use of the automatic guns. They claim it is class legislation and furthermore, it is unconstitutional.

"It is unjust and not fair," says one prominent arms and ammunition man in speaking of the bills. "In the past, four attempts have been made to get similar bills through and they have been defeated on their merits. It is a matter of record that arms and ammunition firms stand for the conservation of game. We are the biggest contributors to the associations and societies that work for conservation. We realize that without game in the field there would be no need of our ammunition and arms.

"What we do claim, however, is that there is no need for a law against the autoloading gun. With a season prescribed by law and a bag limit in force, the automatic gun does not exterminate game. To the contrary, it is more humane than the single or double barrel. Cripples can be killed when once wounded with the automatic in the hands of the hunter.

"But why talk about legislation against a certain class of gun? Certainly no action would be taken against a high-powered automobile for speeding. The driver would be held accountable and the same thing should apply to the hunter.

"Such an eminent authority as Dwight Huntington sets forth the theory that vermin destroy more game than all the rest of the htunters in the country put together. Laws should be enacted to correct this condition rather than trying to jam through some class legislation purely through malice."

A number of sportsmen are in Sacramento fighting against those bills in particular and others that are radical.

Parker Single Target Trapgun—The latest addition to the equipment of the up-to-date trapshooter comes in the form of the Parker single barrel trapgun. The "Old Reliable" double gun has achieved so many victories that it naturally stands sponsor, and guarantees from every angle the performance of its side partner and running mate.

These modern guns will be made to conform strictly to the requirements of the most advanced ideas governing trapguns today, which insure the perfect balance and marvelous shooting qualities which for over half a century have characterized the product of the Parker factory, therefore the advent of the GUN WITH A PEDIGREE will be hailed with with delight by all who need a thoroughly reliable, first class trapgun.

WHY BASEBALL IS FADING.

Wrangling of Magnates and Players Has Driver Fans to Golf, Tennis, and Trapshooting.

A difference of opinion exists among baseball moguls as to the reason, or reasons, for the falling off in the attendance and the apparent lack of interest in the pastime by America's great population of sportsmen.

The magnates agree on one point—that there is something radically wrong with baseball. What that something is most of them profess not to know. They are only fooling themselves. There are a few magnates who see the light. These are the men who pay attention to the trend of the times.

Dick Kinsella, scout of the New York Americans, says that the movies have hurt baseball. President Navin, of Detroit, says that motoring is causing many thousands to forget baseball. Jack Hendricks, the Denver manager, says that golf is the lure of many from the ball parks. Grantland Rice, one of the ablest writers in the country on sport subjects, claims that the continued bickerings of the players and magnates are driving the fans to other forms of amusement, and James McGill, the owner of the Denver Club, asserts that the decline of baseball is due to the increased interest in other outdoor sports by the people who were formerly baseball fans. McGill is convinced that baseball is on the decline.

Mr. McGill may or may not be correct about the decline of baseball. It is a big subject, but he is right about the increased interest of the once baseball fans in other lines of outdoor sporting activity. Here are the reasons why:

It is a long story why the sport-loving American has turned to these sports from baseball. The modern young man takes up a sport that he can actually do. No longer is he to be a bench-warmer. For many years magnates grew prosperous as the turnstiles clicked their sweet refrain; but the clicking hasn't been so industrious during the past couple of years. Politics in baseball brought charges and counter-charges; then came one scandal after another on world's series tickets—the cry of commercialism, the continued wrangle between the magnates and the players, and the threat of the players to close up the ball parks. And some of the magnates still wonder why the people do not take as much interest in baseball as of yore.

Money has done more harm to sport than any other single factor. Baseball is the only professional sport that has thrived for any great period of time. The continued arguments in the public press over salaries never went well with the fans. Idols were knocked from their thrones and the fans began to stir themselves and look for other forms of amusements. It is impossible for any sport to thrive unless there is team play all around—and there is anything but team play in the baseball world now.

So the baseball fan of yesterday is the tennis, golf, motoring or trapshooting bug of today. Athletics are compulsory at nearly every school and college in America, and when the boy drifts out into the world hs is more or less interested in one or more branches of sport as an actual participant. The day of the proxy sport has passed for the live-wire American. Let us look the thing right square in the face.

There were not more than 300 tennis clubs nor more than 50,000 tennis players ten years ago; today there are more than 800 tennis clubs and in the neighborhood of 500,0,00 racquet players. And they have about $30,000,000 invested in the sport. There are nearly 400 golf clubs in America, a gain of over 100 per cent in five years; and golfers have more than $50,000,000 invested in the sport. This, of course, includes the magnificent homes of golf clubs.

The low-priced motor car brought joy to many, and plenty of men who were interested in baseball now spend their leisure moments in short tours.

Then there is trapshooting. It's a great sport. Golf and trapshooting are the two sports to which no admission is charged, no matter how many champions may be performing. The former is a sport in which the majority of the players are of middle age, while trapshooting is the real sport of contrasting ages. You can find them at the traps from the little fellow in short trousers to the gray and grizzled veteran. More than 15,000,000 shotguns have been sold in the United States in recent years, and there are more than 600,000 trapshooters. Five years ago there were less than 100,000. The number of trapshooting clubs has increased in that time from less than 500 to more than 4000.

Now you have the reasons why sportsmen are doing other things besides sitting in the stands watching others do something.—[P. Carney, Phil., Pa.

Deer in City Streets—St. Helena—Deputy Game Warden W. J. Moore was called here from Napa to take charge of the carcass of a doe that had been driven from the mountains into the streets of St. Helena and killed by deer hounds.

The meat was taken to the county infirmary, where it was fed to the inmates.

Local citizens declare they will appeal to the State Fish and Game Commission to compel local sportsmen to keep their hounds chained up.

Deer are frequently driven into the business streets of the city by the dogs.

LOS ANGELES AWARDED STATE SHOOT.

Trap Season Is Now On in Full Blast at Clubs Up and Down the Coast.

The trapshooting season on the Pacific Coast is now on in full blast. Up through the Northwest and in Southern California the scatter gun artists have been enjoying their favorite sport throughout the winter but only in the last couple of weeks have the boys around the San Francisco Bay turned their fancy to blue rocks.

Everything is being outlined for the most pretentious and prosperous season the sport alluring has enjoyed in years. With the Pacific Coast Handicap set for the last four days in May at San Jose, the other big fixture in California has been awarded to Los Angeles. The directors of the California-Nevada Association by a unanimous vote informed Secretary Clarence A. Haight that the Los Angeles Club should receive the event. Los Angeles is figuring on holding the state tournament on May 21, 22 and 23rd.

Plans are under way so that the shooters can participate in the state shoot and then travel on to San Jose in a special train for the Pacific Coast handicap. It is figured that there will be close to a hundred come up from the South.

Another big shoot that looms up in the offing is the one to be staged by the Indians. A local branch of that famous organization of sportsmen was formed last week.

At a campfire meeting in San Francisco over forty Braves formally signed their names as members of a tribe whose purpose will be to promote goodfellowship among gun, rod and kindred outdoor sports. The alluring sport of trapshooting will occupy their attention for the present and in the near future there will be a council gathering at which chiefs will be elected and plans outlined for a banner shoot and barbecue.

There are several other branches of the American Indians in other sections of the country. In the Northwest the Pacific Indians have a high old time every year and in the East there are a couple more chapters. That there will be big doings by the local tribe is indicated by the sportsmen that have signed with the tribe. The signing carries with it a pledge to turn out at the traps. Another band of thirty-five warriors will be herded with the original forty and it will make quite a formidable gathering.

The Indians so far ready to shoulder a musket or bend an arrow are as follows: R. C. Reed, Al Cook, Len Hawxhurst, N. A. Howard, W. J. Terry, L. L. Fuller, T. D. Riley, A. G. Wilkes, W. R. Ellis, T. W. Parsons, Tony Prior, H. C. Peet, A. A. Durney, Geo. Anderson, Fred Willett, Ed. L. Mitchell, Dr. C. D. McGettigan, Barney Worthen, William Price, C. C. Huber, J. W. Nelson, Dr. Topham, C. A. Haight, C. H. Knight, Capt. A. W. DuBray, Orin N. Ford, W. A. Joslyn, E. B. Thorning, C. Carman, F. W. Newbert, George Thomas, H. Jennings, J. G. Heath, P. F. Noonan, W. Eilert, Lee W. Slocum, Dr. J. L. Martin, G. A. Adams, A. G. Flickinger, H. Ogilvie, H. Lorenson.

Seattle Trapshooter's Association.—A fair crowd of shooters turned out for one of the regular program shoots at which there were several bunch for the high score in the 50-target and many more bunched for the second honors in the 100-target program. C. L. Templeton, L. H. Reid (professional), Tom Wilkes and Hugh Fleming each finished their fifty with a forty-nine score. The 100-bird race brought Hugh Fleming to the front with the high score of ninety-eight. D. Rhodes (pro.), C. L. Templeton, C. E. McKelvey, L. H. Reid (pro.), and Tom Wilkes furnished the second high scores with ninety-six apiece.

At the annual business meeting of the association, the following officers were elected: Dr. C. L. Templeton, president; R. S. Searle, vice-president; E. A. Fry, secretary; Ralph Kinzer, treasurer. The retiring secretary's report showed the past season a very successful one for the organization. The scores:

At 50 targets—C. L. Templeton 49, *L. H. Reid 49, Tom Wilkes 49, Hugh Fleming 49, C. E. McKelvey 48, *D. Rhodes 47, R. S. Searle 47, Deskin Reid 47, J. H. Hopkins 46, J. H. Templeton 45, Hil Follrich 45, Frank Templeton 44, Ralph Kinzer 42, R. P. Knight 41, Matt Crossman 41, John Considine 40, J. H. Davis 39, W. B. Taft 38, C. F. Reinhard 33, Jack Lewis 31. E. C. Gaumnitz 26.

At 100 targets—Hugh Fleming 98, *D. Rhodes 96, C. L. Templeton 96, C. E. McKelvey 96, L. H. Reid 96, Tom Wilkes 96, R. S. Searle 94, Deskin Reid 94, Hi Follrich 93, J. H. Templeton 91, Frank Templeton 91, R. P. Knight 87, Ralph Kinzer 86, Matt Grossman 86, John Considine 84, J. H. Hopkins 83, J. H. Davis 71, Jack Lewis 61, J. B. Adams 46.

Yours, E. A. FRY, Sec'y.

Portland Club.—Twenty-five members of the Portland Gun Club and their friends were out to the Everding Park traps on February 18th to try out the new concrete traphouses, trapstands and walks for the first time. The official christening of the new improvements will be made within the next month and several special events will be on the program.

Several visiting nimrods were on hand, including A. H. Jones, president of the Tonopah, Nev., Gun Club; and Frank N. Troeh, National amateur champion, of Vancouver, Wash.

Harry A. Pollock, acting president and manager of the Portland Gun Club, has issued a challenge to A. L. Zachrisson, holder of the W. C. Bristol 20-gauge gun trophy.

Remodeling of the club house is going ahead rapidly and Henry R. Everding, secretary-treasurer, has hopes of seeing everything completed by the time John G. Clemson, president, returns from his trip to California.

James W. Seavey was high gun with 91 among the amateurs. Frank M. Troeh broke 90 out of 100 and Dr. O. D. Thornton was third among those who shot at 100 targets with his 80 per cent. The scores:

Targets—	15	15	20	25	25	T'l
**W. C. Bristol	9	9	11	16	18	63
E. Long	13	11	12	..	..	36

* Shooting salesmen. **With 20-gauge gun.

Alameda Elks' Club—The Alameda Elks' Gun Club will usher in their season's program tomorrow (March 4th) with the regular monthly shoot. The club will stage events on the first Sunday in every month with the Golden Gate Club using the grounds on the third Sunday.

To start the rocks a-flying in approved fashion the Alameda Elks have arranged for a big clam chowder feast for everyone. Chef Charley Linderman, assisted by Lou Schroeder, Al Durney and Bill Ellis, are going to give everyone a good time.

The club has made arrangements for the registered tournament on June 3rd, which falls on a Sunday. This is the correct date. On the previous Saturday there will be practice day. There will be $100 added money with the optional sweepstakes on the Jack Rabbit system. In addition there will be $50 in trophies to be shot for.

Telegraphic Shoot with East.—W. A. Joslyn is going East in about a week and when he reaches Wilmington, Delaware, he will duly issue a challenge that the Alameda Elks have hurled at the Wilmington Elks. It calls for a telegraphic trap shoot with ten men on a side. Any date agreeable to the Wilmington boys will suit the Alameda boys. The match will undoubtedly be made and should provide a deal of interest.

Green Lake Club.—Twenty-two ardent trapshooters braved the cold and fog on February 18th at the Green Lake Gun Club's ground, but they were well repaid for their trip.

Several of the boys complained of the fog being so thick they could not see the targets, but neither the fog nor the cold seemed to bother L. S. Barnes, who led the amateurs and professionals with a fine score of forty-nine out of his fifty. George H. Garrison, professional, came out and shot with the club for the first time since Thanksgiving. He claims he has never recovered from an operation, but at that he broke forty-eight, and if his statement be true that he has not fully recovered, other shooters had better give him a wild path when he does recover. L. S. Barnes also shot an extra string of twenty-five with a twenty-gauge gun and succeeded in tying the high score of W. G. Cook, of twenty-one, made a week ago, on the I. M. Fisher trophy.

Ed. White, H. J. Trimmer and Dr. E. C. Lanter shot with the club for the first time and enrolled as members.

Sam Martin declared he was going to purchase a new single-barrel Ithica, so as to be sure of winning a place on the team that will represent Green Lake in the Western Washington League this summer.

The scores:

L. S. Barnes 49, Geo. M. Garrison 48, Dr. King 47, C. M. Bandy 45, *I. M. Fisher 43, D. R. Baker 43, W. C. Brown 42, E. K. Van Vleck 42, M. A. Rosenfield 41, George B. Baker 41, G. A. Conklin 40, E. W. Eller 40, E. Chantrell 39, H. J. Trimmer 39, J. W. Getz 37, George O. Colwell 36, Dr. S. W. Gi¼n 36, Dr. A. B. Kidd 35. S. A. Martin 31, Dr. E. C. Lanter 31, J. W. Carmichael 29, Ed. White 28.

"Chief" Bender is said to be ready to retire from baseball and accept a position as salesman for an ammunition concern. As an Indian trapshooter the "Chief" should be a good attraction at least.

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Share Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 nd a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

OREGON AVERAGES—Philadelphia, Pa.—Official 1916 trapshooting averages of the Interstate Association for Oregon were released by Sporting Life, and Abner Blair, of Portland, is listed as Oregon's best amateur. He shot at 1200 registered targets and broke 1129 of them for a grand average of .9408.

Peter H. O'Brien, also listed as a member of the Portland Gun Club, was a close second with an average of .9318, having broken 2870 targets out of a possible 3080. O'Brien was the only amateur of Oregon to shoot at more than 3000 registered bluerocks. Out of the 104 amateurs of Oregon who competed in registered tournaments of the Interstate Association only 15 of them shot their scatter guns more than 1000 times.

Peter J. Holohan, of Portland, led the professionals with .9266 out of 3640 targets, while James Bull, of Portland, was second with .9232 out of 990 targets.

The first five amateurs of Oregon for the 1916 season are:

	Shot.	Bke.	Pct.
Abner Blair, Portland	1200	1129	.9408
P. H. O'Brien, Portland	3080	2870	.9318
Lou Rayburn, La Grande	800	744	.9300
F. M. Templeton, Portland	2090	1938	.9277
E. Nickerson, Albany	400	360	.9225

Following are amateurs who shot at more than 1000 registered targets up to January 1, 1917:

	Shot.	Bke.	Pct.
P. H. O'Brien, Portland	3080	2870	.9318
A. W. Strowger, Portland	2640	2147	.8138
Mark Siddall, Salem	2190	1945	.8881
F. Templeton, Portland	2090	1939	.9277
J. W. Seavey, Portland	2090	1866	.8928
E. H. Keller, Portland	1890	1684	.8910
Mrs. A. Schilling, Portland	1840	1576	.8565
C. Leith, Woodburn	1740	1555	.8936
Miss G. Reid, Portland	1320	1002	.7590
F. Van Atta, Portland	1300	1182	.9092
W. N. McCornack, Eugene	1240	1057	.8524
Abner Blair, Portland	1200	1129	.9408
E. R. Goodwin, Portland	1065	765	.7183
Peter Whitney, Hubbard	1040	852	.8105
Al Seguin, Portland	1000	845	.8450

The professional scores for the season follow:

	Shot.	Bke.	Pct.
James Bull, Portland	990	914	.9232
P. J. Holohan, Portland	3640	3373	.9266
E. B. Morris, Portland	2040	1814	.8892
Gus Peret, Yoncalla	890	787	.8843
J. E. Reid, Portland	1565	1367	.8735
C. J. Schilling, Portland	1240	1110	.8952
*E. B. Van Arnam, Portland	700	559	.7985

*Deceased.

Tacoma Club—About 20 enthusiastic members of the Tacoma Gun Club indulged in the first practice shoot of the season on Feb. 22 at the Manitou traps. The turnout was good considering the weather the shooters had to face and officials of the organization are confident the club will enjoy a banner year.

"Goo" Campbell had his sights in working order and as a result broke 50 targets in 50 tries, a remarkable record considering the fact that it was the first shoot of the year. Campbell's straight aim was easily the class of the day.

Other members of the club showed that they were still able to see 'em. C. R. Werner and Ed Young scored a 45 each. Mr. McKelvey of Seattle scored 46 out of 50. Mr. Templeton of Seattle was high for 100 targets with 95. He also scored 49 out of 50.

The majority of the club members shot only the 50 target, which will be used by the Tacoma club this year. A number were not satisfied with this amount of their favorite sport, however, and took from 100 to 200 tries. The scores:

Campbell 50, Templeton 49, McKelvey 46, A. Riehl 47, Werner 45, Young 45, Holohan 45, Harvey 44, Dague 43, Smith 42, Davies 40, Blair 37, Baker 36, Mrs. Ed Young 33, Mellinger 33, Griffin 31, Rice 26x30.

At 100 targets—Templeton 95, McKelvey 94, Holohan 92, Dague 89, Davies 84.

Thirty-one rod and gun clubs are connected with the Oregon State Sportsman's Association.

Sportsmen's Row

C. W. Wood sort of put over a surprise on the trap shooters at the Alameda grounds on Washington's birthday. After being away from the trap for seventeen years he came back and busted forty-nine out of fifty, tying with Ted Handman and Frank Stall for high honors. Wood was a crack in his day and is coming back to gather in some more prizes.

✤ ✤ ✤

Frank Shook, deputy game warden, returned Monday from a trip to the southern end of the county looking after his proteges, the wild game. He reports that he saw many quail in that section, birds that went into hiding when the season opened, as he was down there in October and birds were very scarce.

He stated that the deep holes in the Nacimiento river are teeming with salmon on their way to the headwaters to spawn. During the heat of the day they hide in he pools and travel by nigh. In one pool he saw over 100 big salmon.—Salinas Journal.

✤ ✤ ✤

W. J. Eilert, one of the well-known trapshooters of Fresno, dropped into San Francisco for a visit last week. He reports that the Raisin Belt will be on the trap map again this season. Application has been made by Fresno for a registered tourney on April 27, 28 and 29.

✤ ✤ ✤

A fish sent for identification from near Mazatlan, Mexico, has been pronounced by Dr. C. H. Gilbert the yellow-finned albacore, the albacore most common in Japan and usually called the Japanese albacore. It is found in the Hawaiian islands and a few individuals have been taken in Southern California by the fishermen while fishing for the long-finned albacore or tuna. It is reported that these fish are plentiful near Mazatlan.

✤ ✤ ✤

The Northwestern Trapshooters' League has been formed. Seattle, Tacoma, Everett, Bellingham, Blaine and Green Lake are the cities that will have teams in the league.

✤ ✤ ✤

The champion trapshooting booster of the universe is H. R. (Hi) Everding, of Portland, Ore. He is a former president of the Portland Gun Club, believes in trapshooting, says it is the greatest sport in the world ,and supports it by giving trophies for every tournament that is conducted in the Northwest.

✤ ✤ ✤

It is too late to do it this year, but it is a good wager that trapshooting will be one of the features of the 1918 Mardi Gras carnival in New Orleans.

✤ ✤ ✤

The day will come when there will be a trapshooting tournament for the railroad championship of America. The cla ytarget sport is the main one among the employees of the Pennsylvania Railroad and now the Baltimore & Ohio and the Chesapeake & Ohio Railroads are aiding their employees in forming clubs. There are about 50 railroad trapshooting clubs in the United States.

✤ ✤ ✤

The hand trap has made trapshooting possible almost any place. It is used on aeroplanes, automobiles ,steamships, yachts and last but not least, lake freighters. When the steamer Maruba began its last trip on the Great lakes. Engineer A. L. Hall took along a hand-trap and targets and the crew got a lot of good sport firing at the elusive clays.

✤ ✤ ✤

A little girl stood with tears in her eyes in Washington recently before the big wigs of the government and pleaded for a little yellow dog. She told how her brother, Peter Smiley, had enlisted in the Marine Corps, and how this little dog had been his pet. "Rover will surely die of grief," she said, "unless you let him go to my brother." Evidently the officers had owned dogs themselves, and, setting aside all red tape, they let Rover go to his master at Port Royal, S. C.

✤ ✤ ✤

Sam Crabtree, who is well known over here, has been invited to judge in New Zealand, and is going to take the trip "down under." The show where he will officiate is to take place next July. This will give him an edge as a globe trotting judge on his confreres, Marples, Raper and Holgate, for none of them have yet officiated in the Antipodes, although they have visited nearly every other country as judges at bench shows.

✤ ✤ ✤

Up at Vancouver, B. C., recently an ordinance was proposed to the effect that no person should keep a kennel within 500 feet of the house. Some of the Aldermen moved that the by-law be laid on the table for three months, others said it should be kept there fo rthree years or more.

✤ ✤ ✤

Charley Newcomb, the former national amateur champion, has been seriously ill for some time. He was at Pinehurst—but not at the traps.

✤ ✤ ✤

Trapshooting has become very popular with the women who spend the winter season at Lakewood. So popular has the sport become that the Laurel House Gun Club has secured the services of Mrs. B. G. Earle, of New York, to give instruction to the fair Dianas, who desire to know the whys and wherefores of the "sport alluring."

✤ ✤ ✤

Here is an old and true saying: No amount of practice will make a good shot if the gun does not fit the shooter.

✤ ✤ ✤

Covering 143 acres of the West London (England) Shooting Grounds is the largest shooting organization in the world.

✤ ✤ ✤

Bill Crosby, of O'Fallon, Ill., has been engaged in active competition for 35 years, and he averaged better than 96 for the thousands of targets he shot at in 1916.

✤ ✤ ✤

M. D. Towne, past 86 years of age, with his trusty 16-gauge gun, quite recently broke 46 out of 50 in Southern California, with a run of 34 straight. That shows what this climate will do for a young fellow.

✤ ✤ ✤

Dr. and Mrs. J. L. Martin of Fresno, Cal., dropped in at the L. A. club on their way home from Cuba and the Sunny South. The Doctor was using a strange gun but at that he was only a few shy of the 90 class.

✤ ✤ ✤

A big merchandise shoot will be held by the Portland Gun Club March 11th at Everding Park in honor of President John G. Clemson. The shooting will begin at 9:30 a. m., and no entries will be received after 10:30.

✤ ✤ ✤

Mr. and Mrs. F. H. Mellon, of Pittsburg, Pa., arrived in Los Angeles several days ago, and after a strenuous search secured a handsome bungalow on Kingsley Drive and are now located for the winter, or, "winter months," rather. They visit the park every day and very much to their satisfaction are making fine scores. F. H. has put up two 94's and a 93. Mrs. F. H. broke one 89, the best score she has ever made.

Inland Empire Tourney.—James Hickman and J. A. Ford of Palouse, George Arland of Garfield and B. M. Hayes of Spokane are tied for individual leadership in The Spokesman-Review's Inland Empire championship trapshooting tournament, in which 12 gun clubs of as many different Inland Empire cities are competing. The individual championship trophy will be a gold fob given by The Spokesman-Review.

The above-named shooters shot perfectly in the opening match, each breaking 25 straight bluerocks, despite the fact that the weather conditions were bad throughout the entire district last Sunday.

Eight scatter gun enthusiasts—Porer and Nicholson of Kellogg, R. Houston and Fred Streckman of Kalispell, Billy Cochrane of Spokane, Sanders of Pendleton, Hahn of Lewiston and L. E. Ovenden of Wenatchee are tied for second honors, each having broken 24 out of 25, for a percentage of 96.

Fourteen were in the 92 per cent class, 16 in the 88 per cent class, 20 in the 84 per cent class and 16 in the 80 per cent class.

Of the upwards of 200 shooters who competed the opening day 78 shot for a percentage of 80 or better and the scores of others were over 80 per cent.

The shooters who broke 20 or more out of 25 in the opening matches, together with their scores, follow:

B. M. Hayes, Spokase, 25; Jim Hickman, Palouse, 25; J. A. Ford, Palouse, 25; George Arland, Garfield, 25; Porter, Kellogg, 24; Nicholson, Kellogg, 24; R. Houston, Kalispell, 24; Sanders, Pendleton, 24; Fred Streckman, Kalispell, 24; Billy Cochrane, Spokane, 24; Hahn, Lewiston, 24; L. E. Ovenden, Wenatchee, 24; R. A. Miles, Spokane, 23; B. G. Gregory, Spokane, 23; Lee Matlock, Pomeroy, 23; N. M. Ragan, Palouse, 23; Johnson, Kellogg, 23; Kennett, Kellogg, 23; Sebastian, Kellogg, 23; F. D. Stoop, Kalispell, 23; Thorp, Pendleton, 23; R. J. Robbins, Kalispell, 23; McNurien, Pendleton, 23; C. E. Oevens, Wenatchee, 23; Fred Peden, Garfield, 23; C. A. O'Connor, Spokane, 22; Mrs. C. A. O'Connor, Spokane, 22; T. B. Ware, Spokane, 22; Han Clodius, Pomeroy, 22; G. B. Joslin, Palouse, 22; M. L. Seymour, Potlatch, 22; R. C. Hill, Lewiston, 22; Taylor, Lewiston, 22; Johnson, Lewiston, 22; Roland, Kellogg, 22; Tobe Arland, Garfield, 22; C. M. Johnson, Wallace, 22; Ingersoll, Kellogg, 22; Thohr, Wallace, 22; Walker, Wallace, 22; Jennings, Wallace, 22; W. J. Hauser, Pomeroy, 21; H. I. Sawyer, Pomeroy, 21; F. M. Robinson, Pomeroy, 21; James Spence, Pomeroy, 21; B. F. Mann, Spokane, 21; Reuger, Spokane, 21; H. J. Geesey, Spokane, 21; Hugh McElroy, Spokane, 21; Robbins, Spokane, 21; G. C. Jewett, Palouse, 21; O. E. Lynch, Palouse, 21; D. M. Dudley, Palouse, 21; Dolph Coolidge, Palouse, 21; Thomas, Kellogg, 21; Jones, Kellogg, 21; Stillman, Pendleton, 21; Ingram, Pendleton, 21; Drumm, Lewiston, 21; Artie Hoffman, Wenatchee, 21; Elmer Turner, Sunnyside, 21; G. K. March, Spokane, 20; J. Shriver, Spokane, 20; D. Mars, Spokane, 20; R. B. McCornack, Spokane, 20; Al Weiseman, Spokane, 20; L. C. Carroll, Palouse, 20; F. Robinson, Pomeroy, 20; M. O. Lynch, Palouse, Teape, Kellogg, 20; Jackson, Pendleton, 20; U. G. Pogue, Wenatchee, 20; E. C. Johnson Jr., Garfield, 20; Werkheiser, Wallace, 20; Bromer, Wallace, 20; McConkey, Wallace, 20; S. F. Heitfield, Wallace, 20.

OREGON TO RESTOCK STREAMS.

Governor Withycombe Makes Report on Fish and Game Conditions.

[By James Withycombe, Governor, State of Oregon.]

During the coming two years the biggest problem of the Oregon Fish and Game Commission, from a sportsman's standpoint, will be the restocking of trout fishing streams. The advent of the automobile has greatly increased the accessibility of many of our best fishing streams, with the result that their supply of fish is being rapidly exhausted. To counteract this condition the Commission this year will try to double, if possible, its output of trout fry.

To make this possible, it is being suggested at the present Legislature that the fishing licenses be increased from $1.00 to $1.50 for the year. It would be the intention to utilize the added revenue for fish propagation purposes, and it is believed that from now on the fishing attractions of the State will improve rather than decline.

The Commission has also done much to stocfl the State with Chinese Pheasants. The bird was introduced into Oregon about a dozen years ago and has prospered splendidly. During the last two seasons there has been good shooting in the western portion of the State but due to exceptionally unfavorable winter weather conditions, coupled with hard hunting during the open season, the supply of birds is at present very low.

The Fish and Game Commission also devotes much attention to safeguarding and upbuilding of commercial salmon fishing interests on the Columbia and other rivers. The State Hatchery at Bonneville, where both salmon and trout are hatched, is the largest and finest in the United States.

In addition to the fish and pheasant propagation work, a thorough system of game protection is in operation, and a fish and game warden service is maintained in every county. Under the law now effective, the administration of the Department is in the hands of a Commission of five, of which the Governor is ex-officio chairman, with four citizens; two chosen from the western part of the State and two from the eastern.

Vernon Club.—Although a very stiff wind was blowing over the Vernon Gun Club traps on Sunday it did not seem to affect the shooting of Bill Hillus. The stellar tar hawk smasher stepped out and broke 59x60 clays in the trophy event. This is quite a remarkable score when it is taken into consideration that the wind made the targets go in every direction. Following are the scores:

	Practice	Trophy
William Hillus	..x..	59x60
Robert Bole	40x40	55x60
S. A. Bremer	..x..	58x60
William Pugh	34x40	53x60
J. Dierdoff	14x20	56x60
Moore	33x45	..x..
Geopfert	40x50	..x..
Rohring	17x20	..x..
C. E. Groat	36x40	57x60
Mrs. Groat	38x40	57x60
John Reid	..x..	49x60
A. N. Van Nest	15x20	39x60
Charles White	..x..	56x60

Los Angeles Club.—Although it rained hard all Washington's Birthday, twenty members of the Los Angeles Gun Club turned out and competed in a Washington's Birthday handicap. The shoot was at 50 targets. Two events were held. E. K. Mohler won in the first with a score of 45x50 from 20 yards. He was presented with a gold "take home" trophy. Mohler and Neil tied in the second event, each with a score of 48x50. Neil shot from 18 yards. The shootoff was won by Mohler. He broke 28x30 to Neil's 27x30. The scores:

Fifty-bird handictp—E. K. Mohler, handicap 20 yds., broke 45; Wm. Neil 18—44, Leigh Garnsey 17—44, H. Pfirrmann 20—43, C. W. Fish 20—43, F. H. Mellon 19—43, George Oliver 18—43, B. Carnahan 19—32.

Fifty-bird handicap—E. K. Mohler 20—48, Wm. Neil 18—48, Leigh Garnsey 17—46, C. W. Fish 20—41, F. H. Mellon 19—43, George Oliver 18—43, Carnahan 16—44.

Excellent scores featured the weekly shoot of the Los Angeles Gun Club on Sunday. L. J. Micka was the high gun with 99x100 smashes, which won for him five points on the Cline watch charm. F. H. Mellon was a close second with 98x100 breaks and E. K. Mohler was third with 97x100 smashes. The scores in the trophy event were:

L. J. Micka, 99, F. H. Mellon 98, E. K. Mohler 97, L. J. Petit 95, J. F. Dodds 95, W. A. Cornelius 93, F. H. Mellus 92, Geo. Melford 92, L. M. Packard 91, J. C. Famechon 91, C. W. Fish 91, A. Pachmayr 91, J. W. Meek 90, O. A. Evans 89, O. Council 88, H. Cline 88, Mrs. Pfirrmann 88, H. D. Blanchard 87, E. L. Rogers 86, Wm. Kennedy 85, F. H. Hall 85, Mrs. F. Mellon 84, G. Holohan 83, S. C. Miller 81, F. Hartmann 78, A. S. White 67, V. A. Rossbach 65, R. Hartmann 58, T. W. Neel 48, F. H. Teeple 46, G. L. Pulley 45, F. M. Gibson 44, M. D. Towne 43, T. B. Sloan 40, L. R. Mellus 38, L. H. Brown 37, J. H. Bauer 32, Mrs. C. McClean 15x25.

FISHING IN HAWAIIAN WATERS.

H. Gooding Field Writes of Visit of J. W. Jump and Prospects for Sport.

[By H. Gooding Field.]

Honolulu, H. T.—It is just a year ago since James W. Jump, of Los Angeles, Cal., broke the world's record for an afternoon catch of game fish, using regulation tackle. The event happened off Molokini Island, Maui, Territory of Hawaii.

Mr. Jump has just arrived in Honolulu again to try his luck and see if he can duplicate or go beyond the record he established, that of taking 300 pounds of game fish as follows: Two yellow fin tuna, 70 and 62 pounds; two ono (a cross between the giant mackerels and the swordfish), one 6 foot, weight 61 pounds, and the other 5 foot, 42 pounds; one barracuda, 3 feet 2 inches in length, and a number of smaller game fish, including the oceanic bonito, albacore ,etc.

That afternoon when Mr. Jump came back to shore he remarked, "Hawaii is the leading game fish center of the world." And it might be remarked that Mr. Jump has fished here, there and everywhere for game fish.

Get away from "Little Old New York," Mr. Angler, for a time, and try your luck with us. Much as I love the big city (my residence for 17 years), the attractions here appeal to me more.

Hawaii—the land of perpetual sunshine—is a full-fledged Territory of the United States, reached by regular steamers from San Francisco and Los Angeles (four and one-half days run). There are eight inhabited islands in the group, the largest being Hawaii; Maui, Oahu and Kauai are the other principal islands. The Territory has a total area of 6449 square miles, or a little more than 4,000,000 acres, being somewhat larger than Connecticut and Rhode Island combined.

From an angler's standpoint, Hawaii is a veritable paradise, as its waters teem with game fish of large size and great variety; the fish are landed with rod and reel all the year round. The climate is equable, and there are no sudden changes of temperature, no fogs, no disagreeable cold snaps and no intense heat.

The fish of the Hawaiian Islands were first officially recorded as early as 1782 by Broussonet from specimens obtained during Capt. Cook's third voyage to the islands. In 1903 the United States Fish Commission described 902 species of fish belonging to the region of the Hawaiian Islands, including a large number of the giant mackerels, such as the swordfish, tuna, oceanic bonito and albacore. With such available authentic reports, it is surprising that Hawaii is only now coming into its own as one of the world's greatest game fish resorts.

James W. Jump, of Los Angeles; Fred K. Burnham, of Martinez, Cal.—two game fishermen of international reputation—Gerritt P. Wilder, president of the Hawaii Tuna Club, and the writer, in four days last January—generally an off season elsewhere—killed two yellow fin tuna, 70 and 62 pounds; one long fin tuna, 18 pounds; three dolphin, length 4 feet, weight 16 pounds; 4 feet 3 inches, 20 pounds, and 4 feet 3 inches, 17 pounds, respectively; seven ono—a cross between the giant mackerel and the swordfish and a rare fighter—one 6 feet in length, weight 61 pounds; two 5 feet, 42 pounds each; two 5 feet, 41 and 40 pounds each; one four feet 6 inches, weight 38 pounds, and one 4 feet, 36 pounds; seven ulua—closely resembling a giant pompano, and a very game fish—total weight, 140 pounds; one kaku, length 4 feet, and a number of smaller game fish, including the oceanic bonito.

One week's fishing in February list, with regulation rod and tackle in the above waters, by Messrs. Jump, Burnham and Morris, of Denver, resulted in a catch of nine yellow fin tuna, three long fin tuna, two dolphin and a number of barracuda. The largest of the yellow fin tuna weighed 92 pounds and the smallest 47 pounds. During the week 700 pounds of game fish were killed.

From ancient times the native Hawaiians held the monopoly of the fishing in Hawaii, and probably the most peculiar feature of these fisheries from an early period was the well developed principle of private ownership of the fishes found in the open season and bays within a prescribed distance from shore. There are practically no fishery rights in Hawaii at the present time which affect game fishing.

The game fishes of the Hawaiian waters include the world renowned species of game fish, the giant mackerels, such as the leaping tuna and the long fin tuna; swordfish, resembling the tarpon in spectacular play; ocean bonito, California bonito, called the humming bird of fishes, being quick as a flash in the waters; albacore, dolphin, remarkable for its changeable and brilliant colors; tarpon ono, fierce fighter; ulua, exceedingly voracious; barracuda, of which there are 20 species; frigate mackerel, black sea bass and a number of common fishes.

Under the auspices of the Hawaii Tuna Club fishing competitions are held throughout the year, for which club buttons and prizes are awarded. Several prominent mainland anglers during the past year have won the coveted buttons. Silver cups and special awards are offered by the club and private donors, for which a number of visiting sportsmen are competing.

At Kihei, Maui, located in the center of the lee water Molokini game fishing grounds, club house and hotel accommodations have been provided for anglers. There is a concrete wharf, with launches and other boating facilities at this point, with good motor roads connecting it with Haleakala, the largest extinct crater in the world, over 10,000 feet in height, and many other interesting natural features of the island of Maui.

Making Use of Idle Moments.—In most localities there seems to be a legislative or unwritten law that makes Saturday afternoon a half-holiday. Very few stores can afford to grant such a holiday throughout the entire year, but employes of large banks, mercantile and industrial firms do enjoy the same weekly.

From May until December the lover of outdoor sports can always find tennis, baseball, football or trapshooting, but after December outdoor sport in most sections of the country ceases to be popular, at lease to the city fellow. There is one exception: In late years trapshooting has become an all the year round sport, and many clubs hold weekly shoots. Of course, sport lovers who have not yet become acquainted with trapshooting spend their Saturday afternoons and other spare moments at clubs, theatres or indoor sport events.

But how about the young man who lives on the farm? Winter time is really his joy season, for during the spring, summer and autumn he has very little time for pleasure. However, when he does seek recreation he holds to the outdoors. He kills time in the fields and woods. Hunting is his favorite pastime. Nearly all farmers have done more or less shooting, but at the present time, in many states, game laws are so rigidly enforced that "open" seasons are very short, and in other localities game is scarce, hence clay birds are pleasure producers.

Where the people of the farm do not live near a gun club, they find a good substitute in the handtrap. With this device, some shells and targets, the young man can give the whole family an afternoon of pleasure. Besides, once a trapshooter he becomes a part of a sport so fascinating that it has captured the fancy of over 500,000 Americans, and trapshooting also improves the participant's accuracy and quickens his judgment so that when it is his fortune to go afield in a game country his bag limit is assured.

Farmers' Trapshooting Clubs.—One of the many delightful phases of trapsbooting affiliation and one, by the way, which is comparatively new, is The Farmers' Community Gun Club.

For many years, with the exception of a few individuals in farm sections who would attend an occasional trapshooting tournament, the young men were content to do a little hunting in the fall and winter, feeling that time and distance precluded the possibility of their indulgence in this fascinating sport.

Today, however, we see marked changes taking place in this respect. Regularly organized community transhooting clubs are beginning to dot our farming sections and it is indeed a fine example of American independence; it was not convenient for the farmer to go to those distant traps, so he is bringing the traps to the farm.

And what a get-together sport it is! Though they live miles apart they know one another intimately, the general store having been their meeting place for years and during those years each has studied the ability of the other as a rabbit, quail or duck shot, either through hearsay, observation or personal boasting.

The gun club, however, leaves no room for argument, for the scores stand out in mute judgment and in place of the one-time boasting, arguments and doubt, a wholesome friendly rivalry holds sway.

Only a Few Ducks Die.—The fact that but few ducks have died this fall on Tulare Lake has again upset the theories regarding the peculiar malady which periodically has affected the water-fowl on this lake. If the water of the lake is responsible for the disease it seems strange that last year, when the lake was the dryest it has been for some time, only a few birds were found dead. This year, with an abundance of fresh water and the lake 16 to 18 miles across, no serious outbreak of this disease has occurred. On the other hand, in 1910, when the Kings River ran into the lake from the middle of March until the middle of October and the lake was even larger than at present, the largest death toll of any year resulted. It is to be hoped that the decrease in the number of affected birds noted during the past two years will continue and that the trouble is mainly over.—E. W. Smalley.

Eureka Blue Rock Club—The Eureka Blue Rock Club is laying plans for the most extensive season in its history. A number of events are programmed that should provide interest and amusement for the members. The schedule as announced is as follows:

March 11—Trophy shoot, fifty targets, class events.

April 1—Merchandise shoot, fifty targets.

April 22—Trophy shoot, handicaps based on previous shoots.

May 13—Registered tournament.

The experiment of Walter Hobart in raising wild ducks is looked upon with especial interest by the California sportsmen. Hobart, who is an all-around sportsman, has his own game preserve; so he is able to conduct his experiment on a large scale. He has begun with several hundred ducks.

KENNEL NEWS OF THE COAST.

Mr. Coates Is Selected to Judge the Show at Seattle This Month.

The Arizona Kennel Club has fixed dates for its second show at Phoenix on April 3, 4 and 5, and this year they can confidently anticipate a good representative entry from outside exhibitors. The selection of an all-rounder this time will raise the fixture from a purely local affair to one that we should now be able to look forward to as a regular yearly three-point show. Chris Shuttleworth takes all breeds and their selection is sound. It is questionable if there is a judge more generally respected in all the West for his thorough knowledge of his work and fearless placings of the dogs exactly where they belong, whether owned by friend or foe. He should have a good following from California.

The show dates follow conveniently after Pasadena and the trip is made comfortably overnight in twelve hours, so expressage will not run high. Exhibitors will be well treated by the club officials, who are a very active bunch and are working hard for a successful show. The secretary and superintendent is Mr. Joe M. Murphy, and no one who reads the kennel magazines can deny that M. Joe is a live booster. Premium list will be liberal in trophies and other specials and will be mailed the middle of March. The secretary's address is Box 662, Phoenix, Arizona.

✤ ✤ ✤

The annual show of the Seattle Kennel Club is now fixed for the last three days in March. If this club touches its last year's figures it should hold the Pacific Coast record for another year.

✤ ✤ ✤

The board of governors corresponded with several Eastern judges and with Mr. Coates of Vancouver, B. C., and finally decided upon Mr. Coates as judge for the forthcoming show, which will be held on March 29, 30 and 31. The decision of the governors in choosing Mr. Coates for a judge has proved dissatisfactory to quite a number of the members, a great many being in favor of an Eastern judge, but we have no doubt that he will give entire satisfaction and that everything will pass off pleasantly.

✤ ✤ ✤

Efforts are being made to pull off a 5-point show and as the last show was a 4-point, there is no reason why it should not increase to a 5-point this year. A great many California people and some Eastern people are corresponding already in regard to the show and no doubt a great many of them will attend and bring their dogs.

✤ ✤ ✤

Dog owners throughout the country will be pleased to learn that the status of a dog has been established by a ruling of the New York State Supreme Court, handed down by Justice Irving S. Hobbs, in a test case tried at Fulton, that state, brought by Mr. F. L. Ingersoll against three brothers of the name of Lanning. Mr. Ingersoll claimed that the Lannings killed a foxhound and a setter belonging to him, and which he valued at about $150. The defendants claimed that the dogs had run on their farm and created havoc among the Belgian hares that were being raised there for the market; the plaintiff alleged that the Lannings killed the dogs and buried them on the place, and the suit was for the recovery of the value of the dogs.

The plaintiff did not win the suit and all because his dogs were not licensed ,though Mr. Ingersoll proved, through his lawyer, that this was no fault of his, as he had applied for licenses a few days before the killing, at the City Clerk's office in Fulton, and that the clerk in the office had told Mr. Ingersoll that they had not yet begun to issue dog licenses for the year, which fact, Mr. Ingersoll's lawyer claimed, showed conclusively that his client had acted in good faith in the matter and he should not be made to suffer because of the Fulton County Clerk's failure to provide a license when application had been made. The Court, however, granted a non-suit to the defendants, deciding that the statute was mandatory, and refused to allow the case to go to the jury.

Mt. McKinley Refuge.—New York City.—The bill making the Mt. McKinley region in Alaska a national park only awaits the President's signature to become a law. Through the act 2200 square miles of country rich in forests and wild life and characterized by wonderful scenery are set apart for all time as a refuge for wild life and a playground for the people.

The Mt. McKinley bill was strongly advocated by the Boone and Crockett and Camp Fire Clubs and the American Game Protective Association. It also had the support of Secretary Franklin K. Lane and the Department of the Interior. Senator Key Pittman and Representative James McClintic and James Wickersham led the fight for the bill in Congress.

Among the species of wild life that will be specially benefited by the action of Congress are mountain sheep, moose and caribou. Mt. McKinley is the first game refuge to be set aside in Alaska, but it is hoped another will be established shortly in the Kenai Peninsula, the home of the giant moose.

There was urgent need of action in the present instance, as the region now given protection was menaced by a large increase in the population of the town of Nenana, near by, and also by the approach of a railroad.

Stock and Farm Department

FEEDING YOUNG DAIRY CALVES.

Feeding the calf should begin before it is born, says Farmers' Bulletin 777, Feeding and Management of Dairy Calves and Young Dairy Stock, recently issued by the U. S. Department of Agriculture. Poorly nourished cows give birth to weak, puny calves which are hard to raise. Cows which have an abundance of palatable and succulent feed are rich in good body flesh and healthy, thrifty condition at calving time and are more likely to produce well-developed, strong, and sturdy calves, which will respond to proper feed and care.

The calf should always receive its mother's milk at first, as the colostrum, or first milk, stimulates the calf's stomach and other digestive organs to action. Most dairymen prefer to keep the calf with the cow for about 48 hours immediately after birth. It may be best to allow a weak calf or one that does not gain strength readily to remain a longer time, but it is sometimes difficult to teach the calf to drink after sucking the cow for a time, and serious trouble may result from its failure to obtain food.

Successful raising of calves requires absolute cleanliness. Calf pens should always be kept clean and be supplied with plenty of dry bedding. Discarded feed should be removed from the feed boxes, which should be thoroughly brushed and cleaned each day. All milk fed should be fresh and clean, which is true also of other feeds. Milk pails should be scalded thoroughly with boiling water, or sterilized with steam if possible.

Milk from cows having a communicable disease, as tuberculosis, should be pasteurized (heated to 145 degrees F. and held at that temperature for 30 minutes) before it is fed to calves. Separated milk from a creamery also should be pasteurized, because it it practically impossible to know that such milk is free from infection.

Better results are obtained by feeding young calves three times a day, with the periods between feeding as nearly equal as possible. When fed in this way the calf does not overload its stomach, and the digestion of the feed is more evenly distributed throughout the 24 hours. Regularity in feeding is important. When calves are fed but twice a day, the feeding should be as nearly possible 12 hours apart.

At birth a 50-pound calf should have about 8 pounds of whole milk a day, while a 100-pound one should have about 12 pounds. For the first four days milk from the dam should be fed, then that from the other cows in the herd, preferably not from any that are nearly dry. Milk containing not more than 4 per cent butter fat is considered best.

At the beginning of the third week skim or separated milk may be substituted for whole milk at the rate of 1 pound a day. The daily ration may be increased from 2 to 4 pounds, depending upon the vigor of the calf. When the calf does not drink eagerly what is offered, the quantity should be cut down. The ration at the end of the third week usually should be approximately one-half whole and one-half separated milk. During the fourth week the change should be continued until by the end of the week only separated milk is fed, unless the calf is very delicate. With especially vigorous calves the change to separated milk can be made about a week earlier. The quanaity fed can be increased gradually to 18 to 20 pounds a day.

Six months is probably a good average at which to wean calves from milk. The age depends upon the cost of the milk in relation to the value of the calf, its breed, size, vigor, etc. The season of the year and the other feeds available also must be considered. When the best of hay, silage, and a good variety of grains are available, or when good, succulent pasturage can be provided, the calf can be weaned earlier; also the stronger and more vigorous the calf the more expense the owner is warranted in developing it, and the later it will probably be weaned. If skim or separated milk is plentiful, calves may be fed profitably until 8 or 10 months old.

When the calf is in its second week it should begin to receive grain, and when one month old it should eat about half a pound a day. After this time the quantity of grain may be gradually increased, feeding all that the calf will eat until 3 pounds a day is reached, probably during the third month. Grain is fed to supplement separated milk should never be mixed with the milk. It is questionable whether the preparation of grain in any way, such as soaking or boiling, is advisable under most circumstances.

Wheat bran is eaten readily by young calves. Corn has an excellent physiological effect and to a great extent may take the place of fat removed from skim or separated milk. Experiments tend to show that corn fed to calves should be cracked rather than finely ground. Ground oats are good in grain mixtures when available, but in many cases costs much more per unit to feed than corn and bran. The following grain mixtures are recommended in the bulletin:

(1) Three parts cracked corn and one part wheat bran.

(2) Three parts cracked corn, one part wheat bran ,and one part ground oats.

(3) Three parts cracked corn, one part wheat bran, one part ground oats, and one part linseed meal.

(4) Five parts cracked corn, one part wheat bran, one part ground oats, and one part blood meal.

(5) Oats, ground.

Clover hay, alfalfa hay, or the most palatable roughage available should be given the calf after the second week. Alfalfa is liable to cause scours, and should be fed sparingly at first and increased only after the calf gets accustomed to it. At first, hay should be furnished only a handful at a time and be placed so that it cannot be soiled. For the first six months, at least, the calf should receive all the roughage of good quality that it will eat up clean. When the calf has access to good pasture during the first six months, it need not receive other roughage. It is not advisable, however, to have the calf under two months of age on pasture in the early spring.

SEGIS FAYNE JOHANNA 114656.

THE MOST SENSATIONAL COW IN THE WORLD

A new world's record for all breeds for butterfat production in the seven-day division was established by the pure bred Holstein-Friesian cow, Segis Fayne Johanna 114656, in a test ending January 8, 1917. This remarkable cow produced 50.68 pounds of butter in seven consecutive days, and the official test was conducted by supervisors from the New York State Agricultural College, Ithaca, N. Y.

Segis Fayne Johanna, by her wonderful achievement, is now the most talked of cow in the world, and her sensational record marks a signal triumph in the forward march of the Holstein-Friesian breed.

She was bred by A. A. Cortelyou, of Somerville, N. J., and her present owner is Oliver Cabana, Jr., proprietor of Pine Grove Farms, Elma Center, N. Y., at which noted establishment four other world's record holders have been developed during the past six months.

The new world's record holder freshened at the age of 1 year, 2 months and 17 days. She is four-fifths white, weighs about 1450 pounds, and is sired by King Fayne Segis 46767. Her dam is Vikina Johanna 64385, a daughter of Johanna Rue 3d's Lad and Vikina Clothilde.

The test was made under perfect conditions, absolute quiet, systematic feeding and milking, and a roomy stall constructed of clean white enameled walls.

Segis Fayne Johanna's seven-day production of over 50 pounds of butter surpasses that of Hester Aaltje Korndyke, the previous world's record holder, by 3:91 pounds. In their present warranted state of elation, enthusiastic Holstein-Friesian breeders over the dairy world at large now marvel at the accomplishment of what was allost impossible and ask, "Where will it end?"

———o———

The Holstein-Friesian heifer, Jewel Pontiac Segis 229261, has broken the world's records in the junior two-year-old class of the division covering tests begun not less than 240 days after calving. She holds the world's record for both milk and butter in the sixty- and ninety-day divisions and has now broken the records for milk and butter, and the combination record for both, in the eight-months-after-calving division. Jewel Pontiac Segis was bred and is owned by J. M. Hackney, of Arden Farms, Inc., of St. Paul, Minnesota. Her sire is King Segis Pontiac Count 93909, and her dam is De Kol Pontiac 142184.

✤ ✤ ✤

Fred Johnson, the enterprising and progressive Carneros stock raiser, has received a fine yearling Duroc Jersey sow, weighing about 500 pounds. The valuable animal was bought by Mr. Johnson from the Economy Stock Farm of Shenandoah, Iowa. Mr. Johnson also has recently purchased a gilt from the University Farm at Davis and a sow from Hermann Toeller of West Point, Nebraska.

The Venadera herd of Jerseys, owned by Guy H. Miller, of Modesto, has added to its long list of honors the distinction of having a cow, Anita of Venadera, herself in the register of merit, with seven daughters credited with the same distinction. The new honor has just come to Miller's herd through completion of a year's authenticated test by Stella of Venadera, Anita's seventh daughter, who, beginning the test at one year, eleven months old produced 327 pounds 6 ounces of butterfat from 5,352 pounds of milk in the year. Through the test just made by Stella of Venadera, the mother, Anita, has tied the wonderful brood cow, Lass's Jewel, bred by H. H. Wheatcraft, of Indiana. One of Anita's daughters, Wanda of Venadera, won the senior championship at the State Fair at Sacramento in 1912, and was one of the five cows from Miller's herd which won the heard championship at the Panama-Pacific Exposition in 1915. Anita's mother, Nettie Underwood, was one of the first cows with which Miller started his herd twenty years ago. Miller's herd bull, Altama Interest, has been blue ribbon winner at many district and state fairs.

———o———

Percheron Futurities in 1917.

Business was transacted at the regular winter meeting of the Percheron Society of America which will be of interest to live stock breeders and horsemen generally.

Leading state fairs and expositions throughout the United States were recognized on the same basis as a year ago, same classification and prizes being granted. Cash appropriations of $200 each were made to the Futurity stakes already established at the Iowa, Illinois and Ohio State fairs, and at the International Live Stock Exposition, and provisional appropriations of $100 each were made to the futurity stakes which are being established to be held at the Indiana, New York, North Dakota ,and Wisconsin fairs. In the case of the four last named, complete arrangements for the local support of such futurity stakes have not been entirely completed, but there appears to be no doubt that arrangements will be consummated and futurities held in 1917.

A subsidiary classification was provided whereby the Percheron Society of America will recognize some smaller shows falling in the classification of district or county shows, where a classification and prize list for Percheron horses has been provided which will meet with the approval of the Percheron Society. Only a limited number of these smaller shows will be recognized this year.

The admission of Percherons heretofore recorded in the Forney or French Draft Association, tracing to imported stock, or to animals of record in the Percheron Society, has aroused great interest, and a great many breeders have been making every effort to avail themselves of the opportunity to record their animals before the time limit expired on February 12th. The delays incident to obtaining necessary evidence have been such that the Board of Directors granted an extension of the time limit for the admission of such animals until May 1, 1917. The officials of the Forney Association have gladly lent all possible aid to breeders desiring to transfer their Percherons to the Percheron Society of America, and J. F. and J. A. Forney themselves (J. A. Forney being the Secretary of the so-called Forney Association) completed applications on February 8th for the registration of 117 Percherons heretofore recorded in the so-called Forney Association which they desired to have transferred to the Percheron Society of America. This frank admission on the part of the officers of another organization of the desirability of getting their Percherons into the Percheron Society of America should influence many of the smaller breeders who are not fully aware of the importance of availing themselves of the opportunity under the present suspension of the rules, by which such animals recorded prior to Dec. 2, 1916, in the minor associations can be recorded in the Percheron Society.

———o———

The Holstein-Friesian heifer, Miss Valley Mead De Kol Walker 250936 has broken the record for fat production in the senior two-year-class of the division concerning tests begun not less than 240 days from freshening, by producing in seven consecutive days 470.1 lbs. milk containing 16.942 lbs. fat, with the test still in progress. She freshened at the age of two years, six months, twenty-five days, and began her test 243 days from freshening. Her prior record, begun fifty-eight days from freshening, is 534 lbs. milk 20.546 lbs. fat. Her sire is Prince Gelsche Walker 81663; her dam is De Kol of Valley Mead 51218. She was bred by the A. W. Morris & Sons Corporation of Woodland, California, and she is now owned by Mrs. Anita M. Baldwin, of Santa Anita, California.

✤ ✤ ✤

Keeping them sound is a harder job than making them sound.

THE FARM

How the Corn Plant Grows.—The corn plant needs leaves and roots to manufacture the material that makes up the plant. This means that the progress is slow at first as the roots and leaves are small, the first thing the plant does being to build up the stem, leaves and rots. When this is done it manufactures the material for filling the ear. This means that when the corn plant has tasselled out it has just built the frame work and that most of the food value in the corn plant is produced after this stage. The plant does not have the machinery for manufacturing food very fast, before it has built the roots, stems and leaves. After tasselling out it can produce more food value in a week or ten days than it has from the time it came up. This shows the importance of producing corn that will ripen or nearly get ripe, as it is after the corn plant attains its full size that it produces the most food value.

Bull associations reduce the cost of the services of a pure bred bull for the dairy herd. The average annual cost of service in a large number of associations investigated by the United States department of agriculture was $3.48 for each member.

For a few days after calving a cow's drinking water should be lukewarm. In addition to alfalfa or clover hay and a small quantity of corn silage, she should be fed fran masnes or a small allowance of bran, oil meal and oats. After about three days she may be placed on more solid food. At least thirty days should be taken to getting her up to full feed.

A "365" Day Liniment
YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."
Get It. Relief. Gombault's Caustic Balsam will give you immediate A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.
Gombault's Caustic Balsam
The Great French Remedy Will Do It
It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.
"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that."—Ed. Rosenburg, St. Ansgat, Ia.
Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."
A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.
Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."
A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.
Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

¶ We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

Number 2 in a Series of Six Talks about the Evolution of Firearms and Ammunition

The Sling

The Sling—A Weapon of Primitive Man

SOME primitive hunter, keener of mind than his fellows, found that he could hurl a stone with greater speed and accuracy with his skin girdle than with his hand. The sling was born. We find the sling or its modifications in use up to modern times. It was employed by the Assyrians, the Egyptians, the Israelites and even in the armies of Europe until a hundred years ago. It is used today by the Syrian shepherds upon their historic hills.

The sling represents the second stage in the evolution of modern firearms and ammunition. It is the link between the hand-thrown stone and the bow and arrow—very important because it gave prehistoric man the first differentiation *between* arms and ammunition.

For one hundred years the name Remington has been identified with arms manufacture. Eliphalet Remington welded the first Remington gun barrel in 1816. Since then, the Remington reputation has been growing with marked advancements from decade to decade. Remington UMC has become a general term, both for firearms and ammunition. Absolute accuracy and dependability characterize Remington UMC products.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

PETER McKLYO 2:06.
Son of Peter the Great and Klyo by Jay McGregor.
Holder of the Pacific Coast record for trotting stallions.

DON CASTANO

Needs No Introduction to the Public

HIGHLAND MONARCH

was the winner of the aged stallions, and class for stallions and four of his get at the California State Fair in 1916.

SAN VICENTE

The Junior Champion Stallion of California

In the Yearling Futurity at the State Fair in 1916, five of the six money winners were by Don Castano and Highland Monarch.

The two-year-old Futurity was won by a Highland Monarch colt.

The $100.00 Trophy, offered by the American Saddle Horse Breeders' Association for the best stallion or mare, three years old or under in California, was won by a Highland Monarch colt, and two years prior it was won by Highland Monarch himself.

If you are going to breed your mare, why not mate her with one of the above stallions and have a winning colt?

The service fees for Don Castano and Highland Monarch are $50.00. Arrangements for San Vicente private.

To encourage breeding in this State we will pay the freight charges on mares to and from any part of California, but will not, of course, be responsible for any accidents which might happen in shipping.

San Vicente Rancho,

1023 Investment Building **Los Angeles, Cal.**

SAVE-The-HORSE Will Cure It!

(Trade-Mark, Registered)

OVER 200,000 cases of lameness successfully treated with **Save-The-Horse.** It is a by-word now among noted horsemen and breeders that **Save-The-Horse** is a prompt-acting, sure-cure remedy for Ringbone—Thoropin—**Spavin** or **Any** Shoulder, Knee, Ankle Hoof or Tendon Disease, no matter how old, serious or complicated.

NO BLISTERING. HORSE WORKS AS USUAL.

That is why we sell Save-The-Horse with Signed Contract-Bond to return money if remedy fails. Write for copy of this contract and unquestioned proof!

Our FREE 96-page BOOK makes it possible for you to diagnose and treat cases, and our free expert veterinary's advice is here to help you if you are not sure. **Don't run the risk** of having horse laid up when you need him most. Keep a bottle of Save-The-Horse on hand, and be prepared for any emergency. Write today for copy of Contrace, BOOK and Advice—all Free. Be prepared!

$3,000.00 GUARANTEED

(FOALS OF MARES COVERED IN 1916)

To Trot and Pace at Three Years Old

TO BE GIVEN UNDER THE DIRECTION OF THE

California State Agricultural Society 1920

Entries to close April 1, 1917

$1,800 FOR TROTTING FOALS $1,200 FOR PACING FOALS

MONEY DIVIDED AS FOLLOWS:

TROTTING DIVISION	PACING DIVISION
$500.00 to 1st Heat	$350.00 to 1st Heat
$500.00 to 2nd Heat	$350.00 to 2nd Heat
$500.00 to 3rd Heat	$350.00 to 3rd Heat
$300.00 to Horse Standing Highest in Summary.	$150.00 to Horse Standing Highest in Summary.

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on April 1, 1917, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1917; $5.00 December 1, 1917; $5.00 on yearlings April 1, 1918; $10.00 on two-year-olds April 1, 1919; $10.00 on three-year-olds April 1, 1920.

STARTING PAYMENTS—$25.00 to start in pacing division; $50.00 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all others horses to go to the barn.

Trotting division heat purses $500.00. Total purse $1,800.00.

Pacing division heat purses $350.00. Total purse, $1,200.00.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $150.00 in pacing and $300.00 in trotting divisions goes to the horse standing highest in the summary; distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1919, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there shall be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Rights reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

JOHN M. PERRY, President. CHAS. W. PAINE, Secretary.

Pacific Coast Trotting Record

Peter McKlyo 58009—RECORD 2:06

Cal. License Pure Bred No. 105

Sired by

PETER THE GREAT 2:07¼ (sire of 50 in 2:10 list, including Miss Harris 2:01¼, Peter Volo (4) 2:02, Peter Stevens 2:01½, Peter Mac 2:03, Mabel Trask 2:03¼, etc.), dam KLYO by Jay McGregor.

He is from one of the greatest families on his dam's side in the books, as the performances of Susie J. 2:06½ and Trampfast 2:12¼ prove beyond doubt.

Peter McKlyo is the Greatest Son of Peter The Great

westof of Kentucky and is destined to be one of the world's greatest sires.

He is the only son of Peter the Great five years old with two colts in the list. He was bred to three mares as a two-year-old, only two of his colts being handled,—Charlotte McKlyo, winner of breeder's record 2:25¾, and McKlyo Boy, winner of the two-year-old division Breeders' Futurity Stake, record 2:23½. It can be also said as a matter of record that he is one of the greatest five-year-old trotting stallions ever owned in the state of California, and one of the best individuals to be found in any country.

HE WILL MAKE THE SEASON OF 1917 AT

James Thompson's Training Stables

State Fair Grounds, Sacramento

TERMS: $100 FOR THE SEASON.

Usual return privilege. Mares pastured at $5 per month. Good care will be taken but no responsibility assumed for accidents or escapes. For further particulars address,

WHETHER it be in "Sunny Southern" or "Northern" California that one happens to be tr one interested in the production of live stock impressed with the interest being taken by t meets here and there, whether they be con men, bankers, railroad men, sporting men or in the accomplishments of California liv breeders. The breeders, naturally, have app what they were accomplishing all along; h they have had a lot of uphill pulling and wi cism only for a reward. However, now, o hand, one hears of this breeder's great sal man's splendid show ring winnings and the record of the other's cows. It seems that every one in the state is taking pride in the accomplishments of their live stock. In many instances one hears some heated arguments between residents of one county and the other over which county has the best live stock; a sure sign of interest by all concerned.

There are many reasons why the success of live stock creates more interest than agricultural activities alone; in the first place, it will not be successful live stock unless the interest is there. The breeder must take a lot of pride in his animals, both individually and collectively. Of course, the financial interest is usually paramount. But the best results will not be obtained in breeding live stock unless that personal interest and pride is uppermost in the mind of the breeder. When the neighbors, too, get interested, the success of the business as a whole is assured and it is at that point that the citizenry of California has just arrived, and means more to the interest than any other eventuality.

Every one knows well and good that just the success of the breeder has not so thoroughly awakened the public. What is it that has brought about this most important factor in the business? It is the state and district fairs and the public sales. They have brought the herds of every breeder together at their county fair; then the winning herds of all counties to the state fair. It has been the most effective weeding out process that has ever come to California, this competition, and it has created an incentive to the defeated ones to own the best, and finally, it has caused the breeder of the "harum-scarum" kind to want to improve his herd; it has opened his eyes and brought the one important subject before his vision—that with the present price of land and feed, a better class of stock must be produced.

The change has come, as it does in any business. No matter whether it be in selling dry goods or pigs, when the business thrives and prospers, a change in management has taken place. Farmer-stockmen of California are just beginning to change their methods and their business is becoming more prosperous and interesting.

THERE can be little doubt as to the popularity of racing when one glances at the entries made for the spring meeting of the Westchester Racing Association at Belmont Park. Taking the classic events, such as the Metropolitan Handicap, the first of the series to be run each year, generally in May, it has eighty-five animals named as against the fifty-seven for the race decided last spring and the Suburban Handicap is even greater in its gain. The two largest individual nominators are A. K. Macomber, with eighteen cracks named for each race, and Harry Payne Whitney, who enters eight of his three-year

At a meeting, held last week in Chicago, for the purpose of discussing the present condition of turf journalism and promoting the efficiency of its service to horsemen, the Turf Journals' Protective Association was formed by representatives of the following publication, either personally present or presenting written propositions for membership:

American Horse Breeder, Boston, Mass.
American Sportsman, Cleveland, O.
Breeder and Sportsman, San Francisco, Cal
Canadian Sportsman, Grimsby, Ont.
Horse Journal, Washington C. H., O.
Horse Review, Chicago, Ill.
Horse World, Buffalo, N. Y.
Spirit of the West, Des Moines, Ia.
Trotter and Pacer, New York City.
Western Horseman, Indianapolis, Ind.

These ten publications constitute the entire body of turf journals now issued which either wholly or in part are devoted to the cause of the light-harness horse. The association which they have voluntarily formed has for its object the general betterment of turf journalism as a whole, and the improvement of each paper individually. It has for some time been recognized by the publishers that this could only be accomplished by an association taking concerted action with a view to eliminating the abuses of which the turf press has been the victim—we refer to the irresponsible advertiser and others of that ilk. No one outside turf journalism itself has any conception of the manner in which the businesses of its publishers have suffered in this manner, and as long as no joint action was taken, it was impossible for any protection to be secured.

Hereafter, we desire to state, business patrons whose accounts with any member are not satisfactorily adjusted within a reasonable length of time will be refused credit by all members of the association until such obligations have been discharged.

This step is intended not only to protect the turf press, but its legitimate advertising patrons, as well as all persons doing business through its columns. Experience has demonstrated that the advertiser defrauding the publisher who has published his advertisement, will in virtually 100 per cent of cases, also defraud the general public or the individual horsemen who enter into relations with him.

THE IMPORTANCE OF FAIRS.

Secretary Sponsler, of the Kansas State Fair, is responsible for the following regarding the worth of fairs in developing a higher state of culture:

It takes time and brains to produce prize-winning exhibits at the good fairs.

It takes patience, judgment and cleverness to produce the very best.

The fair is an exhibition of samples which others may strive to equal or excel.

Try to beat a prize winner and see what it takes

ture, is the secretary. [illegible]
ico, a committee was appointed to see [illegible]
propriation was taken care of by the present legislature, and from every indication it seems that they are going to have results. The following is a portion of a letter from D. Clark Thomas, one of Missouri's best known stock men and fair directors, which has been published in every country newspaper in Missouri:

"As the wealth of the nation is derived from the ground, and the agricultural fairs educate the farmer to obtain better blood, feed properly, and realize more for their feed and labor, and thereby put more money into circulation, it is to the interest of every banker, merchant, lawyer, doctor, farmer, laborer, and every individual in the state of Missouri that the agricultural fairs be maintained.

High cost of living is due, partially, to lack of knowledge of the farmer to produce the most possible from the resources at his command.

Many fairs have, from our agricultural college, exhibits with instructions imparting information to the farmer, how to rotate his crops, how to rebuild and preserve the fertility of the soil, how to raise more wheat, more corn, more vegetables, and other foods on which our race subsists.

When as much state aid as Iowa and other states furnish, or sufficient amount that it may be possible for all of our fairs to call on agricultural colleges for exhibits and teachers to impart knowledge to the masses, on soil preservation, and how each man can produce from one-third to one-half more on the same number of acres and not leave our soil destitute of fertility for future generations, it will then be that the importance of the agriculture fairs become so great to the world that their value to the American people can scarcely be estimated.

Our agricultural colleges are of very great value to the world, but are not appreciated by the masses; they educate the farmer boy, that has means to attend, and if he will remain on the farm his influence will be for good, but what we need at the present day is to educate the middle aged and those older, who are the present tillers of the soil and producers, that they do not lose the fertility of the soil to so great an extent that it will take our young agricultural student a generation to replace.

I know from observation and personal experience that much of our soil here produces a third less than it did 35 or 40 years ago.

The way to reach the middle-aged men and older ones is through our agricultural fairs, which they attend in great numbers, seeking advanced knowledge by observation and otherwise.

You can reach "the man behind the plow" through agricultural fairs better than any other source, and consequently another reason why state aid should be afforded for their maintenance.

The great number of fairs that have failed, in the past, is positive evidence that they cannot permanently exist without help from some other source than within, and from what other source should they expect it than from their own state? Therefore, all who are interested in the success of Missouri and the welfare of its citizens should use their influence for state aid to agricultural fairs.

D. CLARK THOMAS,
Supt. of Live Stock,

tetson Working Eleven Good Ones.

ever one hears of John B. Stetson, he knows
aking winners, whether it's hats or horses.
ornia, however, and among the rail birds, the
f John B. Stetson is as familiar as it is to the
ın commercial lines. Of course, our John B.
ı, trainer and developer of speed horses,
know any more about making hats than the
John B. does about making trotters; however,
now how to make winners in their particular
. Mr. Stetson is working 11 head; eight of
e property of the Midway Stock Farm, Kear-
ebraska, all youngsters or green ones, which
selected in California for the farm and which
ɔreparing for the California races, unless oth-
notified to take them East. He is working
C. A. Harrison, the well known Seattle sports-
nd one of his own.

Midway horses are Hal Royal, four-year-old
ɔy Hal B., dam by Satin Royal; The Empress
en trotter six years old by Carlokin, dam by
ɔ; Maymonio, three-year-old pacer by Demo-
ım Mayme Airlie by Prince Airlie; Adioo
aged trotter by McKinney, dam by Direct;
earling trotters by Robert Bingen 2:11¼ out
ta Lockheart, Woodland Bonnie Derby (dam
e in list), and Belle by Diablo. These horses
elected by Mr. Stetson after several weeks'
and all have made good his first impressions
ı. He is getting some good time out of them
ighly pleased with his purchases, all of which
ɔught at reasonable prices and with small ex-
ttached to them.

Hal, a four-year-old pacer by Hal B., dam Touchet, owned by C. A. Harrison of Seattle, is one of the most attractive horses I have seen since coming to the coast. He is a breedy, well developed fellow, with the fineness, style and action of a saddle horse; in fact, if put under a saddle he would come as near being the three-gaited type they are so crazy about, as any horse I know of. He is not a big horse but looks big and his clean, flat bone and good feet will carry him many a fast mile without telling on him. If I were commissioned to buy the most attractive pacing prospect in California I do not know where I could find one that comes so near making good. Harrison, however, realizes this too, and I don't suppose would consider letting him go. He has only been worked a few weeks; three months ago he was unbroken, but he has already gone a mile in 2:30 and made the last quarter in 35 seconds. He will be "there" when the first class is called, and barring accidents will be just as good at the end of the season; he is that kind.

The other horse owned by Mr. Harrison is Chris the Great, a four-year-old trotter by Peter the Great, dam Miss Fairbault by Axworthy; 2d dam by Prodigal. This horse went a mile in 2:16 as a three-year-old and his winter's work has brought about great results. Being by such a sire as Peter the Great and having for his dam's ancestry two such famous brood mare sires as Prodigal and Axworthy, this horse has a just claim in everything that is said of him, and according to his trainer will make the fur fly this year.

Mr. Stetson owns personally one of the best horses at the track, Joe Walker, a four-year-old trotter by Kentucky Todd; dam, Fair Recluse by Moko. This horse went a mile in 27 as a two-year-old and in his mature form bids fair to go some fast heats this year. Another good one in the Stetson string is Palitea, a six-year-old pacer by Palite, dam by Alexander Button. He won two heats last year in the 20 class at Dixon. All the Stetson horses are getting hard work and are in fine fettle. They would be ready for the word next week if it were given.

California horse lovers always expect something good from Walter Tryon, but this year he is going to surprise the most enthusiastic of his followers. He has nine of the best horses he has worked for some time, eight of them owned by the well known horse lover and capitalist, S. H. Cowell of Santa Cruz. They are showing some good trials and all are in the pink of condition, probably better described by the old darkey who declared "Dey sho' am bloomin'." The youngsters in the stable are especially attractive and their trainer is living in air castles. Mr. Tryon's horses have all wintered fine, are ready to take the word and stay until the finish. They are: Rastus, the aged paver by Liberty Boy; John Mack 2:12¼, by George A. Fuller; Albaloma 2:08¼, bay gelding by Almaden; Mountain D., green pacer by Charley D. by McKinney; three-year-old filly by Peter the Great; a three-year-old stud by Peter the Great, and a three-year-old mare by Teddy Bear out of a mare by Zombro, all owned by Mr. Cowell; a three-year-old trotter by Peter McKlyo, entered in stakes, owned by Sam Gault of Sacramento, and a bay mare, pacer, by Demonio, owned by G. W. Davis of Vacaville.

"Everybody has been buying saddle horses," writes E. A. Trowbridge of Columbia, Mo. "Of course, there are always a few on the market. The mule trade here has been the best in years."

...me he raised himself ...nd operated on a large scale, taking over the privileges for entire meetings; but latterly luck seemed to have turned against him, in the manner which the fickle goddess so often displays toward her devotees at just the time when most they need her favors. When at his meridian Welch was not less daring and shrewd, and the spectacular wagers that he indulged in with various "plungers" set the speculative world agog. Many of these wagers were made rather upon impulse than calculation, for "Andy" was exceedingly mercurial, and given to "going the limit" when excited or enthusiastic. In the main, however, he had a well-defined system (that of betting against the favorite), which he followed with more or less consistency.

Welch had far more than the ordinary gambler's interest in the trotter. He had a veritable passion for the horses and the racing sport, and spent large sums in the purchase of horses and of race tracks, and the promotion of breeding and of trotting meetings. When, in the winter of 1891-92, the late J. Malcolm Forbes, of Boston, paid Leland Stanford $125,000 for Arion (4) 2:07¾, who had just lowered the world's two-year-old record to 2:10¾, and brought him east, in response to insistent demands he allowed the colt to serve ten mares in the spring of 1892 at a fee of $2,500, the largest ever charged for a trotting stallion. One of the mares bred to him at this fee was Directress 2:19, by Director 2:17, owned by "Andy" Welch, and the produce of the mating was Fanella 2:13, whom Welch sold to Mr. Forbes while young, and, when bred by him to Bingen 2:06¼, produced that wonderful horse Todd 2:14¾, one of the most remarkable sires of modern times. We have not space at this time to touch upon Mr. Welch's many dealings in horseflesh, but at various intervals he owned, either wholly or in part, many notable performers, sires and dams. One of the most prominent of these was Bow Bells 2:19¼, one of the far-famed Electioneer-Beautiful Bells family.

About 1900 Welch obtained control of Charter Oak Park, Hartford, Conn., which later, we believe, became his property, and whose destinies he directed until a few seasons ago, when financial reverses obliged him to relinquish it. There he promoted a long series of successful Grand Circuit meetings, also gave a number of rich futurities. After the collapse of the New England Breeders' Association, which had built and managed the Readville track, near Boston, about eight years ago, Welch also obtained control of that property and gave several Grand Circuit meetings there, renewing, under various conditions, the "American Trotting Derby," which had originated there. These ventures were, however, losing ones, and added to his embarrassments.

For several seasons past it had been apparent that "Andy" was failing physically, while his reverses had also palpably affected his former sanguine temperament. The last few years were difficult ones for him, for his luck seemed altogether to have deserted him. He was one of the most sharp-cut individuals ever seen "down the line," and a volume could easily be filled with entertaining reminiscences of his personality and the incidents of his career. We record his death with sincere regret, for the trotter has had few more devoted friends and followers than this departed soul.—[Horse Review.

...Walter Tryon, one of the most popular trainers in the state, with nine head, and O. J. Holmes with three head. After looking at every horse on the grounds and seeing several of them work, I was sure of one thing: that though there have probably been twice as many horses in training there in former years, there has never been a more likely, better bred and promising lot than are to be found in these stables.

Peter McKlyo, Pacific Coast Champion.

Naturally I was mostly interested in seeing L. H. Todhunter's celebrated son of the world-famous Peter the Great 2:07¼, called Peter McKlyo, the name being made from that of his dam, McKlyo, and his sire. McKlyo is by Jay McGregor and is one of the most remarkable matrons of the trotting world. Peter McKlyo is one of the handsomest trotters I have ever seen, and standing by the side of the most noted show-bred horses, he would dim the brilliancy of many of them. He is as sound and clean as a bullet; of magnificent conformation and with a great big open eye and very well set, expressive ears, he justifies his reputation in looks. He is undoubtedly the greatest son of Peter the Great west of Kentucky and is destined to be one of the greatest sires in existence. He is the only son of Peter the Great, five years old, it is said, with two in the list. He was bred to three mares when two years old, only two being handled. The filly, Charlotte McKlyo, won the Breeders' record, 2:25¾, and McKlyo Boy won the Breeders' futurity, record 2:23¼.

It was never more clearly demonstrated that like begets like than it was to me Tuesday, when I saw Peter McKlyo and five of his colts; a more uniform, handsomer, healthier and brighter little family never lived; all are trotters but one, and she is the prettiest natural pacer I have seen in years and has a lot of lick. She is owned by E. A. Gammon, of Hood. Trainer Thompson declares she will be the eye-opener of the circuit this year. Mr. Todhunter came out to the track and worked his colts for me, and I want to say right here that there are few owners in this broad land of ours that can boast of owning as many good horses; of owning their sire and dams and of "teaming" them as this well known breeder can. He is justly proud of the family and in addition to getting a lot of pleasure out of them they are a continual source of good income. With such a sire as Peter McKlyo 2:06, proven a phenomenal race horse and sire of race horses, offered to the public of California, the East will be looking up to the youngsters of this coast in a few years, providing the horse is appreciated and patronized as he should be.

Another horse in Mr. Thompson's stable that is getting a lot of good colts and doing an extensive stud service is Bon Watts, by General Watts, first dam by Bon Voyage, that is owned by Thompson, and taking him from the tip of his nose and carefully noting the head, eyes, ears, throttle, crested neck, withers, shoulder, middle, legs and feet, one cannot help but go crazy about him. He is good all over, handsome, and according to some of the rail birds will be one of the stars of the coast this year. He is getting a lot of good mares from all over California, and this shows that mare owners in general appreciate him.

Others of good quality in Thompson's stable which will get in the big money this year are: Natal Day, formerly raced as a trotter and now pacing remarkably well, and a two-year-old filly by Peter the Great, dam Carrietta, one of the most noted brood mares in

Thoroughbred Matters

Sixty entries have been received for The Kentucky Oaks, to be raced at Churchill Downs in May. This is the largest number of nominations received in recent years. Among the entries are two from the Nevada Stock Farm owned by George Wingfield; both of these fillies are foreign bred and have been raced as two-year-olds at Tiajuana.

✤ ✤ ✤

As to the future of racing at Juarez, Mexico, Colonel Winn says he is in favor of two meetings of thirty days each next season, instead of one long meeting. He has hopes of a racing bill being passed in Texas that will permit of a circuit in that section of the country and moreover expects that conditions will be more settled in Mexico in another year. At any rate there will be continued racing each winter at Juarez during the life of the twenty year concession from the Mexican government.

✤ ✤ ✤

A New York paper states that America is gradually getting into its stride again in the thoroughbred business. Mr. W. H. Rowe, who looks after the registration of all thoroughbreds, reports that the American-bred yearlings registered totaled 1974 in 1916, as against 1879 in 1915. In addition 205 yearlings were brought from other countries last year, so that in America this year 2179 two-year-olds will be eligible to compete . Owing to some cause or other, foalings were fewer in 1916 than the previous season, and therefore in 1918 America is likely to have fewer two-year-olds racing than this year.

✤ ✤ ✤

George W. Wingfield, the well-known Nevada breeder, had intended sending his thoroughbred mare Celesta over to England to be bred to Polymelus but the present stage of warfare has caused a decided change in his plans. Sending a horse clear across the continent and then to ship across the Atlantic and back again would have been an undertaking that would have marked a record expenditure in our western turf affairs. Polymelus has a wonderful record as a sire with fees at $2,500, however, and Wingfield is confident that the colt he would have secured would have justified the expense.

✤ ✤ ✤

The following important ruling has been adopted by the Hawaii Polo and Racing Club:

"All geldings imported since January 1, 1917, are barred from all free-for-all flat races at the coming meeting and at all future meetings held under the auspices of the Hawaii Polo and Racing Club."

This is a good rule, for by virtue of it all imported thoroughbreds from now on must be stallions or mares, which in either case will benefit the Territory from a stock-raising standpoint. Without the rule there would be nothing to prevent an owner shipping in a gelding and sweeping the board of the principal races at a meeting. This kind of thing would naturally act as a deterrent to breeders, and in a country like Hawaii, where racing is, perhaps, more than anywhere else, a means towards an end, would tend to resolve the sport into a cold blooded gambling proposition. Under the new rule the owners of a mare or a stallion, even if their horse prove not a success on the turf, have a chance of retrieving and perhaps bettering their investment when the horse goes to the stud.

✤ ✤ ✤

Many of the State Legislatures now in session are passing measures favorable to racing conducted on reasonable lines.

In Montana, bills legalizing paris-mutuel betting at races conducted in connection with fairs were passed by the senate last week. Both bills had previously passed the house.

Senator M. Casey of Jefferson City, Mo., introduced a bill providing for two racing seasons in the State of Missouri, each year, of twenty days duration for each season. The bill is stated to be a copy of the Kentucky racing law, and without a dissenting vote the senate approved it.

The Michigan Legislature voted to kill the reform measure of Representative Wood which would have prohibited the publication of racing results or entries in the newspapers of the State.

The Tennesseeans handling the racing bill in that State are confident of its being accepted by the Legislature. If it is accepted there will be a twelve days' meeting at Memphis, beginning April 12 and closing April 26, which will allow plenty of time for horses to get to Lexington, which begins April 28.

This bill provides that fifty per cent of the net profits go to the county fairs of the State, and that the other fifty per cent be used exclusively for the live stock and agricultural advancement of the State. The Association is to pay no dividends, being out mainly to improve the breed of horses.

Racing bills have been introduced in Illinois and they are looking towards making speculation by the pari-mutuels legal. The Illinois bill would place control of racing associations with county commissioners or county boards of supervisors, wherein a racing association has been formed. It is proposed that five per cent of the net profit of race meetings be turned over to the county. The bill authorizes the use of pari-mutuel machines.

The entries of A. K. Macomber for the Aqueduct Stakes have been received by Secretary Fred Rehberger, and as was expected they swelled the totals in each age division very materially. Walter Jennings named ten of the Macomber horses for the Brooklyn Derby, while an even dozen was named for the Brooklyn Handicap. The two-year-old entries were also particularly heavy.

Among those named for the Brooklyn Handicap are Dodge, Hank O'Day, Ed Crump, Boots, Dick Williams, Star Hawk, Hollister, Star Master, and Stargazer. Some of the Derby eligibles are North Star, Hollister, Le Chevsne, War Star, Star Master, Stargazer and Sunbonnet.

✤ ✤ ✤

The pari-mutuels are nothing new in the metropolitan racing world—as every one knows who visited the tracks in the early eighties, before that method of turf speculation was abandoned by reason of it clasing with the new law governing the situation. As for the chances of a successful resumption at the New York tracks of what were then known as the "machines," they should, at least, be far greater than for many years; this because Maryland, Kentucky and Canada have demonstrated more clearly the practicability of the scheme than would have been possible if our experience were to be limited to far away France and Australia. Certainly if its feasibility had not been abundantly proven such men as James W. Wadsworth, Harry K. Knapp and John Sanford, comprising the New York State Racing Commission, would never have recommended the adoption of pari-mutuels in their annual report to the Legislature.

✤ ✤ ✤

Figures and facts concerning the hundred-day race meeting at Tia Juana, drawn up by Handicapper Ed Jasper, divulged that $251,900 was distributed in purses to the horsemen. Altogether 600 races had been run and 296 horses won races. Jawbone led the horses with seven victories during the season. General, Inquieta, Dominion Park, Maud Bacon and Stanley S. won six races each, while eleven won five. They were Barsac, First Degree, Merry Twinkle, Quartermaster, Redland, Scarlet Oaks, Strathearn, Say, Silver Moon, Van Horn and Zetetic. Thirty-seven horses won three races ,ninety-two won two and 129 won one race.

✤ ✤ ✤

Clarence Buxton, formerly well known on California race tracks, has been exceedingly fortunate of late at Tia Juana. Horses from his stable have won six consecutive victories, including the $5,000 Coffroth Stake and three straight handicaps won by Lasin, and a stake and a handicap won by Old Broom.

✤ ✤ ✤

At Tia Juana on Monday last the day was marred by a series of falls that probably will hold as a record for the track many days to come. In the baby race Sandab and Cavalla fell and threw their riders, while in the third The Feller and Inez suffered similar fate. Fortunately none of the jockeys was seriously hurt, though Johnson and Stevens were badly shaken up.

✤ ✤ ✤

The Yolo county fair dates were set for October 4, 5 and 6 by the directors of the farm bureau units at their meeting on Monday last. Committees were appointed on finance, livestock, dairy and poultry and other committees necessary in the preliminary arrangements of the fair.

✤ ✤ ✤

Eight Napa county men were this week appointed by Governor Hiram Johnson to serve on the board of agriculture of agricultural district No. 25, which takes in Napa county. Those men appointed on the board are Henry C. Dunlap, William J. Stearns, Frank L. Gordon, William L. Mitchell, Thomas Maxwell, B. J. Nixon and Walter De Brettville.

✤ ✤ ✤

There were 1035 racing days in the United States last year as against only 839 in 1915, and there were over 1200 more races, whilst the aggregate value of the stakes distributed amounted to $3,800,000, a big advance on the total of $1,850.000 of the previous year.

✤ ✤ ✤

The Pleasanton Stock Farm, R. J. MacKenzie, owner, has sold C. B. Johnson the famous pacing mare Merry Widow 2:03¾. Mr. Johnson intends to put this mare in training at once and expects to start her at the races this summer.

✤ ✤ ✤

Canada Jack" Adkins, trainer for R. J. MacKenzie, has put Faux-Col and Leo Skolny in training at Lexington, Ky.

✤ ✤ ✤

The clause in the bill regulating race tracks passed last week at Quebec, which puts a tax on bookmaking, is as follows: "Any person selling, recording or receiving bets, wagers or pools otherwise than under the pari-mutuel system shall obtain a license from the Collector of Revenue upon payment of $100 a day."

✤ ✤ ✤

The Jockey Club of New York has adopted the Canada definition recognizing a horse as bred at the place where he is foaled.

✤ ✤ ✤

The stewards at Tia Juana fined Roscoe Troxler $25 for striking Jockey Lilly with his whip after the finish of the Coffroth handicap. Jockey Burlingame was also fined $25 for foul riding on Presumption.

Mr. C. K. G. Billings made four nominations for the Kentucky Derby which will be run at Louisville this year. The Billings entries are:

Omar Khayyam, ch c by Marco—Lisma.
Greek Legend, by Polymelus—Evadne.
Bachelor's Hope, by Tredennis—Ladytown.
All Star, by Sunstar—Falling Star.

Omar Khayyam is the only one of these animals which has been shown to the public.

Mr. Billings' growing interest in thoroughbreds has recently caused jealous comment among some of the adherents of the harness horse sport, who have sought to make light of his thoroughbred investments, but it is said he has a keen desire to see a delegation of thoroughbreds carrying his colors, equal in quality to those which have represented him on the harness horse tracks.

✤ ✤ ✤

Who would have thought a few years ago that English breeders would enter horses in American stakes? While the fact that Walter S. Heather of Rugby, England, has sent eleven nominations for the Futurity of 1919 is probably a speculation on his part, it nevertheless is an innovation and shows distinctively that a close connection is being brought about between European and American breeders of thoroughbreds. It also indicates that a market of greater importance than ever is organizing itself with international features. It will not be at all surprising to see the example set by Mr. Heather followed by many other European breeders, as the American market for English horses is strong at the present time, and mares or foals with American stake engagements will surely be worth more money than those without.

✤ ✤ ✤

"I have two turf reforms I would like to bring to the notice of the State Racing Commission," said F. E. Driver the other day. "The first is a modification of the rules governing jockeys so that a rider who is placed under suspension for a given number of days, or even indefinitely, may fulfill engagements made for the succeeding day. The other is a rule barring bleeders in the betting. In Australia a horse that is known to have bled twice is not even permitted t orace. A bleeder is not a sound horse, and it is not fair that the public should be permitted to wager on such animals."

✤ ✤ ✤

As the principal guest at the 146th annual dinner of the Cimcrack Club, in England, Edward Hulton in his speech said some interesting things on the subject of selecting racing sires.

"The ideal test of merit is the fast mile," he declared, "and the horse that can succeed at this distance among the best class and in the best time is the horse that is wanted to breed from. It will be found that the best stallions have proved their speed at about one mile. They may, of course, have subsequently shown that they could stay longer distances as well. But no great sire has lacked speed. It is the essential. Even though they have won the best long distance races, pure stayers—I mean horses of one pace, but without speed—have never been successful sires. My point is, it is not the pure stayer, with only one attribute, that makes the stallion."

———o———

Figuring expenditures in overnight purses alone at an average of $800 for each event, the Windsor Jockey Club will award to horsemen that compete at its plant July 14-21 and August 15-22 more than $70,000 in 14 racing days.

This amount is exclusive of a little more than $30,000 that has been apportioned in stake and handicap events, the foremost of which is the Frontier Handicap, $10,000 added.

During the 14 days of racing there will be 98 races of all descriptions decided. Ten of these are the fixtures, leaving 88 overnight handicap events and selling races. The total amount to be distributed exceeds $100,000 by $400.

For the minor races the total rewards will be $70,000, the average of $800 for them reaching that figure. Every day of the 14 there will be at least six of those affairs, days on which a fixture is scheduled drawing that many.

Messrs. Hendrie and Parmer, president and secretary respectively of the Windsor Jockey Club, has, as well as making the stake events attractive, planned to encourage the small fry owners to show their colors at the pioneer track in Windsor this year.

At no time in the past has the Jockey Club, internationally known through its liberal policy in dealing with horsemen, approached the rewards it will give in return for their support this year. Next to the Kentucky Derby, the Frontier Handicap will be one of the most valuable thoroughbred events in America, while its overnight numbers are worth more than similar races anywhere else on the continent.

In addition to the Frontier there will be the Windsor Jockey Club Handicap, $5,000 added, and eight fixtures that will have no less than $2,000 added money each. If money will appeal to campaigners of racing stables as the club anticipates, the greatest season in the organization's history is predicted.

✤ ✤ ✤

A raft of claims were put in last week at Tia Juana; seventeen horses changed hands. Some were Lady Leona, claimed by G. Wentworth; Auntie Curl, claimed by William Walker; My First, claimed by H. Field, and Trajan, claimed by T. A. Davies.

Jack Barrymore to Missouri.

Missouri has annexed Jack Barrymore, the celebrated five-gaited saddle gelding, to her great list of famous show horses for 1917, owner H. B. Thornberry, of Stockton, California, having shipped famous gray gelding to Ed Moore, of Columbia, Mo., this week. Jack Barrymore, under the tutelage of Wm. Shropshire, of Winchester, Ky., was undefeated in Kentucky one season and after being sold to Mr. Thornberry, won the world's championship at the P.-P. I. E., defeating among others, My Major Dare. Ed Moore, who gets him, is well known in California, having exhibited Col. Paul Brown's Johnny Jones and My Idol at the exposition. He has always been anxious to have Jack Barrymore in his string. This means that Mr. Moore will be in the "swim" this year and at the top as in recent years. The writer has not seen Jack Barrymore since coming to California, but understands he is in splendid shape and with a little work will be up to his old time form.

✣ ✣ ✣

E. A. Trowbridge, head of the department of Animal Husbandry, University of Missouri, reports the sale of the farm's splendid two-year-old stallion, Astral Denmark 7554, to R. D. Guyer, of Linneus, Mo. Astral Denmark is by Astral King and his dam, Ruth McDonald 3229, is one of the most noted matrons in the Rex McDonald list. She has sired several splendid colts ,all of which have proven good horses. Astral Denmark is a bay, of medium size and attractively marked. He has never been worked but a colt, which, in the pasture, has shown very fine action and style and promises to develop into a great doing horse. His pedigree looks like he ought to be a good horse, and he justifies that opinion when you look at him.

✣ ✣ ✣

Horsemen throughout the Middle West have been anxious over the report of the committee in charge, as to the assurance of the Commencement Horse Show, conducted annually at Columbia, Mo., by the students of the Agricultural College, Department of Animal Husbandry. This show is the opening event in the Middle West, and is the most popular outdoor horse show conducted anywhere in the South or West. It attracts the leading show stables of the country and prominent men and women from every state in the union. In fact, it has never cost the school a cent, and has been one of its best assets, though this has never been considered by some of the officials. The prominence of those who are attracted from all over the country to this delightful little city and to the Missouri University has, as an advertising medium, been beyond comparison to both the University and Columbia. The use of the athletic field has damaged it some, it is said, and consequently there is some objection to holding it in that highly suitable place. Changes in the plan of the University, which puts what is known as "stunt week" after examinations, is another difficulty which will have to be met if the show is held. A definite conclusion will be made, however, at once and the anxious public notified one way or the other.

✣ ✣ ✣

Fred Johnson Appreciated.

The members of the Gentlemen's Riding and Driving Club of this city, who have always taken an especial interest in the National Western Horse Show, on Saturday evening last gathered at the club and presented Mr. Fred P. Johnson, the secretary of the show, with a very handsome gold-headed cane as an appreciation of his work in making this annual exhibition the greatest of its kind in the country.

Mr. Johnson was notified that a special meeting of the club's directors would be held to consider charges preferred against him. He attended and was told that he was held directly responsible for the annual appearance in Denver of so many cattle, hogs, sheep and horses, who made themselves so conspicuous and caused such an enormous crowd to accumulate to see them that residents of the city can hardly get around the streets at show time. In closing, Mr. A. J. Simonson, president of the club, presented Mr. Johnson with the cane as a token of the appreciation of the club members for his good work in connection with the annual exhibition. The Gentlemen's Riding and Driving Club members have always taken a great interest in the annual horse show and have had a very considerable part in making it the great success it has become.—[Denver Record Stockman.

Attractive Horses at Park Academy.

There are 18 head of fine pleasure horses stabled at the Park Riding Academy. Among them are some of the best saddle and show horses to be found in the West, and the horses stabled there are in good hands. Every horse I saw, that was of show calibre, was as near fit as it was possible for them to be. Good management with careful grooms is responsible for this.

Judge E. A. Bridgford's good young saddle stallion, LeGrand McDonald, is among the elite of horsedom stabled there; while E. J. DePue has 12 of his superbly bred Hackneys in training and ready for use and sale. There are some exceptionally well bred ones in his consignment and several that with proper preparation would make a creditable appearance in any show ring. The most notable among these, in my opinion, is the mare Iolanthe, which is of superb conformation and possesses a lot of action that is confined to sraight and true going. He also has a worthy and rather extraordinary Hackney in the mare Jill, which is five-gaited and has the stride and appearance, lick and style of a saddle bred horse. She is cleverly gaited and there is no coarseness or harnessy way about her when she is saddled.

Mrs. W. S. Davis has two very attractive three-gaited horses, chestnuts, good lookers and well bred. She uses them regularly and whenever she appears on one of them attracts a lot of admiration.

Miss Mauricid Mintzer is another local equestrienne who owns her own horses. Her heavy harness mare was champion at the last state fair. In a three-year-old bay gelding by Mrs. T. L. Johnston's stallion, Lord Denmark, however, she has what promises to be one of California's most attractive saddle horses. He is of the three-gaited type, and I understand that he will be developed into this popular and useful type. He has a long, well turned neck, is fine in the throttle and head, bright eyes, intelligent ears and a snappy way of going.

Soundness of Horses.

The soundness of a horse is one of the first considerations of the buyer and should be of the breeder. If the animal is not sufficiently sound to withstand the use for which he is intended, the logical time to learn of this is before the purchase.

Selection must be based primarily on a thorough, systematic examination; the examination should be based on a clear knowledge of desirable and undesirable qualities.

Not only the presence of unsoundness but also of the condition or seriousness of the unsoundness should be noted.

Temporary unfitness should be distinguished from permanent unsoundness.

A hurried examination is likely to prove a disappointment.

Observe blemishes, vice, faulty conformation, unsoundness ,and general characteristics.

Common blemishes are scars from old wounds, poll evils, scratches, shoe boils, and small ruptures.

Common vices are halter pulling, cribbing, kicking, stall walking, weaving, and biting.

Common faults of conformation are straight shoulders ,crooked, weak, or improperly set legs, ewe neck, long, weak back, and drooping croup.

Common unsoundness are splints, thoroughpin, spavin, curb, extreme fistula, ringbone, side bones, extreme atrophy of muscles, contracted tendons, and broken wind.

General characteristics include fleshing, temperament, quality, color, and age.

In final selection, look for the good qualities and weigh them against the defects.

Kentucky Saddle Horses Average $288.

The thirteenth annual sale of the Kentucky Sales Company was held at Lexington the week of Feb. 22, and the varied and excellent consignments brought satisfactory prices.

Monday was devoted to the Elmendorf consignment of draft horses, jacks, jennets, and Shetlands. The next three days to trotters and the fifth and final day to the saddle horses.

One hundred and thirty-two horses were sold at the fifth and final day of the Winter Auction of the Kentucky Sales Company, for a total of $30,075, an average of $288 per head.

In order to complete the catalogue on Friday some forty head were sold Friday night. The top price was $1,000 for the four-year-old bay gelding, Kingsbury, a son of Montgomery Chief and Hildred by Highland Denmark. He was a fine bay gelding with a splendid trot and lots of air and action. He was in every way a first class horse and will be a hard one to beat in the three-gaited classes this season when Bob Moreland, who bought him, gets him ready. He was consigned by R. A. Carrick of Fayette county.

The second highest price was paid by Henry Williams, Buffalo, Ill., for the six-year-old stallion, Auto Be King, the champion three-year-old of his year and winner of the yearling division of the National Saddle Horse Futurity. He brought $725 and was consigned by W. C. Massie of Paris, who is retiring from the business.

NOTES OF THE KENTUCKY SALE.

The annual mid-winter sale of the Kentucky Sales Company, held at Lexington, Ky., February 19 to 24, attracted buyers from every section of the middle-west. I was particularly interested in the saddle horse division of the sale and some sensational prices were made. Buyers from the East, too, were in attendance and looking for good using horses, show horses and riding academy horses; however, I was terribly disappointed in the offering. The cheapest lot of saddle horses I ever saw were offered, and naturally, no one wanted them. It is very evident, to me, that there are going to be some big prices paid for the good kind this year because there is an almost unprecedented demand and no supply, and those that are up to filling the job are going to sell high. A good many of Missouri's horsemen were present but did not buy.

Mr. D. Schilling, who lives in Chicago and makes his millions off a great ranch in Colorado, was among those who were of interest and he managed to find two young studs which he resold immediately. John T. Hook, of Lee's Summit, Mo., and Dr. W. C. Gadsby, of Kirkwood, Mo., were other well known horsemen who were attracting attention but who did not buy.

The gelding Dare Devil, consigned to the sale, sale, brought something like $500, and he was high. He was advertised as Kentucky's champion gelding and if this is true, Kentucky is bad off for good ones. However there are a number of really high class studs here. Bob Moreland has Cascade; Lang Anderson has The Leading Man and Billie Shropshire has the celebrated Vernon Castle, and there are a number of others of show quality.

One green show prospect sold for $1,000 to "Bob" Moreland. Maydan, the gray gelding, was priced at $3,500. "Billie" Roberts got a very nice chestnut gelding for $800. He will never be a winner, however, because he paddles awfully. Mode Nicholl had a green gelding that he asked $2,000 for, and such were the prices and class clear down the line. I did not see a gelding that, in my opinion, can beat Johnny Jones, as he was in Missouri last year.

Dr. Gadsby became disgusted with the horse end of the sale and started out to buy dairy cattle. He got two very fine Jersey bulls and some fancy cows for August A. Busch, of St. Louis, and several head for Wm. R. Bush, of Vermont.

Rodger Pemberton, Jack O'Brien, and R. E. Thomas, all of Chicago, were a live group. Mr. Pemberton got some good using horses around Lexington; Thomas and O'Brien got some of the best in the sale.

Langhorne Tabb Anderson, of Maysville, Ky., was present and told me he had 50 head of the best he had in his stable for some time. He reports the best trade in saddle horses and hunters he has had in several years.

John Hook was looking for a young stallion and a walk-trot horse, but the last time I saw him he was Missouri bound. KENTUCKY.

California Breeders' Greatest Opportunity.

The writer has never heard of a more liberal offer than that which is offered by The San Vicente Rancho, of Los Angeles, and which appears in their announcement elsewhere in this issue of the Breeder and Sportsman. It is a most commendable idea to place the services of so noted a stable of stallions for the benefit of the public; in the firstplace, no great bull or boar, as celebrated, and especially if owned by a company as independent as the San Vicente company, would be allowed to do outside service, rather, his services would be restricted to the breeder's own herd and the only way one could secure the stock would be to buy it outright; secondly, the placing of the services at such a nominal charge, too, strikes me as being a sensible way to popularize the breeding of saddle horses in California; and lastly, and most important of all, offering to pay the FREIGHT BOTH WAYS on any mare located any place in California.

This is a new offer in the breeding business. In my varied experience I have never heard of one like it It is in keeping with all that has been said of the bigness of California breeders; it demonstrates that they really intend to get some place in their efforts, and the best possible way, as all breeders know, is to encourage the owners of good mares to breed to the best. The difference of a few dollars in service fees and breeding expenses is responsible for the majority of "misfits" and mongrels in the horse business, and it seems the only way to remedy it and improve the breed is for the owners of the "better kind" to offer inducements that will offset the difference in price.

There is a no better lot of saddle stallions on any farm in the United States than at San Vicente; breeding, individuality, soundness and every other qualification to be most considered in the selection of a stallion to breed to. The ranch is one of the best improved in the state; the conditions, management and business policy of the farm are all that an establishment of this character could be. Mares sent there will receive the best possible care, in most cases better than they would get at home.

With these conditions prevailing, there is no reason why every man in California who owns a good mare and wants to raise a colt that will be profitable and bring more pleasure to the breeder than the raising of any other thing in animal life, should not have his fondest ambitions satisfied. In fact, if the breeders do not take advantage of such an opportunity it will be sound evidence that they do not want saddle horses of the better type and profitable class in California. For further information write M. Freeman, manager San Vicente Rancho, 1023 Investment Bldg., Los Angeles, Cal.

Notes and News

Dixon's annual May Day celebration and race meeting will be held on the 5th of the month this year.

✤ ✤ ✤

At a meeting of the Board of Directors of the Fresno County Fair, held last Saturday, Director Frank Helm suggested that the rules for entering stock in the Fresno fair should be changed to conform to the State Fair rules. This change will be made at a latter meeting of the directors, they said.

✤ ✤ ✤

The Riverside county fair will not be open on Sunday this year as was the case last fall. Last year, it will be remembered, the opening of the fair on Sunday created a storm of disapproval. The fair directors assured the county supervisors last week, when making a request for an appropriation of $5,000, that the gates would be closed on Sunday this year.

✤ ✤ ✤

There are more horses in training at the famous Lexington track in Kentucky this spring, than have been stabled there in several years. Every stall on the grounds is either filled or engaged and all of the stabling adjoining the famous training ground has been reserved by trainers who will arrive between this time and the first of April. Lexington will send a large colony of useful horses to the sales and races thi sspring and summer.

✤ ✤ ✤

The trotting horse division of the annual winter sale of the Kentucky Sales Company was cleared up on the 22d of February after a three days' sale, when 254 head were sold for a total of $62,820, an average of $247 per head.

The top price of the sale was $1200 for the yearling brown filly Dark Flower by Peter the Great out of Madelle 2:10¼ by Wilask. She was secured by John E. Madden after spirited bidding. She will go into the stable of H. C. Moody.

✤ ✤ ✤

Mr. Jas. Clark, writing in the Horse World about the sale of Peter the Great to Mr. Stoughton Fletcher remarks upon the vigorous condition of the horse and in his closing remarks predicts that Mr. Fletcher will reap a rich reward from his investment. His purchase of the world's greatest sire for $50,000 did more to stimulate the trotting horse industry than anything that had occurred for years. As one noted horseman remarked at that time, "they can talk all they want about the automobiles putting the horse in the discard, but I'd like to see 'em sell me one of their 18-year-old machines for $50, much less $50,000.

✤ ✤ ✤

The Kentucky trotting horse breeders' association are going to put on a new stunt as a try-out. In the long history of the Kentucky Futurity only $800 of the $21,000 has been given as special prizes to nominators of winners' dam, but starting for the foals of 1917, the amount has been increased to $3,000, of which $2,000 will be awarded to the nominators of the dams of winners in 1920 as three-year-olds and $1,000 to nominators of winners of the two-year-old division in 1919. Another change is the entire elimination of the pacing division which has proved an absolutely worthless race compared with the trotting divisions; so that the $2,000 heretofore given to pacers is now added to the juvenile division, making its value $7,000 instead of $5,000, while $14,000 still remains the value for the three-year-old division. The nominators' extra prizes beginning with foals of 1917 will amount to $2,000, half of which will be awarded to the nominator of winner's dam, $500 to second, $250 to third, $150 to fourth, $75 to fifth and $25 to sixth. The $1,000 prize for the two-year-old division will be distributed in $500, $250, $100, $75, $50 and $25 ratios.

✤ ✤ ✤

There are good trainers and bad trainers, some with years of experience and others with little or none, and it is the latter kind which create more trouble around a training track than a bull in a china shop. When not attending to their own business they meddle in other trainers' affairs; the track is never to their liking, no odds how good it may be, and as to news carriers to owners whose horses are in some reliable man's hands, they are never more happy than when they are doing underhanded work against some trainer whom they imagine they have a grievance against. Whilst the class of trainers whom we refer to are an annoying lot for the time being, they soon find their level and have to seek some other occupation to make a living. They never last out for the reason that fair minded owners take no stock in their telling tales and pass them by as unmitigated nuisances. It is a pity that these troublesome fellows get into the business as trainers and drivers, but as they do not last long, what little trouble they do make around a race track is soon forgotten, after they are once safely relegated into the discard. There is nothing like dwelling in unity and peace among trainers around race tracks, but it seems the business has not evoluted up to that point as yet, and probably never will.—Trotter and Pacer.

John B. Stetson's horses are doing nicely at Sacramento . Mr. Stetson has a clever pacer named Grey Hal, by Hal B. 2:04¼, also a five-year-old free legged pacer named Palatine that has been in 2:13. It is Mr. Stetson's intention to race this horse over the Middle West tracks this summer.

✤ ✤ ✤

Ed. R. Dunn, of San Francisco, owner of Virginia Humbug (2) 2:16¾ (which mare, by the way, is now at Walnut Hall Farm and in foal to Manrico 2:07¼), owns a nice green trotting mare by San Felipe 2:09¼. This horse sired only one foal before being castrated, and this is the one Mr. Dunn owns. She is out of a mare by Kinney Lou 2:07¼. Mr. Dunn took her to Cleveland last spring, but she took sick and he left her with Mike Bowerman at Lexington. She is a nice mare and is still in charge of Bowerman.

Meeting of Directors of Fresno Fair Association.

Compliance with Bakersfield's request that this year's Fresno District Fair be held the last week in September, provided the oil city can persuade Kings county to change the date of its fair from the last week in September to the second week in October, was decided upon by the directors of the Fresno District Fair Association at a meeting held last Saturday afternoon. At present, Fresno's fair is scheduled for the first week in October. Bakersfield desires that date for her fair, as the oil city is to entertain the grand lodge of Odd Fellows of this state during that week. Bakersfield will take up the matter with Kings county within the next week or ten days, and after the decision of the latter is made the Fresno directors will decide definitely whether to keep the present date or to hold Fresno's fair during the last week in September. The directors stated that they desire to co-operate with Bakersfield as far as possible and do not desire a conflict in the dates of the Kern county and Fresno county fairs, if there is any way to avoid it.

One of the principal matters of business to come before Saturday's session was the election of officers for the ensuing year. J. E. Dickinson was re-elected president of the association, and George Warlow was again chosen vice-president. The Farmers' National Bank was named treasurer. At the request of President Dickinson, no action was taken concerning the election of a secretary. C. G. Eberhart, who has filled the office for the past few years, will not know for several weeks whether he will remain in Fresno during the coming year, and until he decides, the office will be held open. It was stated that Mr. Eberhart will be re-elected if he decides to remain in Fresno.

Cleveland Horseman to Honolulu.

One of the most enthusiastic horsemen, sportsmen and all-round good fellows of the East, who has been enjoying California's good climate this winter, is George H. Tipling of Cleveland, owner of Binville 2:09¾ and several others of like note. Mr. Tipling left San Francisco Wednesday for Honolulu where he will spend the remainder of the winter. However, before leaving he paid the Breeder and Sportsman an appreciated visit and spent an hour gossiping of horses and horsemen. The recent holiday edition of the American Sportsman gives an illustrated page to Mr. Tipling and Binville, and refers to him personally as a horse lover, thus:—

"We very frequently find extremely wealthy gentlemen who, forming a fondness for a particular horse, stand ready and willing to pay unreasonable prices for same, but seldom do they encounter an owner who places no limit on the value of his property. However, there are exceptions. The late Henry White, who made millions out of his famous products, the White Sewing Machine and the White Automobile, was as much an admirer of Binville as his owner, because he was such an admirable specimen, could trot so fast and never offered to break. On one occasion Mr. White endeavored to purchase the son of Binjolla 2:17¾, and Mr. Tipling replied, 'I would not sell him for $25,000.' Mr. White then tendered his check book with the remark,' 'Just fill out that check for the amount you will sell him for, then.'

"Binville 2:09¾ is an exceptionally well bred young stallion, being by Binjolla 2:17¾ and out of Alice Wren, the daughter of Ashland Wilkes 2:17¼, whose every foal, three in number and all by Binjolla 2:17¾, have been prominent in the futurities, Binland (3) 2:08¼ in 1915 equalling the then record for The Western Horseman Futurity when he won the first heat in 2:08¼, and the past season Alice Jolla (3) 2:11½ winning the pacing division of the same futurity. We doubt indeed if more than two other mares ever produced three foals by the same sire which proved equally as successful in one of the great juvenile classics as did Binland (3) 2:08¼, Binville 2:09¾ and Alice Jolla (3) 2:11½."

Cris Owen, a well known San Francisco horse lover and owner, the other day gave his three-year-old mare Ella O. her first speed work this season, and she went a couple of slow miles in three minutes. This good-looking mare is by Moko Hall and her dam, Sister Mary, is by Kinney Lou. She showed well last year with very little work and is entered in the three-year-old stakes. She is in Frank Burton's stable at the Stadium.

Mr. Joseph Waddell is actively engaged this week in preparing papers for the incorporation of the California Fair and Racing Association, and wishes it stated that anyone who is interested in racing or breeding horses of any kind or other livestock, or is interested in promoting agricultural fairs and race meetings, is eligible to membership. The circuit of fairs and race meetings as planned by Mr. Waddell will be a great benefit to the agricultural interests of the state, as well as for the horsemen and those interested particularly in racing.

✤ ✤ ✤

Jay Wheeler, the well known Sacramento horse shoer, is spending about half of his time at his fair ground shop and says if anyone thinks the boys are not working their horses out there to follow him a while and be convinced that they are wearing out shoes like a ten-year-old school boy. Mr. Wheeler always owns a good trotter and keeps a few good brood mares. He has bred his good mare Carita, by Greco B., a good doing son of McKinney and out of Iron Belle, to Jas. Thompson's great young stallion Bon Watts. Mr. Wheeler says he knows what the results will be and that when the colt gets to going good he won't have to shoe any more horses.

✤ ✤ ✤

O. J. Holmes, one of the veteran horsemen of the west, has three green ones in training at the state fair grounds and with which he expects to "get the bacon" by the latter part of the season. They were started too late to be accomplishing much just now and probably will be a little green by the opening of the season, but if any one can have them ready it is Mr. Holmes, and he says they will be there. He has a black stallion called Conley Boy, owned by Chas. Conley, that was hooked up for the fourth time while I was there, and, you listen to me, he will be a real trotter. He is a good looking horse, a little ugly about the head, but has a lot of sense and a splendid way of going. He is by Sir John S. and out of a mare by Baron Gale. Sir B., an aged pacer by the same horse and owned by Mr. Conley, is another in Mr. Holmes' stable that can "go yonder." Mr. Holmes is working a five-year-old mare for W. J. Irvine, of the Pacific Stables, that is by The Bondsman and out of a daughter of McKinney that he says goes like a house-a-fire. She is a good looking, gimpy sort of mare and should, with a little more work, trot fast.

PACIFIC BREEDERS' FUTURITY STAKE No. 14.

A total of twenty-seven payments on three-year-olds was made on March 1st in Pacific Breeders' Futurity Stake No. 14, for foals of 1914. The three-year-old divisions of this stake will take place at the Breeders' meeting this year. Those eligible are as follows:—

E. T. Barnette's b c by Carlokin, dam Zephyr by Zombro.

I. L. Borden's b g Skyrocket by Ed. McKinney, dam Hester McKinney by McKinney; b g Tommy Atkins by Tom Smith, dam Carrie B. by Alex. Button.

S. H. Cowell's b g Bill Logwood by Jim Logan, dam Two Minutes by Wildnut.

Wm. E. Detels' b f Elloretta D. by Graham Bellini, dam Daphne McKinney by McKinney.

J. Doran's b f Nelley McCarty by Vernon McKinney, dam Zaalam by Searchlight.

W. G. Durfee's b c Troubadour by Carlokin, dam My Irene S. by Petigru.

Sam Gault's b c Peter Klyo Bell by Peter McKlyo, dam Iran Belle by Iran Alto.

Alex. Grant's b c Kinsman Lou by Wilbur Lou, dam Sona by McKinney.

Hemet Stock Farm's ch f Louise de Lopez by Kinney de Lopez, dam Louise Carter by Chestnut Tom; ch f Matilda Lou by Wilbur Lou, dam Lady Zombro by Zombro; ch f Zeta Lucille by Wilbur Lou, dam Zeta W. by Nutwood Wilkes.

H. A. Hershey's b c Galen by Jim Logan, dam Palo Maid by Palo King.

H. S. Hogoboom's b f Eva Dungan by Palo King, dam Miss Ione by Iran Alto; b f Lilly of the Valley by Palo King, dam by Iran Alto.

Roy D. Mayes' b g El Paso by True Kinney, dam Ella J. T. by Bob Mason.

Meadow Brook Stock Farm's b c by The Bondsman, dam Arawanna B. by Sidney Dillon.

J. E. Montgomery's b c Marshall Logan by Jim Logan, dam Leota by Diablo.

Chris G. Owen's br f Ella O. by Moko Hall, dam by Kinney Lou.

Geo. F. Ryan's b c by Frank Perry, dam Miss Harris by Sidney Dillon.

Chas. F. Silva's ch c Little Jack by Teddy Bear, dam Camille by Stam B.

Sutherland & MacKenzie's b c Rhyolite by F. S. Whitney, dam Rubelle by Del Coronado.

L. H. Todhunter's b c McKlyo Boy by Peter McKlyo, dam Sweet Bow by Bon Voyage.

F. W. Wadham's br c Adam Treat by Prince Ansel, dam Johanah Treat by Thos. Rysdyk.

D. W. Wallis' b c Robert Mc by El Angelo, dam Annie McKinney by McKinney.

Alex. M. Wilson's br c Kewpie by Carlokin, dam The Blonde by Strathway.

M. L. Woy's br f Expressive B. by Expressive Mac, dam Loma B. by Stam B.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Game Refuge System.—It is admitted by many well-posted authorities on game propogation and protection that every State in the Union should develop a system of game refuges. California believes deeply in this, to its credit, and wild game will have a chance in this State when the series of game refuges now being located by Harold C. Bryant, for the State Fish and Game Commission, is approved by the Legislature . A fair chance, is the way sportsmen put it —a chance for big game to rear young unmolested by any bang of pot hunters who possess the price of a gun. And just how much chance the men who are planning the sanctuaries intend to give wild game is here told for the first time. Forest rangers, State deputies and resident mountaineers have co-operated with the State officials and have furnished field data which is now being plotted by Bryant. The scheme is to locate a series of the refuges extending in two chains, from the Mexican border to Oregon along the coast; the other through the Nevada Sierra mountains. Hunting only will be forbidden in these areas. Fishing and the bearing of arms will not be stopped, and is not stopped in the game refuges which now exist. At present permits are issued for the hunting of predatory animals. This custom will be continued if the new refuges are accepted, according to Bryant.

Fight to Save Bass.—Sacramento.—Masses of data are being collected by the State Fish and Game Commission in the battle that they have opened to save the fish of San Francisco bay from destruction by shrimp fishers of Marin county. The contest has aroused no end of bitterness. The Commission, headed by Frank M. Newbert, went before the Senate committee on Wednesday night to show that the shrimp is now protected from being caught along these shores, not so much for the shrimp, but for the great percentage of small striped bass, shad and other immature fish, which, say the Commission, had been taken in the shrimp nets and dried and sent to China by the Chinese fishermen.

"If the Chinese are permitted to fish on the Marin county shores for shrimp it will mean the total destruction of striped bass in our bay waters," said Newbert. "At one time there were twenty-one boats in the shrimp fisheries at these grounds, which were the bed of the shrimp and of the small fish. The Commission has caught these fishermen with as many as 250 pounds of striped bass in the shrimp nets, taken in one drift, and there were two catches a day.

"That means 10,000 pounds of small fish taken a day. These fish, if grown to maturity, run from three to sixty-four pounds. Striped bass does not spawn until it weighs three pounds; so it may readily be understood what the loss to the waters of the bay is in the destruction of the young fish. These fish spawn many thousands of eggs. But they have been ruthlessly taken before that time, and therefore there is still greater loss and injury to a natural product.

"That is why I am opposing the bills that are calculated to break down the protection that is now thrown around the fish by the prevention of shrimp fishing on the Marin shores," said Mr. Newbert. "There are ample quantities of shrimps taken at other places on San Francisco bay to supply the market demands. I trust that the Legislature will not tear down the existing regulations."

Newbert said that not less than two months ago two game wardens had been murdered by striped bass fishermen at Bouldin Island, and not long after the murders the Commission arrested two market fishermen who had been using 11,000 feet of net catching striped bass on the spawning grounds to their great destruction. These grounds are set aside by the State, being natural spawning grounds for the protection of the bass.

New Rifle Director—Col. Samuel W. Miller, U. S. Army, recently of the Tenth Infantry, has been named director of civilian marksmanship by the President, upon the recommendation of the Secretary of War. The incumbent of the office which was created last summer by Congress, shortly before adjournment, has already taken up his duties, and has been attached to the Militia Bureau of the War Department. With the legislation which is already on the books in favor of teaching civilians to shoot, and with prospects of other enactments toward the same end during the coming session, the director of civilian marksmanship is facing an unprecedented opportunity to work a national good, the influence of which may be made to extend over all the years to come. Col. Miller comes to his new position enthusiastically in favor of training civilians to handle the rifle. What his policies may be aside from this, he has not yet announced. He has, however, declared himself in favor of co-operation with all the men and institutions in the country who are working along parallel lines. Col. Miller has had much experience in rifle practice . He was commandant of the School of Musketry at Monterey, Cal., from July, 1911 to October, 1914, and moved the school from California to Fort Sill, Oklahoma. When troops were concentrated at Galveston, a battalion of the 19th Infantry, on duty at the school, was ordered to Galveston, and Col. Miller was detailed to Galveston to command the base and port of embarkation. He was detailed to foreign service, going to Europe, where he visited the musketry schools of France, Germany, Switzerland and England. He observed the operation of these schools and embodied his observations in a special report to the War Department. Last fall, while in the Canal Zone, Col. Miller was detached and ordered to Washington and was named Executive Officer of the National Matches of 1916. He was in command of the shooting camp at Jacksonville during the recent competitions. In advocating co-operation between his office and all others interested in seeing the United States again take place as a nation of marksmen, Col. Miller has sounded the right keynote, and, if his future policies are based upon such considerations, great good may be expected from his administration.

UTAH CHANGES GAME LAWS.

House Passes Bill Reducing License and Increasing Duck Limit..

Salt Lake, Utah.—Reducing the proposed $2 fishing license charge to the old fee of $1.25, giving the state fish and game commissioner power to declare open seasons on beavers, and fixing the duck limit at twenty instead of twelve, the house of representatives last week passed the fish and game bill, introduced some time ago.

The house spent a good part of the day discussing the bill. Even then Representative R. E. Currie of Salt Lake gave notice that he would ask reconsideration of the bill because he failed to get through an amendment protecting catfish from seining.

Apparently every member of the house became a sportsman when the measure came up, and everyone had a pocketful of amendments to offer. Amendments were peppered at the bill like a broadside from a machine gun. Few of them carried, however, and this added to the displeasure of the members of the house particularly interested in them.

An amendment offered by Fisher of Wasatch was carried, giving the fish and game commissioner authority to declare open season for the killing of beavers in counties at times when these animals became so numerous as to cause damage to property. The commissioner is to make regulations governing the trapping or killing of the animals under such special open seasons.

The amendment carried with but little opposition. The next amendment was that of reducing the fishing license fee from $2, as proposed by the committee to $1.25, the present fee. The majority of the house argued that to raise the fee would encourage fishing without license and it was argued that more revenue would be derived from a smaller fee. There was considerable opposition to this change, but it carried.

Currie then insisted that catfish be classed with the other game fish the seining of which is prohibited. He contended that the catfish is just as "sweet and fine a game fish" as most trout and entitled to the same protection. He argued that the Utah county sportsmen and others were trying to dictate in the matter of seining and that the Salt Lake county sportsmen wanted catfish excluded from seining. He argued at length and ardently for his amendment, but the house voted it down and he gave notice of reconsideration of the entire bill when it had been passed.

An amendment was adopted permitting fishing in Panguitch lake at all seasons of the year without a license, in an effort, it was explained, to rid the lake of chubs which have so overcrowded the waters as to practically exterminate the tropt.

The open season for Fish Lake was changed from June 15 to October 1. The bill was passed by a vote of 43 to 1.

A companion measure designed to add protection to wild game of the state, in the form of H. B. No. 105, by Young, prohibiting aliens from hunting or even having firearms in their possession until they have resided in the state two years after taking out their first citizenship papers, was passed. The bill was amended, however, to exempt foreigners who might be employed in the destruction of predatory animals

Using anchovy bait, Charles Vernon of Los Angeles, while fishing from the long wharf north of Santa Monica, hooked and landed a four and one-half pound shad. While shad have been caught in nets in Santa Monica bay this is the first time, the fishermen claim, that one has been taken with a hook and line. They claim that shad are seldom taken with hook and line even in waters where they are abundant.

TAKING CARE OF FISHING TACKLE.

Sportsman Advises Anglers to Look to Their Rods in Off Season

No less an authority than Stewart Edward White has stated that the average out-of-doors man becomes uneasy early in February, and instinctively turns for temporary relief to the implements of his favorite sport. Almost to a man the writers who instruct and advise us through the pages of the hunting and fishing magazines insist that every orthodox angler shall devote the greater part of the winter to overhauling his equipment.

I may not be orthodox; I know I have much of angling lore to learn; but I also work that I may fish, and on the eve of opening day my tackle is usually in the same state that it was when put away. Then for two or three evenings the house is upset, the dogs eye me askance and friend wife is sorely tried. I finally depart with the vital things accomplished, but with much undone that, etc.

In one respect at least it pays to be methodical and forehanded. I shall never forget the one and only time I tried to varnish a rod at short notice. Since then this important task has been successfully performed at least two months before opening day. In case some of your readers have not tried to doctor their own rods, I should like to say that the operation is really very simple, all eminent magazine authorities to the contrary notwithstanding.

The man who likes to work during the winter months is given the chance to make his ten-dollar rod look like the expensive made-to-order article. The books and the magazines will tell you to "flow" the varnish on. Forget it. Use as little varnish on the brush as possible, and work it out until the brush slides off the rod. When the first coat is finished the rod will be covered with brush marks. Put the rod away for a week. When you take it out again those marks will have disappeared. Three coats are necessary—four or five are better if they have been well brushed out. Polish with a rag, powdered stone and crude oil. Use a little stone, lots of oil and all the rubbing you have patience to give. Remember, the success of the operation depends on allowing each coat of varnish to dry thoroughly.

While waiting for the varnish to dry the methodical man would naturally look over his stock of flies, discarding the damaged ones. Those that are only mussed can be doctored with steam. Put a cork with a small hole through it in the spout of a teakettle or hold the fly over the vent in your radiator. Make a bodkin by sticking a needle in a small piece of wood. With the needle point stroke up the wings and hackles. If the fly is badly stuck together it can be washed in tepid suds. Stick the flies in a strip of cork or soft wood until dry ,then put away in moth balls or tobacco.

Soak the old leaders and test them while wet. If you are a fly fisherman buy some lengths of gut of the same size as the end of the leader, and tie a strand to each. Leaders lengthened in this way will last much longer. Breaks occur most often near the end, and you will lose only the piece you tied on. This is particularly true of imported leaders.

Clean and oil the reel, even if it only cost a dollar. Rub the lines with a very little crude oil, and if badly worn apply some of the preparations for refinishing enameled lines. If possible get an old trunk or a large box and keep everything together.

Then, brethren, when the tomtit sings in the willows and the voice of the Klaxon horn is heard in the land, you can repair to your favorite stream with that peace and tranquillity of mind which has been our heritage since the days of Walton.

Perhaps while resting beside the stream you may see a tall cuss, so lazy that he switch casts rather than lift his line out of the water. If you should meet this person be kind to him—he's harmless.

Biggest Buck of Season.—A twenty-seven point buck! Such an animal nowadays sounds like a pioneer's tale, but here is the story of its taking.

Ranger Lewis M. Lorenson, each summer stationed at Winthrop, Shasta county, is possessor of the fine antlers—the biggest pair secured by California hunters for many years.

Just at the close of the season last year, Lorenson was surveying near Medicine Lake, not for from the holdings of Attorney Cohen of San Francisco. Lorenson suddenly came upon the great buck asleep in a soft pine needle bed. He had no gun, but he lost no time in covering the half-mile back to camp to secure a shooting iron.

Luck was with him. The buck was just arising when the excited hunter returned. One shot and Lorenson became possessor of 350 pounds of venison and the biggest antlers of the season.

Hunter Pays For Calf.—North Yakima (Wash.).—Gus McLavay, a Parker Bottom rancher, was given judgment in the superior court against Walter Leloh for $25, representing the value of a calf alleged to have been killed by Leloh while hunting pheasants last fall. This is the first judgment for alleged damages to stock in the hunting season which has been given in the local court. Leloh denied killing the calf, but it was proved that the calf was either killed by Leloh or by one of two hunters with him at the time, and the other two were able to satisfy the court they were not guilty.

ALAMEDA ELKS CLUB OPENS SEASON.

Ed Garratt and E. B. Thorning Tie for High Honors; Fred Willet Tops Professionals.

The Alameda Elks' Gun Club ushered in the season on the Alameda grounds last Sunday under the most auspicious surroundings. There were fifty-eight in the regular monthly club program and the scores established were very creditable. Bray Thorning, one of the enthusiastic members ,and Ed Garratt ran a dead heat for the high amateur honors. Each busted 48 out of the fifty. Close behind was Ted Handman with 47 and H. B. Vallejo, Al Durney, W. E. Cooley and Barney Worthen each snuffed out 46. Among the professionals, Fred Willet was in a happy mood to drop only one bird. Len Hawxhurst got 47 and Bill Ellis kept up his good lick with 46. Miss Gladys Reid, the pretty miss from Portland, stepped right along with a 42x50 score.

The club did things up right by serving a clam chowder feast that still has the boys licking their chops. The scores set were as follows:

Events—	15	15	20	Total
*J. W F. Moore	10	12	16	38

*Professionals.

Seattle Association—With sixty-seven shooters facing the firing line, the largest crowd, outside of the state tournaments, to appear on the grounds of the Seattle Trapshooters' Association, the opening season shoot held by this association on February 25th was one great success.

Many of the nearby gun clubs helped the club to make a showing, chief among these being the Green Lake Club of Seattle that closed its grounds in respect to the older organization. Tacoma, Bellingham, North Yakima, Wenatchee and Leavenworth were represented by shooters.

High score amateurs for the day were: C. E. McKelvey, Hugh Fleming and C. L. Templeton, tying with 48 each in the 50-target program. Hugh Fleming and Hi Follrich finished high gun amateur scores by shooting 96 out of the bunch. Professionals standing high were, Geo. Garrison and Ike Fisher, high in the fifty with forty-eight, and Geo. Garrison high in the hundred by going ninety-six.

The Seattle Association has announced a merchandise and trophy shoot t otake place in two weeks. All Northwest clubs are invited to attend. The scores:

At 50 targets—Geo. Garrison* 48, C. E. McKelvey 48, Hugh Fleming 48, Ike Fisher* 48, C. L. Templeton 48, Frank Riehl* 47, J. A. Dague 47, E. W. Cooper 47, Jno. Ruppe 46, Hi Follrich 46, J. H. Hopkins 46, C. R. McConnell 46, Ralph Kinzer 45, Fred Landwehr 45, Matt Grossman 45, R. S. Barnes 45, E. K. Van Vlock 45, A. H. Adams 45, Geo. Hambright* 45, V. V. Eisenbeis 45, Alvin Riehl 45, R. S. Searle 44, Deskin Reid 44, L. H. Reid* 44, Tom Wilkes 44, Dr. King 44, A. Drake 43, S. A. Martin 43, E. Chantrell 43, W. B. Taft 42, D. Rhodes* 42, D. F. Williams 42, Dr. Newton 42, Dr. Hill 42, Jack Converse 41, W. H. Carstens 41, Dr. Kidd 41, Wm. F. Anderson 41, J. H. Templeton 39, A. L. Hall 39, A. W. Mathis 39, P. E. Sullivan 39, O. H. Carver 39, J. H. Geltz 38, Dr. Case 38, C. F. Reinhard 37, J. R. Gibson 36, Geo. Baker 36, J. E. Dafter 36, M. A. Rosenfield 36, Dr. Giffin 36, C. W. Bandy 35, L. B. Williamson 34, H. E. Gleason 34, J. A. Conklin 33, J. Roy 33, Dr. R. V. Mills 31, J. H. Davis 30, W. M. Elliott 26, D. C. Bryant 15.

At 100 targets—Geo. Garrison* 96, Hugh Fleming 96, Hi Follrich 96, C. E. McKelvey 95, Ike Fisher* 94, Frank Riehl* 93, C. L. Templeton 92, Ralph Kinzer 91, Matt Grosseman 91, L. H. Reid* 91, E. S. Hobbies and Their Riders.—Almost every man has a hobby. In fact, it's a poor man that hasn't one. True, he may have been lavishly endowed with worldly goods, but without a real, honest-to-goodness hobby he's up against it hard.

Hardly a day passes but what President Wilson does not play a round of golf. He is an ardent lover of the game and finds much real recreation in it.

John Philip Sousa, when not wielding the magic wand or wooing the muse of famous march music, spends his time at horseback riding or in pulverizing the frisky clay pigeons. In fact, Sousa is some shooter. He admits it, and the trapshooting fraternity throughout this country will willingly attest the fact.

Christy Mathewson, the greatest pitcher of his day —the old master—is also "some punkins" at the traps, as well as on the links, and Chief Bender is a crack shot.

In fact, delving into the sport of trapshooting alone, there are hundreds of famous names on its list of enthusiasts.

Governors Brumbaugh, of Pennsylvania; Ferguson of Texas, Major of Missouri, Capper of Kansas, and ex-Governor West of Oregon, have shattered many a clay bird with their trusty 12-gauges.

Former Director of Public Safety George D. Porter and Superintendent Robinson, of the Philadelphia police, have likewise been participants in many exciting clay target tournaments.

George D. Smith, Mayor of Los Banos, California, one of the best known shooters on the Pacific Coast, goes in for both trap and field shooting. He is an ardent Nimrod, has his own spacious preserves ,and breeds his own game, as well as dogs.

Walter H. Cline, a California District Attorney, seldom misses an opportnuity to appear before the traps, while L. B. Clarke, vice-president of the Hibernian Bank of Chicago, was the winner of 1915's Grand American Handicap—the blue ribbon event of the year.

Licaense For Trappers.—Trappers and persons interested in the preservation of fur-bearing animals in California have started a letter campaign to amend a bill pending before the Legislature providing for the licensing of trappers. They are asking that the act should not become operative against boys under 18 and that a closed season should be placed on all fur-bearing animals to last throughout the summer months.

In asking for the amendment of the measure the fur hunters appear as champions of the skunk, along with fisher, marten, fox, mink ,and otter. They say there are many things to be said in favor of the skunk. He is pictured as a nocturnal destroyer of rodents and insects.

The closed season is asked to save the fur, as fur taken during the warm months is valueless.

Trappers point out that boys in the mountainous districts secure their extra money during the winter by trapping, and that the payment of a license fee would work a hardship upon them.

Migratory Bird Regulations.—The United States Department of Agriculture has received inquiries from many sportsmen in the Middle West in regard to spring shooting of waterfowl. In response the Department has made the following public announcement: "Under the Federal regulations there is a closed season from February 1 to September 6, inclusive, each year throughout the United States on waterfowl and other migratory game birds; the season for hunting is further restricted in various parts of the country to periods not exceeding three and one-half months. The open season on waterfowl in the States of Ohio, Indiana, Illinois, Nebraska, Kansas and Missouri is from September 16 to December 31, inclusive, and it is unlawful to hunt or kill waterfowl in those states at any other time. Persons committing violations of the regulations may be prosecuted at any time within three years after an offense is committed."

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Share Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 nd a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Los Angeles Club.—Heine Pfirrmann, blasting from the 20-yard line, smashed 97x100 targets as the Los Angeles Gun Club Sunday and by so doing was the high gun for the day's shoot in the trophy event.

F. H. Mellon took second high honors with 95x100 breaks to his credit, while L. M. Packard was third with 94x100 smashes. Owen Evans, W. S. Hillis and L. J. Micka tied for third with 93x100 smashes. The scores:

H. Pfirrmann 97, F. H. Mellon 95, L. M. Packard 94, O. A. Evans 93, L. J. Micka 98, W. S. Hillis 93, N. W. Nelson 92, C. S. White 92, C. F. Nichols 92, G. Holohan 92, W. A. Joslyn 92, F. H. Mellus 91, Owen Council 91, C. W. Fish 90, J. W. Meek 90, J. W. Meek 90, L. R. Mellus 90, Geo. Tuckett 90, Mrs. H. Pfirrmann 89, C. D. Hagerman 89, J. F. Dodds 88, F. Frewelll 88, L. J. Petit 88, H. E. Sargent 88, R. O. Pool 87, V. A. Rossbach 87, A. Pachmayr 87, H. C. Cline 87, C. W. Clement 86, F. H. Nichols 86, R. H. Morse 86, R. Adcock 85, E. K. Mohler 84, W. A. Cornelius 84, B. H. Carnahan 83, C. H. Betz 82, Wm. Kennedy 82, J. R. Pitcher 81, F. E. Brint 81, E. Hartmann 81, S. C. Miller 79, Mrs. F. H. Mellon 76, A. Hartmann 68, Chas. Richards 68, J. C. Collins 64x75, W. Scott 46x50, J .H. Bishop Jr. 45x50, Wm. Dougherty 45x50, Seth Hart 44x50, F. H. Teeple 44x50, Paul Nourse 43x50, W. L. Vail 43x50, G. L. Pulley 40x50, C. T. Greenfield 39x50, H. J. Bauer 39x50, M. D. Towne 39x50, C. E. Groat 20x25, W. E. Seeley 20x25, L. H. Brown 19x25, D. J. DeHetre 23x25, Mrs. Groat 22x25, P. J. Curley 34x50, Mrs. C. McClean 30x50.

The point winners on the John C. Cline diamond watch charm are as follows: Mellon 12, Mohler 8, Micka 8, Cline 7, Mellus 7, Packard 7, Cornelius 7, Pfirrmann 6, Allen 4, Morse 3, Petit 3, Gibson 2, Grewell 2, Carter 2, White 2, Mrs. Pfirrmann 2, Dodds 2, Evans 2, Hillis 2, L. R. Mellus 1, Council 1, Nelson 1, Nichols 1.

Young America and Trapshooting.—Time was when trapshooting was looked up as a sport only suitable for the sterner sex. A woman trapshooter was considered a freak. Today women shoot and vote under the same conditions as their husbands, brothers or sweethearts.

It is not to be wondered at then that the boys and girls incline naturally to a desire which gives so much enjoyment to their elders, and coming by it naturally they should be encouraged.

Where a few years ago, there were no women trapshooters, today there are hundreds. A few years ago the thought of a 15-year-old shooting at the traps would have been laughed at. Today we see them shooting with their elders and shooting like veterans.

What does it teach? First of all, confidence; it banishes timidity; it quickens the judgment; creates poise; makes for broad-mindedness and a healthy mental attitude.

The boy or girl who takes up trapshooting needs less coaching than an older novice. They seem to grasp the fundamentals with little effort, after which the results depend largely on the opportunity offered.

"Squad Manners" are absorbed immediately—when to change position, consideration for other shooters, when making changes, etc.

The main thing is the proper placing of a correctly fitting gun stock to the shoulder, distance of hand on fore-end to avoid straining (this governed by the length of the shooter's arms), and finally, "looking" with both eyes instead of aiming with one.—[George Peck.

Telegraphic Shoot.—Spokane, Wash., March 4.—Results of today's shoot in the Inland Empire Telegraphic trapshooting tournament placed Spokane and Wallace in first place with three straight victories to their credit. Kalispell and Kellogg are tied for second place with two victories and one defeat each.

Three of today's matches resulted in ties.

George Arland of Garfield is still in the lead for individual honors, having a total score of 74 out of a possible 75. Today's results follow:

Spokane, 111, Potlatch 104, Pendleton 114, Sunnyside 105, Wallace 115, Palouse 113, Garfield 122, Kellogg 122, Kalispell 119, Lewiston 119, Wenatchee 116, Pomeroy, 116.

Sportsmen's Row

The boys at the Alameda Club shoot on Sunday had a tough time of it. While they were trying to concentrate on busting the targets for a high score, several flights of wild ducks flew overhead. To the credit of the wild fowl be it said that they used good judgment in keeping out of range, for the temptation to turn loose on them would likely have landed some of the gang, even though it is the closed season. No self-respecting hunter can very well stand for a duck giving him the ha, ha.

✤ ✤ ✤

Miss Gladys Reid is figuring on returning to her home in Portland this coming week. The pretty miss showed herself to be a coming shot at both the Golden Gate and Elks' Club shoots and made many friends by her pleasant ways and genial smiles.

✤ ✤ ✤

W. L. Koch is one of the younger shooters who is sticking to the sport and coming ahead in leaps and bounds.

✤ ✤ ✤

No more tournaments now until the third Sunday, March 18th, when the Golden Gate Club will give its first monthly tournament.

✤ ✤ ✤

At the annual meeting of the Los Angeles Gun Club, held last week, Heine Pfirrmann was elected president of the club for the coming season. Harry Cline was elected vice-president and Fred Teeple secretary, and Owen Council treasurer. William Kennedy, H. E. Sargent, E. K. Mohler, C. W. Fish, F. H. Mellus, B. H. Carnahan, N. W. Nelson, W. A. Cornelius, V. A. Rossbeck, C. J. O'Reillly and E. C. Crossman were selected as directors for the coming season. There have been 38,805 targets thrown at the club during the past month, and 266,825 thrown since the first of the year.

✤ ✤ ✤

Mrs. A. O. Lakeland of Summit, N. J., has purchased the orange Pomeranian Minegold Glory from Mrs. F. Brown and Mrs. K. Carlin for $1,250. Minegold Glory won several classes in the Garden and has been unusually successful recently. Mrs. Lakeland is an extensive breeder of Poms.

✤ ✤ ✤

The Big Time Gun Club of Sacramento, before opening the season last Sunday at the Schenk ranch, held an election of officers. Last year there were 214 members and at the annual election there were sixty-five present, with the following named for office: President, Howard Oldbeck; financial secretary and treasurer, Ralph Jost; recording secretary, E. Raffeto; field captain, D. E. Newbeck. These officers with Lee Gorman constitute the board of directors.

✤ ✤ ✤

Al. Durney set up a three-win trophy for high runs at the Alameda Elks' Club and then at the first shoot he annexed a win on it. Al started out badly, missing his first three birds, but he closed with a rush with a straight run of 42.

✤ ✤ ✤

The San Jose Club will stage an old policy registered tournament on March 25th.

✤ ✤ ✤

It is announced that a trout fishing club is soon to be organized at Big Bear Lake, California, which the organizers hope will be a close rival of the Tuna Club at Catalina Island. It is rumored that Judge Henry O'Melveny of Los Angeles will be the first president of the new organization.

✤ ✤ ✤

March 11th the Seattle Trapshooters' Association is planning a special merchandise shoot, the prize shooting being open to everybody. Four classes, for which the club is giving four prizes for each class, will shoot the regular club program of fifty targets. An extra fifty targets, using the added bird handicap, will be shot for the possession of a beautiful oil painting valued at $25 and presented by Fred Landwehr.

N. W. Trapshooters' League.—The christening shoot of this newly formed league will take place on the grounds of the Seattle Trapshooters' Association Sunday, March 25th. The formation of this body of clubs, for which all due credit falls on the shoulders of our mutual friend L. H. Reid, will perhaps go farther towards bringing the sportsmen of the locality together in acquaintance and good-fellowship than any other way.

The monthly shoots of the league will furnish the shooters a splendid opportunity of registering more targets than they have before. The program consists of one hundred registered targets and two handicap events. A team race between teams selected by each club will be the feature of the season's shooting.

Prizes offered by the Interstate Association and also the individual clubs of the league will furnish the contesting shooters something besides the sport.

Officers of the league are Dr. C. L. Templeton, president, and Sarl A. Fry, secretary-treasurer, both living in Seattle.

Dates registered, names of clubs composing the league and their secretaries are as follows:

March 25th—Seattle Trapshooters' Assn. at Seattle. E. A. Fry, Sec'y.

April 22nd—Tacoma Gun Club, at Tacoma. E. E. Young, Sec'y.

May 13th—Everett Gun Club, at Everett. C. E. French, Sec'y.

June 17th—Bellingham Gun Club, at Bellingham. I. Dienberger, Sec'y.

July 22nd—Chehalis Gun Club, at Chehalis. W. C. Short, Sec'y.

Aug. 19th—Blaine Gun Club, at Blaine. F. L. Gott, Sec'y.

Sept. 9th—Green Lake Gun Club, at Seattle. G. A. Conklin, Sec'y.

Yours, E. A. FRY.

Wing Club Shoot.—Jack Nelson and Henry Stelling, both well known to local trapshooters, engaged in a match Sunday, to the great amusement and interest of the California Wing Club members, in which Nelson came out with first honors. The two entered a white flyer contest, twelve to be the full flight. When the affair was over Jack Nelson had a score of 10 to his opponent's 7. Nelson is now being called the "champeen." Other scores of the shoot are:

First event: Peter Walsh 11, Newt Neustadter 2, Ed Hogg 11, Captain Du Bray 6, Henry Stelling 10, T. C. Peterson 7, Jennings 11, Jack Nelson 10, Edward Forester 11, C. C. Nauman 12, Eugene Forester 9, Joe Nelson 8.

Second event: Peter Walsh 10, Newt Neustadter 12, Captain Du Bray 8, T. C. Peterson 9, Jennings 8, Jack Nelson 10, Eugene Forester 9.

"Freeze Out" match: Neustatter and Nelson tied with 7each.

C. C. Nauman was the only contestant to make a perfect score of 12.

S. F. Flycasting Club.—The whirr of reels and the sing of the line playing out throughagate rings marked the entrance of another spring sport Sunday. The members of the San Francisco Fly and Bait Casting Club gathered at Stow Lake in Golden Gate Park to participate in the midwinter tourney.

Weather conditions were ideal. There was no wind and the atmosphere was just a trifle hazy. A feature of the tourney was the ten-pin lure event, infeature of the tourney was the ten-pin lure event. The results:

Trapshooting Has Changed.—Back in the early '80s when America's sportsmen began to demand a between-season outlet for their gunning enthusiasm, some bright Yankee genius conceived the idea of the glass ball as a fitting target to try the prowess of the marksman, when the object was projected at unknown angles from a mechanical contrivance known as a trap.

The name of Bogardus, in connection with glass-ball shooting, is not only historical, but still alive and dominant in the reminiscences of old-timers, a goodly percentage of whom still follow the sport of trapshooting.

The trapshooting of today, however, differs materially from that sport of long ago; the traps are more scientifically constructed, the target, instead of being globular in form, is saucer-shaped and not only covers its 50-yard flight with the speed of an arrow, but rotates as well.

It has become customary for writers to refer to the clay pigeon as "the inanimate target"; so long as they remain packed in barrels or stacked in the trap house this is quite proper. On the other hand, were you to ask any one of the 500,000 active trapshooters in the country for his personal opinion he would unhesitatingly say that immediately following the release of the trap it becomes just about as animated as a devilish ingenuity could conceive.—By "Trapshooter."

WASHINGTON PROUD OF HER GAME.

Warden Darwin Writes That Resources Are Plentiful Because of Cold Water.

[By L. H. Darwin, Washington State Fish Commissioner and Game Warden]

Washington today offers the best hunting and fishing opportunities of any State in the Union. Trout are not only more plentiful in Washington than elsewhere, but they are of the finest quality that can be found anywhere. The explanation for this, in part at least, is its cold water, both fresh and salt. So excellent are its native varieties that the law prohibits the planting of any variety into its waters without the written consent of the State Fish Commissioner, who is also the State Game Warden.

Some of the varieties of fish classed in the East as of the best game fish are so plentiful in Washington as to be designated commercially as food fish and are taken in the salt waters with every description of net. This is especially true of what is known in Washington as the steelhead salmon, but which is classed scientifically and by the Federal Government as a trout.

The plentiful supply of game fish is undoubtedly responsible for the fact that smal lefforts were put forth in this State prior to three and one-half years ago t oartificially propagate them. Washington is increasing in population faster than any other State in the Union, and this fact is responsible in part for the great efforts which have been put forth by State Fish Commissioner and State Game Warden L. H. Darwin, since assuming charge of the office, to not only increase the output of the food fish hatcheries but to greatly increase the output of the game fish hatcheries.

In 1912 the output of the game fish hatcheries in the State was slightly over 2,900,000. This was rapidly increased during the next three years until in 1915 the output of the trout hatcheries was in excess of 17,000,000. It is believed that this is a larger number of eggs than was hatched by all the other States combined, west of the Rocky Mountains.

The number of trout hatcheries in the State during the incumbency of the present Commissioner has been increased from four to seven, while the cost of hatching trout fry has been reduced to about one-fifth of what is was three and one-half years ago.

The first effort on the part of the State to hatch game birds was put forth last year by the State Game Warden, who established an experimental game farm at the State Penitentiary at Walla Walla, with some $2,500 contributed by some of the counties of the state for this purpose. The efforts were confined exclusively to the propagation of Ringneck or Chinese pheasants.

Two things influenced the selection of the State Penitentiary for this experiment: One was the ability so secure labor without any cost and the other was the settled climatic conditions. Success beyond the wildest anticipations attended the effort. Out of some 2,500 eggs set, some 1,900 birds were hatched, of which 1,824 were reared and distributed to the counties contributing to the fund for the establishment of the experimental farm.

The State Association of Game Commissioners and Game Wardens at their annual meeting at Tacoma, December 11 and 12, 1916, unanimously endorsed the proposition of the permanent establishment of a game farm at the State Penitentiary and recommended an appropriation of $25,000 from the State Game Fund for this purpose. Never in the history of the state had the work of propagation of game fish and game birds been carried forward on such a large scale and at such a small cost.

JOE RICE WRITES FROM PHOENIX.

Breeder and Sportsman:

We had a nice little shoot at the Phoenix Gun Club this morning (Sunday, the 4th), with Tom Edens high man. Scores of program follow:

Tom Edens 46x50, 25 of these from 23 yds.; Ray DeMund 44x50, 25 from 23 yds.; H. P. DeMund 35x50, 25 from 23 yds.; W. B. Twitchell 35x50, 25 from 18 yds.; Del Morrell 36x50, 25 from 20 yds.; H. Heileman 41x50, 25 from 20 yds.; Wm. Heflin 33x50, 25 from 18 yds.; Capt. Gulley (first time at traps) 21x50 from 16 yds.; H. S. Prince 25x50 at 16 yds.; *Joe Rice 33x50 at 16 yds.

Arizona has registered three shoots for this fall, the first at Hillside (between Phoenix and Prescott), Nov. 9 and 10, then Phoenix, with the wind-up at Ray.

The shoot at Hillside will be given by Mr. C. Mullen, who is the brother of W. E. Mullen of Ray. The shoot will be held on the Mullen Ranch, and this shoot will be a crackerjack, as the Mullens know how to entertain. I am of the opinion that this will be the best shoot ever pulled off in the Southwest.

I missed seeing many of the boys at Christmas time, and was sorry. I miss the Golden Gate shoots and the good times we used to have around the various Bay clubs.

Am still receiving the Breeder and Sportsman, and appreciate it much.

With kindest regards to all the boys, I am

Very truly yours, JOE RICE.

Phoenix, Ariz., March 4th.

WESTMINSTER SHOW BIG SUCCESS.

Conejo Wicollar Boy, Wire-Haired Fox Terrier, Is Judged Best Boy in Country.

New York has just passed through its biggest dog week, according to many of those who have attended all the shows of the Westminster Kennel Club held in the past thirty years. Though the record of dogs entered had been surpassed once before, there never was a time, according to those old-timers, when the general public demonstrated so keen an interest in the leading show of the country.

The public attended in larger numbers than ever before, and what is more to the point, nearly every person who went to the Garden during the four days of the show displayed more than a passing knowledge of the points of a dog. Fifteen or twenty years ago it was the custom to go to the dog show, just as to the horse show, because other people went to the big attractions in the Garden, but the ordinary visitor knew little or nothing about the animals he came to observe, but just strolled through the aisles and went out no wiser than he came in.

All this was changed in the recent show and nearly every visitor picked out his own pet breed, and his own pet dog, irrespective of the rulings of the judges, which made or unmade champions. That was distinctly evident on Friday when the specials were being awarded. The spectators grouped around the ring for the judging of the best dog in the show of any breed and displayed a tense interest more suggestive of the prize ring than of a dog show. Nearly all were acquainted with the champions of the different breeds and vigorous applause greeted the award of the chief honor to Mrs. Roy A. Rainey, for the great showing made by her wire-haired fox terrier, Conejo Yycollar Boy.

There was a distinct improvement of the quality of the entries in most of the principal breeds, but the experts agreed in the statement that the wire-haired fox terriers came nearer to perfection in standard than any other breed. Mrs. Rainey was supreme all through in these classes, Biddy of Holyport taking the winner's bitches award in addition to the early and later honors garnered by Wycollar Boy. The Long Island woman has spent money lavishly and possesses the best string of wire-haired fox terriers in the country. As a result she was to the front in most of the specials which marked the closing day of the show. Among her other dogs that captured prizes were: Conejo Highbrow, ch. Guycraft Salex, Conejo Gentry Girl, Conejo Enticement, ch. Matford Vic, Uncle Sam, and Parcel Post.

The Bostons, which had the largest entry, showed better marking and color than ever before, according to Mrs. F .A. Dellen, who passed on the breed. Most were of a darker brindle than hitherto and showed improvement about the eyes. The only real criticism was that many of those entered were a trifle too light, in bone. The honors of the class went to Mrs. George E. Dresser's ch. Peter's Captain, which went out of his class to gain the honor of being the best American bred dog in the show.

Charles G. Hopton, who judged the German shepherd dogs, was upheld in his placings later in the week by George Thomas, the judge of specials. The honors in dogs went to Sheridan S. Norton's ch. Max, while Herta von Ehrengrund was the best of the bitches under both judges. Both experts showed objection t othe exceptional fronts which some winners of previous years have had.

Among the bulldogs, ch. Strathtay Prince Albert, owned by Alex H. Stewart, of Chicago, was easily the best. He is an exceptionally low and massive brindle and white, and scored over the American bred Astoria Baron, which was loose behind and wide in the shoulders. In the bitches the winner's award went to Mr. Stewart's Strathtay White Light. Oakwell Flirty West, the reserve, was possibly a trifle heavier in wrinkle and squarer in face than White Light, but the Chicago dog was much better in body, shoulder formation and gait.

The Sealyham had the best entry ever seen in America. The winner was the famous English champion, Hadley Hoodwink, owned by W. Ross Proctor. Hoodwink is a great type of the working terrier, but lacked the action, strength of ribs and powerful quarters of some former champions.

In Irish terriers there was nothing good enough to beat the recently imported Brook Hill Double Shear, owned by W. C. Seipp, a rare stamp which won comfortably. There were quite a few, however, who declared another recent importation, Wrose Badger, owned by Marcus Bird and John A. Bell, Jr., should have been in the money. But she was a little off in coat and a bit overdone in trimming. In the other sex, John G. Bates's famous old champion, Barney Belinda, was an easy victor.

There were some prominent dogs absent from the Pekingese classes. However, of the dogs shown, the first three, Nowata Swinley Lilien, belonging to Mrs. M. E. Harby; Tim Yee Kung of Alderburque, owned by Mrs. Elbridge Gerry Snow, and Shan Tong of Pah Kow were easily the best.

Champion Abbey King Nobbler was the best of the Airedales, but there were many new ones of merit shown. Mr. Stewart's six-year-old title holder looked as good as ever in his wonderful career, and the strong fight he made for actual best dog of the show was evidence that Judge William L. Barclay did not err when he placed Nobbler as the winner in the breed.

The St. Bernards were a grand lot. Colonel Jacob Ruppert captured most of the honors, but it was said experts could not understand why the Judge placed the Colonel's recent importation, Portia, over her sire, the Colonel's old favorite, Boy Blue.

Gamins Rival, belonging to Hugh Jackson, won for best of the breed for French bulldogs. He is the famous sire of the well-known La France Model, winners' dog, and Gamins Rival, Jr., the reserve winner. Both La France Model and Gamins Rival, Jr., are owned by Robert A. Scott. The winners' bitch was Haworth Mircelli, owned by Mrs. Mabel Riddell. Reserve winners' bitch, Georgette R., comes from New England. The sensation of the breed was Arnold Lawson's puppy Robespierre, which is bound to improve and become a champion.—[N. Y., March 4.

New A. A. T. A. Clubs—With the addition of 23 separate organizations during the last month, the club membership of the American Amateur Trapshooters' Association, the Amateur Trapshooters' national body, of which John Philip Sousa is president, is increased to 1309 clubs, distributed among 48 states, Hawaii, Alaska and Canada.

The new clubs to be admitted and which now have the privilege of holding contests for the various medals and trophies awarded by the national organization are as follows:

California—Los Angeles Gun Club, Los Angeles, Fred. H. Teeple, secretary.

Colorado—Lakewood Country Club, Denver, W. A. McConnell, secretary.

Dist. Columbia—Analostan Gun Club, Washington, Miles Taylor, secretary.

Illinois—Iuka Rod and Gun Club, Iuka, G. C. Gorges, secretary; Neopit Trapshooters' Club, Neopit, A. H. Mierswa, secretary.

Maryland—Princess Anne Trapshooting Club, Princess Anne, Earle B. Polk, secretary; Tome School Gun Club, Port Deposit, W. R. Dey, secretary.

Michigan—Lake Linden Rod and Gun Club, Lake Linden, Edw. J. Marcotte, secretary; Pearl Beach Gun Club, Pearl Beach, Harry J. Mier, secretary; West Side Gun Club, Saginaw, Fred L. Helfrecht, secretary.

Minnesota—Chisholm Rod and Gun Club, Chisholm, John Dwyer, secretary.

Missouri—Automobile Club of Kansas City, R. McDermand, secretary.

New Jersey—Englewood Country Club, Englewood, S. A. Graham, secretary; Laurel House Gun Club, Lakewood, A. J. Murphy, secretary.

New York—Bergen Beach Gun Club, Bergen Beach, H. W. Dreyer, secretary; Jefferson Gun Club, Buffalo, D. S. Jacobs, secretary; Cazenovia Gun Club, Cazenovia, H. J. Cull, secretary.

Ohio—Richfield Gun Club, Richfield, Sidney Buell, secretary.

Pennsylvania—Lancaster County Gun Club, Lancaster, J. P. Breneman, president; Oxford Gun Club, Oxford, Dr. Frank A. Hanna, secretary; Wilkinsburg Gun Club, Wilkinsburg, J. Frank Miller, secretary.

Rhode Island—South Country Rod and Gun Club, Westerly, Israel R. Sheldon, secretary.

Wyoming—Rawlins Ideal Gun Club, Rawlins, J. Richard Daley, secretary.

✤ ✤ ✤

Salt Lake Club.—Members of the Salt Lake Gun Club celebrated Washington's Birthday with an interesting shoot at the local traps. On account of the weather conditions, there was not as large a crowd present as was expected. Thos who did attend, however, entered into the sport with much enthusiasm and for this reason the competition was keen.

Reilley, Bishop and Mitchell ran a very close race. The suspense was held until the last event, when Mitchell lost out by one target, leaving Reilley and Bishop tied for first with the score of 47x50. Under such weather conditions as prevailed, these scores are considered very good. Following are the results:

Bishop 47, Reilley 47, Mitchell 46, Anderson (pro.) 43, Heagren 41, Welch 41, Anderson 27, Brown 25.

Louie Breer, one of the old school of trapshooters, and a good one in his day, banteringly challenged his friend Lee Garnsley to a match at 100 targets, Lee to shoot the first 50, and regardless of what he broke he was to count ther all dead, and the last 50 he would get what he actually broke. This looked like a good bet for Louie as Lee had never shot at a target and had only taken up game shooting in the last two years. At the conclusion of the race, which was held in Los Angeles, Louie had broke 86 out of 100 and Lee 93 out of 100 without his handicap. His strings of 25's were broke 22, 23, 25, 23. He also had a run of 57 straight. "This was the most remarkable shooting for a beginner that I have ever witnessed," declared Fred H. Teeple.

Refuge at Riverside.—If a measure proposed by the State Fish and Game Game Commission of California is passed by the present Legislature, a game refuge will be established in the vicinity of Sheep Mountain, Riverside county, to include 69,120 acres of mountain land. Sheep Mountain is located two or three miles northwest of the Martinez Mountain on the west side of the Coachella valley and on the south side of the San Jacinto mountains. A new system of roads is to be built from the towns of the valley to the foot of the mountains, through a recent bond issue voted in the valley. The bill proposes that seventeen game refuges be established in the Sierra Nevada and coast ranges of mountains. The new refuge in Riverside County will be the second largest in the state to be formed under the bill.

Riverside, Cal. FELT WAD.

TIME TO THINK OF CAMPING.

Sportsman's Axe Is Most Important Thing to Remember To Take Along.

Few people realize the importance and value of the axe. In some of its various forms it has been a mainstay of pioneer life since the beginning. With prehistoric peoples it was not only an all-purpase tool, but the premier weapon. The ancient stone axe of the British Isles, called celt, the more elaborate dolabra of the same material, used by the old Romans as a sacrificial instrument, the tomahawk of our American aborigines—these any many others under various names are progenitors of our modern axe.

It is interesting to note that among primitive peoples, our Indians brought the axe as a weapon to its highest development. The tomahawk was originally of stone, but the natives were quick to appreciate the superiority of iron as introduced to them by the white traders.

And the value of the tomahawk did not end with its uses as a weapon and tool; the pipe-tomahawk had a hollow stem, and a bowl at the back of the head. Thus the red man was prepared to "smoke the pipe of peace" or remove an enemy's top-knot, according to the nature of the overtures.

The number of different axes today is astonishing. Every trade seems to have its particular kind; to name but a few, we have the fireman's axe, the stone-cutter's axe, the butcher's axe, the ship broadaxe, the double bitted axe, the ordinary broadaxe, the common chopping axe—and, best of all, the sportsman's axe.

The well-equipped sportsman, if he is camping, takes two axes, one to remain at camp, the other a belt axe to be always with him. The ordinary camp axe should have a 36-inch handle and be rather heavy. If you have much clearing to do a light axe is a nuisance.

I advocate the square-poled implement because of its greater range of usefulness. Particularly as an anvil it will serve you to great advantage. Striking it solidly into a log gives you a fine working surface on which to havver anything with your belt-axe or hunting knife.

As a first step in arranging camp, nail a heavy piece of canvas on a tree as a sheath for the camp axe, and demand that every one in the party put it back in the pocket when done using it. This precaution not only saves the tool, but prevents accidents. And to be really considerate of your pal, the axe, you should nail a little curtain above the pocket, so that the blade may not be rusted by rain.

The belt axe is one of the finest accessories ever added to the sportsman's outfit. As inexpensive as they are, no woodsman can afford to be without one. The blade should be forged from tool steel and carefully tempered, the handle should be second growth hickory, about 14 or 16 inches long. Such an axe will cost you not more than 75 cents, and you can buy a sheath and belt for 60 cents.

The art of sharpening ordinary tools is really a part of woods lore. Different methods are used in conditioning the axe blade, but experience has proved that a one-sided bevel throws chips off better. Finishing both sides equally straight causes the axe to stick more or less.

The best whetstone for steady use is a combination one—coarse India stone on one side, and a fine grained Washita for finishing on the other. Also for hunting-knives, this stone will be found very satisfactory. Many fishermen use it for pointing their hooks and removing rust from various articles of the tackle.

It is always well to have an extra axe-handle in the pack, but if this precaution has been neglected and you find yourself "up against it" with a broken helve, don't worry. With a sharp hunting-knife, a piece of glass, and any stick to use temporarily as a handle till you can cut out a piece of timber, you are independent of the manufacturers.

Select second growth hickory—white is best—and be certain that it is straight-grained and contains no knots. Most of the hardwoods are too brash. Oak and elm are too heavy, and sycamore, though frequently used, is not as satisfactory as the reliable hickory. A straight handle is easier to make, and just as good for your purpose.

Finishing the handle as far as possible with your knife lessens the work, but the real smoothness comes from using the glass. Any fragment, like a piece of broken bottle, will answer perfectly. Use the thinnest cutting edge and you can get about the same results as from sandpaper.

Most important of all is the fit of the handle in the axe-eye. It must be such as to give an absolutely even cutting edge. If either corner is allowed to strike first, the axe is liable to glance. Such an axe is highly dangerous, and will break its handle, if it does no worse. See, too, that the wedging is secure.

The splits, of course, are to be made with your knife before the final adjustment of helve to eye. Spit both ways and have the wedges sufficiently long to retain their place . Many serious accidents have occurred as a result of carelessness in wedging.

L. E. EUBANKS.

Another freak bill that has been introduced in the legislature is the idea to limit the number of ducks to be shot to the number of persons in a hunter's family.

Stock and Farm Department

Cloverdale.—Owing to the heavy rain for five days during the time of the twenty-fourth annual citrus fair, it is now figured that the fair ran between $300 and $400 behind. This deficit will be met by the business men of the town, who agreed in advance to finance the fair if it became necessary. Although regretting the unfortunate weather conditions as far as the fair was concerned, Cloverdale has generally rejoiced over the fine crops that the rain will bring to the section. No racing was conducted.

✣ ✣ ✣

Chico (Butte Co.).—A number of farmers and swine breeders attended the lecture at the high school last Saturday given by Professor J. I. Thompson of the California state fair school. The subject o fthe lecture was "Hog Management and Hog Raising." Dr. B. H. Cady followed Professor Thompson with a review of hog cholera and its prevention. He also demonstrated with a live hog the proper way to vaccinate.

✣ ✣ ✣

Penn Valley (Nevada Co.).—There was an interesting meeting of farmers here last week. They got together for the purpose of talking over farm loans. They recently formed an organization for this purpose and are just in receipt of information concerning how the loans should be made. A number of other matters were considered, including the work of organizing farm units that will eventually result in the appointment of a farm adviser for the county.

✣ ✣ ✣

Marysville (Yuba Co.).—C. C. Mitchell, cattleman of Yuba county, has filed suit in the superior court against the Excelsior Water and Mining company of Smartsville for $6500 damages. Mitchell alleges in his complaint that he put 189 head of cattle and horses on property owned by the defendants, and declares they were not fed. Failure to feed the stock, Mitchell alleges, resulted in the death of 22 cattle and a horse.

✣ ✣ ✣

The River Farms Company of San Francisco has filed five separate applications with the state water commission, which is one of the most important diversions in connection with the culture of rice that has come before the commission, and gives some idea of the expansion of that industry. The total number of acres to be watered is 12,601 and the estimated cost of five diversions is given as $83,000. The land proposed to be irrigated is all in Yolo county.

✣ ✣ ✣

Montana exported to eastern markets 227,828 head of cattle in 1916, an increase of 53,892 over 1915 shipments, according to Frank C. Lavigne, chief stock detective of the state force.

✣ ✣ ✣

The silver loving cup awarded annually by the Missouri State Dairy Association, which must be won three years in succession by the same breeder to the owner of the cow completing the highest official yearly butter fat record during each year, was awarded this year to the Jersey cow, Venita's Figgis 128239 owned by Longview Farm, Lee's Summit, Mo. Her record was 12,216.9 lbs. of milk, 653.67 lbs. of butter fat and 769.01 lbs. est. butter. Her age at beginning of test was 7 years 11 months. Longview Farm took this cup from Forgrave & Haggard, of St. Joseph, Mo., who won it last year with their Jersey cow, Mermaid's Lily May 280443. She produced 12,838.8 lbs. of milk and 780.13 lbs. of fat.

Last Bred Sow Sale in Missouri.

Taken from practically every angle, the March 21 sale to be held at Mexico, Mo., by E. H. Carter and Mrs. Frank Coatsworth, of Poland-China sows, is one of the most important of the winter season. The sale being held as late as it is should prove very attractive to those breeders whose last year's crops were below the average. The offering has been carried through the winter in good shape and is now being offered for sale right at the gate of springtime when it will be of the least expense to carry the sows on. Another important feature of the sale will be the 30 head of tried and proven sows that sell. This is probably more tried sows than have been sold in any sale this winter. These sows should be taken up by breeders wanting material to keep in their herd. There will also be eight fall yearlings and 12 spring gilts.

The offering is sired by A. Wonder, Big Joe, Big Orange, Major Look, Mt. Vernon King and Major B. Hadley, and will be sold bred to King Joe's Masterpiece. This boar is a litter brother to the noted G. & A.'s King Joe, junior champion at the Iowa state fair, 1916, and the National Swine Show. King Joe's Masterpiece is a show boar himself and his get will doubtless be counted among the winners at the shows this fall. Breeders who are in the market for bred sows should not overlook this sale, as it will be the last one in Missouri this season. Everything is immune and will be sold in breeding condition. For information and catalogue address either E. H. Carter or Mrs. Frank Coatsworth at Mexico, Mo.

Dairy Notes.

Air holes in the barn floor are a source of danger.

Cleanliness is next to godliness even in the dairy. Wipe udders with a damp cloth before milking. Have a clean milking place—clean cows, clean milkers and clean utensils.

A dairy calf should never be permitted to suck its dam longer than three or four days. The proper way to handle a calf is to teach it to drink milk from a bucket.

Discomfort and fright take the butter fat out of the milk of any cow.

Profitable dairying depends largely upon getting cows to eat large quantities of nourishing food.

Topping the hog market at Denver's great stock yards has been a habit of the J. O. D. Ranch Co., of Aroya, Colo., for several years. However, several months ago this ranch started in by breaking Denver's records and last week, for the third time since November 1, 1916, hogs bred, fed and marketed by this ranch brought the highest prices ever received on the Denver Market. There were two loads in last week's consignment and they brought $12.75 per cwt. The following wire was received by D. Schilling, proprietor of the ranch, last week: "Congratulations on receiving the highest price ever paid for hogs on the Denver market." In addition to the three thousand hogs fed out and sold at "top" prices this ranch sells annually a large number of fine boars and brood sows for breeding purposes. In their herd are numbered some of the most celebrated sires in Duroc-Jersey affairs.

Gold Mine? No, Just Plain Old Potatoes.

Bakersfield.—George Peters of the Alvin district is harvesting a crop of potatoes that is averaging 100 sacks to the acre. At prevailing prices he will get $38,250 from his eighty-five acres. Peters harvested an excellent crop about December 1, and as soon as his present harvest is over he will plant again for a July harvest.

Eureka.—Three times the normal area planted to potatoes in Humboldt county has been prepared for tuber seeding this year, it has been estimated by the agricultural interests.

Appropriation Insufficient.

The opinion that the appropriation of $140,000 asked of the legislature by the board of regents of the University of California for the university farm at Davis is insufficient and that the sum of $260,000 provided in bills introduced at the last session is the least on which efficient work can be done, is contained in the report of the special committee of the Sacramento Valley Development Association. The report was presented to the association at the meeting Saturday a week ago. It follows:

"The the Board of Directors,

Sacramento Valley Development Association:

Your committee on the State University Farm begs leave to report as follows:

After careful consideration of all the facts available with reference to the university farm and its needs, and in accordance with the recommendations approved by this board at its last meeting, held on January 20, we have caused to be prepared and introduced in the current session of the state legislature two measures appropriating in all the sum of $260,000 for the state university farm.

The amount asked for in these bills is the same as that asked for by Dr. Thomas F. Hunt, dean of the college of agriculture, in his recommendation to the board of regents of the university.

The amount recommended to the legislature by the board of regents, and approved by the state board of control, is $140,000. Your committee believes this amount is insufficient to meet the actual needs of the work being carried on at Davis, a work of far-reaching value to agriculture, the great supporting industry of this state.

We recognize the fact that the board of regents and the board of control have been forced to prune recommendations. We believe, however, that the importance of the work in progress at Davis and its needs are such that the larger amount should be provided, and we hope that this association and other agencies interested may be able to so represent the facts to the above named boards and to the legislature as to secure the larger amount.

The amount asked for the university farm by Dean Hunt and the amounts recommended to the legislature by the board of regents of the university and the state board of control, are as follows:

Creamery—Recommended by Dean Hunt, $100,000; asked of legislature by board of regents, $50,000.

Building and equipment for animal husbandry—Recommended, $60,000; asked, $60,000.

Water supply, distribution, irrigation, sewerage disposal, and fire protection—Recommended, $15,000; asked, $15,000.

Minor structures and repairs — Recommended, $15,000; asked, $15,000.

Agricultural engineering—Recommended, $50,000; asked. none.

Dean's residence—Recommended, $10,000; asked, none.

Green houses — Recommended, $10,000; asked, none.

Total recommended by Dean Hunt, $260,000; total asked of legislature by board of regents, $140,000.

Farmers in Alberta and Saskatchewan have the strongest rural organization in the world, not only absolutely controlling legislation in the Canadian west, between Manitoba and British Columbia, but also controlling the price of their products. Their individual accumulation of wealth has been rapid.

Passing of World's Champion Cow of All Breeds.

Kilnford Bell 3rd, Grand Champion of Champions, the greatest dairy aristocrat of the show ring, has passed away at Spring City Ayrshire Stock Farm, Waukesha, Wisconsin. Kilnford Bell 3rd was imported by Adam Seitz. She was the mainstay of the Seitz Ayrshire herd for many years and has probably traveled more miles and been exhibited at more fairs than any other animal of any breed. A winner wherever shown, she invited competition from other breeds and in 1913 and 1914, after winning 1st and Grand Championship Ayrshire at the National Dairy Show, she competed with the Champions of the Jersey, Guernsey, Holstein and Brown Swiss breeds and was awarded the Valentine Trophy, valued at $500, symbolic of the World's Championship of all dairy breeds. The winning of such an honor for two consecutive years is proof in itself of her greatness. Her record in Scotland as a two-year-old was 12,000 pounds milk in 9 months, testing 4.4%, and as a mature com 13,565 pounds milk, 625 pounds butter, in 10 months.

Good Missouri Bulls on Utah Ranges.

N. C. Christensen, of Utah, was in Howard county, Missouri, last week and bought a fine lot of young bulls to ship back west. His state has recently passed a law requiring pure bred bulls and he says that farmers are scrambling for the better classes of stock, such as are raised in central Missouri. Mr. Christensen bought sixteen Shorthorn bull calves of Chenault Todd and Sons, of Fayette. He paid $1925 for the bunch. These calves were judged by a professor of the Iowa agricultural college who says that they are a better lot than he had been able to find in his state. Mr. Christensen also bought seven young bulls from the herd of Herefords of L. M. Ricketts at $100 each, and 20 head of Herefords from Henry Taylor of Armstrong.

Even a Horse Can't Escape.

Here's another kick against old H. C. of L.:

You've been kicking against the price of shoes for yourself and your family, and against the cobbler's raise in soles and heels and patches. But——

If you happen to be luck enough to own a horse you've got another kick coming. So has your dumb friend.

It will cost you 50 cents more to shoe your horse hereafter, for the Master Horseshoers' Protective Association announces an increase of from $2.50 to $3 per set of horseshoes.

The increased cost of the material for Dobbin's boots, due to the war, over which the poor smithy has no control, is given as the reason of the boost in price.

Thousands Expected at University Farm.

Thousands of automobilefuls of people are expected at this year's "University Farm Picnic," to be held at the University of California Farm at Davis, Yolo county, on Saturday, April 28. Last year 2800 automobiles were parked in the alfalfa fields, and more than 15,000 people, by actual count, entered the gates of the University Farm on Picnic Day, coming from all parts of California.

"California Favorite," the steer which won a world's championship for the University of California at the recent International Livestock Show in Chicago, is no longer in the land of the living, having been sold for $1,950, the highest price in history, and butchered to make a Chicago holiday, but this wonderful steer's mother and father will march in the Livestock Parade which will be one of the great features of the University Farm Picnic. Nowhere else in California could such a display of fine livestock be witnessed. Every division of the University Farm will have a float in line, also, showing the work that is being done in poultry-raising, dairying, vegetable gardening, grain-improvement, irrigation-experimentation. viticulture ,farm engineering, etc.

The students have organized a committee for this greatest day of the year at the University Farm, consisting of Colby Slater, general chairman, and the following sub-committees: R. Sevier, Eureka, reception; F. F. Janney, Santa Barbara, entertainment; D. Wormley, Long Beach, decoration; J. Hunsacker, Los Angeles, parade; E. H. Struve, Watsonville, refreshments; H. M. Burson, Fillmore, athletics; A. Folger, Mill Valley, stock judging; G. Hunt, Piedmont, dance; H. E. Drobish, Riverside, publicity.

Besides the livestock parade, other features of the day will be speech-making, broncho-busting contests, stock judging, a "water fight," a baseball game, and an evening gathering and dance.

Dairy farming is increasing in almost every section of the country, largely because it is the most economical form of agriculture so far as soil fertility is concerned. Dairying also is growing because dairy products are an important part of our food supply.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29½ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 27625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

DILLCARA 57462

Son of Sidney Dillon 23157 (sire of 9 in 2:10 list) and Guycara by Guy Wilkes 2867 (sire of 3 in 2:10 list), will make the season of 1917 at

PLEASANTON DRIVING PARK, PLEASANTON, CAL.

SERVICE FEE $50 TO INSURE

Dillcara is a full brother to Harold Dillon 39610, the leading sire of New Zealand. Last season the get of Harold Dillon won 41 races, totalling over $25,000.

MANHATTAN STOCK AND POULTRY FOOD AND REMEDIES

Awarded Gold Medal at California State Fair

ENDORSED BY THE LEADING HORSEMEN OF THE UNITED STATES

Red Ball Stock Food Co., OAKLAND CAL.

SELECTION---

Thousands own saddle horses today, but only a few enjoy the distinction of having a champion, by a son of champions; still fewer have ever bred a champion.

MARSHALL CHIEF 2765

offered to the service of the public, makes it possible for any one owning a registered mare of any class to breed a champion of his own.

SEASON $25 CASH

No other horse surpasses him in breeding, beauty, and perfect performance—Ask Jump Cauthorn about him, he knows.

Make arrangements for his service with

HANS BERG, 159 Warren Ave., Milwaukee, Wis., or E. N. HAMILTON, Manager, Mexico, Mo.

GOOD BLUE GRASS, SPRING WATER ——— MARES FROM DISTANCE MET AT TRAINS

THE FINALITY OF

ASTRAL KING

In all branches of human endeavor, in industry, in Art and in Stock Growing and Farming, there are certain names which convey the idea of finality, outshining all others, as the North Star outshines subsidiary planets.

ASTRAL KING is that name in Saddle Horse Affairs.

And when you mate your mare to him or buy a colt by him, you have the satisfaction of knowing you have purchased the finest horse the breed affords.

JAS. HOUCHIN, Owner, Jefferson City, Mo.

HEMET STOCK FARM

F. E. WARD MGR.

COLTS AND FILLIES BY WILBUR LOU ALWAYS ON SALE

HEMET, CAL.

Offers for service the best grandson of McKinney 2:11¼

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion Two-Year-Old Race Trotter of the Pacific Coast.

ZETA LUCILE (2) 2:12½

Champion Two-Year-Old Filly of the Pacific Coast.

HEMET QUEEN (1) 2:16¼

Champion Pacing Filly of the World.

KINSMAN LOU (2) 2:23½.
MATILDA LOU (2) 2:22½.
FIESTA LOU (p) (1) 2:25, (2) 2:22½.
GOLDSMITH LOU (2) 2:29.
BILLIE BOYD (2) 2:30.

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of Louise Carter (3) 2:24, the only mare to produce two yearlings to trot in 2:20 or better:

WILBUR LOU (1) 2:19½.
EDITH CARTER (1) 2:18¼.

Breed to him for colts that will race. Fee for 1917, fifty dollars, with usual return privilege, or money refunded at our option. Mares kept, $60.00 per year. All information gladly furnished.—Licensed Pure Bred Cert. 23.

Number 3 in a Series of Six Talks about the Evolution of Firearms and Ammunition

REMINGTON UMC

The Bow and Arrow--A Forerunner of Remington UMC

THE bow and arrow is believed to have originated from the bow drill, a fire-making device developed by our remote ancestors. The sling was adequate for small game, but something more powerful was needed to combat the shaggy, thick-skinned animals that roamed the forests and hills.

The bow drill enabled the fire-maker to get results quicker than by rubbing two dry sticks together by hand. It probably inspired its maker with its possibilities as a weapon. The first bows and arrows were quite crude, but improvements were made from one epoch to another, until we find the powerful siege cross-bows of the Middle Ages, weighing eighteen pounds and throwing heavy bolts. The bow was the first *powerful* arm to kill game at a distance with accuracy and certainty. It is still used in some parts of the world.

When you pick up your Remington shotgun or rifle, it is hard to realize that the simple bow and arrow was one of the forerunners of this splendid weapon with its solid breech, hammerless and take-down features. The stone, the sling, the bow and arrow and the cross-bow, all have contributed their historic share toward the creation of Remington UMC firearms and ammunition.

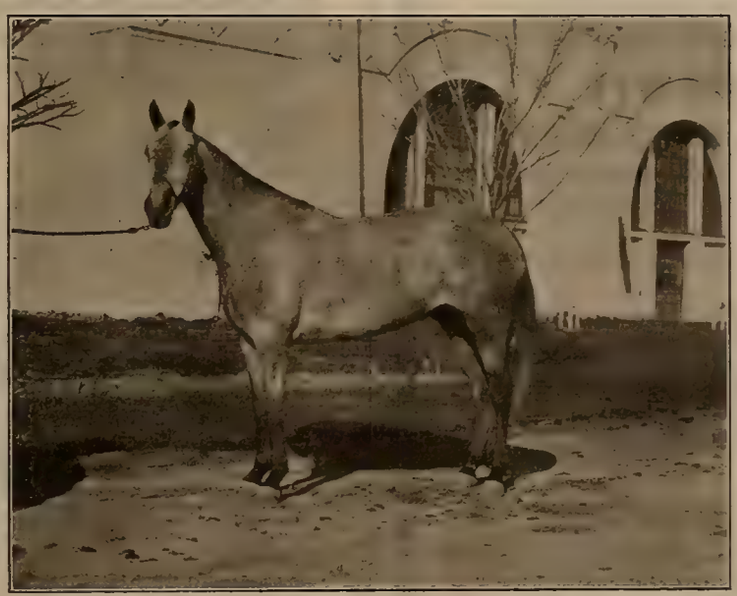
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

Entries open to the world. Membership not required to enter; but no horse, wherever owned. will be allowed to start until the owner has become a member.

SUBSTITUTIONS.

If a mare proves barren or slips or has a deal foal or twins, or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President.

F. W. KELLEY, Secretary, Post Office Drawer 447, San Francisco, Cal.

DON CASTANO
Needs No Introduction to the Public
HIGHLAND MONARCH

was the winner of the aged stallions, and class for stallions and four of his get at the California State Fair in 1916.

SAN VICENTE
The Junior Champion Stallion of California

In the Yearling Futurity at the State Fair in 1916, five of the six money winners were by Don Castano and Highland Monarch.

The two-year-old Futurity was won by a Highland Monarch colt.

The $100.00 Trophy, offered by the American Saddle Horse Breeders' Association for the best stallion or mare, three years old or under in California, was won by a Highland Monarch colt, and two years prior it was won by Highland Monarch himself.

If you are going to breed your mare, why not mate her with one of the above stallions and have a winning colt?

The service fees for Don Castano and Highland Monarch are $50.00. Arrangements for San Vicente private.

To encourage breeding in this State we will pay the freight charges on mares to and from any part of California, but will not, of course, be responsible for any accidents which might happen in shipping.

San Vicente Rancho,
1023 Investment Building Los Angeles, Cal.

Pacific Coast Trotting Record
Peter McKlyo 58009- RECORD 2:06

Cal. License Pure Bred No. 105

Sired by

PETER THE GREAT 2:07¼ (sire of 50 in 2:10 list, including Miss Harris 2:01½, Peter Volo (4) 2:02, Peter Stevens 2:01½, Peter Mac 2:03, Mabel Trask 2:03¼, etc.), dam KLYO by Jay McGregor.

He is from one of the greatest families on his dam's side in the books, as the performances of Susie J. 2:06½ and Trampfast 2:12¼ prove beyond doubt.

Peter McKlyo is the Greatest Son of Peter The Great

westof of Kentucky and is destined to be one of the world's greatest sires.

He is the only son of Peter the Great five years old with two colts in the list. He was bred to three mares as a two-year-old, only two of his colts being handled,—Charlotte McKlyo, winner of breeder's record 2:25¾, and McKlyo Boy, winner of the two-year-old division Breeders' Futurity Stake, record 2:28¼. It can be also said as a matter of record that he is one of the greatest five-year-old trotting stallions ever owned in the state of California, and one of the best individuals to be found in any country.

HE WILL MAKE THE SEASON OF 1917 AT

James Thompson's Training Stables
State Fair Grounds, Sacramento

TERMS: $100 FOR THE SEASON.

Usual return privilege. Mares pastured at $5 per month. Good care will be taken but no responsibility assumed for accidents or escapes. For further particulars address,

$300.00 to Horse Standing Highest in Summary.	$150.00 to Horse Standing Highest in Summary.

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on April 1, 1917, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1917; $5.00 December 1, 1917; $5.00 on yearlings April 1, 1918; $10.00 on two-year-olds April 1, 1919; $10.00 on three-year-olds April 1, 1920.

STARTING PAYMENTS—$25.00 to start in pacing division; $55.00 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all others horses to go to the barn.

Trotting division heat purses $500.00. Total purse $1,800.00.

Pacing division heat purses $350.00. Total purse, $1,200.00.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $150.00 in pacing and $300.00 in trotting divisions goes to the horse standing highest in the summary; distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1917, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there shall be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00. the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Rights reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

JOHN M. PERRY, President. CHAS. W. PAINE, Secretary.

Terms—One year, $3; six months, $1.75; three months, $1.
Foreign postage $1 per year additional; Canadian postage 50c per year additional.
Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

STALLION DIRECTORY.

In addition to the practical worth to the owners of the country, the announcements of the stallion owners which appear in the Breeder and Sportsman serve another purpose. They remind the breeder that his now-or-never opportunity is here; his great harvest time, and that his stallions and breeding stock should be in the spot light and where the interested public will be reminded of them every week. The publishers of this paper are personally acquainted with every stallion owner whose announcement appears in its advertising columns and we recommend every one of them and the stallions they are advertising unhesitatingly. We know the statements made of the stock advertised to be true in every respect.

It is our guiding principle that our advertising pages shall be as important and correct as our reading pages, and that nothing is misrepresented therein. The owners of good mares, registered mares, whether they are Standard bred, Thoroughbred or Saddle bred will find the stallions advertised here that they are looking for. The utmost in their particular breed are represented in our pages this season. The owners of good horses never hesitate to advertise. They have the stallions you should patronize. Their owners are not ashamed of them and they give their breeding and their accomplishments in full. If a horse isn't worth advertising he isn't worth patronizing . The horses advertised in the Breeder and Sportsman are of the best blood lines, they are the utmost that man, by wise breeding, good care and thought has been able to produce to such a perfection, and they are the only kind it pays to breed to at the present time. If you own a registered mare, no matter what breed, she should be bearing fruit, and, if bred to the right kind of stallion, the fruit will be profitable; if your mare isn't registered or does not produce good foals, you are wasting your time, your mare's time, the stallion's services and the stallion owner's time. It's only the best that pay and the future for the horse in his highest state of perfection was never brighter.

The following horses advertised in this issue represent the best of their breed and are worthy of the patronage of the most select and highly bred mares of the same breed:

Harness Horses	Owners
Peter McKlyo 58009	L. H. Todhunter, Sacramento, Cal.

THAT the farmers of the country are adopting more and more the practice of analyzing their business carefully and using the same in keeping books was brought out recently in the hearings on the agricultural appropriation bill before the house committee at Washington. The office of farm management of the department of agriculture has provided in Farmers' Bulletin No. 661 blanks for use in analyzing a farm business in such a way that the farmer can readily ascertain the various sources from which he derives his income, the ways in which he spends his money, the total income from the farm, and the amount which should be charged off for interest on his investment. Approximately one-third of the farmers who have been induced to analyze their business in this way, it is said, are now keeping books. Hitherto many farmers have been discouraged from this by the apparent complexity of the systems employed. By simplifying these systems so that the farmer can tell what the figures are all about and how to use them, the department is greatly increasing the amount of bookkeeping being done on the farms of the country.

OUT-OF-DOOR SPORTS in California are reaching the perfection of the Eastern coast. The intense interest so manifested just now up and down the Pacific coast in all outdoors, is the natural result of a demand; the natural culmination of so many sport lovers and resort habitues coming here. The influence of sport upon the social and business life of any countryside is a phase of rural existence which has only recently been seriously considered in California, although in England it has been recognized always and in our own eastern states, too, for many years. California, however, is learning of its importance and the outdoor sports are becoming the chief claims of many realty advertisers. In fact, nowadays, most any real estate advertisement, announcing the sale of country estates, suburban homes and other rural sales, refers the reader first of all to the nearness of the estate to this or that polo club, racing course, horse show or yachting, hunt and country clubs.

What has proven one of the best polo tournaments in the history of the sport is just nearing its end at Coronado, and in addition to the local enthusiasm it has created, it has attracted the best players and followers of the game here. From a half-dozen Eastern stables upwards of 100 polo ponies are participating in the tournament. It is also freely admitted that the players are only a few of the prominent people who have gathered in California on account of the good matches here this winter.

The Coronado tournament closes March thirty-first and has attracted the most prominent players. However, equally as good shows have been made at Santa Barbara, Pasadena, Riverside, Burlingame, San Mateo and Del Monte. Among the prominent local players at San Mateo is Archie Johnson, son of Governor Hiram Johnson. With horse shows promised for the summer months, there will be continued activity the whole year round.

THE diversified agricultural and horticultural products and practices of the country around San Francisco bay, as related to the varied soil and climatic conditions of the area, are discussed in a recent publication of the United States Department of Agriculture. The publication is the report of a reconnoissance and survey of the region made by the bureau of soils of the department in co-operation with the University of California agricultural experiment station. The report consists of a colored map showing the distribution of the various soil types and 112 pages of text discussing the soils and soil adaptations.

The area covered by the survey includes San Francisco peninsula and the coast country as far south as Santa Cruz and quadrangles adjoining and lying south, west and north of San Francisco, San Pablo and Suisun bays. It includes the Livermore, Sonoma, Vaca, Ignacio and San Ramon valleys; parts of the Santa Clara, Napa and Santa Rosa valleys; some smaller valleys and the mountains and hills separating and surrounding them. The area is one of the foremost in the state in agricultural importance and has a population of nearly 1,000,000 . Eleven counties lie wholly or in part within the area.

THE Prendergast Assembly Bill 798 will be accorded a public hearing before the Assembly Medical and Dental Laws Committee at Sacramento on the evening of March 20, according to an announcement of the State Humane Association, which organization is desirous of having persons interested in the welfare of animals present to protest against the measure. The purpose of the bill is to force public pounds to surrender unclaimed cats and dogs to medical colleges for vivisection and no other measure before the legislature has evoked the storm of protest from citizens in all parts of the state that the Prendergast bill has aroused. Many private citizens not connected with humane societies have signified their intention to be present to speak against the bill ,and such interest has been manifested that the senate chambers will be used for the hearing.

NEXT IN IMPORTANCE to fairs and expositions, the breed associations of the United States have accomplished more for the live stock industry of the land than any other one thing. Every breed which has a live association with good, active officials has flourished through every condition, good or bad. The breeders of live stock appreciate, generally, what their associations have done for them and give their every assistance to the betterment of the organization which represents them; advertises them; arranges for their sales, their shows and everything that means prosperity to the producer. Perhaps the secretary of these associations, on whose shoulders the work usually falls, is most largely responsible for the good they do. At least, an association without a live secretary never gets any place.

What has caused more of a widespread prosperity to the dairy breeds, than those active associations which are ever on the job and alert to the possibilities of new territory and new expositions for their producers? What, also, has done more for the beef breeds? Would an average of $1,281 on 144 head of young Herefords down in a little Missouri town have been possible without the splendid Hereford association? What has caused American jack stock to become the best in the world and caused jennets to sell at $3,000, unless it is the continuous efforts of the associations that represent the breeders? Every breeder of Percherons in America knows what Wayne Dinsmore has done to improve American Percherons; to improve the methods of the breeders and to cause the American farmers to raise more Percherons. The swine breeds, all, have had active associations for years; and who will deny that they are not largely responsible for the better hogs found in every nook and corner of the land

Next in importance to the National associations come the state associations. In fact, without good live state associations, the National associations are unable to cope with the smaller breeder's needs and conditions to the extent they do; then the county associations. Every breed that is prosperous has a National association which is active and alive to the needs of their members; every state that features any breed has a state association and every county should have an association. Go into any county where there is an organization of breeders and you invariably find more prosperous breeders than in the adjoining counties where there is no association. In the state where there is a good live stock association you will find the most prosperous breeders; and so the breed, which has a good live organization, is more prosperous than the breed whose producers are not organized.

The organization of live stock producers is far-reaching in its good-doing, as the breeds testify. As California advances in live stock affairs her breeders are organizing; or rather, as the breeders organize, the live stock business advances. The dairymen, horsemen, cattlemen and hog breeders of California are organizing and the whole world is beginning to take notice of what we are doing here and to recognize us. Last week, at Hanford, the breeders of Poland-China hogs formed a high-speed organization that is sure to advance that valuable and profitable breed here. They called it a high-speed organization because they elected officers who are optimistic, hard workers, well informed, and who have the pep and determination to show the farmers of California that it pays to breed better hogs, especially Polands. The most important thing they did was to make R. H. Whitten, the well known Los Angeles business man and breeder, secretary. I said in the beginning, it's usually the secretary's ability that tells in the long run. An association without a hustling, interested, well informed secretary is like a ship without a sail. From what I have seen of Mr. Whitten I will bet on the Poland-China breeders of California getting some place. Read his account, in this issue, of the meeting, which was written for the Breeder and Sportsman, and you will be convinced.

The J. O. D. Ranch Co., Aroya, Colo., on March 10 received $14.85 per cwt. for 85 head of 210-pound Durocs on the Denver market, which on that date was fifteen cents more than hogs ever sold for at the Denver Union Stock Yards. This makes six times since December 31st last that this ranch has broken Denver's record.

Harness Horses and Horsemen

TWO NOTED BROOD MARES.

[Written for the Breeder and Sportsman.]

A few weeks ago mention was made in your excellent paper ,of the fact that the great brood mare Bertha, was bought when young by the late Samuel Gamble, for a California gentleman, by whom Mr. Gamble was employed to come East and buy some trotting-bred mares for brood purposes.

It may not be generally known, but it is a fact that on the same trip that Mr. Gamble bought Bertha, he also bought Carlotta Wilkes ,then a yearling, and took her to California along with Bertha. It seems remarkable that any man could select from green, untried material, on one trip two such mares as Bertha and Carlotta Wilkes proved to be as producers of standard record performers.

In the table of brood mares that have produced ten or more standard performers each, as published in The Horse Review Racing Guide, Bertha stands at the head of the list, with 14 to her credit, 11 of which are pacers and 3 trotters. Two of the 3 trotters also made standard pacing records.

Evidently through an oversight of the compiler, the name of Carlotta Wilkes does not appear in that table, but in the table of producing dams in the official Year Book for 1913, and all subsequent ones, Carlotta Wilkes is credited with five trotters and five pacers, all of which have made records in standard time. The names and present records of her trotters are as follows: Carlokin 2:07½, Guy Carleton 2:21¼, Lottie Dillon 2:26¼, Ida Dillon 2:27¼, and Sir Guy Dillon 2:29¾. Her pacers are: Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Volita 2:15¼, and Carlocita 2:24¼.

Carlotta Wilkes was bred by the Boston detective E. D. Wiggin, and foaled in 1888; sired by Charley Wilkes 2:21¾, a son of Red Wilkes 1749. Her dam was Aspasia, a no-record, producing daughter of Alcantara 2:23, by George Wilkes 2:22. Aspasia's dam was Miss Buchanan, by Clark Chief 89; second dam Nep, by Sebastopol, a son of Whitehall, by North American, a son of the thoroughbred Sir Walter. The latter was by Hickory, a son of imported Whip, and Sir Walter's dam was Nettletop ,by imported Diomed. The third dam of Aspasia was by the thoroughbred imported Monarch, by Priam, winner of the English Derby in 1830.

Mr. Gamble evidently was a born horseman, gifted by nature with the ability to detect at once merit in young green animals, which the average horsemen would fail to discover. It was this quality in his character that saved Sidney Dillon 23157 from the veterinary surgeon's knife. It was the intention of Mr. Henry Pierce, whose property Sidney Dillon was foaled, to have the colt castrated. Mr. Gamble saw the colt about the time he was given his first lessons to break-cart, and judging from the appearance of the youngster in harness ,together with what he knew of the character of his ancestors, he felt confident that, if given an opportunity, the colt would become a very successful sire of fast trotters, and strongly advised Mr. Pierce to keep him entire.

The success of Sidney Dillon 23157 as a sire of 210 or better record performers has fully justified the confidence, at that early day expressed in him. He is now credited with 89 performers that have made records in standard time, 52 of which are trotters. The number of his sons and daughters which have made records in 2:10 or better is 15, and 9 of them are trotters, one of which is the famous Lou Dillon 1:58½, the first trotter to reach and cross the two-minute line. He is also credited with 12 daughters that have produced 18 with standard records, 12 of which are trotters, and three of these trotters have made records of 2:08¼, 2:08½, 2:08¾. It was fortunate for the trotting-breeding interests of America that Sidney Dillon 23157 was kept for stock purposes.

In his efforts to identify the second dam of Lou Dillon 1:58½, a few years ago, Mr. Gamble was so fortunate as to learn from a man who at one time owned Venus, the dam of Sidney Dillon 23157, some interesting facts concerning her breeding. The name of the man was W. S. Lyle, and the information which he gave Mr. Gamble was obtained through a letter from Mr. Gamble to the writer of this article. The letter was published in the American Horse Breeder, with wihch I was connected at that time, and was as follows:

"Mr. Lyle obtained Venus from the late Sabe Harris, and as he did not believe in putting off till tomorrow what can be done today, he started out to learn at once as much of her genealogy as it was possible to learn from reliable sources. He learned by careful investigation, that the dam of Venus was mated with both Venture and Capt. Webster, the year before Venus was foaled, with an interval of 22 days between the two matings, but he was unable to learn the exact date when Venus was foaled, hence it never can be known by which of these two sons of the thoroughbred Williamson's Belmont, Venus was begotten.

"Mr. Lyle informed me that he knew the grandam of Venus well. She was a handsome animal, a superior roadster, and could trot a mile in about three minutes. It was claimed that she was brought overland to California in early days, and was represented by her owner to be of Morgan and Black Hawk stock. She was then owned by Ellis Homes, who was superintendent of schools of San Francisco, Cal.

"During one of Mr. Homes' vacations he thought it best to give his mare an intermission, or let-up for a few months, and sent her to the late Colegrove's farm at San Mateo. When on a visit to that farm to see his mare, she was observed to be in season. Mr. Homes admired Mr. Colegroves' young horse Algerine (a son of Easton's Dave Hill), and had this so-called Morgan and Black Hawk mare mated with Algerine. In course of time the result of that union was a filly which became the dam of Venus.

"It is a fact, well known to many here, that in Mr. Lyle's road-driving days he kept from three to six animals for his private use, and his fancy was for handsome good-gaited mares, hence he never kept any other animals for his private driving. It is also well known that he was always very particular to learn the breeding of his mares. He was often heard to remark that if his mares were by a yellow dog he wanted to know the fact. Mr. Lyle presented Venus to D. (White Hat) McCarthy, after she had met with an accident, and McCarthy sold her to the late G. Valensin.

"Mr. Lyle is an old-time mining man and was a friend of the banker W. C. Ralston. He has no recollection of William Maxwell ever selling Mr. Ralston a pair of mares called Fly and Gypsy sired by Black Flying Cloud, but he does remember well the chestnut team of mares called Hattie and Nellie, bought by J. C. Flood, also a banker of San Francisco. Hattie answers the description that has been given of the Maxwell mare called Fly, but I have never been able to obtain a description of Fly's mate, Gypsy, and perhaps never will, hence it will be impossible to compare the mare Gypsy with Nellie, the mate to Hattie in the Flood team."

It seems from Mr. Lyle's statement to Mr. Gamble that he traced Venus to her breeder, and learned that without the shadow of a doubt her sire was either Captain Webster 10173 or Venture 320, and her dam (whose breeder was Ellis Homes) was by a young son of Easton's Dave Hill. "The latter was bred by Oliver Russell, Shoreham, Vt., and got by Vermont Black Hawk 5. His dam, as given in volume two of Battell's Stallion Register, was very energetic, a great roadster, and was said to be of English blood. In 1855 the stallion Dave Hill was bought by Benjamin Fish, acting as agent for Ansel I. Easton, San Francisco, Cal., for $2800. The horse was shipped to California by way of Panama, and stood for public service at a fee of $100 without warrant."

Both Captain Webster 10173 and Venture 320 were by Williamson's Belmont, a thoroughbred son of American Boy. The latter was by Sea Gull, whose sire was imported Expedition and whose dam was by imported Sour Crout, sire of the dam of Mambrino, the son of imported Messenger that got Abdallah 1, and Mambrino Paymaster, the sire of Mambrino Chief 11. The dam of American Boy, sire of Williamson's Belmont, was also by imported Expedition.

Venus was raced a little in California during the seasons of 1877-8 and 1880, and although she did not make a fast record she showed that she possessed speed, gameness and endurance. Some of her best performances were in races against Lady Ellen 2:29½ at Sacramento, Cal., Sept. 21, 1880. Venus was one of seven starters for a purse of $1000. Tommy Dodd won the first heat in 2:24 but was drawn in the third heat . Clay won the second heat in 2:28, but he too was drawn in the fourth heat. Lady Ellen then went on and won in 2:29½, 2:31, 2:33. Venus got second money.

Sept. 24, 1880, only three days after the above-mentioned race, Lady Ellen 2:29½, Venus, Molly Drew, Tom Stout and Bessie started in a race of two-mile heats, best three in five, at Sacramento, Cal.; Lady Ellen 2:29½ won in straight heats, time 5:04, 5:04½, 5:00. Venus stood second in the summary, and Molly Drew 2:27 was third. Tom Stout and Bessie were distanced. Lady Ellen was by Carr's Mambrino 1789, a son of Mambrino Patchen 58, and her dam was by Owen Dale, a thoroughbred son of Williamson's Belmont.

In 1890 the pacer Adonis by Sidney 4770, made a record of 2:11½. The dam of Adonis p. 2:11½ was Venus. In 1891 Cupid, a full brother of Adonis, p., 2:11½, trotted to a record of 2:18. In Wallace's Year Book for 1891, page 520, Cupid appears as follows: Cupid, b. h., foaled 18—, by Sidney, 4770; dam Venus (dam of Adonis p. 2:11½), by Captain Webster, 10173; and in the same Year Book, page 704, Captain Webster is credited with siring the dam of Adonis p. 2:11½ and Cupid 2:19, but when Sidney Dillon 23157 and Venus were registered in volume 12 of Wallace's American Trotting Register, Venus was registered as pedigree not traced. It is evident from his statement to Mr. Gamble, that Mr. W. S. Lyle and already traced the breeding of Venus carefully and thoroughly, for his own satisfaction.

Old horsemen who are still living know that at that time there was a strong prejudice, among some of the breeders of standard-bred horses, against a near thoroughbred cross in a trotting pedigree; but it is a singular fact that two of the four trotters which have made records of two minutes or better have inherited the blood of Williamson's Belmont, as did also Directum (4) 2:05¼ ,that held the world's champion record for trotting stallions seven years, and so does John A. McKerron 2:04½, the only trotting stallion that has yet made a race record of 2:10 or better to wagon. The two trotters with records of 2:00 whose pedigrees show a Williamson's Belmont cross are Lee Axworthy 1:58¼, the world's champion trotting stallion, and Lou Dillon 1:58½, the world's champion light harness mare.

Had Samuel Gamble never done more for the trotting-breeding interests of the Golden State than to select and take to California the two great brood mares Bertha and Carlotta, and influence the owner of Sidney Dillon 23157 to have that horse kept for stock purposes; also to put on record the statement that Mr. W. S. Lyle traced the breeding of Venus, and found that her sire was either Captain Webster 10173 or Venture 320; it was enough to entitle him to the gratitude of the trotting horse breeders of the Pacific Slope.

S. W. PARLIN.

Famous Colman Farm Sold.

Possession has been given to Col. A. A. Ebert, of Oran, to the famous farm, twelve miles of St. Louis, which for fifty years was owned and operated by the late Norman J. Colman, a former governor of Missouri and until his death a few years ago was editor of Colman's Rural World. Col. Ebert, who formerly lived at Sikeston, Mo., and is now president of the A. A. Ebert Auction Commission Company of East St. Louis, bought the Colman farm. During his residence in Sikeston Mr. Ebert founded the Pleasant View Stock Farm and the Southern Missouri Fair Association. He will use the farm for the raising of hogs and cattle.

Governor Colman gave the best part of his life in developing it into an ideal live stock farm, where he raised standard-bred horses. At the time of the Governor's death the farm was the home of over one hundred brood mares, combining the blood lines of the most fashionable pedigrees. At the head of the stud was Baron Reaper, bred and developed upon the farm and as a five-year-old he held the world's record for a five-heat race over a half mile track.

After the death of Governor Colman, which occurred while he was enroute to Colorado to inspect some horses and a breeding establishment owned by the Government, the farm was inherited by his daughter, Mrs. Clara Nicholson of St. Louis.

In writing of the new farm, Col. Ebert had the following to say:

"Yes, it is true, I finally landed the famous Colman stock farm. They say that patience is the virtue of the Jewish race and perseverance the virtue of the German race. You know I am a full-blooded German and it was by perseverance that I finally succeeded in getting the farm. I was personally acquainted with Governor Colman and had often heard him talk of his place. However, I had never seen it, but when I heard of his death and that the farm was for sale I determined it should be mine. At the time I was the owner of Pleasant View Farm in Sikeston and had established somewhat of a reputation as a breeder of fine Poland-China hogs, but my field was limited; I was too far south to get the right kind of prices for the kind of hogs I was breeding and raising, and I was surrounded by extremely high priced land and knew I could never enlarge my breeding plant and it was entirely too small for my purpose; so I decided to go and look at the Colman farm. It was everything a man could desire for my business. While the land is rolling, yet it is very fertile, being the last strip of the rolling land right at the famous Missouri River bottom land. The soil is practically the same. There are 80 acres of the finest kind of alfalfa, all on rolling, well drained land; then I have the natural blue grass and the best of corn land. A stream of water fed by nine springs on the farm runs right through the center of the land with a hundred yards of the finest natural shade on each side of the stream. Most all of the surrounding farms are small truck farms, hence, I will not be bothered with other people's stock to create disease. I have good railroad facilities, both passenger and freight, besides the best kind of an automobile road, just a forty-minute ride from any hotel in the city of St. Louis. Yes, I think I have the finest stock farm and expect to have one of the greatest herds of Poland-Chinas in Missouri. While many a famous horse has been developed upon this land and picked the luxuriant grass, they are all gone now and in their place will come the big mammoth Poland-Chinas.

"In connection with my herd of hogs I will make an assembling plant for beef bulls. In my stock business I am repeatedly asked or written to by parties wanting to know where they can get a young bull ready for service."

W. G. Cowan of Kenwood, Sonoma county, announces the services of Silkworthy 58175 to the public in this issue of the Breeder and Sportsman. Silkworthy is one of the most fashionably bred stallions standing for public service in California at the present time. He is a son of Morgan Axworthy 47430 and his dam is Clear Silk, dam of Crystal Silk 2:28¾. Morgan Axworthy is a son of Axworthy and his dam is a full sister to Bingen 2:06¼. Clear Silk is by Prodigal, a great brood mare sire, and her dam Red Silk is by Red Wilkes, another great sire of brood mares. Lee Axworthy 1:58¼, Uhlan 1:58, Hamburg Belle 2:01¼ all trace to this family.

Thoroughbred Matters

The German St. Leger was won by the Royal Graditz Stud's filly, Adressie by Nuage out of Antwort, from four others. The race was worth 40,000 marks.

✤ ✤ ✤

Tommy Hunt, the little apprentice that has been riding for Kay Spence, is now the property of Juan Fuentez. Hunt's contract was sold this week and the promising little fellow will be given every opportunity to show his real riding class . Claude Hunt, his brother, will continue to perform for Kay Spence.

✤ ✤ ✤

The rich handicaps are not at an end at Tia Juana, even though all the promised stakes have been run. In consequence, President James Wood Coffroth has arranged for the Earl Rogers handicap, valued at $800 to be run next Sunday. It will be one and a six teenth miles in duration and should attract the fanciest steppers stationed on Coffroth bluff. A seventh race, a "Darktown" derby at one mile, will also be staged.

✤ ✤ ✤

Several horses were sold in the paddock at Tia Juana last Saturday. Kay Spence disposed of six head of his stock, while several others also went under the hammer. Spence sold: Belle C. to O. Rice for $120; Certain Point to V. J. Allen for $400; Prince Eugene to Ed Dealy for $85; Black Jack to Ed Manaugh for $775; Boxer to William Walker for $700; Hocnir to Earl Linnel for $1,975. C. H. Dixon sold Eugene Sues for $50 and Commoness for a like sum, while Gus Flannagan disposed of the celebrated Phil Epstein for $55.

✤ ✤ ✤

On Sunday, January 21, the last of the big races of the Argentine season was run at Palermo. This was the Premio Capital (weight for age), of 2,500 metres, worth 16,932 pesos to the winner, 2,552 to the second and 1,276 to the third. It was won by the four-year-old Campanazo, by Diamond Jubilee—Celerina, beating Floripar, Grand Senor, Changui and five others. D. Torterolo rode the winner, which got home by a short neck. Celerina has proved an extraordinarily successful brood mare in the Argentine. Celerina is by Goldfinch, out of Carissima, by Kingfisher (a son of Lexington) ,and was bred in the United States by James B. Haggin in 1897 and exported to England in 1898 for Simpson Jay. She won a race or two, and was put to the stud in 1900. For three successive years (1901, 1902, 1903) she produced dead foals, but in Celerina's fourth season she produced a filly by Love Wisely. The following year came Potomac, a winner by Wisemac. Next year she had a colt by Oberon ,and she was exported that same year to Buenos Aires, where Ignacio Correas bought her. Since then she has bred a conitnuous succession of really high-class winners.

✤ ✤ ✤

Recently funds were appropriated for the purpose of offering premiums for the best colts sired by the eleven thoroughbred stallions controlled by the Kentucky State University. These horses have been placed in eleven different districts in the state and last spring they covered 311 mares. It is the purpose to have a colt show either at the county fair or at the county seat this summer for these suckling foals. The premiums are in cash and amount to $25 for first, $15 for second and $10 for third. It is hoped that every one who owns a mare that was mated with one of these stallions will take good care of the colt when it is foaled this spring and will get ready for the colt show that will be held in the county. In case there is no county fair then the show will be held on the main street of the leading town. The Kentucky Racing Commission will set aside funds later on for the best yearling colts to be exhibited at the State Fair. These premiums will aggregate several hundred dollars and it is believed that the prize winning colts from the eleven different counties will be brought together at the State Fair for these big premiums.

✤ ✤ ✤

Of all branches of the horse market, that of selling Thoroughbred yearlings was perhaps the most prosperous in 1916. Records compiled for the American Racing Manual show that prices were practically 50 per cent higher in the auctions held by the Powers-Hunter Company, of New York City, and other commission firms last year than they were in 1915, or, in fact, any other year since 1907. For the 426 yearlings sold under the hammer, the buyers paid $396,975, or an average of $932. In 1915 the average for 375 head was $695, and in 1913 it was $472, while in 1911 it fell to $230. A number of well-bred colts and fillies from France and England helped to raise last year's average quite materially, yet the yearlings from several American breeding studs in Virginia and Kentucky made averages almost equal to those of the foreign-bred ones. Eleven by Ballot, for example, made $15,500 ,an average of $1,408. A. B. Hancock sold sixteen by Celt for $31,150, or an average of $1,497 . Eight by Jack Atkin made an average of $1,508 and seven by Sir John Johnson,, an untried horse, an average of $1,512, while for eleven head by Superman, H. T. Oxnard received $19,700, or an average of $1,783, and the highest price of the lot was $2,650.

It has been arranged to hold no fewer than 153 days' racing in Germany this year; the days will be divided between twenty-two different towns. The 153 days include racing on the flat and over jumps.

✤ ✤ ✤

Last Saturday at Tia Juana an unfortunate successio nof falls occurred in the two-year-old race, which finally resulted in Urapip being destroyed. Urapip's back was broken in the fall and it is remarkable that all the boys escaped serious injury.

✤ ✤ ✤

Brighouse was started five or six times at the Tia Juana meeting without success, but last Saturday was well backed and finished second to Oakland. The horse was entered to be sold for $500 and was immediately claimed by G. Alexandra, the Vancouver horseman.

✤ ✤ ✤

The Nevada Stock Farm owned by Geo. Wingfield has entered three horses in the Clark Handicap, one of the feature races at Churchill Downs,—Slippery Elm (4) by Bannockburn—Schwalbe, Bank (4) by Mint—Miss Blair, and Square Set (3) by Duke of Ormonde—Dora I. are the three representatives of the Nevada turfman.

✤ ✤ ✤

Thirty two-year-olds have won races this year on the different tracks where racing has been conducted up to March 1. Five of these winners were sired by Pacific Coast stallions and were bred and raised on this coast. Zip by Salvation; Avon Carey by Joe Carey; Anna Star by Starbottle, each won two races, and Candelaria by Von Tromp, Laura Miller and Kate Bright by Norford each won one.

✤ ✤ ✤

Hal Price Headley, president of the Thoroughbred Horse Association of Lexington, Kentucky, has purchased from the James B. Haggin estate that part of Elmendorf property known as the Graves farm. It contains 457 acres and is eleven miles from Lexington . It is all in blue grass and has sixty new fourteen foot box stalls on it. The price was close to $100,000.

✤ ✤ ✤

Next June the Hawaii Polo and Racing Club will stage the biggest race meeting in the history of the Hawaiian turf. There will be a half-day of racing at Kapiolani Park on Saturday, June 9; a full day's sport on Monday, June 11, Kamahameha Day, and another matinee program on Saturday, June 16. In all there will be six races for Hawaiian-breds and seven events for free-for-all horses. The sum of $4150 will be hung up for the free-for-all races and $2060 for the Hawaiian-bred events. Events closed to Army entries will be worth $475 ,and $600 will be devoted to events confined exclusively to Orientals, making a grand total of $7,275 in purses for the meeting. The races vary in length from a half mile to a mile and a half, and there will be events for both home-bred and free-for-all horses at these and intermediate distances. Each day there will be a big feature event.

✤ ✤ ✤

Racing in the state of Maryland has been taken into court. At least the Baltimore County Racing Commission has been ordered to show cause why a license cannot be granted to the new Bengies track. The promoters of the Bengies course have had two applications for a license denied and they are determined to fight for their rights. The new track is said to be owned by Baltimore politicians who are eager to get into the charmed circle. According to gossip, the Pimlico track is opposed to the granting of a license to them. If the Bengies people win their legal proceedings they will then apply to The Jockey Club for racing dates. Probably the Jockey Club is holding back the 1917 schedule for this reason. The turf in Maryland is dominated by the pari-mutuels, which have aroused much opposition on the part of the reform element.

✤ ✤ ✤

New Orleans, La., Feb. 26.—Formal steps for the purchase of the Fair Grounds and for the dedication of the City Park racetrack property to the city of New Orleans for park purposes were taken at a meeting of the Board of Directors of the Business Men's Racing Association last night.

The president was directed to call a meeting of the stockholders within fifteen days to vote on the transfer and dedication of the property to the city as an annex to City Park.

A resolution was adopted authorizing the officers to buy the Fair Grounds for $400,000, $50,000 to be paid in cash and the balance in yearly payments of $25,000. A dividend of 10 per cent on all the stock, payable March 1, was voted.

Reports from the officers showed the net receipts from the racing season just closed would be about $150,000.

According to statements, the attendance this season for forty-four days was far in excess of the total of last season, when fifty-seven days' racing was in vogue at the Fair Grounds. The purse money this year also totaled $79,000 more than it did last season.

✤ ✤ ✤

E. W. Moore, who holds the contract on Jockey Crump, has given second call on the boy's services to Jefferson Livingston. The latter is as well fortified with riders as he is with an all-round stable, having McTaggart, Crump, Jeffcott and Urquhart under engagement.

The Thoroughbred Record of March 3, published a long interview with August Belmont, Chairman of the Jockey Club, from which the following extracts are taken. In answer to a question as to the betting feature of the sport he expressed himself as follows:

"The principal objection to racing has been the betting, which in nearly every instance accompanies the sport. Legislation has been directed against bookmaking—by that I mean the system which fixes odds so that poolrooms know the quotations before a race is run. This is an incentive for general gambling and enables people in large cities to bet on the races simply as a gambling proposition and without the accompaniment of the sporting spirit. It also provides a definite price for wagers that are made i nhandbooks.

"The pari-mutuel system would be a distinct improvement on the old system, as the odds are determined only after the race and by the actual amount of money invested on each starter in the race. It is a notable fact that in Canada and in States of the Union where pari-mutuels have been substituted for the old bookmaking method, handbook makers have disappeared, and bookmaking, which has caused so much criticism, is at a standstill.

"The question of introducing the pari-mutuels in England has been discussed recently and has received the support of prominent sportsmen across the water. I do not know whether it is possible to introduce this system in the State of New York, as it probably would require a change in the Constitution of the State, but there is no question in my mind that it would provide a much more satisfactory means for the public to wager on the chances of a horse race, if such wagering is to be permitted at all."

Another important matter touched on by Mr. Belmont, in reply to a question, was the new rule prohibiting the racing of two-year-olds until April 1. Asked as to the effect of this rule, he said:

"It was a wise move ,and made in the interest of breeders and horsemen. We expected an outcry on the part of those who wish to race immature horses at winter tracks, but the move was made as a result of experience gained by watching the performances of those horses which were raced at too early an age, and there is no idea of going back to the old order of things. There is no doubt whatever that we shall obtain better racers and better breeding stock by delaying the entrance of the young racers into the field of competition until the spring meetings open."

✤ ✤ ✤

Hot Springs, Ark., March 7.—All attendance records at Oaklawn Park were broken today, the opening of the spring racing season, and seldom has there been a gathering at any racecourse that showed as much enthusiasm as the one here. The proclamation of the Mayor, Dr. J. W. McLendon, making the day a half holiday, gave the local people a chance to get to the races, and they turned out in full force, led by members of the Business Men's League, which fathers the sport here.

The Mayor delivered an address of welcome to the visiting racing people in front of the grandstand just before the first race, and he told them how glad he and his fellow townsmen are to have a big assemblage within the gates of the city. He assured the visitors that they will be given a real taste of hospitality here, and bade them make themselves at home.

The day was perfect for racing, it being like spring, and the track, while a trifle slow from a heavy downpour of rain early this morning, dried out rapidly during the afternoon. Every point of vantage in the grandstand, on the steps and on the walk in front of the stand was taken, and many persons watched the races from automobiles and carriages in the centerfield.

The feature, the Arlington Hotel purse, fell to E. W. Moore's imported mare. Arriet. She had no trouble beating Mars Cassidy five lengths and was well in hand at the end. This affair was at six furlongs, and a good band of sprinters contested for it. The Hot Springs inaugural purse was won by the consistent Langhorne. Ed Howard, making his first start since last fall in Kentucky, was the one most favored in this event, but he ran as though he needed a race or two. W. P. Johnson's good three-year-old Fizer beat Kultur two lengths in the fifth race. Kultur, as usual, opened up a big gap, but quit badly in the final drive through the stretch.

Judge Nelson gave the jockeys a lecture in their quarters regarding rough riding before the first race, and he gave them to understand that riders guilty of this offense at this meeting will be severely dealt with. Starter A. B. Dade also gave them a talking-to, as there are many riders here who never rode under him before.

✤ ✤ ✤

Olga Star, the high class daughter of Star Shoot and Olga Nethersole, ran a most impressive race in the Descanso handicap run last Sunday at Tia Juana. Olga Star has been running disappointingly this winter but now seems to have finally rounded to her best form. She was outpaced in the early running being fully ten lengths out of it at the half mile pole, but moved up with a powerful rush rounding the far turn and mowed her field down in the stretch, winning going away. Bigtodo and Conning Tower were second and third.

SADDLE and SHOW HORSES

T. C. Jefferson, the well known Kentucky horseman, who is in charge of the saddle horses of the Sierra Vista Farm, Chino, Cal., writes that he expects a regular "hoss race" when the two three-year-olds, Cochise and Tourist Peavine, get in competition.

✤ ✤ ✤

Mrs. Grace Maxwell has taken charge of the riding academy at Pasadena, which is owned by Revel Lindsay English. Mr. English has an excellent lot of horses in this academy and with Mrs. Maxwell as an instructor, visitors at Pasadena are offered a rare opportunity to enjoy a ride at the same time they are taking lessons.

✤ ✤ ✤

Godfrey Preece of New York has a stable of excellent Polo ponies in training at Mexico, Mo., where most of them were purchased . Mr. Preece, who is now in Havana, has notified Lee Bros., of Mexico, through whom he makes his purchases, of his intention to visit Mexico immediately and select a load of three-gaited saddle horses, and ship them with the Polo ponies to his country estate on Long Island.

✤ ✤ ✤

San Vicente Rancho's noted matron, Dona ,has foaled a splendid filly foal by Don Castano, their noted sire, who is a son of Golden King. The writer saw a yearling in the corral at San Vicente which is a full sister to the new arrival, that I picked out of the dozen as the star of the lot, and L. S. Rollins, manager of the farm, declares that last week's foal is much better than the yearling.

✤ ✤ ✤

The Winona Riding Association is the name of a recently organized riding club at Winona, Minn. The leader of this "back to the saddle movement" in this section of Minnesota is Wm. Kuhlman, who with other members of his family are ardent horse lovers. They are making an effort to secure the services of a first class instructor and educator of horses to make riding master of the club and to train their horses.

✤ ✤ ✤

Lee Bros., of Mexico, are buying every good three-gaited horse they can locate—that has the right class and price tag on him. They have had one of the best spring seasons in the history of their very successful career in the horse business. This firm has the reputation, and it is conceded by all, of having furnished more high class show horses to eastern buyers which have become champions, than any firm in the West.

✤ ✤ ✤

Holger Rasmussen of Chicago, owner of Alston, the celebrated high jumper, and others of note, has taken charge of the First Cavalry Riding Academy. Mr. Rasmussen is a real instructor, having had more experience in that line probably than any man in Chicago; he is a great rider, exhibitor and a natural born horseman, and together with his being a clever young chap and a high class gentleman, makes his services very valuable to the academy, which, by the way, is one of the most prosperous in the United States, and which is soon to be replaced with one of the most pretentious buildings of the character ever built, and to be equipped with every convenience and excellent mounts.

✤ ✤ ✤

The annual American Saddle Horse judging contest which was conducted by E. A. Trowbridge, head of Animal Husbandry, University of Missouri, at Columbia, attracted 137 contestants. Students from practically every county in Missouri and from Oklahoma, Kansas, Mississippi, Illinois, Arkansas, Texas and the Hawaiian Islands taking a part. Three classes of saddle horses were placed, including the three-gaited, five-gaited and breeding classes. Students were allowed twenty minutes for inspection and fifteen minutes to give their reasons for placings, being graded fifty per cent for placing and the same for reasons. The silver trophy offered by the American Saddle Horse Breeders' Association going to M. R. Howell of Columbia, Mo. Joe T. Harris, owner of Peter Pan and Prince Albert, America's foremost pair of roadsters; Will Thompson, president of the Boone County Fair Association, and James Hamilton, of the Blue Grass Farm, Mexico, Mo., were the judges of the contest.

✤ ✤ ✤

On account of the secretary, "Jump" Cauthorn, coming West January 1st, and Messrs. Houchin, Trowbridge and Jackson, all active in the affairs of the Missouri Saddle Horse Breeders' Association, having various other matters that demanded their attention at the time, the annual winter meeting was postponed from the first week in January until some time during the spring. Prof. Trowbridge writes that they will make an immediate effort to have a rousing meeting some time this spring. There is much that an association of this character can accomplish in Missouri, but the few officers of the company must have the co-operation of the entire membership, some 100 breeders, before attempting anything.

✤ ✤ ✤

Foxhall Keene's wonderful recuperative power has never been better demonstrated, I am sure, than by the fact that after his severe accident on the hunting field last autumn he is now taking an active part in California polo. While he was visiting Mr. and Mrs. Daniel T. Murphy, with whom he came out to California, at Burlingame he played at the San Mateo Polo Club, and on the first of February he was off for the Coronado tournaments. Keene left California when a child, after his father, the late James R. Keene, had made a fortune here, but he frequently returns for a visit. His father's financial beginnings, in the days of '49, were made in the little town of Shasta, where he was known as "Squire" Keene. He was Justice of the Peace and notary public for the county before he went to San Francisco.

✤ ✤ ✤

Manager John T. Hook, of the saddle horse department of Longview Farm, Lee's Summit, Mo., returned last week from Kentucky where he has been looking for something to fill one or two vacancies in this noted stable. After spending a week in the state, however, he only found one that was eligible, and after giving one of the farm's best horses in part payment he finally persuaded owner Langhorne Tabb Anderson, of Maysville, Ky., to let him have a young walk-trot mare of the smaller type. Mr. Hook is very "keen" on her and says that while she is young and needs a lot of work he expects to have her in the A class by the opening of the important shows. Point-au-View Farms, he declared, has some exceptionally fine horses finished and ready for the show ring and for business and pleasure use, and was the only place he was able to find just what he was looking for in the smaller type three-gaited variety.

✤ ✤ ✤

One of the most attractive lot of colts advertised for sale this season will be found in the announcement of Oakridge Ranch, Kenwood, Sonoma county, in this issue of the Breeder and Sportsman. Three royally bred saddle colts and two standard breds, yearlings and two-year-olds. The saddle bred colts possess the most talented blood lines it is possible to secure in California. Two by Lord Denmark and one by Highland Squirrel King, the two veteran sires of the Coast, and both proven sires of high class show horses; horses with good clean gaits and splendid conformation and good heads. The Standard breds are by Silkworthy and Don Sonoma, and like the Saddle colts are from attractive dams. These colts will be found in good condition and ready to go into training at once. They are priced reasonably so that they will sell at once, and interested readers should address W. G. Cowan, Kenwood, Sonoma Co., or Breeder and Sportsman, San Francisco.

✤ ✤ ✤

His many friends throughout the country will be glad to know that Charles W. Green, of Centralia, Mo., has been invited to officiate at one of the horse shows to be given in connection with one of the large state fairs of the West this fall. The editor of the Breeder and Sportsman, perhaps, has been more closely identified with this prominent and popular young judge's work than any other individual of his acquaintance, and I do not know of anyone who is better qualified and who comes so near filling the bill in every respect. Mr. Green has judged at some of the leading horse shows and state, district and county fairs in the United States, and his work has been highly satisfactory and especially instructive to the audience and the exhibitors. He is universally popular with harness and saddle horse men alike and takes the appointments of this character as an honor and judges accordingly. Mr. Green has been one of the most successful buyers and sellers of horses and mules in Missouri, and buys several carloads of horses and mules from Missouri farmers every week. His having been practically raised in the business and also being a member of a business firm, he knows the game from A to Z and is considered the most successful dealer in Missouri of his age. Clean, honorable, well qualified and "up to right now" in everything, is what has made Charles W. Green's services, both as judge and superintendent, so demanded in the Middle West by exhibitors and associations alike. He is best described as the "happy medium," for when the annual fuss comes up about judges they settle on Mr. Green, for they know he will be acceptable to all.

✤ ✤ ✤

Roger Pemberton, of Chicago, bought three good horses in Kentucky sale week and Chicago fanciers who have seen them say they should "top the Chicago market." All Chicago dealers claim excellent demand for good pleasure using saddle horses, and the shortage of supply of this kind will make itself felt in higher prices. Kentucky and Missouri, I believe, were never so short on good gaited saddle horses.

A Remarkable Saddle Stallion.

There are always some well bred, well educated and attractive saddle stallions for sale in Missouri and Kentucky. Here is where they are bred and raised by farmers and horse breeders alike; where the blood of the most noted horses of all time flows most liberally and where every man knows a good saddle horse. However, when one is found that can go out and win in any company he is priced in such figures that the man looking for a stock horse; one that he can show with a great degree of success, use as a pleasure horse and make money from his investment, becomes discouraged.

Again, those that are worthy of showing are in many instances good only for breeding purposes and the show ring, and it is a rare thing to find a stallion that is so mannered he will answer every purpose desired in a saddle horse. Noble Rex, advertised for sale in this issue by D. Schilling, of Aroya, Colo., is just such a horse . One could travel through Missouri and Kentucky for weeks and not find one of his kind. He has every qualification for a sire; for a show horse and for a pleasure horse, either to use in country or in cities. He is a horse of great bone and sound feet; 16 hands high, six years old, a jet black with magnificent style at both ends.

He is the best mannered stallion the writer knows of: I dare say, that any one who can ride at all can ride Noble Rex as well as a professional. His gaits, five of them, are letter perfect and so thorough that the average business man cannot spoil them. He works perfectly in company; does not squeal or bite and has none of the habits that make the average stallion "taboo" as a pleasure horse. He carries the best blood of the Denmarks and is a typical specimen of that great family. Any one that wants the most versatile saddle stallion offered for sale should lose no time in communicating with Mr. Schilling, at 3152 Pine Grove Ave., Chicago, as a horse of this type will not go long without good buyers; he is the kind which the public demands.

The San Vicente Rancho Co., of Los Angeles, has sold their brown five-gaited gelding, Kentucky, which won the gelding class at the last California State Fair, to Mr. J. M. Danziger, a prominent attorney of that city and the owner of a very beautiful estate in the Santa Monica mountains. With such an ideal pleasure and show horse in their possession, it is hoped and confidently expected that Mr. Danziger and his family will become interested in show horses.

NEWS FROM MISSOURI.

[By Rufus Jackson, Mexico, Mo.]

Godfrey Preece, of New York, bought this week from Lee Bros., of this city, what he considers the greatest prospect for show ring honors that he has ever purchased in his extensive career as a dealer in high-class horses. The horse in question is a beautiful chestnut with white markings, a long neck with a clean-cut throttle and a fine head and ear. He possesses wonderful knee and hock action and his manners are perfect. Mr. Preece has been an extensive buyer of good horses here and among the number that he has taken east and developed was the great winner, Panama. That his recent purchase is the best horse he has ever bought here speaks volumes of the wonderful qualities of the chestnut for it is recalled that Mr. Preece has bought some good ones here in the past. This horse was bred by J. R. Snook of northeast of Mexico, and was sired by Rex Chief A .and out of a mare by Ike. In addition to this horse Mr. Preece also bought two extra good horses through Lee Bros. from S. G. Wood of Auxvasse . One or these is a bay gelding by Rex Mont and out of a mare by the thoroughbred stallion, Col. Stephens, the sire, by the way, of Mr. Prece's former champion, Panama. The other purchase from Mr. Wood is a chestnut gelding by Forest Montrose out of a mare by the sensational eastern show ring winner, Nala.

* * *

L. B. Barnett is fitting a number of good show horse prospects for coming season's shows at Lee Bros.' Boulevard Stables. Included in the number is a brown gelding owned by French Field that gives every promise of developing into a wonderful show horse. The good young stallion, All McDonald, owned by E. N. Hamilton, is working splendidly under Mr. Barnett's careful handling and is sure to prove a contender in the big stakes this year.

* * *

Joseph H. Hoch, of Chicago, and Dr. Tubbs of Council Bluffs, Iowa, were in Mexico this week in search of good saddle horses.

* * *

Jack O'Brien ,of Chicago, has made arrangements with L. B. Barnett of this city to train and show a green mare that is said to be "sum punkins."

✤ ✤ ✤

The shortage of horses at the National Stockyards, East St. Louis, was more pronounced than ever last week, a commission man said. The total receipts of the Campbell-Reid firm, which is selling horses to France and Italy, was 1200 head. About 700 of these were required for the domestic trade, leaving 500 to be divided by the two allies. At least 2500 horses could be sold every week to the Europeans, the dealer said. Farmers who are preparing for their spring planting are making a large demand for horses and mules.

Notes and News

At the late meeting of the New York State Fair Commission at Albany the officers of 1916 were re-elected and Racing Commissioner Schoeneck was authorized to announce a Grand Circuit program with not less than $40,000 in early and late closing purses.

✤ ✤ ✤

Don de Lopez (3) 2:16½, son of Kinney de Lopez and bred at Hemet Stock Farm, took part in sixteen races during the 1916 season and won twelve of the number, being but once behind the money. This is a wonderful showing for a three-year-old ,as in six of these events he was racing against aged horses.

✤ ✤ ✤

Fred Hahn, of Oakland, Cal., is jogging a four-year-old green trotter that promises to be "fit" for the coming season. With little work last season he trotted around 28 and is showing class this year. He is by Arner, by Charles Derby, and his dam also is a daughter of Chas. Derby.

✤ ✤ ✤

The French government recently placed with East St. Louis firms orders for 20,000 horses and the Italian government has ordered several thousand mules. Mules are used in pack trains in the Italian army and for motive power for the artillery in the mountains.

✤ ✤ ✤

Secretary Joseph Waddell, of the California Fair and Racing Association, is in Los Angeles using his efforts to interest the business men and stockmen in giving a good meeting there this autumn. He also visited Fresno and other cities south of San Francisco on his way down.

✤ ✤ ✤

J. Dupont, who heads the committee of the Petaluma Driving Club, has announced that an agreement has been reached with the park commissioners for the leasing of Kenilworth park and race track, which practically insures the race meet there in July. Horsemen of that vicinity are taking considerable interest in the circuit races to be held this summer.

✤ ✤ ✤

A. B. Kinney, of the State Fair Grounds, North Yakima, Wash., has sold the bay stallion True Kinney 2:21¼, by Kinney Lou 2:07¾ out of My True Heart by Nutwood Wilkes 2:16, to Fred Weldt, of The Dalles, Ore., who will use him in the stud this season. Mr. Kinney contemplates a campaign through the Great Western Circuit this summer with two mares by Hal B. 2:04½ which are topnotch pacers.

✤ ✤ ✤

A one cent post card sent to the Reducine Company, Otsego, Michigan, and mention of this paper with the request for one, and you will receive a copy of their 164 page booklet postpaid. If you have any kind of a horse, no matter how much you think you know about the animal, you can learn a lot of new things out of this interesting publication. It won't cost you anything and it may make a difference of a lot of money to you and possibly save you some valuable horse that you may think a great deal of.

✤ ✤ ✤

A number of citizens of Salinas and vicinity who are interested in racing and fairs met last week and organized the Salinas Valley Fair and Racing Association. This association is a part of the California Fair and Racing Association, whose object is to encourage and promote county fairs and racing. A circuit is being formed and Salinas gets the first meet of the circuit, the second week in July. C. Z. Hebert was chosen president of the local association; R. A. Stirling ,treasurer, and J. A. Anderson, secretary.

✤ ✤ ✤

Mr. A. C. Cohmire, President of the Willamette Valley Fair and Racing Circuit, of Portland, Ore., speaks very highly of the qualities of Reducine which he has been using on his horses. One especially bad case was that of Redskin 2:16½ which was entirely cured, and the horse trotted sound all last summer, winning several races.

Alonzo McDonald has also been using Reducine and finds the results very satisfactory. E. T. Geers also says that he has been using Reducine a good deal for the last two or three years and likes it better than anything alse he ever used for its purpose.

✤ ✤ ✤

Fifteen yearlings by San Francisco were sold for a total of $11,595 at the Garden sale last week, or an average of exactly $773 per head. This is considered the highest price paid for that many yearlings in any public sale by one stallion. The sale record for weanlings is held by The Harvester, twenty-nine of his get selling for a total of $20,775 last November, or an average of $715.40 per head.

Several brood mares formerly owned by The Woodland Stock Farm were offered in this sale and sold as follows: Sweet Princess by Prince McKinney brought $100. Carrietta 2:18, the dam of Suldine 2:08¾, Silent Brigade 2::09, etc., sold for $400. Ila Moko brought $375, Verbena Mc $475, Fair Recluse $250, and Reina Directum 2:12½ $150.

J .Janson, Jr., the enterprising horse goods man and harness manufacturer at Pleasanton, has something new to offer in the way of a "speedycut," as will be seen by his advertisement in this week's issue. Mr. Janson makes a specialty of high-class light harness horse goods ,turf goods, and in fact everything required about a stable of race horses.

✤ ✤ ✤

Mr. C. K. G. Billings' decision to sell all his horses will release the great pacer, William 1:58½, for return to harness racing. He will be a welcome addition to the free-for-all brigade of the Grand Circuit which has lately lost some of its best horses through breakdowns, retirements and relegation to the half-mile tracks. William went lame when in training to beat the record last year, but the trouble was not believed to be serious.

✤ ✤ ✤

George J. Peak, the sage of Winchester, Ill., has lost his grand old show horse, Tommy Doyle, perhaps the greatest roadster stallion that ever lived. Tommy Doyle died at his home on Mr. Peak's estate at Winchester last week and it has unnerved the old showman to such an extent that he has consigned his entire stable, including the show horses, brood mares ,colts and equipage to the Chicago sale. There never was a horse that has won so consistently as Tommy Doyle and he was exhibited in all classes; single and as one of a pair, in roadster, light harness and breeding events in all shows west of Pittsburgh. He was as honest and game an animal as there ever lived and knew the game better than any other horse of recent years. In his last appearance, which was at this year's Denver show, he was driven by a man who could not ride in a Bain wagon, yet, he fought the battle by himself, and with the handicap, landed close to the top in one of the biggest and most heated contests of the show. We will all miss the old horse; perhaps I am safe in saying that the death of Tommy Doyle will affect more lovers of the show horse than that of any other animal; but the sage of Winchester, the only George Peak, will be missed a thousand times more if he retires from the game, as is reported.

Horse Affairs in Canada: C. A. Harrison.

Mr. Fred Johnson, of Calgary, Alberta, Canada, owner and fancier and one of Canada's most prominent harness horse men, has sold his fast pacer, Mussell Shell 2:10½ to W. J. Fleming, of Calgary. Mussel Shell is a son of Bozeman, by Mambrino King, and was raced on the ice this winter by Vic Fleming, the well known Canadian reinsman. He will be raced by Fleming over the Western Canada circuit in 1917.

Russ McGuire, of Moose Jaw, Canada, will race Mr. Johnson's pacers, Sir Wilfred and Dr. McGlaughlin 2:17¼, by Vinmont Almota, by Vice Regent, and the trotter Copious 2:14¾ by Lacopia, son of Bingen 2:06¼.

"California Jim" Stewart is conducting a public training stable at Calgary.

George Haag, of General H. 2:04 fame, is now one of Canada's leading wheat growers and cattle raisers. He is on a large ranch near Calgary.

The most attractive circuit in years is being planned over Western Canada and some good purses in prospect.

Dr. F. W. Crang, a prominent physician of Edmonton, Alberta, is the owner of a top notch pacer, Grey Ghost 2:13, dam Nellie Coovert 2:15. Grey Ghost has been racing on the ice all winter and is now back in Edmonton being prepared for the Canadian summer circuit.

J. T. Wilkinson, of Vancouver, owner of the good stallion Ora Wilkes Jr. (2) 2:12¼, has that good stallion in service at Chilliwack, B. C. He is proving a good sire and among others of promise is a four-year-old mare, May Wilkin, which her owner believes is the best thing he has ever raised. She is a beautiful filly and though she has never been worked, can pace a "blue streak" and can go across the fields faster than most horses can run. Mr. Wilkinson has neglected having her handled on account of his personal business affairs, but I believe in the right hands there is a chance of her making a top-notcher. She is broken nicely and has a lot of sense.

Wm. Delabanty, who is one of the most clever trainers in the country, is working some good horses for W. H. Gibson, of Gannavoque, Ont., who is a wealthy horse lover and sportsman. Among those in the stable are the pacer Hydric 2:05½ and two green youngsters that are doing nicely. They had Forrester Boy ready at Ottawa for the ice meeting but sickness prevented them from making any good showing. Mr. Gibson is one of the foremost harness manutacturers and business men of Ontario.

———o———

At Boise, Idaho.

Jas. Kirby, well knwon horse lover and authority of Boise, Idaho, has been one of the "live ones" to answer the Breeder and Sportsman's call for list of Western horses in training and sends the following, which constitutes the colony at Boise:

Wm. Howell has Pfeister's Lynwood, by Lynwood W.; Miss Sirius, three-year-old trotter by Graham Bellini, dam Lady Sirius 2:10¼; Kinney Benton, three-year-old trotter by True Kinney, dam Princess Viola, by Prince Ansel; Idaho Chief, two-year-old trotter by Suomi, a son of Zombro, dam Lady Sirius 2:10¼; Lady Ellen, two-year-old trotter by Suomi, dam Lady Alfred 2:16½ by Alfred G.; Miss Idaho, yearling trotter by Suomi, dam Lady Sirius 2:10¼; Miss Betty, yearling trotter by Suomi, dam by Oronteo 2:16¼ ,second dam by a son of Belmont 64.

J. D. Springer, of Sonoma Girl fame, has Mountain Boy 2:12¼ and Adver Direct, pacer, by Directus J., dam Adwillta by Advertiser.

O. M. Hutchens has Valentine Jr., pacer, 2:10, by A. Valentine; and a promising green pacing filly by Francis J.

Wm .Taylor has Mr. Fleety, three-year-old pacer by Suomi, dam Miss Otto 2:11, which has been a mile in 2:22 as a two-year-old; Beans, three-year-old trotter by Suomi, dam Summerbeau, that has been a quarter in :36 and an eighth in 17 seconds as a two-year-old; bay pacing filly by Gayloc, son of Suomi, that when a yearling paced a quarter in 35 seconds.

Fair Association of Glenn Incorporates.

Judging from the articles of incorporation of the Glenn County Livestock and Agricultural Association ,filed with Secretary of State Frank C. Jordan, Orland's annual fair is to be an established event. In its articles the company states it will conduct fairs near Orland in order to promote the livestock, agricultural and horticultural interests of Glenn county.

The company is capitalized at $10,000. Each share of stock has a par value of $1. The fifteen directors are: Chris Mybre, H. M. Knightwell, I. L. Brownell, S. F. Williams, W. G. Gurnett, Charles A. Whitsett, S. W. Baugher, E. A. Kirk, J. J. Flaherty, E. E. Kracaw, Charles L. Leonard, George E. Wyngard and W. E. Scearce ,all of Orland, and W. L. Guilford and W. H. Walker of Willows.

———o———

Important Meeting Called For March 24.

The California sulky circuit will open earlier and continue later this year than has been the case in years. The new corporation, the California Fair and Racing Association, of which Mr. Joseph Waddell, who organized the very successful Inter-Mountain Circuit last year, is secretary, is actively at work organizing the California Circuit for 1917, and has called a meeting of all interested to be held at the Hotel Manx in this city on Saturday next, March 24th, at which time the dates of every meeting on the circuit will be announced ,and purses and classes also arranged. Already there are seven meetings sure before the State Fair and there is no conflict of dates between any of these associations. The circuit will open at Salinas the second week in July, proceed from there to Petaluma the following week, thence to Ukiah, thence to Ferndale where the Humboldt County Fair will be held, thence probably but not certainly to Eureka, thence to Santa Rosa, Dixon, and Woodland in that order and then to Sacramento to the big State Fair meeting. Following the State Fair a meeting may be given at Stockton, after which the big Fresno Fair will take the last week in September and the Kern County Fair the first week in October. If Hanford decides to come in, and it doubtless will, as the Kings County Fair is one of the best county fairs held in the State, there will not be room for the Stockton meeting unless that city gets in early, claims dates and announces its program. After Bakersfield a four days' meeting is assured for Santa Maria, which has already collected and banked the money to insure the purses, and Santa Ana, Riverside, Ventura, Los Angeles and other places are already holding meetings to see if they cannot get into the circuit, which is to wind up at Phoenix about the second or third week in November. There is a certainty of at least 12 and a probability of between 15 and 20 weeks of racing on the California Circuit this year.

A general invitation is extended to all who are interested in a California Circuit to attend the meeting at the Hotel Manx next Saturday. All are welcome and some important announcements will be made.

———o———

Continued Straws.

Those who have predicted that the horse is going to be retired by the auto have another guess coming. Horse experts declare on the contrary that, despite the sale and export of some 500,000 for war purposes, there are now more horses in the United States than ever before.

The assertion is frequently made that the farm is the only home now left for old plug horses, since they have been almost wholly retired from city business work . Chicago, however, which is as modern a city as the world knows in business methods, and which might be expected to use commercial trucks freely, reports that in the period from 1911 to 1916 the number of licensed horse-drawn vehicles dropped from 58,000 to 49,000 and the number of motor vehicles increased from 11,000 to 43,000.

This is an astonishingly small reduction in the number of horses, but an enormous gain in the number of motors. These figures show that the normal increase in business vehicles from year to year is largely taken care of by motors.

Missouri is still raising some fine horses which sell as high as $1,000 each, but the business has declined greatly. The five-gaited breed, selling from $500 to $5,000, and the expert racing breed will very likely be revived, since the sport of racing is being revived. All over the country there is an increased interest in pure-bred horses, which indicates a revival of horses instead of their retirement. America still has millions of horses and probably will have millions for many years to come.—[Milwaukee Journal.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Vivisection Bill.—Quite a fight and a deal of controversy has been stirred up over the so-called vivisection bill introduced in the assembly at the present session of the California legislature by assemblyman Nick J. Prendergast. The measure has its supporters and opponents. The father of the bill gives the following explanation:—

"The bill in no way changes the present statute providing for vivisection other than that it allows the animals to be purchased from the pound by colleges for purposes of vivisection. It specifically provides that no operation shall be performed on any animal except under surgical anaesthesia. The present law makes no such provision.

"During 1916 nearly 4,000 dogs were destroyed without having served any useful purpose. Under this bill those animals would have aided in the work of research and would have furthered medical and scientific investigation."

On the other hand ,the following communication dealing with some features of the bill has been mailed to the Breeder and Sportsman:

"Members of the State Humane Association and unaffiliated animal lovers from all parts of California are gathering in Sacramento this week to oppose the Prendergast bill, which if passed would compel all public pounds to surrender unclaimed animals to medical colleges for vivisection.

The committee on Medical and Dental Laws of the assembly will hold public hearings on the bill, and among those who will speak in opposition to it are: Supervisor Edward I. Wolfe of San Francisco, Matthew McCurrie, secretary of the State Humane Association, Hugh J. Baldwin, former superintendent of San Diego schools, and other prominent humanitarians.

James H. Wilkins, San Francisco newspaper man, has prepared a statement outlining the position of the Humane societies ,saying: 'In order to correct scandalous mismanagement, societies for the prevention of cruelty to animals have shouldered the administration of public pounds in most cities. It is a work to which many earnest and kindly people, in a spirit of universal humanity, have given some of the best efforts of their lives.

"The San Francisco pound is an institution which may be studied to advantage by other cities. Stray dogs, cats, and other hapless animals are collected there ,are well fed and well housed. If they show evidence of ownership, efforts are made to find their masters. If they are of any value, homes are found for them. After a certain period the unclaimed derelicts are painlessly destroyed.

"The Prendergast bill strikes at the very foundation of mercy on which all these labors are built. It provides, in effect, that all the pounds in the state shall turn over their unclaimed animals to the various medical colleges of the state for the purpose of vivisection. Failure to do so involves fine or imprisonment or both.

"Such a bill, if enacted, would, of course, terminate the present activities of all humane societies which operate pounds. It could hardly be expected that men and women of gentle purpose would become collectors of animals doomed to a death of the most appalling torture."

Some of those who are present at the capital opposing the measure are: Hugh J. Baldwin, San Diego; Matthew McCurrie, San Francisco; Mrs. James Sprecher, Los Angeles; R. C. Irvine, Sacramento; Wm. Harvey, Sr., Fresno; Mrs. Laurence Gronlund, Oakland; and Charles Kelly, Pasadena.

Southern Rod Club.—With a large crowd of fly and bait casters competing, the Southern California Rod and Reel club staged its monthly casting tournament at the Eastlake park grounds on Sunday. Some very remarkable hurls resulted during the day. Following are the summaries:

Heavy tackle fly accuracy, fifteen casts at 50, 55 and 60 feet: J. J. Low 98 13-15, E. J. Kennedy 98 9-15, Charles Van Horn 97 14-15, W. A. Holmes 96 1-15, T. G. Corfield 89 13-15.

Heavy tackle dry fly accuracy, five casts at targets 2 0to 60 feet: Low 99 10-15, Kennedy 99 9-15, Van Horn 99 2-15, Holmes 97, Corfield 95 12-15.

Heavy tackle, distance, ten minutes to each: Kennedy 96 ft. 6 in., Low 86 ft., Holmes 70 ft., Corfield 64 ft.

½-ounce accuracy, target 60 to 100 feet and back: Lane 98.2 per cent, Kennedy 98, Perkins 97.1, Van Horn 96.6, Baker 94.5, Borngrebe 91.8.

½-ounce, distance, five sasts—average: Lane 212 ft. 5 in., Perkins 141 ft. 11 in., Lenarth 141 ft. 11 in., Baker 120 ft. 4 in., Van Horn 116 ft. 8 in., Borngrebe 74 ft. 5 in., Kennedy 57 ft. 1 in.

Longest single cast, 212 feet 13 inches, by Oscar Lane.

2½-ounce distance, regular, five casts: Baker, average, 218 ft.; King 210 ft. 2 in., Kennedy 207 ft. 10 in., Perkins 202 ft. 7 in., Borngrebe 168 ft. 5 in., Hudson 115 ft. 11 in., Lane 113 ft. 10 in. Longest single cast, 248 ft. 4 in., by Sherman Baker.

2½-ounce distance, handicap under surf conditions, average: King 204 ft. 6 in., Perkins 198 ft. 10 in., Lane 165 ft. 2 in., Kennedy 155 ft. 10 in., Van Horn 101 ft. 9 in., Hudson 94 ft. 11 in., Borngrebe 86 ft. 11 in., Baker 78 ft. 8 in. Longest single cass, 264 feet 3 inchet, by Charles King.

Spokane Fly and Bait Club.—Spokane, Wash.—The annual meeting of the Spokane Fly and Bait Casting Club, held February 6th in the Old National Bank Building, was attended by sixty enthusiastic anglers. Several new members were added to the club and the membership committee was authorized to accept applications up to April 1, the opening of the fishing season.

After some discussion of the situation regarding prosecutions and penalties imposed upon violators of the fishing laws, the president was authorized to appoint a lookout committee to secure the facts in individual cases, compare them with instances in adjoining counties, and report back to the membership in detail. The club members are determined that the money expended for the propagation of fish and their protection shall not be wasted by illegal fishermen.

A very interesting and instructive talk was given by A. J. Buzard, game commissioner in charge of fishing, on methods pursued in raising the little fellows until big enough to take care of themselves in the natural streams.

Officers were elected as follows: President, Garrett B. Hunt; vice-president, Henri Crommelin; secretary-treasurer, J. E. Griffith; captain in charge of contests and targets, Dr. J. E. Drake.

The club endorsed the action of the Spokane County Game Commission in recommending no change in the laws prescribing the minimum length of bass and trout to be legally caught. D. R. M.

Southern Rod Team—The executive committee of the casting auxiliary of the Southern California Rod and Reel Club has made the announcement that the selection of the team to represent the club at the tournament of the National Association of Scientific Angling Clubs, which is to be held in Chicago next August, is to be made by competitive tests. This puts the fly and bait casters all on edge in their efforts to win places on the team of three men that will have a chance for national honors. Such stars as Baker, Lane, Kling, Kennedy and Van Horn will toe the mark on the casting grounds and they will be opposed by equally clever men with the rod and reel. It is the tentative plan of the casting auxiliary to select the three members of the team at the end of the winter casting tournament, and then to place the men in training for the great Chicago event. Southern California has championship material in plenty and the competition to be sent to Chicago is going to be keenly fought. OBSERVER.

Los Angeles, Cal.

Food For Wild Ducks.—Washington, D. C.—To assist commissions, organizations and individuals in preserving and propagating wild ducks, the U. S. Department of Agriculture has just revised two of its publications on the food plants of these birds and published the revision as Bulletin No. 465.

The bulletin recommends for propagation, eelgrass for salt water; widgeon-grass, sago pondweed, and wild celery for brackish water; wild rice, wild celery, the pondweeds and watercress for fresh water with a slight current; and the pondweeds, banana waterlily, musk grasses, waterweed, and coontail for fresh water that is usually quiet. Along the margin of fresh water where there is no marsh, wild millet is desirable. In addition, a number of other recommendations are made for various conditions.

The bulletin discusses in detail the propagation of most of these foods.

You can't keep a good man down. H. W. Cadwallader, of Decatur, Ill., had his right eye destroyed and it was the natural conclusion that he would never more shoot at the traps. As Cadwallader did not wish to give up the sport he was so fond of, he spent several months perfecting an extra rib which he placed on his trapgun. With this he sights with the left eye and shoots from the right shoulder. Necessity surely is the mother of invention.

✣ ✣ ✣

Wilmington, Del., has it on any city of its size in America when it comes to trapshooting enthusiasm. It is a common occurrence to find 100 trapshooters before the traps on a Saturday afternoon in the Delaware city, but recently on a very unpleasant afternoon there were 122 men and women at the traps of the Wilmington Trapshooting Association, 21 more before the traps of the Philadelphia, Baltimore and Washington Railroad Company, and eight more at the Greenhill Club. 150 before the traps on a stormy day denotes much enthusiasm.

COMPLIMENT TO RAINBOW TROUT.

Chicago Writer Enthuses Over the Gamey Fish in Coast Waters.

[By Larry St. John.]

Chicago ,Ill.—When Gitchie Manito finished the first sunset he had some wonderful red paint left over, so he brushed it on to the sides of a trout, and that is why the sides of the rainbow trout are red even to this day. When writing about trout, you know, it is the customary thing to "horn in" an Indian legend, and never having heard one about the rainbow trout, we invented that one ourself. Not so bad, is it, for the first attempt of an amateur Indian legend maker? One also is expected to tear one's hair and rave around a little about the Beauties of Nature when producing Trout Literature—we'll resign first! Now, having settled that, let's get down to business.

Besides the typical form, Salmo irideus, common to the mountain streams of California, there are five subspecies of rainbows, as follows: The brook trout of western Oregon, which seldom exceeds a pound in weight; the McCloud river trout, used for stocking midwest and eastern waters; the Kern river trout, found only in that stream and which reaches eight pounds; the "Nissuee" of the upper Sacramento, and the golden trout of Mount Whitney, the Francis X. of them all.

In appearance the rainbow trout is a beautiful fish; in color bluish above, with silvery sides irregularly polka dotted on the back and sides, and with generous splashes of red along the median line. It is stockily built ,except when young, being much deeper in proportion to length than other trouts, and its mouth is noticeably small. He can be distinguished from our brook trout (fontinalis) by these features and by the prominent red sides, and the fact that his spots are black, while those of fontinalis are red.

We mention these differences because on some streams both rainbows and brooks will be taken, and possibly the brown trout as well—the latter can be told by his almost square tail and the fact that his scales can be plainly seen without the aid of a magnifying glass.

The rainbow trout varies in weight in different parts of the country, depending on the amount and variety of food available—they differ from most game fishes in that they prefer crustacea, worms, and larvae to minnows, and when they are present in quantities, Sir Rainbow will become aldermanic in size without losing his "pep." In the Ozarks, on the Au Sable, in Michigan, and in some streams of New York state, he is often taken up to five pounds, and an odd specimen is landed now and then that weighs ten or twelve pounds or more.

He is an active fish, likely to be found working all over the stream, although the idea that he does not prefer the well aerated and fast water is not quite founded on fact. He has one advantage over the brook trout—he can thrive in waters that have become slightly polluted through lumbering or manufacturing and in water that is too warm for the fontinalis. For this reason the McCloud river variety is much used for restocking streams from which the brook trout has "exited."

Some of these McCloud river fish were planted in the Au Sable river, in Michigan, in the '80s, and have done remarkably well—some say at the expense of the brook trout, but as the latter spawn in the fall and the rainbows in the spring, there has been no conflict for breeding quarters, and the Michigan fish commissioners are inclined to believe that the rainbow is not an enemy of fontinalis. The Au Sable, the Pere Marquette, the Boardman, and other Michigan streams now furnish some fine rainbow trout fishing.

As a game fish the rainbow trout is a major leaguer. He rises readily to flies (large specimens more readily than will large brooks or browns), and he fights like the very devil himself for life, liberty, and the pursuit of happiness, and is a leaper from Leaperville. We recently heard an angler who has fished the world over say that the rainbow fishing in Michigan is equal to salmon fishing at its best. William C. Harris, an authority, says:

"I have taken them (rainbows) in Michigan and found them superior to any other fish of similar size in any waters." As a table fish they do not quite equal the brook trout, but are "fine eatin' " nevertheless.

For tackle one wants a sturdy rod for rainbow trout. Say ,one of ten feet, and six ounces or more, where the fish run heavy, although the old hand can use a lighter tool. Leaders should be of the very best quality, and flies on hooks numbers six, eight, and ten are about right. As to patterns, most of the standard flies will do the trick, as the rainbow is not as discriminating in this respect as are some of the other trouts."

Fishermen in the vicinity of Santa Monica, Cal., are getting ready to wage a legal fight against the kelp cutters. A. R. Muller of the Long Wharf and fishermen of the village have collected quantities of the kelp bearing the mark of the cutting knife, the leaves of which are covered with spawn containing millions of eggs, which is evidence of the great destruction wrought by the kelp cutters and goes to show that myriads of fish never see the light owing to the operation of these boats.

REGISTERED TOURNEYS NUMBER 442.

Coast Clubs Schedule More Events With Shooting Sanctioned on Sundays.

E. Reed Shaner, secretary of the Interstate Association, announces that the complete list of registered tournaments number 442. It includes the five Interstate Association Handicap tournaments already announced and events by clubs in every section of the country.

The Pacific Coast, with registered events sanctioned on Sundays by the parent trapshooting body for the first time, will figure more prominently this season than in those of the past. A list of the events with the clubs and dates on the Pacific slope are announced in another column on this page under the heading of Trapshooting Fixtures.

Starting this month, the San Jose Club will stage an old policy tournament and on the same day, at Seattle, Wash., the Northwest Washington League will promote a tourney.

April will be given a good start with the Golden Gate Club putting on registered targets at the Alameda grounds on the 8th. Del Monte is going to get on the trapshooting map despite the fact that the new organization was unsuccessful in securing the California-Nevada State championship tournament. On April 20, 21 and 22 registered targets will be thrown and quite a gathering of scatter-gun artists will likely be attracted to the beautiful garden spot of California. The Northwest Wash. League puts on another tourney at Tacoma on April 22. Fresno will celebrate Raisin Day with a bang as usual, with the traps busy on April 28 and 29.

May will be the month when the outstanding features will be run off. Coalinga will start the targets a-flying on May 6th and the Oregon State tourney comes off on May 7th and 8th, at Salem. The Northwest Washington League will keep active with another registered tourney at Everett, Wash., on May 13th. Eureka gunners celebrate on the same day . Vernon follows on May 13, 14, and 15th, with Spokane taking a hand on May 14, 15 and 16th.

Jumping along to May 21, 22 and 23rd, the California-Nevada State tournament will be staged at Los Angeles. The Pacific Coast Handicap follows at San Jose on the 28, 29 and 30th, so that the boys will be kept right on the jump with interesting shoots in sight. The list of registered tournaments continues right on through to October.

Pacific Coast shooters can look forward with pleasure to the most prosperous and extensive season they have ever had.

Inland Empire Tourney—George Arland of Garfield is the real individual leader in The Spokesman-Review Inland Empire trapshooting tournament in which more than 250 members of 12 gun clubs are competing. In the first two matches he broke 49 out of 50 bluerocks, an average of 24.5 per match, for a percentage of 98.

Jim Hickman of the Palouse club, who participated in only one match, is the nominal leader, with 25 straight breaks.

The shooters are closely bunched, J. A. Ford of Palouse, Lee Matlock of Pomeroy, Johnson of Kellogg, Brown of Spokane and Harry Gayhart and Fred Steckman of Kalispell being tied with an average of 24 broken bluerocks a match, for a percentage of 96. Brown, who has taken part in only one match, is the only Spokane shooter who has broken 96 per cent.

Kalispell has more shooters among the first 14, or those who have a percentage of 94 or better, than any other club, four of the Montanans being in the charmed circle. Fred D. Stoop of the same club is not far behind, with 92 per cent.

The average of all the shooters who have broken 80 per cent or more of their targets are given below:

Individual Averages—J. Hickman, Palouse, 25, Geo. Arland, Garfield, 49, J. A. Ford, Palouse, 48, Lee Matlock, Pomeroy, 48, Johnson, Kellogg, 48; Brown, Spokane, 24; Harry Gayhart, Kalispell, 48; Fred Steckman, Kalispell, 48; B. M. Hayes, Spokane, 47; Nicholson, Kellogg, 47; L. E. Ovenden, Wenatchee, 47; R. J. Robbins, Kalispell, 47; R. Houston, Kalispell, 47; B. F. Gregory, Spokane, 47; Porter, Kellogg, 46; Hahn, Lewiston, 46; F. D. Stoop, Kalispell, 46; C. E. Owens, Wenatchee, 46; Fred Peden, Garfield, 46; Mrs. C. A. O'Connor, Spokane, 46; Tobe Arland, Garfield, 46; Godsey, Pomeroy, 23; Hibbs, Lewiston 23; R. A. Miles, Spokane, 23; Murray, Lewiston, 23; Sebastian, Kellogg, 23; Thorp, Pendleton, 23; McNurien, Pendleton, 45; T. B. Ware, Spokane, 45; G. B. Joslin, Palouse, 45; Johnson, Lewiston, 45; Flohr, Wallace, 45; D. Mars, Spokane, 44; G. K. March, Spokane, 44; Drumm, Lewiston, 44; Jones, Kellogg, 44; O. E. Lynch, Palouse, 44; G. C. Jewett, Palouse, 44; J. Spence, Pomeroy, 44; Walker, Wallace, 44; Ingersoll, Kellogg, 44; Kennett, Kellogg, 44; Kimmell, Kalispell, 44; H. F. Robbin, Kalispell, 44; Green, Lewiston, 22; Wann 22; H. Clodius 22; Roland, Kellogg, 22; Saunders, Pendleton 43; Billy Cochrane, Spokane 43; C. A. O'Connor, Spokane, 43; R. C. Hill, Lewiston, 43; Boomer, Wallace, 43; U. G. Pogue, Wenatchee, 43; Ingram, Pendleton 43; B. F. Mann, Spokane, 43; W. J. Hauser, Pomeroy, 43; C. M. Johnson, Wallace, 43; Hadley, Kellog, 43; L. Robinson, Pomeroy, 43; J. Adams, Wenatchee, 43; F. E. Butler, Lewiston 42; D. M. Dudley, Palouse, 42, N. M. Ragan, Palouse, 42; Thomas, Kellogg, 42; Taylor, Lewiston, 42; Werkheiser, Wallace, 42; R. E. McCornack 42; Keuger, Spokane, 21; H. J. Geesey, Spokane, 21; H. McElroy, Spokane, 21; Robbins, Spokane, 21; D. Coolidge, Palouse, 21; Artie Hoffman, Wenatchee, 21; Warden, Kellogg, 21; B. Lemon, Kellogg, 21; Bunch, Kellogg, 21; E. Gochnour, Sunnyside, 41; G. Gochnour, Sunnyside, 41; C. Van Horn, Sunnyside, 41; C. France, Wenatchee, 41; Beckman, Lewiston, 41; A. Hoffman, Garfield, 41; Easton, Kellogg, 41; J. Schriver, Spokane, 41; M. L. Seymour, Potlatch, 40; Al Wieseman, Spokane, 40; F. Robinson, Pomeroy, 40; E. C. Johnson Jr., Garfield, 40; Jennings, Wallace, 40; Stillman, Pendleton, 40; E. Turner, Sunnyside, 40; Gilmore, Wallace 40; Larson, Lewiston, 40; Coults, Pendleton, 40; W. McDougall, Kellogg, 40; L. Verat, Kalispell, 20; D. P. Farthing, Garfield, 20; R. S. Pratt, Sunnyside, 20; McConkey, Wallace, 20; M. O. Lynch, Palouse, 20; Teape, Kellogg, 20.

Everding Donates Trophy—H. R. Everding, secretary of the Portland Gun Club and one of the most enthusiastic and popular trap devotees on the Pacific Coast, has presented the Golden Gate Club with a trophy to be shot for. Everding has done much to stimulate interest among the clubs throughout the Northwest and is branching out to create good feeling among the California sportsmen. Mr. Everding's letter to C. A. Haight, secretary of the Golden Gate Club, follows:—

"My dear Mr. Haight:

"Have had a sympathetic feeling towards you since Mr. Doremus and yours truly averaged better than Mr. Haight at the last Pacific Coast Handicap. I was just informed through Mr. H. E. Poston that you were the secretary of the San Francisco club and I took the liberty of having a trophy sent to you. The prize is to be shot for at your club any way the club may elect—handica pbasis. Hoping I did not over-step the bounds of friendship by donating this trophy, I am Yours very truly,

(Signed) "H. R. EVERDING."

"The Portland Gun Club (with its now two thousand dollars' improvements) will hold two big registered shoots this season. All the California boys are invited any old time."

Los Angeles Club.—J. F. Dodds and F. H. Mellus, shooting from the 19-yard line, smashed 97x100 targets at the Los Angeles Gun Club on Sunday, and by doing so tied for high gun on the John C. Cline diamond watch charm. Owen Council was also in very rare form and blasted 95x100 in stellar style. H. E. Sargent was fourth with 94x100 breaks. Following are the scores:

J. F. Dodds, handicap 19 yds., broke 97x100; F. H. Mellus 19—97; O. Council 18—95, Ed Mitchell 18—95, H. E. Sargent 18—94, J. C. Famechon 16—94, L. J. Micka 20—93, George Oliver 16—93, H. C. Cline 18—93, L. J. Petit 16—92, W. A. Cornelius 19—92, C. A. Haight 16—92, Geo. H. Melford 16—92, H. Pfirrmann 20—91, L. M. Packard 20—91, J. W. Meek 16—90, Guy E. Holohan 19—90, Wm. Kennedy 16—90, J. H. Bishop 16—89, Mrs. Pfirrmann 16—88, S. C. Miller 16—88, Seth Hart 16—88, V. A. Rossbach 16—86, E. K. Mohler 20—86, F. H. Mellon 20—86, C. W. Fish 20—86, L. Garnsy 16—85, N. W. Nelson 16—84, B. H. Carnahan 16—84, O. A. Evans 19—80, H. Hoyt 18—80, A. W. Childs 16—79, J. R. Mead 16—78, H. J. Bauer 16—71, T. McClellan 16—68, A. J. Petersen 16—45, H. F. Keenan 16—20. At 16 yards—R. Hartmann 58x75, F. Hartmann 54x75, A. Hartmann 47x75, C. Bourneque 46x75, F. H. Teeple 45x50, J. Funk 42x50, M. D. Towne 37x50, E. W. Selbach 37x50, Mrs. F. H. Mellon 36x50, O. D. Ashton 33x50, C. J. Hurst 22x25, W. S. Sawyer 22x25, A. Taylor 20x25, R. Chinoweth 17x25, W. Koerner 16x25, F. A. Carse 15x25, J. A. Raymond 14x25, Ben R. Meyer 6x25, W. S. Childs 5x 25.

Practice work for the contests to be held this season by the Seattle Fly and Bait Casting Club is on in earnest, and every few days a bunch of both the bait and fly men out at the Beacon Hill pool endeavor to raise their casting score. At a recent practice contest a bunch of old-timers ,composed of A. L. Llaumont, George Shaefer, R. E. Lyttaker, E. G. Smart and J. W. Monnette ,showed up in good form. A large squad of novices displayed some promising talent. The practice pool will be open for use every Sunday. D. W. R.

Seattle, Wash.

✤ ✤ ✤

Feeding birds in winter is a delightful and inexpensive recreation as well as an excellent investment. The birds will repay you by destroying hundreds of thousands of insects.

✤ ✤ ✤

The legislatures of 42 States, Alaska, Porto Rico and Hawaii ,are in session this winter and you look for many changes in the game laws.

✤ ✤ ✤

The number of deer in Maine last fall was greater than at any time since deer were found on the borders of the State, 40 years ago.

✤ ✤ ✤

If the bob cats do not wipe them out there will be a great plenty of moose in Maine when the closed season expires in 1919. To protect moose as well as deer the State has placed a bounty on bob cats.

✤ ✤ ✤

Quail has been placed on the song bird list by the Ohio legislature. Some years ago Ohio lawmakers placed doves on the list of musical birds.

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

March 18—Salt Lake City, Utah—Salt Lake Gun Club. "Old Policy." A. R. Bain, Secretary.

March 25—Denver, Colo.—Lakewood Country Club. "Old Policy." J. B. Milton, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24 — Bellingham, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

Seattle Association.—Only one squad of shooters appeared on the firing line on March 4th, most of the shooters visiting other clubs in opening the season and other events. Matt Grossman stood high man in both the fifty and the hundred-target events.

The members of the Seattle Trapshooters' Association are now shooting for the possession of the Hercules trophy, the winner being high man in a total of three hundred targets, shot in six events of fifty each. The added bird system prevails in the shooting for this prize.

The club started the shooting by members for class prizes in the form of four sterling silver spoons to be given to the high men in the four classes. The scores:

At 50 targets—Matt Grossman 49, J. H. Hopkins 46, Fred Landwehr 44, Hugh Fleming 44, Jack Lewis 38. At 100 targets—Matt Grossman 97, Fred Landwehr 88, Hugh Fleming 88, J. H. Hopkins 82, Jack Lewis 67.

Hundreds of salmon are now passing through the Salinas river on their way to the headwaters to spawn. Many of the streams through which the salmon must pass are very shallow, forcing the fish to remain in the pools. Residents of Salinas and other places are feasting on salmon and salmon eggs.

Salinas, Cal. RED SPINNER.

Sportsmen's Row

The save the lives of the deer seen on the railroad tracks at night the Southern Pacific Company has issued orders to its engineers to extinguish momentarily the headlights of the locomotives. The glare of the headlights confuse the deer, who migrate by way of the tracks. It was discovered that if the light is extinguished, if only for a second, the deer will jump to safety.

✣ ✣ ✣

New York has inaugurated a continuous game census. The game wardens—who, by the way, are uniformed—are supposed to observe conditions and report weekly.

✣ ✣ ✣

A resolution has been passed by the B. P. O. E. discouraging the use of elk teeth as emblems. The idea back of the resolution is to discourage tusk hunters . Thousands of elk have been killed yearly and their carcasses left to rot because of the tusk hunters.

INTERSTATE ASSOCIATION IS PROGRESSIVE.

Has Developed Trapshooting from Obscurity to a Place in the Front Rank of Sports.

One of the most progressive organizations we have in the world of sport is the Interstate Association for the Encouragement of Trapshooting.

This organization always has its ear to the ground, in the hope of learning something that will improve and give even greater popularity to the sport than it now enjoys. It is an association that is willing to listen to the views of all who think they have something to offer of benefit to the sport.

During the past few years the Interstate Association has done many things to elevate trapshooting and place it on the high pedestal it is now on. Among these things are the classification of States for championship purposes, the award of trophies to newly-organized gun clubs and for inter-city and team competition; the accepting of entries of women in trapshooting tournaments, especially the Grand American; the excellent planning of the handicaps; the broadening of the trophy principle, and the generous policy to all clubs.

These trophies awarded to newly-formed gun clubs are shot for by the members. The trophies for team competition are afterwards shot for by the members of the winning team, so that double use is made of nearly all the trophies. It is this generous method of dealing with organizations that has made the Interstate Association so well thought of in shooting circles, and yet the Interstate Association is willing to turn over the reins of management to the shooters themselves any time the shooters care to form a national body to handle the sport. This isn't likely to occur, as the shooters are very well pleased with the way the Association does things.

The American Amateur Trapshooters' Association has done a wealth of good, too, for trapshooting in keeping alive interest in individuals and clubs. The A. A. T. A. and Interstate Associations do not conflict in any way—they both work with the same object in view, the betterment of trapshooting. Thus we have the reason why 50,000 new devotees are being made to trapshooting yearly and why 11,000 men and women, boys and girls, participated in the "beginners' day" events last June.

State associations have been divided in four classes by the Interstate Association—A, B, C and D. To the approved tournaments in Class A states the Interstate Association gives $250; to Class B, $225; to Class C, $200, and to Class D, $175.

The states are classed in this manner:

A—California-Nevada, Illinois, Iowa, Missouri, New York, Ohio and Pennsylvania.

B—Connecticut, Indiana, Kansas, Nebraska, Virginia and Wisconsin.

C—Kentucky, Maryland-District of Columbia, Massachusetts, Michigan, Minnesota, New Jersey, Oregon, Oklahoma and Texas.

D—Alabama, Arizona, Arkansas, Colorado-New Mexico, Delaware, Florida, Georgia, Idaho, Louisiana, Maine, Mississippi, Montana, New Hampshire, North Carolina, North Dakota, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Washington, West Virginia and Wyoming.

Salt Lake Club.—W. P. Fowler proved victorious in the first of a series of handicap shoots which are being held at the Salt Lake traps. Although Mr. Fowler had not had a shotgun in his hands for four years, he put to good advantage the accuracy he had once learned in the art of trapshooting and led a string of thirty shooters to the last. In order for a shooter to obtain this cup as permanent property he must win it three times. For this reason there promises to be keen competition in this event in the following shoots, as every contestant is determined that he will be the winner.

The shoot for the club challenge trophy was also a very interesting event on the program for March 4th. H. Heagren, C. H. Reilley Jr., and Bill Gallagher tied in the race with scores of 24 out of 25.

A series of shoots has been arranged for all beginners. The first of the series brought the honors to J. W. Spry. Spry is a promising shooter and, although he has had very little experience along this line of sport, it is the opinion of all the veterans that he will develop into an excellent shot.

Besides winning a leg on the loving cup, Fowler was made a present of a beautiful gold knife. Spry of the beginners' squad was also given a knife. All who are interested in trapshooting are invited to attend the traps at the scheduled Sunday shoots. Following are the scores:

	Broke.	Hdcp.	Total
*Cummings	46	5	50
Fowler	46	5	50
Gallagher	46	3	49
Bain	44	5	49
H. Heagren	43	5	48
Shepherd	42	6	48
Williams	42	6	48

Beginners—Spry 20, Anderson 17, Barrett 16, R. Heagren 15, Barney 15, Bailey 10, Faires 9, Culbert 7, C. Mitchell 3, Brown 2, out of 25 targets.

Portland Club.—A. L. (Tip) Zachrisson retained the W. C. Bristol 20-gauge gun trophy in the shoot at the Everding Park traps of the Portland Gun Club on March 4th, after defeating A. W. Strowger, H. R. Everding and J. W. Seavey in a shoot-off. Fourteen shooters participated in the shoot and despite the high wind, four of them registered scores of 20. Dr. O. D. Thornton, who did not shoot in the trophy event, broke 23 out of 25.

In the regular event, J. W. Seavey registered the score of 98 out of 100. Jim Bull, professional, broke 140 out of 150, and Hugh Poston smashed 93 out of 100.

Vice-President Harry Pollock lost his "goat" in a special event. In this competiiton the shooters challenge each other to a 25 bird race, the winners getting the others' goats. The losers in order to win back their goats must buy shells for the holders of their goats ,and then shoot another 25 bird race.

The scores in the Bristol cup race: A. L. Zachrisson 20, H. R. Everding 20, A. W. Strowger 20, J. W. Savey 20, *J. P. Bull 18, *H. E. Poston 17, C. L. Diven 17, H. A. Pollock 17, A. Woelm 15, R. P. Knight 12, S. E. Bird 13, C. B. Cadwell 10, F. C. Atwell 10, B. E. Boone 10.

Green Lake Club.—Despite a drizzling rain, which continued through the entire shoot, thirty-three trap enthusiasts went out to the Green Lake Gun Club on March 4th for their weekly shoot. Some remarkable scores were hung up.

L. S. Barnes maintained his lead in the club averages, smashing forty-nine out of his string of fifty. He had made a straight run of forty-seven, and it began to look as though he would make a "straight," but his forty-eighth target caught a puff of wind, with the consequence that a miss had to be recorded. Close upon his heels came R. S. Searle, Dr. King and Fred Call with fine scores of forty-eight. With both the Green Lake Club and the Seattle Trapshooters' Association keeping a record of the averages made in the regular 50-target programs, an interesting fight is looked for to see who will gain the coveted honor of landing at the top for the season's grand average.

The club was honored with several new sportsmen, among those shooting for the first time with the Green Lake Club being C. B. Blethen, Dr. T. Mesdag, F. L. Wilkins, J. P. Houston, W. T. Curtis, O. H. Carver, William Burrell and H. H. Johnson. In a ten new members were taken into the club. An one, whether a member or not, is always welcome the weekly contests.

In the 100-bird race R. S. Searle led the field breaking forty-nine in his last fifty, which, together with his forty-eight in the first string, gave him total of ninety-seven. Hi Follrich, who had trouble with his first fifty, wound up his second string with forty-nine to his credit. The scores:

L. S. Barnes 49, R. S. Searle 48, Dr. King 48, Fred Call 48, Dr. J. F. Hill 46, H. S. Gibson 44, W. C. Brown 44, Hi Follrich 43, D. R. Baker 43, C. W. Band 43, J. W. Geltz 43, Dr. R. V. Mills 43, G. A. Conkli 42, C. R. McConnell 42, S. A. Martin 41, George E. Baker 41, W. H. Carsten 39, Dr. S. W. Case 37, H. E. Gleason 37, F. F. Gearheard 37, Dr. S. W. Giffin 3 William Burrell 34, Dr. T. Mesdag 34, O. H. Carve 30, C. F. Rinehart 27, Dr. C. E. Lanter 27, C. E. Blethen 25, F. L. Wilkins 24, H. H. Johnson 19, J. E. Houston 25, W. T. Curtis 23. Dr. Mesdag and H. E. Johnson shot 20-gauge.

Vernon Club.—Mrs. C. E. Groat, champion amateur woman trapshooter of the United States, achieved high gun in the regular Sunday competition held at the Vernon Gun Club on March 11th. Out of 10 targets shot at she broke 97. In the 60-bird handicap for the season class cups, she squelched 57. Bill Dougherty and Stan Bruner tied for second high in the handicap, each with 56x60 scores. Bob Bole was third high with 55x60. The results:

Handicap event—C. W. Clement 54, Keeney 47 W. Pugh 49, W. Dougherty 56, Van Nest 49, Grewell 52, S. Bruner 56, C. E. Groat 50, Mrs. Groat 57, Bole 55, Reed 46.

Practice—Clement 42x45, Keeney 22x25, Pugh 38x 40, Dougherty 33x40, Van Nest 18x20, Grewell 39x40 Bruner 20x20, C. E. Groat 16x20, Mrs. Groat 40x40 Bole 20x20, Reed 37x40, Front 82x85, Bohring 21x25 Dierdoff 48x60, Foley 28x50, Knauf 19x20, Weekhoas 16x20, Gepfort 14x20, Kimble 22x25, Hedderly 28x40

Tacoma Club—Despite the fact that every shooter who faced the Tacoma Gun club's traps at Manitou on March 4th, also bucked against a driving rain and the most unfavorable weather conditions, the organization's first regular shoot of the 1917 season came off according to schedule with 26 shooters competing. The scores turned in were very good, considering the elements the sportsmen faced. More than 2,000 targets were trapped.

Several Seattle sportsmen and a number of professionals accepted the invitation of the local club and a number of the visitors were fortunate enough to carry off high scores.

The Majestic Cafe trophy, which will be the prize until some member wins it for the fifth time, was the object of attention and brought out some keen but friendly rivalry.

A. Z. Smith, shooting the Dupont handicap system, succeeded in winning the trophy Sunday. This is his second win. Smith also succeeded in capturing the sterling silver spoon for the long run, as he registered 27 breaks without a miss.

Tom Wilkes of Seattle was high amateur on the 50 targets with a score of 45. D. Reid of Seattle, Val Eisenbeis and Carl Coon of Tacoma tied for second with 43. Of the professionals Frank Riehl of Tacoma was high on the 50 with 49; George Garrison of Seattle, second, with 48, being tied for this position with Les Reid. In the 100-bird race Reid, the Seattle pro., took the lead with 92 breaks, Riehl second with 91. The scores:

Stock Breeders' Page

Frank Brandt and Mike Kavanagh ,of Gonzales, have received several loads of Nevada and Oregon cattle which they will fatten on the ranch near Salinas.

✤ ✤ ✤

The board of supervisors of Merced have voted unanimously to appropriate $2000 for a county farm adviser, upon petition from the 424 members of the that purpose.

✤ ✤ ✤

Ranchers of the Imperial Valley are urged to plant more alfalfa another year, as the demand, especially from cattle men of Arizona and New Mexico, has sent prices sky-high.

✤ ✤ ✤

S. Fitzpatrick, a well known rancher living near Modesto, has received $1,000 a load for his bean crop. Fitzpatrick had less than 15 acres and received about $1700 from the crop.

✤ ✤ ✤

In view of the present prices for live stock, a market report from the National Stock Yards, under date of January 23, 1889, is interesting. The top price on cattle was $3.50 for 37 native steers averaging 1,143 pounds. Ten native cows sold at $2 per cwt. Bulk of hogs went at $4.75, and sheep at 03 to $4.50 per cwt.

✤ ✤ ✤

The Napa County Livestock Association held its regular monthly meeting at the William Tell Hotel, St. Helena, Saturday noon, March 3, President W. L. Mitchell presiding . Mr. F. M. Johnson, secretary, being absent, Homer Hewins was appointed by the chair to act as temporary secretary. After the reading of the minutes Mr. E. C. Voorhies of the University Farm at Davis gave a lecture on dairying in California and in Napa county in particular.

✤ ✤ ✤

S. M. Diamond, one of the leading rancher-stockmen of Colorado, who owns a good herd of pure-bred Shorthorn cattle and good saddle horses, in renewing for the Breeder and Sportsman says they have had a hard winter in his section of Colorado and that live stock has fared badly.

✤ ✤ ✤

Haden Smith, a Yolo farmer who makes a specialty of Duroc-Jersey hogs, cannot meet all the demands of purchasers inquiring for that particular breed. After an exhibition he made at the fair he disposed, within a period of three months, of all his stock except those he wanted to retain for breeding purposes. —Woodland Democrat.

✤ ✤ ✤

Missouri breeders sold more than one million dollars' worth of registered live stock at public auction in 1916. Incomplete figures compiled by W. L. Nelson of the Board of Agriculture show that 1,838 cattle of the beef breeds sold for $865,626, an average of $471 per head. Included in these sales were 1,016 Herefords averaging $479.36, and 147 Angus averaging $496.90. ..75 Shorthorns averaged $253.06.

✤ ✤ ✤

The third annual spring livestock exposition at Chico, to be conducted in May, will receive one of the silver trophies offered by the American Shorthorn Breeders' Association, to be given as one of the prizes for that breed. Several live stock associations are recognizing this exposition in this manner, most of the prizes and appropriations having come through the efforts of W. S. Guilford, of Butte City, who is one of the most prominent live stock men in California.

✤ ✤ ✤

Following the experiment of R. L. Thompson, one of the largest hog raisers in the Oakdale section, San Joaquin county raisers are making an exhaustive investigation of feeding rice to hogs, which thus far meets with their approval. Thompson has been feeding steam rolled rice, a very low priced feed, to his hogs. Thompson's experiment has demonstrated that he was able to fatten and finish a car of hogs at the rate of three pounds per hog ,per day, and the finished product was in every way better and more firm than the corn-fed eastern hog. San Joaquin county hog raisers are now experimenting with rice feed. The experiments which have been carried on at University Farm, Davis, too, have proven very successful.

✤ ✤ ✤

Orland (Glenn Co.).—Following a conference between Secretary Kirk and the directors of the State Agricultural Association, the dates of the Glenn County Agricultural Fair are fixed for September 26, 27, 28 and 29, assuring no competition from other fairs in North California. The following committees have been named by President Flaherty:

Finance—W. E. Scearce, C. E. Kracaw and Ross Brownell.

Livestock, Dairy and Poultry—Chris Myhre, Chas. Leonard of Glenn, and W. G. Gurnett.

Agriculture and General Exhibits — George Nygaard, W. S. Guilford and Harry Kingwell.

Grounds and Housing—E. A. Kirk, S. W. Baugher and S. F. Williams.

Concessions, Music and Publicity—J. J. Flaherty, Dr. Walker and W. E. Whitsett.

Gilroy.—Stockmen from the large stock ranches in the hills about Bell Station and in fact all about this section of the country, have been interviewed since the recent rains, by telephone and in person, and report that the recent cold weather retarded the rapid growth of grass. Now ,however, the warmer weather and the recent heavy rains are forcing it into a more rapid growth already and a luxuriant color is apparent all through this end of the county. Orchardists have reason also to rejoice at the abundant downpour of water, and while many are anxious to plant trees they realize that there is plenty of time for that yet remaining. Dairymen are also looking forward to a bright future in their line of business.

—o—

Bonus For Dairymen.

The Gonzales Tribune has the following to say in regard to a bonus which will be paid to the dairymen by the Alpine Evaporated Cream Company:

"In accordance with their system of co-operation profits inaugurated some time ago with regard to factory employes ,the Alpine Evaporated Cream Co. has decided to give a bonus to dairymen who regularly bring milk to the factory during the year 1917.

According to J. P. Myenberg, vice-president of the company, letters have been written to the dairymen explaining the new system. They will be mailed immediately, and no doubt the dairymen will welcome the good news.

For the month of January the company has credited the account of each dairyman with a bonus of 8 cents per hundredweight on 4 per cent milk brought regularly to the factory . This amount is payable January 1, 1918 ,on condition only that the dairymen continue to deliver milk to the local concern during the year 1917.

A bonus, the letter states, will be allowed from time to time, as general trade conditions warrant, and in accordance with the company's policy of co-operative profits . The allowance of a bonus is not necessarily monthly, and when allowed, may be more or may be less than the amount credited on the January account.

The Alpine company hopes by this experiment to create an incentive to the dairymen to produce more and better milk, and to establish confidence on the part of the dairymen that the company has a desire to make dairying more interesting and profitable, which will result beneficially to both parties concerned, as well as to the town in general."

—o—

A big hay shortage is being felt in California to such an extent that it is very doubtful if the present supply will hold out until the new crops come on. The shortage is reported to be state-wide, and is particularly on alfalfa, although grain hay is also scarce, it is said. The limited supply is attributed to the fact that more hay has been consumed this year than usual and because of the unusually cold winter, which has retarded and rendered the supply of grass short. A second cause is that northern farmers shipped thousands of tons to Los Angeles and southern points early in the season, when the supply was apparently plentiful, which is more than has been shipped away in previous years. Local hay dealers say that the crop this year has been an average one, but under the present conditions the supply will soon be exhausted. The new alfalfa crop will not come on until about April 15, and grain hay in May.

Hay has been advancing in price steadily for the past few weeks until alfalfa is now selling around $20 and $25, and grain around $21 and $25, which is the highest price in years. Imperial Valley, which has in previous years always shipped out great quantities, is at this time totally out and calling for more at most any price. It is $25 a ton there now. It is stated that Imperial Valley, which has probably the biggest source in the State for this crop, has had a great deal of its hay fields dug up the last year, and cotton, which has proven a success and brings greater returns, planted in its stead.

POLAND CHINA BREEDERS FORM PROSPERITY ORGANIZATION.

[By R. H. Whitten.]

There was no speed limit observed at the meeting of Poland-China breeders at Hanford, March 6th, called for the purpose of forming a state association. Enthusiasm was at high pitch; everyone made a live wire of himself, and the ordinary work of many months was accomplished in a few hours.

The meeting followed a banquet given by the Kings County Poland-China Breeders' Association, preliminary to their sale on the following day, and was attended by several hundred breeders from all parts of the state.

For a long time the Poland-China breeders have felt the need of a state association. They have one of the best hogs on earth—a hog particularly adapted to California conditions—but nowadays merit alone is not enough. It must be coupled with publicity in order to put anything to the front, and, lacking organization, the Poland-China breeders have been unable to give their hog the place he rightly deserves in the California live stock field.

So they got together, talked about the advantages of organization, co-operation and publicity, and proceeded to form the California Poland-China Breeders' Association. A constitution and by-laws were adopted ,and the following officers were elected: President, Wm. Bernstein, Hanford; vice-president, O. L. Linn, Modesto; secretary-treasurer, R. H. Whitten, Los Angeles; directors, the foregoing officers together with M. Bassett, Hanford, Hale I. Marsh, Modesto, C. R. Hanna, Riverside, and Nate Hauck, Alton.

The officers are not going to be satisfied to follow in the footsteps of other breed organizations. They will strike out along new and original lines, and do things differently. They propose to put California on the map as the leading Poland-China state in the Union, and to make their association so strong and helpful, so powerful and influential, that people will select Poland-Chinas in preference to hogs of other breeds for the sake of getting into the organization and sharing in the many benefits that the members will receive.

Among other things, they propose to encourage the Banker-Farmer and the Pig Club movements; to give the Poland-China hog publicity in our magazines and newspapers, and at conventions and gatherings; to hold consignment sales in different parts of the state; to encourage live stock exhibitions and interest breeders in showing; and last, but not least, to make every membership worth as many times the dues by taking a deep, personal interest in the member and giving him information, advice or assistance along any desired line—such hearty co-operation and support as to practically guarantee his success.

Everyone in California who raises Poland-Chinas is urged to join the association at once. The dues are only $1 per year, and remittances should be made to R. H. Whitten, 610 Security Bldg., Los Angeles.

The next meeting of the association will be held at the University Farm, Davis, during Farmer's Week in May, the exact date to be announced later.

A consignment sale will be held at the State Fair in September, to which the breeders will consign some of their best animals and show the people who attend what real Poland-Chinas are. It will be the greatest sale of its kind ever held, and breeders who contemplate consigning animals should communicate with the Secretary at once, as it may be necessary to limit the number from each breeder.

From the way the sparks are already flying it is evident that a membership in this association and Prosperity will go hand-in-hand.

—o—

GOVERNMENT CROP REPORT.

A summary of the March crop report for the State of California and for the United States, as compiled by the Bureau of Crop Estimates (and transmitted through the Weather Bureau), U. S. Department of Agriculture, is as follows:

Wheat on Farms.

State: Estimated stocks on farms March 1 this year 336,000 bushels, compared with 704,000 a year ago and 408,000 two years ago. Price on March 1 to producers, $1.50 per bushel, compared with $1.00 a year ago and $1.31 two years ago.

United States: Estimated stocks on farms March 1 this year 101,000,000 bushels, compared with 244,448,000 bushels a year ago and 152,903,000 two years ago. Price on March 1 to producers, $1.64 per bushel, compared with $1.03 a year ago and $1.34 two years ago.

Corn on Farms.

State: Estimated stocks on farms March 1 this year 164,000 bushels, compared with 341,000 a year ago and 302,000 two years ago. Price March 1 to producers, 150 cents per bushel, compared with 87 cents a year ago and 109 cents two years ago.

United States: Estimated stocks on farms March 1 this year 789,000,000 bushels, compared with 1,116,559,000 a year ago and 910,894,000 two years ago. Price March 1 to producers, 101.0 cents per bushel, compared with 68.2 cents a year ago and 75.1 two years ago.

Corn of Merchantable Quality.

State: The percentage of the 1916 crop which was of merchantable quality is estimated at 80 per cent, compared with 88 per cent of the 1915 crop and 90 per cent of the 1914 crop.

United States: The percentage of the 1916 croy which was of merchantable quality is estimated at 84.0 per cent, compared with 71.1 per cent of the 1915 crop and 84.5 per cent of the 1914 crop.

Oats on Farms.

State: Estimated stocks on farms March 1 this year 325,000 bushels, compared with 975,000 a year ago and 924,000 two years ago. Price March 1 to producers, 77 cents per bushel, compared with 53 cents a year ago and 51 cents two years ago.

United States: Estimated stocks on farms March 1 this year 394,000,000 bushels, compared with 598,148,000 a year ago and 379,369,000 two years ago. Price March 1 to producers, 56.9 cents per bushel, compared with 42.7 cents a year ago and 52.1 cents two years ago.

Barley on Farms.

State: Estimated stocks on farms March 1 this year 3,000,000 bushels, compared with 5,127,000 a year ago and 5,468,000 two years ago. Price March 1 to producers, 113 cents per bushel, compared with 71 cents a year ago and 76 cents two years ago.

United States: Estimated stocks on farms March 1 this year 32,800,000 bushels, compared with 58,301,000 a year ago and 42,889,000 two years ago. Price March 1 to producers, 96.9 cents per bushel, compared with 59.6 cents a year ago and 67.7 cents two years ago.

REDUCINE

THE HUMANE TREATMENT FOR

Lame, Sore, Wounded and Blemished Horses, Etc.

A REDUCINE PACKAGE
(Reduced Size)

This cut shows (reduced in size) a Reducine package.

The label is of heavy manilla paper and the printing on the label is in green ink.

Don't let your druggist or horse goods dealer sell you something which he says is "just the same as Reducine" or "just as good as Reducine." There is nothing that is "just the same" or "just as good" as Reducine.

Reducine is entirely different in every ingredient from any other preparation used for horses—its method of application is different—its effects are different and its results are different.

If your druggist or dealer does not have Reducine in stock, he can get it for you at once from his wholesaler.

If he will not get it for you, send direct to us.

Mr. W. E. Bell and his stallion Adbell Axworthy, by Axworthy 2:15½; dam Bell Winnie 2:22½, dam of the unbeaten Belwyn 2:06¾.

Onancock, Va., March 6, 1916.

BELL HARNESS CO.

The Reducine Co.

Gentlemen: If you remember some time ago we wrote you about a friend of ours, Mr. H. O. Finney, that had rheumatic gout and went on crutches just as the picture shown in your booklet. We begged and prevailed on him to use Reducine. We even offered to give him a box if he would use it and it did him no good, it would not cost him one cent. He asked his doctor about it and after a while he consented to use it. We put it on him ourselves. It worked slow, but after a while he put his crutches aside and used two canes ,and a little later on used only one cane, and today ,to our surprise, he was walking around town with no cane. He is a pretty fair jig dancer and today he could get out on our floor and dance a jig.

Before using this treatment, he could not sleep one-half of the night, and now his wife has trouble to get him up. We must say it is the greatest improvement we ever saw.

We find Reducine a great remedy. All you have to do is to give it time and it will do the work. We are selling quite a lot of it down in North Carolina.

With kindest regards, we are

THE BELL HARNESS CO.
Per W. E. BELL.

IF YOU OWN A HORSE OR KEEP HOUSE OUR NEW 164 PAGE BOOKLET WILL BE VALUABLE. WE SEND IT POSTPAID—FREE TO ALL WHO SEND NAME AND ADDRESS

Onancock, Va., March 21, 1916.

The Reducine Co.

Gentlemen: I have seen Reducine used on a number of cases and some remarkable cures on horses. The case I am about to write you is not a horse, but myself. I have been suffering with something like rheumatism for some time. It got so painful that it was almost unbearable. I limped around on two canes, and from that I had to go on crutches, reminding myself of the picture shown in your booklet. My knee had enlarged to twice its natural size, and I could not rest with it night or day.

Mr. W. E. Bell, of Bell Harness Co., had been trying to persuade me to use Reducine. I had tried everything else that I could think of, or that my friends would name to me, with no results. (I believe my case puzzled the doctors.) On December 3, 1915, I fully made up my mind to give Reducine a trial. I limped down to the store of the Bell Harness Co. and told them I was ready to give it a trial. I have used not quite a box of your valuable remedy and am proud to say that I do not have to use either cane or crutches. I sleep well and am gaining in flesh every day. Mr. Bell was that anxious for me to use Reducine that he told me to take it home and use it, and if it did no good, it would not cost me one penny. I was more than glad to walk down this morning and pay for it, and will say to all, if you have a stubborn case, either man or beast, try Reducine.

Yours truly, H. O. FINNEY.

For sale by your Horse Goods Dealers or direct from us. Cash with order in all cases. Please send Draft, Express Order or P. O. Order **PRICE $5.00 PER CAN—DELIVERED**

THE REDUCINE COMPANY, :: Otsego, Mich.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29½ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 27625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

Cal. State Thoroughbred License No. 2018.

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

ENDORSED BY THE LEADING HORSEMEN OF THE UNITED STATES

Red Ball Stock Food Co., OAKLAND CAL.

SELECTION---

Thousands own saddle horses today, but only a few enjoy the distinction o having a champion, by a son of champions; still fewer have ever bred champion.

MARSHALL CHIEF 2765

offered to the service of the public, makes it possible for any one owning registered mare of any class to breed a champion of his own.

SEASON $25 CASH

No other horse surpasses him in breeding, beauty, and perfect performance— Ask Jump Cauthorn about him, he knows.

Make arrangements for his service with

HANS BERG, 159 Warren Ave., Milwaukee, Wis., or E. N. HAMILTON, Manager Mexico, Mo.

GOOD BLUE GRASS, SPRING WATER — MARES FROM DISTANCE MET AT TRAINS

THE FINALITY OF

ASTRAL KING

In all branches of human endeavor, in industry, in Art and in Stock Growing and Farming, there are certain names which convey the idea of finality, out shining all others, as the North Star outshines subsidiary planets.

ASTRAL KING is that name in Saddle Horse Affairs.

And when you mate your mare to him or buy a colt by him, you have the satisfaction of knowing you have purchased the finest horse the breed affords.

JAS. HOUCHIN, Owner, Jefferson City, Mo.

Number 4 in a Series of Six Talks about the Evolution of Firearms and Ammunition

Gunpowder and the Percussion System

THE Chinese are credited by many authorities with the discovery of gunpowder, centuries before the Christian era. A European monk, Roger Bacon, in the thirteenth century discovered gunpowder in so far as Europe was concerned. Berthold Schwartz, another monk, followed in Bacon's footsteps with valuable experiments.

Bacon's discovery grew out of chemical research to find an inflammable substance that would blaze brightly and yet be difficult to extinguish. It was the practice in those days to throw fire by machines on enemy ships and buildings. Thus, fighting with fire begat gunpowder.

Various methods of igniting gunpowder in crude types of guns were devised. The first guns were really nothing but tubes. Forsythe, a Scotch clergyman, invented the percussion system—the explosion of the primer to make the powder go off—while Houiller, a French gunsmith, orginated the idea of putting powder, ball and percussion primer into a metal gas-tight case, so he invented the *cartridge*.

Your Remington UMC ammunition, known literally the world over for dependability and fine workmanship, owes its origin to these men of different eras, whose ingenuity and tireless patience gave these marvelous discoveries to humanity.

Pacific Breeders Futurity Stakes No. 17.---$2,500

GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION FOR FOALS OF 1917 TO TROT OR PACE AT THREE YEARS OLD

$1,500 for Three-year-old Trotters $1,000 for Three-year-old Pacers.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916, when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

SUBSTITUTIONS.

If a mare proves barren or slips or has a deal foal or twins, or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President.

$500.00 to 1st Heat	$350.00 to 1st Heat
$500.00 to 2nd Heat	$350.00 to 2nd Heat
$500.00 to 3rd Heat	$350.00 to 3rd Heat
$300.00 to Horse Standing Highest in Summary.	$150.00 to Horse Standing Highest in Summary.

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on April 1, 1917, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1917; $5.00 December 1, 1917; $5.00 on yearlings April 1, 1918; $10.00 on two-year-olds April 1, 1919; $10.00 on three-year-olds April 1, 1920.

STARTING PAYMENTS—$25.00 to start in pacing division; $55.00 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all others horses to go to the barn.

Trotting division heat purses $500.00. Total purse $1,800.00.

Pacing division heat purses $350.00. Total purse, $1,200.00.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $150.00 in pacing and $300.00 in trotting divisions goes to the horse standing highest in the summary; distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1917, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there shall be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Rights reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

JOHN M. PERRY, President. CHAS. W. PAINE, Secretary.

Peter McKlyo 58009- RECORD 2:06

Cal. License Pure Bred No. 105
Sired by

PETER THE GREAT 2:07¼ (sire of 50 in 2:10 list, including Miss Harris 2:01¼, Peter Volo (4) 2:02, Peter Stevens 2:01½, Peter Mac 2:03, Mabel Trask 2:03¼, etc.), dam KLYO by Jay McGregor.

He is from one of the greatest families on his dam's side in the books, as the performances of Susie J. 2:06½ and Trampfast 2:12¼ prove beyond doubt.

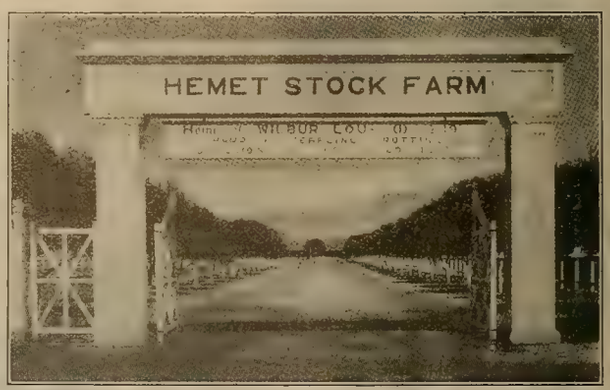
Peter McKlyo is the Greatest Son of Peter The Great

westof of Kentucky and is destined to be one of the world's greatest sires.

He is the only son of Peter the Great five years old with two colts in the list. He was bred to three mares as a two-year-old, only two of his colts being handled,—Charlotte McKlyo, winner of breeder's record 2:25¾, and McKlyo Boy, winner of the two-year-old division Breeders' Futurity Stake, record 2:23¼. It can be also said as a matter of record that he is one of the greatest five-year-old trotting stallions ever owned in the state of California, and one of the best individuals to be found in any country.

HE WILL MAKE THE SEASON OF 1917 AT

James Thompson's Training Stables



State Fair Grounds, Sacramento

TERMS: $100 FOR THE SEASON.

Usual return privilege. Mares pastured at $5 per month. Good care will be taken but no responsibility assumed for accidents or escapes. For further particulars address,

L. H. TODHUNTER, Owner, Box 387, Sacramento, Cal. or JAMES THOMPSON, State Fair Grounds, Sacramento, Cal.

FARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10 ¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, in-

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¾, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE. EVERYTHING AT THE FARM IS TO BE SOLD.

For particulars, photographs, etc., address

HEMET STOCK FARM, HEMET, CAL.

A WINNER IN IOWA--

It is generally admitted that high class saddle horse are scarce. Any one looking for a coming three-year-old saddle stallion, and has not been successful in locating one in Missouri and Kentucky, come and see **WM. TIMMERMAN at Manning, Iowa,** and I will show you one as good as ever lived or as there is living to day, barring none. This stallion can be bought, but not for a song.

STALLION DIRECTORY.

In addition to the practical worth to the owners of the country, the announcements of the stallion owners which appear in the Breeder and Sportsman serve another purpose. They remind the breeder that his now-or-never opportunity is here; his great harvest time, and that his stallions and breeding stock should be in the spot light and where the interested public will be reminded of them every week. The publishers of this paper are personally acquainted with every stallion owner whose announcement appears in its advertising columns and we recommend every one of them and the stallions they are advertising unhesitatingly. We know the statements made of the stock advertised to be true in every respect.

Soil Washing Steals Fertility.

Soil washing by heavy rains is probably the most important cause of the loss of soil fertility on rolling upland farms. The amount of this loss is difficult to measure accurately. Figures obtained at the Missouri College of Agriculture during the last two years indicate that as much as five per cent of the really fertile soil may be lost in one year on a gently sloping field if the surface is left bare. This means that continuous cultivation for one generation may result in the loss of all the fertile soil on even gently rolling land unless some measures are taken to restore it. On steeper lands the loss is much more rapid.

Some idea of the loss of plant food may be obtained by considering the loss of nitrogen. The supply of this element in the soil is contained in the organic or vegetable matter present. Nitrogen is made available for the use of plants by the decay of organic matter. It is estimated that two per cent of the total amount present becomes available each year. It is this two per cent which may be removed by the crops, by leaching and in the form of gas. As the availability of the other elements of plant food in the soil is closely associated with the decay of organic matter, it is evident that the washing away of that part of the soil richest in organic matter results in a lack of all the really valuable soil plant food. In addition to the loss of plant food the poorer physical condition of the soil resulting from the removal of organic matter and the inconvenience caused by ditches in the fields are to be noted.

The farm practices that cause excessive erosion are continuous cultivation, shallow plowing, furrowing with the slopes, leaving the land bare in winter, neglect of gullies and the exhaustion of organic matter.

Practices tending to control erosion are systematic rotations containing fewer cultivated crops and more hay and pasture crops, the gradual deepening of soil by occasional deep plowing, the use of barn yard and green manures, winter cover crops such as rye and wheat ,and prompt attention to gullies and ditches. Terracing and contour farming are coming into favor as preventive practices as lands increase in value. Tiling poorly drained sloping lands such as spouty hillsides, helps by opening up the subsoil and carrying part of the water off through the tiles.

GIVE COLONEL WEINSTOCK A CHANCE.

Politics have ruined more good state fairs, agricultural laws and prevented the advancement of better agriculture throughout the United States than any and all other mediums combined. It is hard enough to get a good agricultural bill through the Legislature these days and still harder to get a decent appropriation for the advancement of better breeding and farming methods; however, once a good bill is passed and the appropriation made, it is left for the political pie grabbers to dive for, and in most instances it is made into a pie. Wherever state fairs, agricultural boards and live stock associations have been run on a business basis and appointments made on the merits of the applicant rather than on his political standing, those associations have made rapid strides in the accomplishment of their duty; while the "political office holder" has been content to rare back on his "dignity',' with his feet a-top a seldom opened desk and look wise, with the results that are well known to all live stock men. This, as much as any one thing, is the reason for badly needed live stock and agricultural laws being sent to the "morgue." They have been abused.

It is so seldom we get a good man that when we do, all should rejoice, and give their assistance in making his efforts successful. Colonel Harris Weinstock, state market commissioner of California, in my opinion, is one of the most capable state officials in the country, and if any man ever proved himself "up to his job" it is Colonel Weinstock. The job was not much, I understand, at one time, and Weinstock made it a man's size job; making the job and himself famous the length and breadth of the state. This is too good, however, and "Petty Politics" are after his goat. Weinstock is on the carpet and the political bosses are cross-examining him as though he had committed some offense. If Col. Weinstock could be let alone for a while he would continue in his good work of organizing the rancher-stockmen of California and the results so necessary in this all-important work would soon be evident. The editor of the Breeder and Sportsman has never met Colonel Weinstock but if I ever do, I am going to shake his honest-to-God hand assure him that I am for him, because since coming to California I have watched his work and I am sure if he is allowed to use his best efforts he will bring about better farming and stock growing and better living to the producers and consumers.

Farming sections, which are the producing sections, should stand solidly back of Weinstock, because the first effect of his plan will be to stabilize prices; the consuming public, confined principally to the large centers of population, should also stand back of the commissioner because the ultimate result, and at a not far distant time, will materialize in a lower price to consumers. That is not an idle statement, but one which is proven by the records already at hand, as the result of the Weinstock plan thus far tried out.

Kentucky and Kentuckians are rejoicing. They have good reasons to rejoice. Kentucky's live stock and agricultural development is making more rapid and progressive strides than at any time in the history of that noted and far-famed commonwealth. Always the leader in the production of horses; by comparatively recent circumstances it is developing every breed in its kingdom to an equal perfection. They are doing more diversified farming and stock growing in Kentucky today than old-timers believed was possible, and goodness knows, Kentuckians have never hesitated to sing their praises of the Blue Grass.

Kentucky has always had a few breeders in every line of live stock and agricultural lore. However, the people as a whole have been content to let the old haphazard methods of growing stock and grain rule their fair land. In the last few years a great change has come, and, like her sister states, Missouri and Illinois, every Kentucky planter is trying to outdo his neighbor in his farm activities. Pure herds of fame are a common occurrence throughout the state; in the "Pennirile" they are up and doing and making their neighbors in the Blue Grass hustle, and the greatest prosperity Kentucky has ever known now prevails among their farmer-stockmen. Hon. Mat S. Cohen, noted horseman of a few years back, since being elected Commissioner of Agriculture, has had much to do in the making of this great change. He was referred to in the heyday of his glory in horsedom as "Marvelous Mattie," and since being elected to the high position he now fills he is called "Marvelous Mat" by all lovers of better farming. The "hook worm" is a stranger in Kentucky.

HEMET STOCK FARM

In another column of this issue of the Breeder and Sportsman will be found the advertisement for the sale of the Hemet Stock Farm and all the horses now at the farm.

The Hemet Stock Farm is one of the best appointed and equipped breeding establishments on the Pacific Coast; situated in the heart of the Hemet Valley in Riverside county, close to the town of Hemet, a neat, thriving little place of about 1500 inhabitants. Here all the residences are new and decidedly pretty. Gardens, lawns, hedges and gravelled walks surround each home. The well kept streets are shaded with trees; the stores large, commodious and well stocked. There are two banks in solid buildings which would be creditable to any city in the State. At the end of the main street is the entrance to the Hemet Stock Farm; an eighth of a mile from the gate is the trainers' headquarters, a pretty bungalow with complete office fixtures, a bath-room adjoining with shower and all modern improvements. This bungalow is in the center of a beautiful lawn and around its foundations are roses, carnations, verbenas, lilies and geraniums blooming the year round.

Beyond this, nearer the track, are long rows of neatly painted buildings containing over 100 large box stalls, well lighted and ventilated; cement troughs are set up at different places in front of them, and here as well as everywhere the water supply is unlimited. Not far from here is the big stallion barn, one of the finest buildings of its kind existence. Everything that could be thought of for the comfort of the stallions and their attendants has been provided for.

Here is the best half-mile track in California. It holds the State trotting record on a half mile track and all the appointments as a racing institution are perfect, with fine covered stands for judges as well as spectators. The track is kept in splendid condition all the time. It has numerous well fenced alfalfa paddocks and brood mare runs. The plant has a very complete racing equipment of sulkies, harness, boots and all the accessories that go with training and racing trotters and pacers. The whole infield of the track is laid out to alfalfa and the plant is electric lighted throughout.

The climate here is perfection,—cloudless sky, cool evenings and always a soft, gentle mountain breeze blowing—not a wind—but just faint zephyrs which make one feel that it is heavenly to be outside to enjo yit.

Many years ago the late W. F. Whittier came into this valley and saw that its climate was unsurpassed and that by the expenditure of money he could make this sandy, cactus and sage brush covered spot one of the ideal places of California; at an outlay of over $2,500,000 spent in building a dam, water works, laying pipes and making irrigating ditches, he has succeeded in making this valley one of the most productive of its size in the world.

Here, close to the stock farm where he could be in touch with his horses, he built his summer residence. It is a veritable palace, set like a gem in the midst of an evergreen forest of golden-laden orange trees. It appears to be one of the choicest spots imaginable to build a home, and to describe it and its beautiful surroundings is beyond my power.

The executors of the will of the late W. F. Whittier have decided to place the farm and horses on the market, and foremost among the horsesoffered will be the successful sire Wilbur Lou, son of Kinney Lou and Louise Carter. Wilbur Lou as a yearling was the world's champion trotting stallion of 1910, record 2:19½. As a two-year-old he won all his engagements and took a record of 2:19½. As a three-year-old he was a famous futurity winner and gained a record of 2:10¼. At the age of seven he is the sire of eight standard performers including Hemet Queen (1) 2:16¼, world's champion yearling pacing filly and Natal Day (2) 2:13½, champion two-year-old trotting stallion of the Pacific Coast.

Allie Lou 2:12¼ by Kinney Lou, dam Lady Zombro by Zombro, and winner of Breeders', State Fair, and Pleasanton three-year-old stakes, is also in this consignment. This mare raced successfully last year as a four-year-old and was separately timed in a race at Phoenix in 2:07¼.

Don de Lopez, now four, by Kinney de Lopez, dam Eradiate by Geo. W. McKinney, started in fifteen races last year and won twelve of them; he could have trotted in 2:10 at Phoenix last fall.

Louise de Lopez 2:19¼, record made last year, is now three. She is a daughter of Kinney de Lopez and out of Louise Carter, the dam of Wilbur Lou, the only mare that ever produced two yearlings to trot better than 2:20, and her grand dam is the famous matron Ingar by Director 2:17; Ingar being the dam of six including the great race horse and sire John A. McKerron 2:04½. Louise de Lopez is entered in all colt stakes on the Coast.

Edith Carter 2:18¼, champion yearling trotter of 1916, is a full sister to Louise de Lopez and is entered in all colt stakes on the Pacific Coast.

Sequoia by Wilbur Lou, dam Eradiate, now two, is a great colt trotter and is entered in all colt stakes.

Harry R., a green pacer, can pace a half mile track in 2:10.

These horses are all in nice shape and will be ready to race this season. Besides the few horses mentioned here, everything at the farm is to be sold.

Harness Horses and Horsemen

Vancouver, B. C., March 3, 1917.

Editor Breeder and Sportsman:

Being on a visit to what was once my home town, Vancouver, B. C., I have naturally been visiting with my horsemen friends and enjoying myself generally. The first horse fan I met was Ed Burgoyne, the fat and genial owner of the real race horse Bon Guy 2:09¼. I found Bon Guy looking fine and taking his daily road work of from eight to twelve miles per day hooked to a Baily buggy, and I had the pleasure of a long ride behind Bon Guy. I found the little red rascal to be a most pleasing road horse. He's shod in pads and the way he can lead off and keep it up pleased me very much, and the way his amateur sportsman-owner takes care of him makes me say that Ed Bourgoyne is a natural born horseman. Bon Guy will be ready for any races he is eligible to on the North Pacific Circuit of 1917, and the trotter that beats him will know he has been in a horse race.

In addition to Bon Guy Mr. Bourgoyne has recently purchased a grand looking three-year-old pacer sired by Zobona 2:20, the beautiful brown son of Zombro that at all times was a blue ribbon winner at provincial horse shows. This colt is out of a mare by Nutwood Wilkes 2:16¼, sire of Copa de Oro 2:01, and in appearance he is all that a critic could ask for. Mr. Bourgoyne says he is not quite satisfactorily broken but that he can imitate a real trotter and will be trained this spring, and if he shows class enough Mr. Bourgoyne will race him.

Mr. Geo. Hardy, one of Vancouver's solid men and one of the best harness horse owners ever in the province, is the proud owner of a pair of fillies that in type and breeding are good enough for any fancier. The oldest filly is two years old; her name is Bonney Cres. She is by Bonaday 2:11½ by Bon Voyage 2:08, dam Silk Cres, full sister to Bon Cres 2:10¼. Silk Cres is a daughter of Cresceus 2:02; and Silpan by Silver Bow 2:16, son of Robert McGregor 2:17¼; next dam Kitty Fox, sister to the dam of Tommy Britton 2:06. Kitty Fox was sired by Pancoast, the great sire. The next dam was Bessie Brown by Dictator 113. So in writing this crude sketch the breeding of Mr. Hardy's filly Bonney Cres, I will say that if there is a man in all the world who will say that it is not an extremely fashionable and stout pedigree on both the dam and sire's side,—why, I will say to that man that he is hard to please or else doesn't know a well balanced pedigree when he sees it.

Mr. Hardy's other filly is named Bell Cres, being sired by Belmar 2:21¼, a son of Moko, the greatest of all futurity sires . Belmar's dam is the renowned brood mare Chestnut Belle, dam of 9 trotters and grand dam of four, including Native Bell (3) 2:06½.

Now when we say that this filly Bell Cres is a fashionably bred one, we are not in any danger of being called down by ony one, and in addition to this we will say, that a more perfectly formed filly or horse of any sex it has never been my pleasure to look at—not even those I saw at Horse Heaven, Lexington, Ky., could surpass Bell Cres in beauty of conformation and color, she being a bay with two white hind ankles and a star in the forehead. If an artist could paint this filly to perfection and show the picture it surely would have many admirers.

Mr. Hardy, being a horseman who believes in having registered horses, has had both his fillies registered, which is what every sensible horseman should do. Silk Cres, the dam of these fillies, is a big slashing bay trotter that was trained by Al McDonald of Pleasanton, Cal., and by whom she was sold to Mr Hardy. Silk Cres trotted a half mile track at or about 2:17 for Mr. McDonald, and after being sold to Mr. Hardy she met with some mishap and was then put to breeding. She is again in foal to Belmar and I regret to say that Mr. Hardy has not nominated her in the California futurities. I am going to try to induce him to nominate Silk Cres now in some stakes if it is yet time, or a substitution can be had, for few men in this western country have a pair of such well bred and good looking fillies and they should be engaged in the California futurities.

Mark Rose, a Lulu Island rich man, is owner of Frank D. Nichol 2:25¼, a full brother to Silk Cres. Mr. Frank Loomis is training this son of Cresceus 2:02¼ and will race him this year. Frank D. Nichol is a fast, game and reliable trotter. His slow record is no measure of his speed, as his owner is one of those men who is afraid to let his stallion get a low racer. Mr. Loomis has the chestnut pacer Prince Malone 2:15¼, by Kinney Lou 2:07¼, dam Princess Bessum by Egyptian Prince, son of El Mahdi by Onward and Lady Bunker, dam of Guy Wilkes 2:15.. This well bred pacer is as good as his breeding, which is the best and most fashionable in the books. His record should read a much faster figure as he has finished the last half of his miles in 2:02¼ on a half mile track and he is a good going, good mannered, reliable pacer. I look for him to be a 2:05 pacer any old time on a good track in 1917, for the same owner, Mr. W. C. Brown.

Mr. Loomis is training a very classy chestnut three-year-old stallion by Prince Ansel 2:20, sire of Prince Lot 2:07 and many other good race horses, including the world's greatest yearling trotter, Anselita (1) 2:17¼. The dam of this grand young trotter is Princess Bessum, so he is not only formed by nature to be a good horse but his breeding is fashionable and reliable.

Mr. Brown is a good owner and a man who in addition to having a large law practice, gives his continuous and capable attention at all times for the best interests of the harness horse sport, and it is a credit to the sport to say that a man of Mr. Brown's standing is a constant worker for the harness horse game. I wish I knew a million men just like W. C. Brown in the game; it would be good for the game.

A. R. Miller, former owner of Zobono 2:20, Bon Voyage 2:08 and Bonaday 2:11¼, is now amusing himself with Hal Scott 2:19¼, a good race horse, son of Hal B. 2:04. Mr. Miller is one of the most active members of the Vancouver Driving Club and is at all times ready to do more than his share of the work for the good of the sport.

J .T. Wilkinson, who by the way is the man who stands highest as an agent of the New York life Insurance Co., either in the United States, Canada or the world, is a Canadian sportsman who has owned, raced and raised many good standard bred horses ,including Texas Rooker 2:04¼. At present Wilkie has just one, a very beautiful bay filly, a pacer by Ora Wilkes Jr. 2:12¼, a good game son of Ora Wilkes 2:11¼. This filly is out of Hazel Kirke by Altamont 2:26, son of Chehalis 2:04 and many other celebrated racers. Wilkie is going to prepare this mare, now a five-year-old, for the 1917 races. She has been jogged all winter at Mr. Wilkenson's private half mile track at Chilliwack, B. C.

I could go on for a week telling about well bred horses owned in this Province, and just now the people are being put through the fire of sorrow over the European war, as thousands of the best men of British Columbia have gone to the front, and every man who went has rendered a gallant account of himself in defense of his country. Many never will return and many more are going. Just now 1100 men of a Highland regiment are preparing to leave for the front, perhaps all to be killed. Yet one hears no revolt. The people of British Columbia, both men and women, are loyal to their country and flag, and the Vancouver Exposition Association will carry out its program in 1917, and do as it always has done by the harness horsemen—pay all purses 100 cents on the dollar. Yours truly,

C. A. HARRISON.

TIME ALLOWANCES.

The following construction of the time allowance rules was adopted at a meeting held at the Deming Hotel, Terre Haute, Indiana, Monday, March 12, 1917.

The time allowances which appear in the Codes of the National and American Trotting Associations read as follows:

"Rule VII, Sec. 5. A horse with a winrace made on a mile track shall be allowed four seconds when entering on a half mile track, providing the class to which he would be eligible under this allowance is not slower than his winrace, on a half-mile track."

"Rule VII, Sec. 6. After a horse has acquired a winrace, he shall be allowed, whether raced or not, one second for each calendar year until he equals or reduces it. No other allowances shall be permitted. A nominator is required to claim time allowance when making entry."

All horses with winraces made on a mile track are entitled to the four seconds granted by Rule VII, Sec. 5, and no change can be made in same, except when the number of seconds are reduced by actual performance.

The time allowance of one second for each calendar year granted by Rule VII, Sec. 6, to all horses that have acquired winraces, permits them to start in slower classes, in their first races each year. Attention is called to the fact that this allowance does not waive the application of Rule VII, Sec. 2, after such horses have been given the benefit of the allowances to which they are entitled, or allow them to start, in a race after they have won, in one second, or more, faster than the claim advertised, prior to the closing of entries.

When a horse with a winrace, made on a mile track, has started on a half-mile track, and won within four seconds of same, if he was entitled to any allowance under Rule VII, Sec. 6, he forfeits the same, just as a horse forfeits his allowance under the same rule on a half-mile track when he equals or reduces his winrace on a mile track. He is, however, still entitled to the allowance, between his mile and half-mile track winraces, when entering on a half-mile track.

JOHN C. WELTY, Pres.; E. W SWISHER W. H. GOCHER, Sec'y.
W. P. IJAMS, Pres. W. H. SMOLLINGER W. H. KNIGHT, Sec'y

Mr. Wm. M. Ferguson of Dixon, Cal., has sold to Mr. S. S. Silvey, of the same place, a six-year-old trotting mare by Palite out of the dam of Graustark that with two weeks' work has trotted an eighth of a mile in 20 seconds. Graustark, by the way, is the roan pacer which made such a wonderful record last season over the Ohio Circuit. Out of twenty-eight starts he was first twenty times; second four; once third, and once fourth.

California Fair and Racing Association Incorporated

Articles of incorporation were filed last week by the California Fair and Racing Association with a capital of $10,000, one .thousand shares at $10 per share. Today a meeting of stkcoholders will be held and a board of directors elected. Those who are at present serving as directors are:

I. L. Borden, Clarence Berry and H. S. Cowell of San Francisco; M. L. Woy, Fresno; Charles Silva, Sacramento; J. E. Montgomery, Davis; L. L. Cannon, Santa Rosa; C. A. Durfee and D. L. Hackett, Oakland, and Joseph Waddell, San Francisco, secretary.

The purpose of the organization is to encourage breeding, training and the showing in competition of standard bred and thoroughbred horses and all other livestock. It is also designed to assist and encourage all of the State fairs and to give special attention to the matters of the 1917 California circuit. The organization of a stock company furthermore means that in small centers where it has been proposed to stage racing meetings and where there is not quite enough money on hand to support such projects the stock company will come to the fore and assist in financing such meetings.

As conditions now stand the success of the 1917 California circuit seems assured. Already meetings have been assured at about twelve centers, while within the next week or so it is expected that there will be fifteen weeks of harness racing provided for. As the circuit is now arranged, racing will commence at Salinas in the second week of July. The order of assured meetings, together with two doubtful ones, is as follows:

Salinas, Petaluma, Ukiah, Eureka, Santa Rosa, Dixon, Woodland, Sacramento, Stockton, Fresno, Bakersfield ,Santa Maria, Phoenix.

Much has been said of late in Eastern contemporaries of the proposed match race between Col. Tom Dennison's R. C. H. and J. W. Linehan's M. L. J. with other horses that might care to enter for $1000 a corner, winner to take all. The following from Col. Dennison explains his position:

"I see in the Horse Breeder of March 7 the proposition of Mr. L. A. McElroy, as secretary of the Erie track, trying to bring about a match race between M. L. J. and my horse, R. C. H.

"I am not trying to build up any track or aid any race meeting. I am too busy to go that far away from home. The association here would give a purse, I don't know how much, but they have already guaranteed to pay the express on this horse for a match with R. C. H.

"I am still willing to make a match for $1,000, but I cannot go that far away from home.

"Respectfully yours, TOM DENNISON."

✤ ✤ ✤

W. G. Durfee ,of Los Angeles, visited Phoenix during last week and as agent for T. W. Murphy of Poughkeepsie, N. Y., purchased Zombrino 2:06¼, black stallion by Prince Zombro, and shipped him to New York. Mr. Murphy plans to enter him in the stake races and will race him through the Grand Circuit this year. The horse was purchased from Dr. J. G. Belt, who campaigned him last year under the care of Ted Bunch. Zombrino made a wonderful campaign last season, annexing eighteen first monies. This is a great achievement, and a horse capable of same is necessarily an individual possessed of speed, endurance and a naturally rugged constitution.

Los Angeles Plans Big Fair.

Plans for the big district fair to be conducted in Los Angeles, some time in the autumn, are already taking shape and the personnel of the officers and committees who are to be in charge indicates that it will be one of magnitude and of vast practical worth to Southern California and the varied livestock and agricultural interests of that section.

Many associations which have been holding independent exhibitions have signified their desire to join in the District Fair, each having special days and features which will be specially advertised and exploited. It is proposed to give one week of live stock and agriculture shows which will include the exhibition of live stock, a good racing program and a brilliant horse show for both heavy and light horses.

Joseph Waddell, of the California Fair and Racing Association, met with the officers last week and was assured by Secretary Davison that they would give a good meeting and become a member of the circuit. The week for their meeting probably will be one or two weeks before the Phoenix fair. In this manner they will not only be assured of all the good race horses and show horses from the state fair at Sacramento, but will draw the exhibits of cattle and other live stock, which are now becoming paramount features of California fairs.

The officers of the fair are: Clinton E. Miller, president; R. W. Burnham, treasurer, and F. B. Davison, secretary. The committee in charge of the agricultural department will be: C. B. Messenger, chairman; J. Ross Clark, J. E. Killian, H. L. Musser, M. L. Germain, F. C. Langdon and F. E. Woodley. The live stock committee will be Messrs. John S. Mitchell, H. C. Carr, O. B. Fuller, J. L. Thatcher, D. O. Brandt, J. M. Davison, H. A. Jastro and Mrs. Anita Baldwin. The following have been named as probable members of the speed department: R. A. Smith, Wm. Loftus, Col. Hogan, E. J. Delorey and W. G. Durfee.

Thoroughbred Matters

A bill providing for pari-mutuel betting, which passed both houses of the Montana Legislature, was vetoed by Governor Samuel V. Stewart. The veto was sustained by a forty-five to forty-two vote in the house.

✤ ✤ ✤

The pari-mutuel bill, which would legalize betting on horse races in Texas by means of the pari-mutuel machines, as conducted in the State of Kentucky, was last through the absence of its friends. The house refused to engross by a vote of 54 to 59 and eleven members who were absent were pledged to vote for the measure.

✤ ✤ ✤

Jockey McTaggart was advised by James Rowe that he would like to engage his services for the Harry Payne Whitney stable again this season. Last season McTaggart was connected with the stable, but decided to discontinue riding while at Saratoga, and the contract terminated. McTaggart, according to present intention, if he returns to the Whitney stable, will try to ride at 110 pounds or less, and so informed Mr. Rowe.

✤ ✤ ✤

New Orleans, La., March 3.—Hugh A. O'Donnell, editor of The New Orleans American, owned by H. D. (Curley) Brown, who attacked the local race track and its system of betting, was sentenced to serve four months in prison and to pay $500 fine and two months additional if the fine is not paid, by Judge Frank Cretien of the Criminal Court yesterday. He was convicted of criminally libeling Mayor Martin Behrman and the members of the Commission Council, alleging that they were using city funds to aid the races. Sam Montgomery, attorney for O'Donnell, appealed.

✤ ✤ ✤

General discussion of the merits of racing two and three-year-olds has resulted from the request of the Thoroughbred Horse Association, sent to all the jockey clubs early in February, that more races be provided exclusively for three-year-olds. Though the resolutions passed by the association at the last meeting were intended only to suggest an improvement for the three-year-olds, the managers of several of the tracks who have replied to the request have renewed the old discussion regarding continuous and early racing of the two-year-olds.

Nearly every track official who has made reply has indicated his track will increase the number of races for three-year-olds exclusively, each announcing a willingness to do anything reasonable that may be to the interests of the breeders and horsemen as indicated to them by the directors of the Thoroughbred Association.

Judge Joseph A. Murphy of the New Orleans Business Men's Racing Association; D. Sterrett Gittings, secretary of the Maryland Jockey Club; Racing Secretary Fred Rerberger of the Queen's County Jockey Club, Brooklyn; Jos. W. Bender, chairman of the Race Committee of the Essex Fox Hounds; V. E. Schaumberg, racing secretary of the Empire City Racing Association; Secretary A. R. London of the Hamilton Jockey Club, and Frank J. Bryan, racing secretary of the Piping Rock Racing Association, all expressed themselves as being in full accord with the desired movement.

✤ ✤ ✤

New Orleans, La., March 7.—Wheels were put in motion here today for the establishment of another race track in New Orleans when the Jefferson Fair Association, located in the adjoining parish of Jefferson, reorganized under the name of the Jefferson Fair Association, Incorporated, with a capital of $225,000.

The purpose of the new association is to link dates with the Business Men's Racing Association and offer horsemen and tourists a much longer racing season than would be possible if racing were confined to Orleans Parish, where a law prevails permitting racing only between January 1 and Mardi Gras Day.

Under the present plans the Jefferson Fair Association's meeting will open about December 1 and operate up to January 1, when the Fair Grounds season opens. Officials of the new association say that the racing will be put in charge of men who are recognized all over the country as efficient and conscientious racing experts. There will be no Sunday racing, and the new association will obtain the sanction of the Jockey Club and race under the approved regulations.

A tract of ground for the new track has been purchased and building operations will be started within a few days. The site cost $90,000. Already nearly $100,000 worth of stock in the new corporation has been sold, and it is expected that the remainder will be placed in a few weeks.

✤ ✤ ✤

Sacramento, March 16.—Publication by newspapers of betting odds, form charts or tips on horse racing is prohibited under the provisions of Luce's bill, which passed the Senate today. The bill is aimed to curb the activities of race track gamblers in San Diego, who operate at the Tia Juana, Mexico, race course. Publication of horse racing results, however, is permissible.

Jockey Willie Kelsay is riding in his best form at Tia Juana now. The old stager has been favored by a new lease of life this winter, and his riding has been little short of sensational. Kelsay is now in great demand by horsemen and few races go by each day that do not find him on a horse, providing he cares to ride.

✤ ✤ ✤

President J. W. Coffroth has declared that the present meeting at Tia Juana will continue indefinitely. The game is better now than it has been at any time during its original 100 days, and with Tia Juana suffering in no respect by the advancing Eastern meetings, Coffroth sees no reason why the game should not continue. As a matter of fact several of the big business houses of San Diego banded together in an appeal for a further extension.

✤ ✤ ✤

The Western Circuit of racing that has been promised horsemen by W. W. Finn in the main has been responsible for keeping many horses right on the coast. Finn has promised to make his dates known immediately upon the closing of the Tia Juana meeting, and from all accounts there will be racing at Denver, Colorado Springs, Phoenix, Alan and several other middle western cities. With the possibilities of a short summer meeting at Tia Juana the horseman will have plenty of racing to keep his stock busy. It is said that Reno will follow directly on the heels of Tia Juana and that the Navada Racing Commission will handle the meeting itself.

✤ ✤ ✤

Roscoe Troxler, who claims the distinction of being the oldest jockey in point of service in the saddle in the United States today, passed through San Francisco Tuesday on his way to New York, where he is under contract to P. A. Clark, a wealthy and prominent recruit in the game. Troxler rode for Wingfield at Tijuana with pleasing success.

For eighteen years Troxler has been sporting silks. Along in 1902 he rode at Emeryville, and since then has visited every track in the country. He is still able to do 109 pounds and is rated as one of the best post riders on the turf today. The little fellow has seen the Danny Mahers, Tod Sloans and all the famous jockeys pass until not one remains who was in the saddle when he first started.

✤ ✤ ✤

Hot Springs, Ark., March 8.—H. C. Applegate's Old Rosebud came into his own again this afternoon at Oaklawn, when he gave an old-time exhibition of high speed and administered a sound beating to good opposition, when he took up 120 pounds and led for the entire six-furlong trip and negotiated the distance in 1:13 1-5 on a track that was little better than slow. There was vast interest as to how the one-time crack would acquit himself, and not alone was this interest confined to the spectators who had read of his prowess, but also to the calloused horsemen. After the finish their opinion was that he had rounded into his good form and the manner in which he came out of the race augurs well for his standing training in the future. He was hustled into the lead immediately after the barrier's rise and led well in hand throughout. Aildebaran pressed him closest at the finish and showed a good effort. Robert Bradley, after being all over the track, settled down to hard business in the last furlong and overhauled David Craig.

✤ ✤ ✤

George Berry, manager of George Wingfield's Nevada Stock Farm, arrived Tuesday from Tijuana, where he has been campaigning a string of twenty-seven thoroughbreds. He is on his way to Reno to look over the breeding farm. Arrangements have been made to ship sixteen horses from Tijuana on April 15 to sport the colors of the Nevada Stock Farm on the metropolitan tracks.

In the lot will be the sensational Slippery Elm, Square Set, Scarlet Oaks, Bank, Minnow, Star Shooter, Gladiola and eight two-year-olds that have not faced the barrier so far and will be eligible for the New York races. Slippery Elm won the title of the king of thoroughbreds in the West this winter. Out of the seven stakes at Tijuana he was first four times, second once and third once. Scarlet Oaks was another consistent performer, winning in every one of her five starts. The Nevada Stock Farm was the solid stable at the Lower California course, winning in all twenty-seven races.

Square Set, the Duke of Ormonde three-year-old colt, is George Wingfield's candidate for the classic Kentucky Derby.

OLD ROSEBUD.

Now that Old Rosebud, that remarkable six-year-old gelding, son of Uncle and Ivory Bells by Himyar, bred by John E. Madden, Hamburg Place, owned by H. C. Applegate and trained by F. D. Weir, after being out of training for two years, demonstrated by his performance at Hot Springs on March 12th, when he shouldered 130 pounds and galloped to an easy victory over some good opposition that included David Craig, Bob Hensley, Hanovia and Indolence, that his return to something like his brilliant form shown as a two and three-year-old, is no fluke, we believe a resume of his performances will prove of interest.

Old Rosebud started fourteen times at two and finished the year with twelve victories to his credit, having met with defeat on only two occasions, and then curiously enough at the hands of another Hamburg Place product, in Little Nephew, a son of Uncle and Miss Granville, by Yankee. His first start was at Juarez, Mex., February 9, 1913, when he won the Yucatan Stakes; his next out was a half-mile affair, feated which he won in :47 by five lengths. Then he was defeated by Little Nephew by a head for the Idle Hour Stakes at Lexington; won at four and one-half furlongs at Churchill Downs, and met his only other defeat of the year, in the Bashford Manor, which Little Nephew won by a length. After the Bashford Manor his record was one of unbroken victory. He won at four and one-half furlongs, Churchill Downs; five furlongs, Douglas Park, again at five furlongs, going the distance in :58 4-5, beating Little Nephew four lengths; five furlongs in :58 3-5; the Spring Trial Stakes, in which he went the five furlongs in :58 2-5, the present record for that distance at Douglas Park. Old Rosebud then won the Harold Stakes and Cincinnati Trophy at Latonia. His next start was at Saratoga in the Flash Stakes, which he won, and then came his victory in the United States Hotel Stakes, which was his final appearance at two.

At three, Old Rosebud started three times, his win at Lexington on April 25, 1914, at one mile in 1:42 over a slow track by six lengths, showing that he had wintered well. Then came his brilliant performance in the Kentucky Derby which he won by eight lengths in the record time of 2:03 2-5. He was then shipped East and started in the Withers Stakes, in which race he was beaten, and did not start again that year. After a let-up of two years, his showing at Hot Springs proves him to be a truly wonderful horse.—[Thoroughbred Record.

Cincinnati, Ohio, March 12.—Appreciation of the efforts of the Latonia Jockey Club in putting on the big Championship Stakes for 1919 has been shown in the liberal entry list, which that association has received. Four hundred and fifty-nine colts and fillies have had their first entrance fee of ten dollars paid. Twenty-two of these came from England, six from France, one from Cuba, many from Canada and nearly every state in the Union is represented. Ninety-nine breeders and horsemen have contributed their part to winning the big stake by entering the best they have on their farms. This huge entry list insures a stake of at least $50,000 net to the winner. The entry list has overwhelmed Manager Hachmeister and A. B. Hancock, sponsors of the stake. They believed that if 300 entries were received their efforts would be well rewarded, but when the grand total of 459 entries was received their joy was unbounded.

The entries from England, twenty-two in number, were cabled as were the six from France, so the pedigrees have not yet been received, but will be along in a few days or weeks.

Practically every stallion of any class whatsoever has representation in the list and some of them were even unheard of by Manager Hachmeister.

Entries were received from the following states: New York, Kentucky, Texas, Maryland, Maine, Pennsylvania, Massachusetts, Tennessee, New Jersey, Virginia, Illinois, Washington, South Carolina, Nevada, Oklahoma and Ohio.

Hal Price Headley leads, having sent in fifty-two. A. B. Hancock is second with thirty-four, and J. O. Keene a close third with thirty-three. The Wickliffe Stable followed with twenty-eight and Harry Payne Whitney, recognizing the race as a good thing, sent in twenty. One hundred and thirty-four of the entries are of foreign breeding. Manager Hachmeister says there is no question now but that the winner will receive in excess of $50,000, in addition to the $1,000 Gold Cup, which will be donated by the Thoroughbred Horse Association.

Latonia Championship Stakes for 1919. To be run during autumn meeting; $15,000 added; by subscription of $10 each; for three-year-olds (foals of 1916); $15,000 to be added by the Latonia Jockey Club, of which $2,500 to second horse, $1,000 to third horse, and the fourth to save its stake; the original nominator of the winner to receive $1,000 and the second horse $500 ,third horse $250; colts and geldings to carry 122 pounds, fillies 119.

Declarations and payments: If declared by January 1, 1918, $25 each; if declared by January 1, 1919, $50 each; all remaining after January 1, 1919, $100 each; $250 additional to start; acceptances through the entry box the day before the race, at usual time of closing. A gold cup valued at $1,000, a gift from the Thoroughbred Horse Association, by private subscription of certain of its members, will also be given to the winner. One and three-quarter miles.—[Thoroughbred Record.

The once good race mare, Mamie Algol, bay, 1902, by Algol out of Miss Mary by Powhattan, owned by J. W. and R. E. Ttate, of Centralia, Ill., was shipped to Kentucky last week to be bred to O. A. Bianchi's Jim Gaffney.

✤ ✤ ✤

The bill providing for the State of Indiana to take over the State Fair property was vetoed by Governor Goodrich, after it had passed both houses of the legislature. The failure of the solons to properly provide for the immediate needs of the fair by passing appropriate bills is possibly the cause of the Governor's action.—Western Horseman.

SADDLE and SHOW HORSES

D. Schilling, of Chicago, attended the sale of saddle horses conducted by The Kentucky Saddle Horse Co., at the State Fair Grounds, Sedalia, Mo., last week.

✤ ✤ ✤

L. T. Anderson, Point-Au-View Farm, Maysville, Ky., has sold a splendid three-gaited saddle gelding to Frank B. Grimm of New Philadelphia, Ohio. Mr. Grimm will show him this season.

✤ ✤ ✤

Ed. Moore, of Columbia, has an entire new stable which he will exhibit through Missouri, Kentucky and the shows of that section this year. Headed by H. B. Thornberry's great gelding, Jack Barrymore, Mr. Moore promises his friends a sensational stable of show horses for this year's shows.

✤ ✤ ✤

Tom Mason, of Santa Barbara, California, reports his noted saddle stallion, Cy Mason 6892, developing into a wonderful show horse, and he expects to get the "grapes" with him this autumn at the California shows. Horse interests are humming at Santa Barbara and Mr. Mason is working 30 head of saddle horses.

✤ ✤ ✤

Jas. Buford, of Paris, Mo., was called to Forth Worth, Tex., last week by V. P. Keel, the well known Texas saddle horse breeder and exhibitor, to assist him in showing his horses at the Fort Worth show. Mr. Buford reports large crowds and the best show he has seen in a year with the exception of the International, at Chicago in December.

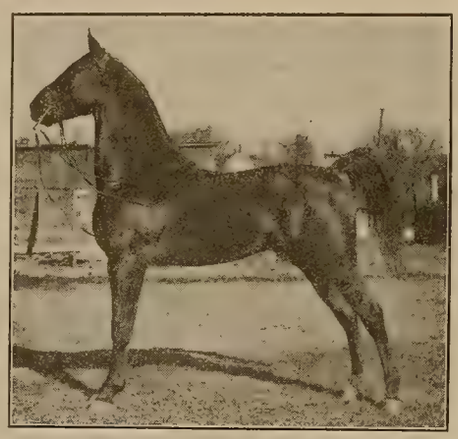
✤ ✤ ✤

There are some exceptionally well bred saddle horses in the list announced for sale in this issue by the Oakridge Ranch, of Kenwood, Cal. They are well bred on both sire and dam's side, are sound, in good condition and are priced to sell at once. Anyone wanting some well bred colts to start work on at once should communicate with W. G. Cowan, Oakridge Ranch, Kenwood, or the Breeder and Sportsman, San Francisco.

✤ ✤ ✤

Wm. Timmerman, the well known saddle horse expert of Manning, Iowa, who owns the splendid show stallion and sire, Timmie's Rex, announces he has some splendid young stallions and mares, among them a coming three-year-old stallion, that is as good as the breed has ever produced and that he will fill the vacancy in any man's stable who needs a headliner. Mr. Timmerman suggests that the buyers of saddle horses come to Manning if they do not want to be disappointed. He also reports his good stable as having wintered splendidly and all being "fit and ready."

✤ ✤ ✤



Hon. Jas. Houchin, one of the most prominent men in America, who is keenly interested in the horse business, and who has had the good fortune to own a world's champion, announces that his grand young stallion, I Am King, winner of the junior championship of Missouri last season, will be just as good in the aged championship and stake classes this year. It is indeed fortunate that with the retirement of Astral King, crowned the king of his day, that his owner should have another to send out under his colors that promises to bring home just as much glory; more important, however, is the fact that his coming champion is a son of his retired champion. In writing to the editor of the Breeder and Sportsman of this young horse, Mr. Houchin says: "I was out to see my next world champion yesterday, and if he is not the kind that will make them all sit up and take notice I will miss my guess entirely."

✤ ✤ ✤

C. R. Wells, of Washington, Iowa, who perhaps has the distinction of being Iowa's veteran saddle horse breeder and owner, has 60 head of the most superbly bred young saddle horses it has ever been the good fortune for any one individual to own. The writer can remember this horse lover's pilgrimage to the Missouri sales since I was "knee high to a duck" and he usually was the best buyer present. Whenever Mr. Wells, of Washington, came to town we knew we were going to have a horse sale. He has never bought any high priced stallions, and I do not know but he has been very wise; at any rate, he has saved a lot of money. Instead of buying the "top" stallion at the sales, Mr. Wells has usually taken the best brood mares and the "top" foals and the results are the 60 or 70 head on his big farm near Washington. He has never exhibited in aged classes at the fairs to any extent and has neglected having most of them trained sufficiently. However, he has them up to the age where they are now ready for schooling and development and the buyers of his colts will be assured of getting good blood, good health, soundness and unspoiled tails and feet.

✤ ✤ ✤

One of our Chicago readers writes that there is a strong demand for good saddle horses in that city and the various riding and driving clubs of the town are more active than in many seasons. In speaking of the bood business the riding academies are doing and the new ones being opened, he makes the following comment in regard to the Edgewater Beach Academy: "I was invited out to the Edgewater Beach Riding Academy, at 1128 Foster Ave., yesterday, by the new manager, Mr. Frank T. Fowler, and I was amazed to find such an attractive place. I can truthfully say that this academy was a revelation to me. I had seen the stables and horses under the old management; but now it is made into a tasty, clean, up-to-date riding academy, with maid and valet service; rest rooms, check rooms, showers, and everything to please the discriminating patrons and make for their convenience and comfort. Mr. Fowler is discarding the old horses and is buying new ones as soon as he can find the kind to come up to his qualifications. This fills a long-felt want in the vicinity where this academy is located and judging from appearances and the business they are doing the place seems to be appreciated and to be a big money-maker.

REX ORTIZ OF DENMARK

Magnificent Saddle Stallion by Rex McDonald—Ortiz Belle.—Owned by Bruce Robinson, Riverside, Iowa.

After "dickering" for six months, Milwaukee's genial horseman, Hans Berg, has purchased the five-gaited saddle gelding, Blees McDonald, from T. D. Anderson of the Astral King Farm, Jefferson City, Mo. While the price was not made public it is understood to be in the neighborhood of $700, which, considering the fact that Blees McDonald is being purchased for one of Mr. Berg's patrons as a using horse, is something of an example of the prices good finished saddle horses are bringing in Missouri. Blees McDonald is a bay gelding, about 15.3 hands high, weighing around 1,150 pounds, and one of the most attractive, versatile, thoroughly gaited and mannered horses ever bred. He was formerly the property of Bruce G. Eaton, Eaton, Colo., who sold him to Mr. Anderson after the Eaton stable completed its 1916 show campaign. The writer had been commissioned by Mr. Berg to buy an ideal pleasure horse for him, and after looking for several months saw Blees McDonald. Mr. Berg was notified at the time, and he thought the price a little steep and sent word to buy him after Mr. Anderson had already closed the deal. Mr. Berg has been after him ever since.

✤ ✤ ✤

One of the most promising youngsters in the California Gaited Saddle Horse Futurities is Fred Bork's stallion, Goldie Rex, a beautiful three-year-old by Don Castano and Dollie Rex by Rex McDonald. Mr. Bork, who is one of the best horsemen on the coast, has the horse in splendid shape and gaited and those who have seen him work declare he will be one of the contenders for the big money this fall.

✤ ✤ ✤

Dr. W. C. Gadsby, of Kirkwood, Mo., who has purchased more high class horses in Kentucky in the last two years than any other buyer going into that state, was again in evidence last week and secured some of the most brilliant stock he yet has purchased, and it is remembered that it was Dr. Gadsby who bought the sensational young stallion, King's Rival and the entire stable of the Mountain View Stock Farm, of Vermont. Last week he secured the two splendid horses, a gelding and a three-year-old filly, by Rex Peavine, from Mode Nicoll, and Dr. Gadsby is particularly enthused over them.

Horse breeders of Missouri are awaiting the arriva of the foals of Marshall Chief with much concern and it is expected that he will receive some of th best mares in the country to his court this year Marshall Chief, when owned by Ira G. Sharp, of Illi nois, was a big favorite with Missourians, and whe the writer bought him last spring he received som of the best mares from the best informed horsemer in Missouri, and these foals will really be the firs by this beautiful stallion to be seen in Missouri Marshall Chief is now owned by Mr. William Wallace of Philadelphia, who is one of the most prominen horse lovers of the Philadelphia colony, and who obeying the request of the writer when he sold him Marshall Chief, sent him to Missouri for service this year. He has placed him in charge of Ed. N. Hamilton, whose farm is only a few miles south of Mexico, and which is especially adapted for a court of such a magnificent stallion. Mr. Hamilton is one of the best known saddle horse men and capable stallion-eers in Missouri and will meet all mares at trains, unload and re-load them, and give his best efforts to the service of the patrons of Marshall Chief. The services have been placed at $25 cash for the season, with return privilege, and this rule will positively not be broken in any case. It is a price and a policy that should be taken by more owners of stallions, and which would insure better results all around. Mr. Wallace lives in Philadelphia and leaves the management of the horse to Hans Berg, the Milwaukee horseman ,who will be glad to answer any communication concerning the horse. However, arrangement for the services of the horse and the caring of mares should be made with E. N .Hamilton, Mexico, Mo.

—o—

Breeding Three-Gaited Horses.

More and more the idea of teaching the horse the five gaits seems to be growing "taboo," and while the breeders of the East have proven that they are more successful in the sale of a horse with the three distinct gaits—the walk, trot and canter—it is now spreading throughout the country. It is true that a real high class five-gaited horse can be spoiled by an amateur rider, and as the majority of pleasure riders of the present day are amateurs, being prominent people of the business of social world who have taken up riding rather late in life, it is logical that the breeders should produce the kind they demand. There is plenty of a demand for both kinds, however, as much as I admire the five-gaited horse personally, there is no use trying to force the popular demand into the discard and horses should be supplied those who want only three gaits.

Mrs. Thomas L. Johnson, of San Francisco and Mendocino county, California, one of the most ardent admirers of five-gaited horses, has the right idea, and is breeding and educating horses on her gorgeous estate along those lines. The result is that she has a type; a stable of youngsters who have been bred and trained for the pleasure rider; and while she believes the American Saddle Horse is the "ideal" she is not gaiting them, and it is doubtful if any establishment in the East has a more uniform lot of three-gaited saddle horses. In every instance Mrs. Johnson has used an American Saddle Stallion, her splendid Lord Denmark being one of the best examples of the breed in the country; but every now and then she crosses them with a Thoroughbred mare, and the result is she has some beautiful foals with the manners, style, and action and beauty of conformation of the ideal saddle horse. Mrs. Johnson has a number of youngsters which are about one-quarter Thoroughbred and in these she has pinned her greatest faith and expectations for just the kind the general public want.

Among the noted five-gaited brood mares on her ranch are Lady McDonald A, the dam of My Idol, the champion mare at the P.-P. I. E. and one of the most sensational winners seen in Missouri and Kentucky in a decade; and Hazel Dazzle, a younger mare ,but one that is bred right to be a splendid producer. She also has some young things by Bourbon King that promise to mature into show horses of the best class. Mrs. Johnson declares a cross now and then to the Thoroughbred produces a finish and type that is expected in three-gaited horses, and those who have seen her young horses declare she has accomplished more in the development of her "ideal" than many of the experienced breeders of the Middle West.

Mrs. Johnson breeds horses because she loves them, but she is breeding the kind that the people will want and the type she is sure will find buyers at a profitable figure. They are raised in the out-of-doors and are seldom broken until they are three-year-olds; having plenty of feed and every opportunity to develop their muscles, their bone and their growth. While Mrs. Johnson has not exhibited at the recent California shows, she probably has won as many premiums as any exhibitor on the Coast, and expects, before many seasons pass, to have a stable of saddle horses to send East and hold their own with the most noted stables of the country. She gives a silver trophy valued at $100 to best foal by Lord Denmark at the California State Fair annually, and this ,together with that stallion's proven ability as a sire, has made his services in much demand. He is not in service, however, at the present, but is being used by Mrs. Johnson through the splendid equitation paths of Golden Gate Park, where his beauty and intelligence create much admiration, and habitues of the park are always on the alert for this talented equestrienne and her beautiful mount.

Notes and News

Harness affairs are being "whooped up" in California.

✣ ✣ ✣

The California harness horse breeders and trainers are live ones and are going after the "bacon." '

✣ ✣ ✣

"Lively dope" is what we want and what your neighbor wants. Where is that list of horses you are training?

✣ ✣ ✣

There are only a few "knockers" among the horsemen of California, and they have all promised to be good this year. Let us hope.

✣ ✣ ✣

Secretary Waddell, of the California Fair and Racing Association, spent a week in Southern California.

✣ ✣ ✣

From Salinas to Phoenix the boys of the California Fair and Racing Association will be there with bells on.

✣ ✣ ✣

C. A. Harrison of Seattle is expected to "blow in" to California. Mr. Harrison writes that if we see or hear a wild looking Irishman coming down Market street we will know he has "hit the town."

✣ ✣ ✣

The big things of the world are not done on blackboards; it takes hard work, brains, effort and all-fired pepper and pulling together to make any business pay. Especially the horse business.

✣ ✣ ✣

The San Francisco Driving Club expects to start the ball a-rolling in a few weeks. Things are picking up around the stadium and the fans can be seen starting out like the "early birds" every morning.

✣ ✣ ✣

Silkworthy, offered for public service at Kenwood-Cal., is one of the best bred horses in the books and priced at such a nominal charge should get some good mares to his court.

✣ ✣ ✣

The wise horseman will insure his horses now, getting protection during the breeding season. Two of the best companies in the business are doing business in California and will send a man to talk insurance at any time, upon receipt of a postal card. Better be safe than sorry.

✣ ✣ ✣

"Pop" Durfee, of Oakland, is beginning to look natural again. With the persistent "nagging" of the editor and Mrs. Durfee, we have his moustache once more. It's still a little ragged, but by the opening of the season "Pop" will be as attractive as ever. Just now, however, he looks like Al Thomas.

✣ ✣ ✣

Ivanhoe Whitted, the tireless Iowa booster and horse lover, says the prospects for a successful sale at Des Moines are growing more encouraging every day. Some extra good consignments have been made by prominent western breeders and a demand is coming in for catalogues.

✣ ✣ ✣

A board of directors for the Petaluma Driving Club has been elected as follows: Louis Founcrault, Dr. H. B. Wingtringham, N. Nelson, S. O'Leary and Oscar Glahn. Secretary J. Dupon is instructed to write to the different driving clubs in the state and invite them to Petaluma during the year. A track committee was appointed, consisting of Ed Millerick, J. Dupon and W. Silva. The club has decided to start the races the first Sunday in June, which falls on the 3d.

✣ ✣ ✣

They are working on the northern Colorado racing circuit to include seven towns by taking in Casper and Douglas, Wyoming. The dates thus far set are: Loveland, August 28-21; Longmont, September 4-7, and Sterling, September 11-14. These towns will hold agricultural fairs in connection with the race meetings and will provide a good program of entertainment aside from the racing and fair. Greely will not hold a meeting this year unless some club or society other than the Island Grove Park Racing Association takes it in charge. In case this is done, the present organization will turn over its membership in the American Trotting Association as well as assist in every way possible to make it a success. The scheme is to get in Brighton and Platteville to fill the hand.

✣ ✣ ✣

A meeting of representatives of the fairs comprising the North Missouri Fair Circuit was held in Trenton, Mo., March 1, with the following present: D. Clark Thomas, Knox City, Mo.; T. R. Davis, Green City, Mo.; R. E. Maupin, Pattonsburg, Mo.; Dr. J. A. Asher, J. W. Schooler, W. R. Ward, S. Day, Trenton, Mo.; H. I. McKinley, Smithville, Mo., and E. Day White, Mt. Vernon, Mo. Dr. J. A. Asher was re-elected circuit president and T. R. Davis circuit secretary. These dates were assigned: Knox City, August 14-17; Green City, August 21-24; Pattonsburg, August 28-31; Trenton, September 4-7. The following uniform classes were adopted: Three-minute trot, 2:30 trot, 2:20 trot, 2:15 trot, three-year-old and under pace, 2:25 pace, 2:10 pace, 2:14 pace, 2:11 pace. Good saddle and show horse classes also will be given in connection.

Secretary Davison, of the Los Angeles District Fair, has assured the horsemen of a good race meeting in connection with that great fair this fall.

✣ ✣ ✣

Fred Ward, popular and hustling manager of Hemet Stock Farm, says he believes there is a good chance for Hemet coming in on the California circuit, in which event they will take the week following Riverside.

✣ ✣ ✣

J. B. Stetson, of the Midway Farm, Kearney, Neb., has been called East by the management of the Midway Stock Farm, and much to the regret of California horsemen and Mr. Stetson, this good stable will be campaigned through the Middle West.

✣ ✣ ✣

Warren Dennis, of Farmington, Utah, has 17 head of splendid horses in his stable and expects to land some more of good class before the season opens. He has written for program of California circuit and says he probably will ship down here this year instead of through Nebraska and Great Western, as he anticipated.

✣ ✣ ✣

The officers of the California Fair and Racing Racing Association are going after things in a business like way. They have organized a business association and intend to make business where there hasn't been any business for them in years.

✣ ✣ ✣

George Ryan has his hands full at Pleasanton. With several stallions doing a big breeding business, and some aged horses and campaigners getting their "daily jog," Mr. Ryan has a barn full of youngsters that he is breaking and he has to "step lively" all day long.

✣ ✣ ✣

There are nineteen grandly bred stallions advertised in this issue of the Breeder and Sportsman. Look them over, they are the genuine thing backed up by their ancestors and breeding. They don't need any "pure food" advertising bill to take care of them. What they are and what they have done is in facts and figures.

✣ ✣ ✣

Of course, the horse business would be a dead issue if the horsemen left it to other people to look after their affairs. Some horsemen do this but California horsemen are hitting the ball. They have some good horses; they know the people of the West love the "Sport of Kings" and they are arranging to have a season of good racing.

✣ ✣ ✣

M. L. Woy, of Fresno, reports some good mares coming to the court of his grandly bred stallion, Stanford McKinney. Stanford McKinney has never had much opportunity but has made the best of what he has had; siring Miss Macklie 2:09¼, Pavana 2:10¼, Kinneysham 2:13¼ and Silente 2:19, and has as promising a lot of youngsters ready for this year's trials as any stud in the state.

✣ ✣ ✣

Mexico, Mo., the best fair town on earth and which makes the writer think of "home and biscuits," has announced their annual fair dates as August 14 to 17 inclusive. Mexico will be on the Missouri-Kansas Grand Circuit and the third fair in the Missouri division. A splendid speed program, with liberal purses is promised. Running races also will be featured every day and probably a $1,500 saddle horse stake.

✣ ✣ ✣

C. A .Harrison, the lover, writer and owner of good horses, has been visiting in his own home town, Vancouver, and incidentally hobnobbing with the horsemen. Of course C. H. enjoyed the horsemen and the horses so much that he wants all other western horsemen to share in the news, and has furnished us with the important matters. We wish there were a few more like Mr. Harrison. It would be "sum punkins" to fill the paper full of good lively "dope" every week.

✣ ✣ ✣

The representatives of fairs and horsemen from every section of California in San Francisco today, indicates that there will be an enthusiastic and business like meeting at the Hotel Manx, this afternoon, when permanent officers and directors of the California Fair and Racing Association will be elected; dates set and matters of importance to the fair managers and horsemen threshed out. Mr. Waddell, the secretary, has received wires and letters from several associations which have not been represented heretofore, which indicate they will have representatives here today.

✣ ✣ ✣

Frank E. Burton is a very busy man at the old McKinney Stables on 36th Avenue; he is preparing a string of choice ones for the amateur races. Among the lot are the well known performers Harold C. and Vera Hal, owned by Harold Cohen; Merrylina, an old time favorite that formerly raced on the circuit in the stable of A. Ottinger; a very promising three-year-old, by Aerolite, with a matinee record of 2:15; the old reliable and consistent pacer King Pointer by Star Pointer, who has a matinee record of 2:10; a classy looking black two-year-old colt by Derbertha Bells, dam Abbie McNutward, owned by James McNamara, which shows great promise; a three-year-old filly by Moko Hall, dam by Kinney Lou, which looks like a good two-year-old. These horses are all doing well and will be heard from when the circuit opens.

Riverside, California, has taken the date following Bakersfield for their fair this year and will be one of the livest towns on the 20 week circuit.

✣ ✣ ✣

Ted Bunch is wintering at the Arizona State Fair Grounds and has in his string the sensational pacing mare Waynetta 2:03¾ with which he expects to clean up this season.

✣ ✣ ✣

T. E. Pollock of Flagstaff, Arizona, has a stable of ten head at the Arizona State Fair grounds. Mr. Pollock's horses are under the management of Fred Carman, and several of this string will undoubtedly be entered through the California Circuit this year.

✣ ✣ ✣

Millard Sanders will be ready shortly to ship his stable to North Randall, Ohio; as he has not a full carload he would be glad to hear from anyone who has any horses to ship in the near future. He will be in Pleasanton until shipping time.

✣ ✣ ✣

Dave E. Everett, for many years in charge of the Southwest Department of the Spirit of the West, has been made Superintendent of Speed of the Bethany, Missouri, fair. Mr. Everett is now in business at Bethany and his affiliation with the fair association at that place assures a good program from both the association and the horsemen.

✣ ✣ ✣

Secretary Waddell of the California Fair and Racing Association received a wire from Eureka fair officials this week stating that everything assures horsemen Eureka's hat is in the ring. "We have made ample arrangements for track, finance and support of a good fair and race meeting," the message read. Ferndale, in the same county, has lined up and is taking a convenient date.

✣ ✣ ✣

It is claimed that about one-fourth of the ear corn fed to animals is not digested. If this be true a steer fed three or four months as he is being fattened wastes about three bushels of corn. This would be enough to pay the cost of grinding or crushing about 75 bushels of ear corn, estimating the corn worth 50 cents and grinding at about 2 cents a bushel. As a matter of fact corn at this writing is worth over a dollar a bushel.

✣ ✣ ✣

Marvin Childs shipped the Peterson stable to Indianapolis the last of February and will prepare Ben Earl, p. 2:00½, Baxter Lou, p. 2:11¼ and others for racing over mile tracks. At Omaha admirers of the trotter and pacer are expecting a race between Ben Earl and Single G., over the half mile track near Benson, as Mr. Peterson is willing to race Single G. at Youngstown, O., providing the managers of that horse will consent to a race at Benson during the June meeting.

✣ ✣ ✣

One does not necessarily have to be a lover of dogs to appreciate John Taintor Foote's latest book, "Dumb-Bell of Brookfield." However, it will be a rare event if one doesn't love them and is not an enthusiastic sportsman after reading this brilliant author's latest offering to the public. Those who read Mr. Foote's "The Look of Eagles," positively the best horse story ever written, expected something good of him and they are not disappointed in "Dumb-Bell of Brookfield," which is written by one who loves dogs, for dog lovers. Those who read it will have joy in their hearts and just a little catch in their throats as they lay it down.

✣ ✣ ✣

With the breaking and training days here and the time for the forthcoming events that make horse history not far off, every horseman should take an inventory of his equipage and provide for every emergency. While the class of harness and sulkies in many instances do not win the race, it is freely admitted that these accessories have "saved the day" many a time. Now, while the colts are getting their first lessons, is a good time to have new equipment; it may save a horse for you, prevent a serious accident, and one is always sure of better results when there is an unlimited wardrobe around the training stable. The time is not far distant when every horseman will be off to the fairs, and one's horses like one's self, are often judged by their appearance; good "equipment" means as much to a horse as good purses to the driver. J. David West, San Francisco's leading dealer of Harness and Turf goods, has everything that a good stable needs in stock and invites the horsemen of the West to visit his establishment at 1018 Fillmore street and look over his attractive display. Mail orders will be promptly answered and goods guaranteed.

Col. Brown's Stable to be Dispersed.

The editor of the Breeder and Sportsman regrets to chronicle the dispersion of Col. Paul Brown's great stable of show horses, which are to be sold at Durland's, in New York, April 4. Col. Brown is the veteran saddle horse fancier of Missouri. He has been responsible for many of Missouri's most famous horses being bred in or brought to Missouri, among them My Major Dare, which he sold to Miss Loula Long for $10,000. In his consignment to Durland's sale will be Missouri's champion gelding and winner of the richest saddle horse stake in 1916, Johnny Jones. There are seven horses in his notable consignment.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Changer In Oregon Laws.—Klamath Falls.—According ad advices received by Henry Stout, game warden, from Carl D. Shumaker, State Game Warden, a nnumber of important changes in the game laws of the state, as they are applicable to Klamath county, were made by the last session of the Legislature.

The first change of importance was with reference to the use of dogs in chasing or hunting deer. The new law permits no person or persons making use of a dog in hunting, pursuing or killing any of the game animals of the state of Oregon. It is also provided that any dogs found running any deer shall be declared a nuisance and at such time killed by the game warden or other person entrusted with the enforcement of the game laws.

Amendments as follows have been made: "One-half of all fine moneys hereafter shall be forwarded to the State Treasurer to be deposited in the game protection fund."

Both men and women are obliged under the new cade to take out a hunting license, although women are exempt from purchasing a fishing license. The price of hunting licenses has been increased from $1 for the year to $1.50, beginning May 21, and the same is also true of the angler's license fee. The Chinese pheasant hen is being protected, and it is unlawful to kill that bird at any time hereafter. The deer limit has been changed from three to two, and the trout limit reduced from 75 to 50 fish or 35 pounds in any one day.

Los Angeles Club.—Frank H. Mellus captured the much sought for John C. Cline diamond watch charm at the Los Angeles Gun Club on Sunday. He did not get this prize, however, without doing considerable shooting. After the regular program was completed, it was found that Mellus, J. F. Dodds and F. H. Mellon were all tied for the prize, so it was decided to shoot off at fifty targets.

Mellus and Dodds were put at twenty yards, while Mellon shot from the 19-yard mark. Mellus won the charm by smashing 49x50 targets, while Dodds was a very close second with 48x50 breaks and Mellon had 46x50. J. F. Dodds was the high gun for the day, breaking 99x100 targets from the 20-yard mark. Ed Mitchell also broke 99x100. There were eighteen shooters who broke more than 90x100 targets at the L. A. club Sunday.

Mrs. H. Pfirrmann captured the special silver trophies put up by L. J. Petit. Mrs. Pfirrmann broke 82x100. Mrs. Mellon took second prize with 75x100 breaks. There were fifty-eight shooters present at the club and during the day there were more than 6000 targets thrown. During the past week there have been 10,510 tarhawks throgn, which brings the total for the season up to 291,810. Following are the scores:

J. F. Dodds, 20 yds., 99x100; Ed Mitchell 16—98, P. G. Peterson, 16—97, Frank Free 17—96, H. Pfirrmann 20—95, H. E. Sargent 18—95, V. A. Rossbach 16—95, George Oliver 16—95, O. A. Evans 19—93, Geo. Tuckett 18—92. R. O. Pool 16—92, Wm. Dougherty 16—92, E. K. Mohler 20—91, L. R. Mellus 18—91, C. W. Fish 18—90, F. H. Mellus 20—90, O. Council 19—90, C. W. Clement 16—90, L. Garnsey 16—89, W. A. Cornelius 19—89, L. J. Petit 16—89, Geo. H. Melford 16—89, P. O. Long 18—87, B. H. Carnahan 16—87, H. C. Cline 18—87, J. C. Famechon 17—86, L. M. Packard 19—86, F. H. Mellon 19—85, T. N. Dunn 16—85, F. Grewell 18—81, J. Arneil 16—84, C. H. Betz 16—83, Mrs. Pfirrmann 16—82, Wm. Kennedy 16—81, S. C. Miller 16—79, E. Mueller 16—73, W. H. Whitcomb 17—71x75, C. D. Hagerman 17—46x50, H. H. Hall 17—45x50, C. F. Nichols 18—43x50. Others at 16 yards: J. F. Cowan 61x75, J. R. Tomlin 61x75, C. Bournique 45x75, A. Pachmayr 46x50, C. L. Nickle 46x50, F. H. Teeple 45x50, F. M. Gibson 44x50, F. H. Nichols 43x50, W. S. Oliver 43x50, G. Persinger 41x50, Guy L. Pulley 40x50, O. D. Ashton 37x50, O. P. Lockhart 36x50, Dad Skinner 35x60, E. Foley 30x50.

Portland Club.—More than three score shooters responded to the appeal of Secretary-Treasurer Henry R. Everding to attend the merchandise shoot in honor of John G. Clemson, president of the Portland Gun Club, at the Everding Park traps on March 11th.

High gun among the amateurs was tied at 46 birds out of a possible 50 between Charles Leith, Frank M. Templeton and Frank M. Troeh. E. B. Morris, a Portland professional, broke all his birds, while Hugh E. Poston, of San Francisco, was the second professional in line with four misses out of his 50.

J. H. Joyce got the low prize of the day, because he broke only three bluerocks out of the 50 thrown. For his efforts he received a sack of onions, a much-coveted prize because of the present H. C. of L. Charles Leith was first in Class A, with James W. Seavey second, while Dr. O. D. Thornton led class B and E. H. Keller was next.

Class C honors went to A. K. Downs, with T. J. Mahoney second, and W. A. Leith broke enough targets to win the Class D prize, while W. J. Derrhick went second. J. G. Kamm came out on top in Class E, but he was pressed by A. L. Zachrisson. F. Jackson and E. L. Clark divided first and second money in Class F. G. Turner and Felix Friedlander were the best in Class G, while Phil Metschan Jr. won first place in Class H and J. H. Joyce was second .

Between events the board of directors of the Portland Gun Club, composed of John G. Clemson, president; H. A. Pollock, vice-president; W. C. Bristol and A. W. Strowger, presented Henry R. Everding, secretary-treasurer of the club, with a beautiful trophy in appreciation for the efforts Mr. Everding has put forth to benefit the "greatest gun club in America." "Hi," as he is more familiarly known, responded with a speech which was a "knockover." Following are the scores:

J. E. Reid 40, Abner Blair 44, E. G. Hawman 38, J. G. Kamm 29, J. E. Cullison 41, F. C. Jackson 32, M. Turner 25, W. L. Leith 33, B. J. Hecker 18, W. J. Derrhick 33, Joseph A. Stutt 30, J. G. Wilson 15, J. P. Bull 45, A. W. Strowger 36, George Bertz 24, H. Holmberg 4, W. C. Bristol 29, H. A. Pollock 34, H. N. Strong 24, F. J. Sewell 40, W. D. Strong 13, C. B. Handy 40, E. H. Keller 43, Charles Feller 45, E. B. Morris* 50, W. C. Carter 15, R. P. McClelland 37, A. K. Downs 39, F. C. Griffin 28, Phil Metschan Jr. 25, Peter Whitney 41, R. T. Strong 23, L. L. Mulit 28, J. G. Hurd 27, Hugh E. Poston* 46, Mrs. Ada Schilling 45, James W. Seavey 45, D. F. Allen 23, Ben Anselmo 14, Frank M. Troeh 46, G. G. Clark 35, W. F. Lipman 22, John G. Clemson 31, T. J. Mahoney 40, Eddie Long 33, Raymond Winters 29, R. P. Knight 45, F .O .Jop 31, Charles Leith 46, J. S. Crare 34, A. L. Seguin 32, Jas. K. Simpson 30, Felix Friedlander 24, A. L. Stone 12, A. L. Zachrisson 36, A. Woelm 41, M. Sanftenberg 17, J. H. Joyce 3, A. L. Estes 23, Frank M. Templeton 46, W. B. Starr 33, E. L. Clark 35, C. L. Diven 28, P. J. Holohan* 42.

Seattle Association.—Over thirty shooters contested for the prizes offered by the Seattle Trapshooters' Association in the first merchandise shoot of the season. The programs of fifty targets each furnished the sport of the day. Class shooting was used in the shooting for merchandise prizes, winners being as follows: Class A—D. Reid first, C. L. Templeton second, Hi Follrich third, Hugh Fleming fourth. Class B—Ralph Kinzer first, Fred Landwehr second, H. Smith third, J. H. Hopkins fourth. Class C—W. B. Taft first, A. W. Mathis second, H. Jun third. Class D—Jack Lewis first, J. H. Davis second.

The second program for the possession of an oil painting presented to the club by A. H. Richter, a well known Seattle artist and sportsman, and two other prizes, were won by H. Smith, first, Tom Wilkes, second, and A. A. Benson, third.

L. H. Reid furnished the high score of the day and stood high gun with 98. Deskin Reid kept up the family record and furnished the high amateur score by shooting 95.

H. R. Everding, secretary of the Portland Gun Club, presented the Seattle Association with a sterling silver trophy to be contested for at the opening shoot of the Northwest Washington Trapshooters' League which opens on their grounds March 25th. The scores:

At 50 targets—L. H. Reid* 49, Deskin Reid 47, Geo. Hambright* 46, C. L. Templeton 46, Hi Follrich 45, R. Kinzer 44, Fred Landwehr 44, Hugh Fleming 44, Matt Grossman 44, H. Smith 43, J. H. Hopkins 43, R. S. Searle 42, C. E. McKelvey 42, Tom Wilkes 42, F. Campbell 42, Dr. Hill 42, D. Rhodes* 42, A. Drake 41, C. W. Bundy 39, Jack Lewis 39, W. B. Taft 37, J. H. Davis 37, A. W. Mathis 36, H. Jun 34, J. R. Owens 22.

At 100 targets—L. H. Reid* 98, Deskin Reid 95, Geo. Hambright* 94, Hugh Fleming 92, C. L .Templeton 92, H. Smith 90, Tom Wilkes 90, Hi Follrich 90, Matt Grossman 89, D. Rhodes* 88, Ralph Kinzer 87, Dr. Hill 86, Fred Landwehr 85, F. Campbell 85, J. H. Hopkins 84, C. E. McKelvey 83, R. S. Searle 82, A. Drake 82, Jack Lewis 78, J. H. Davis 76, W. B. Taft 75, J. R. Owens 62, A. A. Benson 42, Archie Adams 37, E. C. Gaumnitz 34, C. B. Blethen 28.

Yours, E. A. FRY, Sec'y.

Seattle, Wash., March 11th.

No Tournaments After October 15—So many tournaments held last year after October 15th were virtually failures from an attendance standpoint that it was the opinion of our Directors, at their last annual meeting, that it would be well to refrain from registering tournaments in 1917 after said date. Gun clubs in applying for registration of tournaments will please be governed accordingly.

THE INTERSTATE ASS'N,

E. REED SHANER, Sec'y.

New Jersey farmers are offering a bounty of $3 for foxes.

A. A. T. ASSOCIATION HAS 60,000 MEMBERS.

Organized a Little More Than Year Ago to Bring Together Amateur Trapshooters and Clubs.

[By Peter P. Carney.]

One year of the American Amateur Trapshooters Association is sufficient proof that the organization will be with us for many years.

The association has for its object the banding together of amateur trapshooters to the mutual advantage of all members and for the purpose of providing suitable trophies as rewards of skill.

Approval met the organization from the start, and in its first year 47 State organizations, six Canadian provinces, and the trapshooting organizations of Alaska and Hawaii came into the fold. In these state associations are 1286 clubs, with an individual membership of 60,000.

Trapshooting as a sport has grown wonderfully during the past half dozen years and the field was fertile for the A. A. T. A. The officers elected when the association was formed are officers now. They are: President, John Philip Sousa, of New York; first vice-president, Dr. Horace Betts, of Delaware; second vice-president, Charles W. Billings, of New Jersey; third vice-president, James L. Kellogg, of Massachusetts; and secretary-treasurer, Stanley W Withe, of Maryland.

In addition to these officers the president of each State organization is a State vice-president and is the representative of the A. A. T. A. in that State The headquarters of the organization is in Baltimore Md The association specializes upon a medal system of improvement . Upwards of 100 medal shoots are conducted each month. These medals are awarded in the shoots of the clubs that are members They are called "proficiency medals," for it is necessary to win a 75 per cent. medal before winning an 80 per cent. one. The medals are of bronze, silver and gold and are awarded for averages of 75, 80, 85 90 and 95 per cent. Special medals are awarded to women shooters who average more than 50 per cent

By this method the A. A. T. A. has brought along mediocre trapshooters to the front rank. Captain Jack Wulf, the winner of the last Grand American Handicap, is an enthusiastic follower of the A. A. T. A system and credits it with aiding him in his great victory. As we understand the method it is the means of concentrating upon every shot the mind, eye and nerves, which is the "meat in the nut" of trapshooting success.

The A. A. T. A. and the Interstate Association for the Encouragement of Trapshooting are in perfect accord. They work along different lines but with the same end in view. The Interstate Association records the averages of the trapshots who engage in the registered tournaments; the A. A. T. A. records the performances of the thousands who do not engage in the registered events. Between the two organizations it will be possible to ascertain the ability of nearly every trapshooter.

The A. A. T. A. has united the amateur trapshooters and trapshooting clubs for the mutual benefit and improvement of the sport and is endeavoring to increase interest in club shooting and to bring about a greater development of the individual trapshooters in the same way that the National Rifle Association is fostering the interests of the rifle shooters.

During the first year of the association Pennsylvania clubs to the number of 163 became affiliated This is the greatest number from any one State Pennsylvania appears to be the hotbed of trapshooting and trapshooting clubs, having more trapshooters and clubs than any State in the Union. Illinois is running the Keystone State a close second. One hundred and twenty-two clubs came in from Illinois. New York has over 100 also, with 117.

The other States came through in this manner: Iowa, 93 clubs; Wisconsin 55, New Jersey 52, Indiana 47, Michigan 45, Missouri 35, Minnesota 33, Nebraska 31, Maryland and Kansas 38, Massachusetts 27, California 24, Connecticut and Montana 22, Kentucky 20, Virginia 18, Washington 17, Oklahoma 16, Delaware 15, Colorado, Ohio and Oregon 12, North Carolina and West Virginia 11, South Dakota, Alabama, New Hampshire, Vermont, 10; Arkansas, No. Dakota, 9; Florida, Idaho, Texas, 8; Maine, Mississippi and Louisiana, 6; Arizona, Tennessee, Utah, 5; Nevada, Rhode Island, 4; South Carolina 3, District of Columbia 2, New Mexico, Wyoming, 1.

There are 52 Canadian clubs in the membership, two from Alaska and one from Hawaii.

High Cost of Pets—Chicago.—Idaho white potatoes sold at $3.05 on the track in Chicago last week, the highest price in local history. Wisconsin whites jumped to $2.90.

Pet elephants also went up. So did tigers, red nose apes, the horned tapir, monkeys and canary birds. Canary birds which in other times sold at $2.75 were quoted at $12.

Investigators official and unofficial, engaged on the problem, stumbled on the live pet market and found dealers complaining that their business had been hit worse than any other.

The investigators, however, came upon a recent rarity, namely, something the price of which had gone down—gold fish. They had decreased in price, largely because people don't care to pay the advanced prices for their food. The glass globes they are kept in have advanced.

TONEY PRIOR SETS LONG RUN RECORD.

Breaks 117 Straight and 149x150 at Golden Gate Shoot; Ted Handman Has Perfect Score.

A gathering of sixty-seven at the monthly shoot of the Golden Gate Club at the Alameda grounds on Sunday made the smoke fly out of the blue rocks. In the regular club program of fifty birds, Toney Prior and Ted Handman finished in a tie, each having a perfect score. Close behind were H. R. Phinney, Frank Webster and H. A. Hine with 48.

Toney Prior was in especially good form and smashed out 117 straight without a miss. Clarence Nauman and other statisticians set up the claim that it was a record run for this vicinity. Toney continued his good work by continuing with only one miss out of 15 0targets.

The day was ideal for high scores and right on down the line the boys banged away. Among the professionals, Len Hawxhurst showed his consistency to get 49 and Clarence A. Haight was right behind with a 48x50 score. The other marks established were creditable. They were as follows:

Inland Empire Tourney—One hundred and thirty contestants in The Spokesman-Review Inland Empire championship trapshooting tournament are pulverizing the clay disks for a percentage of 80 or better ,the class of shooting having shown a decided improvement during the last week. Of this number 35 have broken 90 per cent or more and nine, 95 per cent or more.

The nominal individual leaders are G. Chiesman of Lewiston, W .Warren of Kellogg and J. Hickman of Palouse, each of whom has taken part in only one match . All three have perfect records.

The real leader is George Arland, the "old reliable" of the Garfield Gun Club . He has broken 74 out of 75 bluerocks, for a percentage of better than 98.5 In his last two matches he did not lose a bird.

That Mr. Arland is not to be allowed to make a runaway race for the individual championship, however, is quite evident as Harry Gayhart of Kalispell and E. Johnson of Kellogg are only one bird behind, each having broken 73 out of 75, for a percentage of better than 97.

Mrs. Charles A. O'Connor of Spokane is the only woman shooter who has a mark of better than 80 per cent. She is well up on the lsit with 64 out of 75.

The averages per 25 targets of all the shooters who have broken 80 per cent or more in the matches follow:

G. Chiesman, Lewiston, 25; W. Warren, Kellogg, 25; J .Hickman, Palouse, 25; G. Arland, Garfield, 24.67; E. Johnson, Kellogg, 24.33; H. Gayhart, Kalispell, 24.33; A. C. Despam, Pendleton, 24; J. A. Ford, Palouse, 24; J. Nelson, Kellogg, 24; F. Steckman, Kalispell, 23.67; F. D. Stoop, Kalispell, 23:67; Godsey, Pomeroy, 23.5; Hibbs, Lewiston, 23.5; Leo Matlock, Pomeroy, 23.33; Hahn, Lewiston, 23.33; Tobe Arland, Garfield, 23.33; H. J. Sawyer, Pomeroy, 23.33; Bert Lemon, Garfield, 23; M. P. Epencer, Wenatchee, 23; Gilbert, Pomeroy, 23; Turner, Wallace, 23; L. E. Oveuden, Wenatchee, 23; B. F. Gregory, Spokane, 23; Fred Porter, Kellogg, 23; Fred Peden, Garfield, 23; R. E. Jones, Kellogg, 23; Sebastian, Kellogg, 23; Thorp, Pendleton, 23; Nicholson, Kellogg, 22.67; Mr. Murien, Pendleton, 22.67; O. E. Lynch, Palouse, 22.5; D. P. Farthing 22.5; Murray, Lewiston, 22.5; B. M. Hayes, Spokane, 22.33; C. E. Owens, Wenatchee, 22.33; G. B. Joslin, Palouse, 22.33; Flohr, Wallace, 22.33; D. Mars, Spokane, 22; Walker, Wallace, 22; Kimmel, Kalispell, 22; W. J. Houser, Pomeroy, 22; F. E. Butler, Lewiston, 22; C. A. O'Connor, Spokane, 22; H. Clodius, 22; Roland, Kellogg, 22; B. Dickson, Pendleton, 22; T. Scott, Wallace, 22; White, Wallace, 22; Gibbs, Wallace, 22; Coston, Palouse, 22; Chard, Pomeroy, 22; Copelan, Palouse, 22; B. Houton, Kalispell, 21.67; L. Drumm, Lewiston, 21:67; Johnson, Lewiston, 21.67; T. B. Ware, Spokane, 21.67; Ingersoll, Kellogg, 21.67; Kennett, Kellogg, 21.67; Hadley, Kellogg, 21.67; J. Adams, Wenatchee, 21.67; N. M. Regan, Palouse, 21.67; Werkheiser, Wallace, 21.67; N. G. Pogue, Wenatchee, 21.5; L. Robinson, Pomeroy, 21.5; Green, Kellogg, 21.5; Brown, Spokane, 21.5; McElroy, Spokane, 21.5; R. H. Pratt, Sunnyside, 21.5; Mrs. C. A. O'Connor, Spokane, 21.33; Ingram, Pendleton, 21.33; H. J. Goesey, Spokane, 21.33; S. A. Easton, Kellogg, 21.33; Stillman, Pendleton, 21.33; R. A. Miles, Spokane, 21; G. K. March, Spokane, 21; G. C. Jewett, Palouse, 21; J. H. Spence, Palouse, 21; Saunders, Pendleton, 21; Bloomer, Wallace, 21; Taylor, Lewiston, 21; McCornack, Wallace, 21; Jennings, Wallace, 21; Gilmore, Wallace, 21; Johnson, Garfield 21; Coolidge, Palouse, 21; Hoffman, Wenatchee, 21; Warden, Kellogg, 21; Lemon, Kellogg, 21; Prather, Kellogg, 21; Butler, Wenatchee, 21; Brown, Wenatchee, 21; Hadley, Pomeroy, 21; Westcott, Garfield, 21; Forger, Garfield, 21; Venable, Wallace, 21; Stier, Wallace, 21; Lynch, Palouse, 21; Dudley, Palouse. 20.67; Van Horn, Sunnyside, 20.67; Shriver, Spokane, 20.67; Ebbley, Wallace, 20.67; Gochnour, Sunnyside, 20.33; France, Wenatchee, 20.33; Lachmund, Potlatch, 20.33; Beckman, Lewiston, 20.33; Hill, Lewiston, 20.33; Cochran, Spokane, 20.33; Coutts, Pendleton, 20.33; Turner, Sunnyside, 20.33; Johnson, Wallace, 20.33; Wann, Lewiston, 20; Mann, Spokane, 20; Robin, Kalispell, 20; Wieseman, Spokane, 20; Robinson, Pomeroy, 20; McConkey, Wallace, 20; McDougal, Kellogg, 20; Cole, Lewiston, 20; Van Horn, Lewiston, 20; Heitfield, Wallace, 20; Smith, Kellogg, 20; Timpe, Kellogg ,20; Roose, Kalispell, 20; Metler, Kalispell, 20; Nicholson, Pomeroy, 20; Johnson, Garfield, 20.

Green Lake Club.—Green Lake gunners faced a pleasant day at the traps Sunday, March 11th, thirty-one shooters going through the program of fifty targets. Dr. King, with forty-nine to his credit, headed the list of both amateurs and professionals, D. R. Baker and L. S. Barnes following a close second with forty-eight out of fifty.

A general discussion of what the club would put up as prizes for the season was entered into. Nothing definite was decided as to what the prizes would be, that matter being left to the secretaries, with instructions to decide upon useful silver articles. The same system as used last year in giving added targets, in order that all contestants may be placed on an equality basis, will be used, and although prizes have not as yet been selected, Sunday's shoot marked the opening of the competition for these prizes. D. R. Baker with two added targets, and W. H. Carstens with four, topped the list in this respect, each recording perfect scores. What the season's trophies are to be will be announced later. Several tries with the 20-gauge were made, for the special trophy in this class, but the two marks of twenty-one made three weeks ago were not beaten.

Additional clearing operations were started on the grounds in order that added room for parking automobiles may be had, as the club expects facilities to be taxed to the limit to handle the big crowd at the rapidly approaching state tournament in May.

C. L. Hofman, M. J. Louridson, W. C. Bourchert and H. R. Frederickson shot with the club for the first time and became members. The scores:

Dr. King 49, L. S. Barnes 48, D. R. Baker 48, W. H. Carstens 47, I. M. Fisher 40, Geo. B. Baker 44, J. W. Geltz 42, G. A. Conklin 42, Al Mertens 41, Dr. A. B. Kidd 40, Dr. R. V. Mills 40, R. L. Woodman 40, P. E. Sullivan 39, Geo. O. Colwell 39, H. E. Gleason 39, E. Chantrell 38, Dr. S. W. Giffin 38, C. F. Rinehart 37, W. C. Borchert 37, H. J. Trimmer 37, Dr. S. W. Case 36, W. M. Elliott 35, H. R. Frederickson 33, W. B. Cook 32, Ed White 31, E. W. Eller 30, M. A. Rosenfield 29, Dr. E. C. Lanter 28, E. P. Buck 21, M. J. Lauridson 21, C. L. Hofman 21.

TRAPSHOOTING FIXTURES.

August29, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

March 25—Denver, Colo.—Lakewood Country Club. "Old Policy." J. B. Milton, Secretary.

March 25—San Jose, Cal.—San Jose Gun Club. "Old Policy." O. N. Ford, Secretary.

March 25—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Seattle Trapshooters' Association. W. B. Taft, Secretary.

April 8—San Francisco, Cal.—Golden Gate Gun Club. C. A. Haight, Secretary.

April 15—Lindsay, Cal.—Lindsay Gun Club. Chas. C. Barieu, Secretary.

April 20, 21 & 22—Del Monte, Cal.—Del Monte Gun Club. J .F. Neville, Secretary.

April 22—Tacoma, Wash.—Northwest Washington Trapshooters' League Tournament ,under the auspices of the Tacoma Gun Club. E. E. Young, Secretary.

April 23, 24—Lewiston, Idaho—Lewiston Gun Club. C. E. Butler, Secretary.

April 28, 29—Fresno, Cal.—Fresno Blue Rock Club. C. B. Jackson, Secretary.

May 6—Coalinga, Cal.—Coalinga Gun Club. E. N. Ayers, President.

May 6—Bingham, Utah—Utah State Sportsmen's Association. A. R. Bain, Secretary.

May 6—Denver, Colo.—Denver Trap Club. Warren Conley, Secretary.

May 7—Crete, Nebr.—Crete Gun Club. Frank J. Kobes, Secretary.

May 7, 8—Salem, Oregon—Oregon State Tournament, under the auspices of the Capital City Rod & Gun Club. Mark Siddall, Secretary.

May 13—Everett, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Everett Gun Club. C. E. French, Secretary.

May 13—Eureka, Cal.—Eureka Blue Rock Club. W. E. Innes, Secretary.

May 13, 14, 15—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary.

May 14, 15, 16—Spokane, Wash.—Spokane Gun Club. "Old Policy." Chas. A. O'Connor, President.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden, Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24 — Bellingham, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz. -Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

New Gun Clubs.—The list of "newly organized gun clubs" which were presented with trophy cups by The Interstate Association between January 31 and March 10 follows. Clubs organized previous to December 1, 1915, are NOT eligible for these trophies. The clubs are:

Creighton Gun Club, Creighton, Nebraska; B. F. Blakeman, secretary.

Pastime Gun Club, Mead, Nebraska; O. E. Henning, secretary.

Delavan Gun Club, Delavan, Illinois; D. S. Meeker, secretary.

Monmouth County Sporting Association, Red Bank, N. J.; Wm. H. Hitchcock, secretary.

Belpre Gun Club, Belpre, Kansas; L. L. Anderson, secretary.

Bay Side Gun Club, Keyport, N. J.; H. L .Case, Jr., secretary.

Greenwood Sportsman's Club, Greenwood, N. Y.; R. P. Holly, secretary.

THE INTERSTATE ASS'N.

Pittsburgh, Pa. E. REED SHANER, Sec'y.

The Portland (Ore.) Gun Club has expended $2000 in improving Everding Park until now it is one of the finest trapshooting parks in the world. Concrete trap houses, concrete stands for the shooters, cement walks, flower beds, permanent benches have been put in.

Sportsmen's Row

✤ ✤ ✤

A new tournament has been planned by members of the Portland Gun Club and it will be known as the "goat" shoot. Each contestant has a paper goat and the match race is for 25 birds. The winner takes the loser's "goat' 'and the nimrod who loses is forced to present the winner with a box of shells and then shoot another 25 targets to try and secure it back. H. A. Pollock, vice-president and manager of the Portland club team, is the first one to lose his "goat" at the Everding Park traps.

✤ ✤ ✤

Fifty thousand Angora goats grazed in the National Forests in six Western States last year.

✤ ✤ ✤

Thirty-five States now have laws permitting the breeding and sale of all or a certain species of game.

✤ ✤ ✤

Elk and mountain sheep have increased materially in Wyoming during the past year.

✤ ✤ ✤

While in the field it is necessary for New York hunters to wear a button on their hunting jacket. This button is supplied by the State and has on it the number of the hunter's license. This was done to prevent men from hunting who did not take out a license.

✤ ✤ ✤

George Nicolai, of Kansas City, pulled down the International trapshooting event in the midwinter shoot and won $1575.

✤ ✤ ✤

On February 6th E. A. Parsons, of Portland, Ore., shipped the setter, Irene Danstone Marie, to George B. Robertson, Whaleyville, Va., to be bred to Prince Rodney's Count, and accompanying her was her daughter, Theda Bara, by Free Lance, as a present to Mr. Robertson. When the crate arrived at its destination Irene Danstone Marie was missing and to date has not been recovered. A search on the part of the express companies has demonstrated that both bitches were still in the crate when it left Chicago, and must have been lost or stolen while en route between that place and Whaleyville. Needless to state, Mr. Parsons was greatly upset over the loss of his bitch, which he considers one of the best brood bitches living today.

✤ ✤ ✤

Dr. S. B. Friend and Miss Alice Wheeler, of Los Angeles, two active members, were united in the bonds of holy matrimony about four weeks ago and are now in the Orient. Upon their return they will both take up trapshooting once more.

✤ ✤ ✤

A band of Chowchilla rabbit-chasers bagged over 1,000 jack rabbits last Sunday. The company is to be enlarged for a drive next Sunday, when an effort will be made to double the bag.

✤ ✤ ✤

The Pendleton (Ore.) office of the Biological Survey had a bonfire recently in which the scalps of 647 coyotes and 32 bob cats were used as fuel.

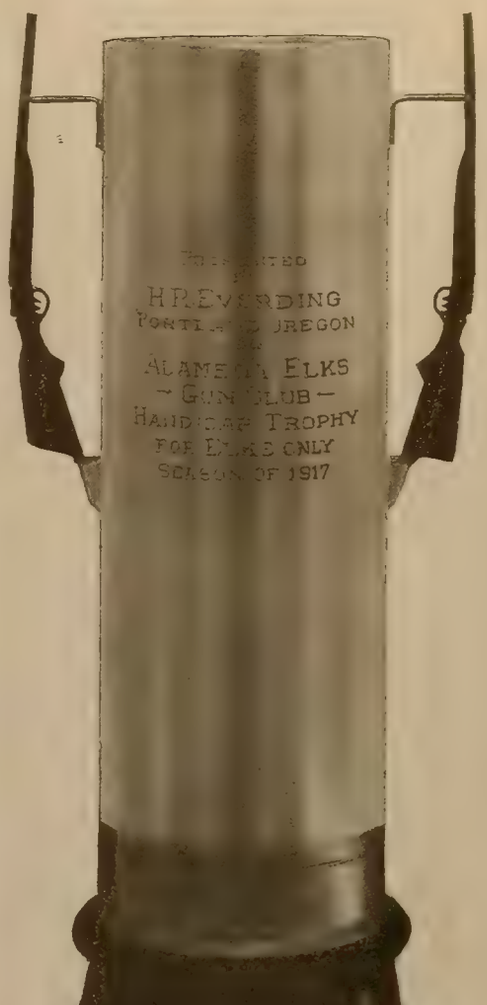
The Vallejo Club will open the season tomorrow. Ne wtraps and a comfortable new clubhouse will be evidence to visitors that the boys are looking forward to a series of happy gatherings during 1917.

✤ ✤ ✤

Going to San Jose for the registered tournament with the O. N. Ford championship singles and doubles as the outstanding feature?

✤ ✤ ✤

Officers will be elected and plans outlined for the California Chapter of the Trapshooting Indians at San Jose tomorrow. The new organization promises to be a hummer. Del Monte has been proposed as the site for the annual gathering of the some seventy-five sportsmen who have joined the charter membership roll.



Vernon Club.—Van Nest and Meek tied for high gun in the campetition held Sunday by the Vernon Gun Club for the season's class cups. The conditions called for 60 targets with handicaps. Van Nest and Meek broke 54 targets apiece.

Guy Holohan, professional trapshooter from the Du Pont Powder Company, won a purse in a special 100-bird event between Bob Bole, Stan Bruner and himself. He broke 100 straight. Bole broke 97 and Bruner 93. The results:

	Practice.	Hdcp.
C. E. Groat	36x 40	53x60
Mrs. Groat	36x 40	53x60
Bole	117x120	53x60
Bruner	112x120	50x60
Pugh	57x 65	49x60
Holohan	137x140	58x60
Meek	35x 40	54x60
Van Nest	31x 40	54x60
Reid	23x 25	49x60
Smith	..x ..	48x60
Davidson	12x20	..x..
Behrns	39x45	..x..
Meenghuber	28x40	..x..
Cooper	33x40	..x..
Kluble	34x40	..x..
Hermann	31x40	..x..

BEAUTIFUL TROPHY PRESENTED.

H. R. Everding followed up his gift of a similar present to the Golden Gate Club by presenting the Alameda Elks Gun Club with the coveted shell that is pictured here. The Portland gun devotee is encouraging a fine sportsmanlike feeling among the trapshooters of the Northwest and California by his liberality.

Seattle Casting.—A large squad of bass fishermen, members of the Seattle Fly and Bait Casting Club, visited the Beacon Hill casting pool, trying out their outfits and getting in shipshape for the opening of the fishing season. Here are a few scores made by the high men at the bait casting contest on March 11th:—

J. Schaffer, 94 per cent; C. Byler 96, J. W. Monette 95.5, J. M. Bond 94.3, W. M. Edholm 87, Les Allen 93, E. Curtiss 97, J. H. Byer 85, C. A. Wisen 78.

Angling Clubs Meet.—The annual tournament of the National Association of Scientific Angling Clubs will be held in Chicago August 31 and September 1 and 3, according to announcement by the executive committee of the organization. Silver and gold trophies worth more than $2,000 will be offered in addition to merchandise prizes for winners in nine regular events and four novelty events. Entries have already been received from many states, and President J. N. Smith of Chicago says the list of entries is larger than for any previous tournament.

Another League in N. W.—Plans are under way to form a trapshooting league among the gun clubs of Oregon and Southern Washington to be known as The Oregonian-Willamette Trapshooters' League, and two trophies awarded by The Oregonian will go to the first and second winners of the tournament.

There are more than 75 regularly organized gun clubs in Oregon alone, with an aggregate membership of more than 3000. Almost every club has several members who have won renown at the traps either at home or abroad, but the question of superiority in an open race, in which each club meets every other club on an equality, has never been determined.

The Columbia-Willimette Trapshooters' League will be run along the same lines as the Inland Empire Trapshooters' League, the members of which are competing for the Spokane Spokesman-Review trophy at present.

Under the local league rules each club will shoot its league events on its home grounds, where competitors should be able to do their best without disconcerting surroundings. The accuracy of the scores will be amply safeguarded. The competition will not involve any entry fees or other expenses to the clubs engaged or the individual competitors. All they are required to do is to shoot and shoot their best.

Amateur shooters only will be allowed to enter the Columbia-Willimette circuit and any regularly organized gun club of Oregon and Southern Washington is eligible for membership, providing each guarantees to abide by the rules and complete the schedule. The length of the season will be dependent upon the number of the clubs in the league. Thus, with a membership of 12 clubs it would require 11 weeks to complete the schedule.

Every club member in good standing is eligible and the five high guns in the trophy event shall constitute the club team, the scores to be the club's score in the league standings. Should there be a tie for fifth place on the team, it may be shot off but the score of the winner must be placed at the original score . That is, if in a regular 25-bird event four contestants should tie for fifth place ,each one breaking 21 ,then in the shoot-off, if the winner should break 24 out of 25, his original score of 21 must be turned in with the other four higher nimrods in the first place.—(Portland, Ore.)

San Jose Club.—The blue rock shoot on Sunday of the San Jose Gun Club, held on the grounds on the King Road, proved unusually interesting, as it brought out a large attendance and was the means of several new shooters joining the club. In the first event at 50 blue rocks, George Anderson and Charles Nash tied with a score of 47 each, while Mrs. Hall McLaughlin, who has been shooting but a month, broke 30 targets, a most creditable showing for an amateur in a regulation shoot. In the double events George Anderson was high man with 20 breaks out of 24 targets sprung. Following is the score in the 50-bird match:

George Anderson 47, Charles Nash 47, Hall McLaughlin 45, A. B. Jamison 42, W. J. Masters 40, A. R. Kennedy 39, H. Bridges 37, A. M. Free 36, J. H. Kelly 32, G. E. Ballantyne 32, Mrs. Hall McLaughlin 30, Wilson 29, Holmes 29, Smith 25.

On March 25th (tomorrow) a regulation shoot will be held on the grounds of the club which will be for the championship of California and Nevada, both in single and double events. Shooters from various portions of this State as well as from Nevada have already signified their intention of being present.

Colorado to Prohibit Spring Shooting.—The Senate of the Colorado Legislature, as a committee of the whole, recently passed on second reading Senator Fincher's bill prohibiting the shooting of ducks and other water fowl during the spring season. One amendment prohibits the shooting of ducks, geese, brant, swans, plover and other wading marsh waterfowl during the period from December 31 to September 15. The federal law carries the same provisions.

Under the amendments the open seasons on other kinds of game and fish in Colorado will be as follows:

Deer with horns, October 1 to 6, beginning 1924.

Male mountain sheep, September 25 to 30, beginning 1924.

Male antelope, September 25 to 30, beginning 1924.

Male elk, November 1 to 5, beginning 1924.

Prairie chickens, mountain and willow grouse, September 15 to October 1.

Sage chickens, August 15 to September 15, beginning 1924.

Pheasants and other grouse not indigenous to the state, September 1 to 20, beginning 1924.

Doves, September 10 to 25.

Bob white quail, October 1 to 20, beginning 1924.

Crested quail, October 25 to 30, beginning 1924.

Rabbits and hares, open season the entire year.

Trout and grayling, seven inches or more in length, in running streams, May 5 to October 31.

Lake trout and grayling, in lakes at an altitude of not more than 7,500 feet, May 1 to October 31; in lakes 7,500 feet or more, June 1 to October 31.

Whitefish, bass, sunfish, catfish, perch and walleyed pike, May 1 to October 31.

One provision of the law makes it unlawful to fish between the hours of 8:30 p. m. and 5 a. m.

History of Firearms and Ammunition.

The last of a series of six advertisements upon the evolution of firearms and ammunition is appearing in this issue of the Breeder and Sportsman.

These advertisements cover the historical origin and growth of weapons of the chase and defence from primitive man up to the present day. In view of the fact that a demand seems to have been created therefor, a number of requests having been received for the series from libraries, organizations and individuals in different parts of the country, The Remington Arms Union Metallic Cartridge Company, Inc., Woolworth Building, New York City, will be glad to furnish proofs of the entire set of six advertisements free upon request. The number of sets available is limited.

✤ ✤ ✤

Fred Clarke, former manager of the Pittsburgh Pirates, was a competitor in the recent midwinter trapshoot in Kansas City, Mo.

BETTER LIVE STOCK
and Agricultural Topics

Mule Trade Active.

Despite the fact that Missouri mule men have had the biggest business in the history of the trade, and that several weeks ago buyers declared the state was practically drained of good mules, there have been a number of remarkable public sales in the country districts and some great mules have been brought out. Among the good sales were those conducted by Col. J. T. Johnson, Mexico; Alex Carter & Son, Mexico; B. R. Middleton & Son, Mexico; R. B. Glenn, Columbia, and R. R. Buckner & Sons of Auxvasse. The tops of all these sales have been more than $500.

E. W. Briggs, of near Center, recently sold to O. Moors, of Spencerville, O., a pair of big show mules for $625. These mules were raised by Gray Vaughn of Monroe county, who refused $300 for them as weanlings, afterward selling them to Frank Elliot, who in turn sold them to Mr. Briggs. G. B. Dowell, of Center, well known as a successful stockman, was the bidder-up on the pair, he having offered $600 for the pair. The mules will be shown at the big fairs throughout Ohio and adjoining States this season.

J. Sam Brown, the well known Centralia horse and mule dealer, recently sold to a St. Louis buyer a mare mule for $350. This animal was 16½ hands high ,weighed 1770 and of extreme high quality.

BREEDING BEEF CATTLE IN ARGENTINE.

"Cattlemen of this country would profit by studying the methods of the Argentine cattlemen,'," said Dean Custiss of the Iowa State College, who returned a few months ago from a judging and inspection tour through the Argentine, in a recent interview.

"The Argentine is a cattleman's country," he said, "and as the other industries such as lumbering, mining and manufacturing have not been established there, that government is owned and controlled by the cattlemen. Unlike Americans usually suppose, the Argentine is not a free, wild country. The cattle industry has so developed that none of the rich plains area is open range, but under permanent fence. Although there are large farms or estancias, they are divided up into pastures, and cattle are let from one pasture to the next at intervals during the season.

"Alongside and parallel with the cattle industry is the vast alfalfa acreage which produces abundant hay and winter pasturage for the cattle. Unlike this country, the Argentine has no fertility problem as each estancia owner strives to keep his land in alfalfa as long as possible instead of breaking it and growing maize or small grains. All the alfalfa is fed on the estancia, thus saving and even increasing the fertility of the land each year. I was shown several fields which had been constantly in alfalfa for over 30 years, and the stand would please the most enthusiastic alfalfa grower in this country.

Posts Last Forever.

"One reason for the substantial and well fenced fields is due to the fact that the posts used are of the last-forever variety. Some posts were set over 50 years ago and they show no indication of decay at the present time. The post wood is known as 'quebrake,' which means 'break the hatchet.' The posts with holes bored in them are set about 50 feet apart and five smooth wires strung through them. The top wire is barbed. These fences are seldom broken by the cattle going through them.

"The quality and breeding of the cattle is far superior to the range cattle of this country. The herds are of excellent uniformity and it is the exception to see a grade bull used. Most all bulls are purebreds. Many of the estancia owners maintain a herd of pure-breds along with their large beef herds.

"Foot and mouth disease is common there, and seemingly no precautions are taken as the disease is often seen in the show ring. The cattle tick and hog cholera are unknown.

Peculiar Marketing.

"The cattlemen have a very peculiar method of marketing their stock. They make an estimate of the amount of dressed beef in their herd and submit it to the packers . Then the cattle owners are paid on the basis of this estimate. After butchering the exact amount of dressed beef is known, and if there is a discrepancy either way it is made up at the next transaction. The cattlemen always sell to the same packers year after year and seldom receive bids from other packers. There is a marked degree of honesty between the producer and the packer.

"One great fact is that the Argentine is the only country in the world that has a surplus of beef. The beef produced in this country is all consumed here and we will have to look to South America to supply foreign trade.

"Finally, there is a lesson in superiority of well-bred stock. No country has made greater improvement in the beef breeds than Argentine. As a result the Argentine farmers are furnishing a grade of grass-fed beef that compares favorably with the best grain-fed beef in this country. Improved methods of grazing and the general use of well-bred animals —these are the lessons to be learned by the cattlemen of this country."

✤ ✤ ✤

The Blackhawk Stock Ranch, of Burlingame, this week sold their magnificent five-year-old Shire stallion, Witchford Albert, to the Reinhart Land and Cattle Company ,of Winnemucca, Nev., for $2,500, one of the best prices ever paid for a California draft horse, but considering the animal sold, a very reasonable figure. Witchford Albert is an imported horse of the most attractive breeding in the Shire family and was a winner in England and since reaching America has been especially successful in the important show rings.

He was leased last year to the Spreckels Sugar Company, for stud service and a very high figure, and has proven equally as good a sire as he has a show animal. The ranch now has two colts by him which they are holding for their personal use and in which they have the greatest expectations. In addition to his having been a winner in his individual classes at both the California State Fair and the P.-P. I. E., Witchford Albert was a member of the Reserve Grand Champion Group at the P.-P. I. E.

✤ ✤ ✤

The Blackhawk Ranch expects to move to their magnificent new estate at Diablo, Contra Costa county, within the next thirty days. The new stables, residence and equipment of the ranch are rapidly reaching a state of readiness, and it is just beginning to look the magnificent establishment that it is to become. More than $150,000 has been spent on improvements and the farm, when completed, will be the show place of its kind on the Pacific Coast. The new stable, which is designed along the English Court style, cost $20,000, and manager Lovell expects to move the noted Shires there next month. In addition to the Shire horses ,which have reached the highest state of excellence of any herd in the West, the Blackhawk Ranch is breeding Shorthorn cattle, Berkshire and Mulefoot swine, Cornish Game and Black Minorca poultry, and every herd is equally as noted as their Shires for breeding, individual merit and class. Fifty head of noted Shorthorns already purchased in England by the company will be imported as soon as the embargo is lifted by the English Government, which added to their present herd will make this one of the great Shorthorn herds of America. Arrangements are being made by the management to exhibit at the Chico exposition again this year, and among their exhibits will be their famous herd header, Anwick Arthur and his two sensational youngsters, Black Gay Lad and Blackhawk Chessie. These two colts have never been defeated, winning at county, district and the state fair of California, and at the P.-P. I. E. They have entered 12 head at the Chico fair.

✤ ✤ ✤

The extreme high prices of live stock at the present time are shown in the public sales being held over the country. In the recent Hal Jewett sale in Cooper county, Missouri, which totaled $10,000, small gilts sold for $40 per head, stock hogs at 18 cents per pound, lambs at $25.25 each, a grade Jersey cow at $131, a horse mule colt at $150, a yearling mare mule at $250, a yearling horse mule at $207.50, two spans of work mules at $490 each. It might be added that all the stock was of the best quality and in fine shape. The sale had been well advertised in the county papers and the crowd was estimated at from 1000 to 1200 people, among whom were fifty farm wives and daughters who found much to interest them in the stock and the modern new Jewett home. In the free dinner served 75 loaves of bread, half of a beef and countless gallons of soup were consumed.

MAKING DAIRYING PAY.

[By A. D. Fender.]

The dairy farmer has numerous advantages over the beef cattle raiser or the grain farmer, among which is the steady cash income, the conservation of the soil fertility. I believe that practical work of this kind will also have a great deal to do with encouraging the children to stay on the farm. You must give your boy and girl an interest in the business and they will be glad to help you. By doing so you will teach them to help themselves. In nearly any town you can find men working for very meager wages, barely enough to support themselves and families. If they had been encouraged to study the farming or dairy business when they were children the chances are that they would now be on the farm where they were born and be prosperous men. In many cases by the study of soils and how to treat them they could have raised the value of their acres from $100 to $200 per acre, where it has decreased in value from lack of knowledge.

If the practice of encouraging the child to study agriculture and dairying was universally followed it would have a tendency to bring on a generation of skilled farmers instead of a generation of underpaid city laborers.

I read an article recently in a paper from Chemung county, N. Y., in which it was stated that a meeting was called there to ascertain, if possible, why so many farmers who were apparently hard workers and good managers were always in debt and unable to meet their indebtedness. It was shown at this meeting that about a third of these farmers did not milk cows except for their own use; the second third milked but a few and realized about five per cent profit on the money invested; while the balance were real dairymen and were making from two to five thousand a year from their business.

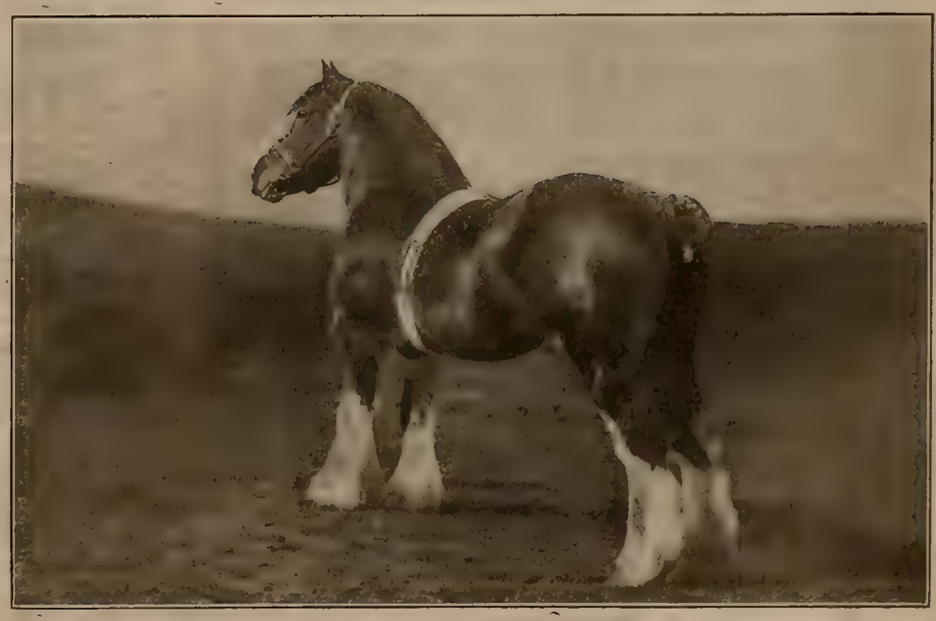
Swift Buys California Ranch.

Louis F. Swift, president of the meat packing corporation, Swift & Co., is the principal figure in a $2,000,000 deal for 42,000 square miles of San Joaquin valley land that was consummated Monday by Chas. H. Kedrick on behalf of the United States Farm Lands Company.



This huge tract, whose acreage is equivalent to a strip of the valley twenty miles in width, is almost 40 per cent of the famous old Rancho Chowchilla.

Associated with the Chicago packer in the deal is O. A. Robertson of St. Paul, Minn., who for five years has maintained a footing at Sacramento while largely interested in colonization of another part of the Chowchilla ranch.

Swift plans to develop his purchase under the name of Chowchilla Farms Company, which will engage particularly in sugar beet growing. The intention is to build a large sugar beet factory.

Cattle, sheep and hogs will be raised in large quantities on the range to be fattened on the chief by-products—beet pulp and molasses—of the factory.

The 42,000 acre tract, which is known as the West-side lands of the Rancho Chowchilla—it had a total acreage of 108,000—is considered one of the most attractive blocks of farm and ranch land in the San Joaquin valley.

WITCHFORD ALBERT, Five-Year-Old Imported Shire Stallion, Sold This Week by Blackhawk Ranch, Burlingame, California, to Reinhart Land and Cattle Company of Nevada.

THE FARM

THE FUTURE PRICE OF WOOL.

It is plainly evident to all that the price of woolens has advanced materially during the last few months and that the future is in a state of uncertainty. The condition of the wool market is succinctly set forth in the eighteenth semi-annual report of the Washington Woolen Mills company of Fredericksburg, Va., the following excerpts being taken from it:

"The wool clip of 1916 sold for 60 to 65 cents per scoured pound, but the fleece on the sheep now running around in the snow of our wool-growing states has been sold to dealers under contract for delivery next June on the scoured basis of $1 per pound or more.

"The United States uses 600,000,000 pounds of wool per annum. The clip of the United States has decreased in five years from 325,000,000 to 228,000,000 pounds. The clips of Australia, Argentine and New Zealand have decreased, the clip of all the countries at war has almost disappeared; 20,000,000 men at war use five to ten times as much wool as usual, and can't exist without it. And there is no substitute.

"Wool at Any Price" Prospect.

"If the war continues for even one more year, it will not be a question of price, but of wool at any price, and there is always the possibility of this country being forced to actual preparedness, which would necessitate taking for the army such wool as is now in the mills for their general trade.

"England has an embargo on wool from her home and all her colonies. We are dependent on South America for more than half our supply and must bid against the necessities of war for every pound we get.

"So long as the war continues, clothing must climb in price by leaps and bounds, and what seems outrageously high this season, appears a lost opportunity next season.

"The question naturally arises: Suppose the war should end? We know it must end sometime ,and God grant that it may soon, but whenever it ends the following facts must prevail:

"The world will have no reserve supply of wool.

"All the world (except possibly the United States) will have bare counters.

"The countries now at war will begin their renaissance.

Must Discard Tattered Uniforms.

"A large part of 20,000,000 men must discard their tattered, vermin-infested uniforms for civilians' clothes.

"England, France, Germany, Austria and Belgium will leap at each other's throats in the greatest commercial war of the world.

"The demand for raw wool and cotton will be insatiable, because it takes nearly as much raw stock to start up a mill as it normally buys in six months.

"No man can return to the factory until everything is definitely settled, but every factory owner will seek raw materials at any price.

"Our deductions from the foregoing are:

"That no matter how high wool and cotton sell during the war, they will sell much higher during the year following an armistice.

"That it will be more than six months after fighting ceases before quantities of cloth could be landed here, and, consequently, at least a year before clothing from same could reach the consumer.

"That this gives the merchant at least a full year after an armistice is reached in which to liquidate, during which time wool and cotton will sell at the highest prices ever known, and provide a situation in which stocks can be liquidated at a profit."

The Lime Stone Valley Farm sale of jacks and jennets came off as advertised on the 15th at the State Fair grounds, Sedalia, Mo. The offering was in good shape and the attendance was good, but the buyers were not plentiful; most of them had jacks to sell. The grand champion aged mule at Missouri State Fair, 1916, sold for $385 to Jewett Bros., Booneville, Mo. Third prize aged mule in class 6-year-old, sold to W. E. Smith of Chickasha, Okla., at $350. Top aged jack, Lime Stone Good Boy 6026, went to Judge G. T. Florida, Sweetwater, Tenn., at $1,415. Top yearling, Dongola Boy 6759, went to Geo. Worley, Dongola, Ill., at $715. No. 15, top jennet, went to Geo. Worley at $450. Buyers from Tennessee, Oklahoma, Kansas, Illinois and Missouri were in attendance. Colonels Harriman and Gross did all the selling, with Hieronymus Bros. and Logsden in the ring.

A new record was established both in the number of horses sold and in the amount of money which changed hands at the horse sale at Dillon, Mont., this month. Heavy stuff was plentiful and it was in great demand, much of the stock which passed through the ring being imported from the eastern part of the state, while some was shipped in from Utah, Idaho and Colorado. More than 1,200 horses passed through the ring and Clyde Moore, wielding the gavel, disposed of them at a tattoo rate. The amount of money changing hands was well above the $100,000 mark.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

DON CASTANO

Needs No Introduction to the Public

HIGHLAND MONARCH

was the winner of the aged stallions, and class for stallions and four of his get at the California State Fair in 1916.

SAN VICENTE

The Junior Champion Stallion of California

In the Yearling Futurity at the State Fair in 1916, five of the six money winners were by Don Castano and Highland Monarch.

The two-year-old Futurity was won by a Highland Monarch colt.

The $100.00 Trophy, offered by the American Saddle Horse Breeders' Association for the best stallion or mare, three years old or under in California, was won by a Highland Monarch colt, and two years prior it was won by Highland Monarch himself.

If you are going to breed your mare, why not mate her with one of the above stallions and have a winning colt?

The service fees for Don Castano and Highland Monarch are $50.00. Arrangements for San Vicente private.

To encourage breeding in this State we will pay the freight charges on mares to and from any part of California, but will not, of course, be responsible for any accidents which might happen in shipping.

San Vicente Rancho,

1023 Investment Building Los Angeles, Cal.

THREE NOTED JUDGES

A. S. Thompson, of Kentucky; Jas. H. Bright of Missouri and Florida, and L. M. Monsees of Missouri, recognized throughout the land as three of the best, most courageous and qualified judges of saddle horses living, selected

MARSHALL CHIEF 2765

in a field of 22 of the world's most famous stallions, as the most ideal saddle stallion for breeding purposes. The considerations were: breeding, conformation, soundness, action and beauty.

THE WINNER OF THIS, THE MOST IMPORTANT BREEDING CLASS IN SADDLE HORSE AFFAIRS,

is in public service at E. N. Hamilton's farm, three miles south of Mexico, Mo., where blue grass, spring water and feed are to be had in abundance.

HANS BERG, 159 Warren Ave., Milwaukee, Wis., or **E. N. HAMILTON, Manager, Mexico, Mo.**

WHY EXPERIMENT?--

Hundreds of thousands of dollars are spent annually by horse lovers in efforts to buy or breed a winner.

The Wise Men of Today

have quit experimenting and are mating their mares to **Astral King,** who has proven himself the

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09½, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

Cal. State Thoroughbred License No. 2018.

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

IF you see DUPONT, BALLISTITE or SCHULTZE on the shell box you are sure you are buying a Du Pont brand of Smokeless Shotgun Powder.

Don't just ask for "Shells,"—be particular-a very large percentage of the trap and game shooters always ask for Dupont, Ballistite or Schultze loads.

Look at the Top Shot Wad

DUPONT, BALLISTITE or SCHULTZE is on the top shot wad of every shell loaded with the Du Pont Company's Smokeless Shotgun Powders.

Look at the shell box label,—if you don't see DUPONT, BALLISTITE or SCHULTZE the shells are not loaded with a Du Pont Smokeless shotgun powder. Your favorite shell is loaded with one of these powders.

Number 5 in a Series of Six Talks about the Evolution of Firearms and Ammunition

The "Kentucky" Flintlock

REMINGTON UMC

Guns of an Early Period And Your Modern Remington

THE sportsman of today would be amused if he could compare his solid breech, hammerless, well-balanced Remington arm with the first guns wrought after gunpowder was discovered. Nevertheless, the early weapons were as wonderful in their day as our Remington rifles and shotguns are at the present time.

An iron tube with a wooden handle was the first gun. Some of the earliest guns were so heavy that they had to be used with forked rests. A flash pan for the powder by the side of the touch hole was an early improvement. Then came the matchlock with a slow-burning match in a movable cock upon the barrel. The wheel-lock was the next step. In this type a steel wheel wound up with a key was made to strike flint. The stream of sparks flying into the flash pan ignited the powder. The flintlock followed the wheel-lock. It is still used in semi-barbarous countries.

A flake of flint in the cock is snapped against a steel plate and the powder ignited by flying sparks. The flintlock was so practical that its use became quite general at one time. *It was the gun of our forefathers.*

The breechloader is comparatively new. The Civil War opened with muzzle loaders and ended with breech loaders. From that period improvements have been introduced until we have attained the splendid accuracy, power and dependability that characterize Remington UMC autoloading and repeating firearms.

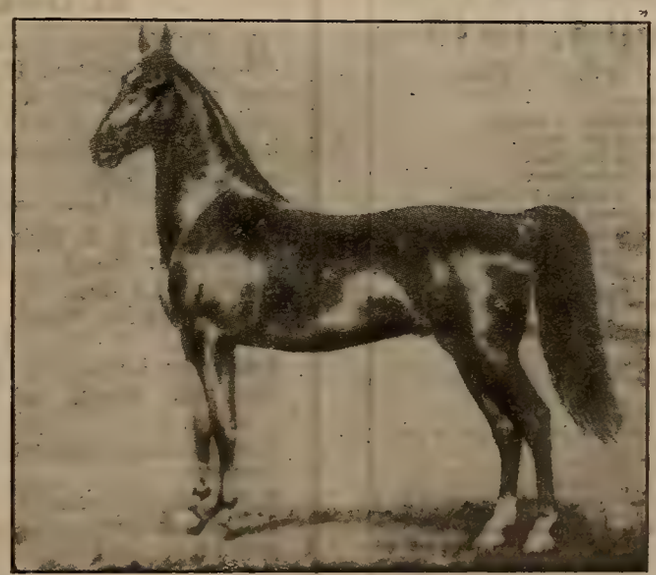
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

MONEY DIVIDED AS FOLLOWS:

TROTTING DIVISION	PACING DIVISION
$500.00 to 1st Heat	$350.00 to 1st Heat
$500.00 to 2nd Heat	$350.00 to 2nd Heat
$500.00 to 3rd Heat	$350.00 to 3rd Heat
$300.00 to Horse Standing Highest in Summary.	$150.00 to Horse Standing Highest in Summary.

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on April 1, 1917, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1917; $5.00 December 1, 1917; $5.00 on yearlings April 1, 1918; $10.00 on two-year-olds April 1, 1919; $10.00 on three-year-olds April 1, 1920.

STARTING PAYMENTS—$25.00 to start in pacing division; $55.00 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all others horses to go to the barn.

Trotting division heat purses $500.00. Total purse $1,800.00.

Pacing division heat purses $350.00. Total purse, $1,200.00.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $150.00 in pacing and $300.00 in trotting divisions goes to the horse standing highest in the summary; distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1917, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there shall be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Rights reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

JOHN M. PERRY, President. CHAS. W. PAINE, Secretary.

STALLION DIRECTORY.

In addition to the practical worth to the owners of the country, the announcements of the stallion owners which appear in the Breeder and Sportsman serve another purpose. They remind the breeder that his now-or-never opportunity is here; his great harvest time, and that his stallions and breeding stock should be in the spot light and where the interested public will be reminded of them every week. The publishers of this paper are personally acquainted with every stallion owner whose announcement appears in its advertising columns and we recommend every one of them and the stallions they are advertising unhesitatingly. We know the statements made of the stock advertised to be true in every respect.

Columbus Gets Horse Show.

A noteworthy item of news is the announcement that the Horse Show in conjunction with the National Dairy Show will be held this year at Columbus, Ohio, October 18th to 27th inclusive. Both of these events were held last year in Springfield, Mass., where they made a marked record for success.

Plans are being made to make this year's Horse Show a notable aggregation of various breeds of horses, for which there will be a large list of classes. In fact, it is the management's purpose to offer a prize list of exceptional merit that will attract exhibits from far and near.

Columbus is especially easy of access, as several railroad trunk lines converge there. The Show will be held in a new Coliseum at the State Fair Grounds, conveniently located in the suburbs of Columbus. This building is of the most modern type, and is larger and more complete than the one built at Springfield, Mass., last year. The arena, including its show ring, will be spacious and well adapted for show purposes. Another feature will be the ample and excellent stable accommodations.

W. E. Skinner, General Manager of the National Dairy Show Association, will have as his associates in the detail work of the horse show, Donald R. Acklin, member of the Ohio State Board of Agriculture, and W. S. Blitz.

Good Loser Always a Good Winner.

In writing the Breeder and Sportsman, F. L. Wright, one of our Missouri readers, who was a former subscriber of the Missouri Stockman, says: "I like the Breeder and Sportsman, and while it is published a good ways from home it gives the news I am interested in. We regretted giving Jump Cauthorn to California; he was the most popular live stock paper representative in the Middle West and the best informed horseman. I would rather watch him when his own horses are being exhibited than any show I ever saw. He is the best loser I know, and,—well, a good loser always is a good winner, but a good winner is not always a good loser."

Californians Should Breed Saddle Horses.

It is a matter of very recent history since Californians were offered the services of good saddle stallions. In fact, the majority of citizens took it for granted that one meant a good cow pony; a mountain climber, etc., when reference was made to saddle horses. However, in comparatively few years they have learned what a saddle horse is; and the majority of them realize that a saddle horse is a distinct breed with a long list of ancestors, registered in the volumes of the American Saddle Horse Registry; just as is a Standardbred, Thoroughbred, Percheron, Clyde and Shire.

The popularity of the saddle horse with the public can be best attested by a glance of the advertisements of good stallions doing a public service here. California, for the number of mares, has more stallions of the highest type than Missouri or Kentucky, and—look how they are bred?—every great sire of stallions and brood mares in the registers can be found represented here. The services on all are very reasonable and every possible inducement offered to the public.

With the growing demand for saddle horses in all Coast cities, it seems that they are naturally looking to California for their mart and naturally, it is up to Californians to produce them. Every mare in California should be bred this year and bred to one of the stallions advertised in the Breeder and Sportsman, which are proven breeders, from proven breeders, and the kind that can always be sold at a good profit for the producer.

Remember that a good, well made and sound saddle mare can hold her own on the farm by the side of a good mule; can do as much on the road as a harness bred one and is incomparable under the saddle, their intended use; and if you don't own one now, lose no time in securing one, and the first thing to do is to breed her to one of these good stallions.

FOR A GREATER MISSOURI.

The Missouri State Federation of Commercial Clubs has announced a program for State betterment which has three prongs, like an old-fashioned steel fork. It is:

Better seed for the 1917 corn crop.

A farm adviser for every county.

A highway engineer for every county.

If there is any sadder thing than the loss of the harvest of broad acres of Missouri land and long hours of Missouri sunshine through patient waiting for seed to come up that was dead before it was planted, it must be sought for outside of farming. Only less sad is the expenditure of good brains and muscle of man and horse in the culture of corn which yields a second-class crop on first-class land because the seed was second-class to begin with.

The county farm adviser has come to Missouri to stay. When his contract runs out he is re-engaged. Look at Pettis and Cape Girardeau counties. There has been opposition to farm advisers in Missouri, but never a single case where a farmer who had availed himself of the aid of an adviser opposed the system. A good farm adviser is really a clearing-house of experience for the farmers of a county; he brings to each the benefit of the experience and knowledge of all and learns as he teaches.

As for the engineer, the securing of a county highway engineer is the beginning of a rational movement for good roads. This is not a matter for argument; look at the counties that have engineers—and then at those that have not.

Our Title Page.

On our front page this week, Astral King, one of the greatest saddle stallions the world has ever known, is portrayed; a horse that has achieved distinction and popularity the width and breadth of the land. In the show rings of America's greatest fairs and expositions he has won over all comers and all ages. His career reads like a book and though in gaining his distinction he has had many obstacles to overcome; was knocked and abused perhaps as no other horse ever was, he fought back like the good soldier he is; and today, those who predicted he would be in total obcsurity after a few seasons' shows, doff their hats to him and acclaim him "The King of Saddle Horses."

COMPARATIVE GROWTH.

In six years, 1910-1916, the country's population has increased nearly ten millions. Precisely, the figures are, in 1910 there were 92,309,348 people in the United States, and government census gives the number for 1916 as 102,017,312. Speaking relatively there was in 1910 slightly less than five people to every horse estimated on farms to each person in the country. In 1915, to January 1st, there was a narrower margin of difference and this favorable to the horse, as compared with five years previous (the figures of the Department of Agriculture on horses for last year not being before us). Specifically the number of horses on farms in 1910 was 19,833,113, or one to every 4 14-19. January 1, 1915, the report gives 21,195,000 head and the population 100,399,318, or one animal for each 4 15-21 people, which, as will be seen by the figures, is a slight difference favorable to the horse for the latter period.

The table furnished by the department at Washington gives no estimate whatever of city owned horses but it is held generally that there are about eight million head in city use through the country. Neither have we included mention here of the number of mules in the country, which in 1910 was 4,209,769 on farms and in 1915 this number had increased to 4,479,000, a jump of 269,239 in five years. If the nearly four and one-half million mules and say 7,500,000 city used horses were added to the table of relative figures it would show that instead of there being one animal for every five persons, there would be one to every three and 50-100 persons. The summary of the whole shows that in so far as numbers go, the horse has kept apace with growth of population.

It must be conceded that light drivers and carriage horses are reduced immeasurably in numbers since the great growth of automobiles have rendered their (the horses') use somewhat of a dangerous luxury, but even so, the country's growth establishes the fact that there is need for horses in comparison with increase of population. It would be idle talk to deny that the horse interest has not been severely injured by the machine, but, on the other hand, how could the country have been served if it were not for the machine. Here we have a growth of 10 per cent in population in seven years and only about 2 per cent growth in the number of horses during practically the same period; how could progress be marked up if such untoward conditions continued to face it without some kind of dependency to rely on? Without a question the rapid growth of the machine caused a scare among breeders and farmers who believed that it was all over with the horse, and this is one reason why their number fell off, comparatively, in the years between 1910 and 1915 and between 1905 and 1910. In 1905 it is given that there were 17,058,000 horses on farms, and, as already stated, this number increased to 19,833,113 in 1910, a jump of 2,775,133 in that brief space of time, while during the next like period there was an increase of but 1,361,900, a difference of 1,414,233, which surely was due to no other reason than scare caused by the incoming of the automobile.

Again we must emphasize doubt regarding the correctness of the U. S. department's figures in regard to number of horses. These doubts are created by the close similarity of figures presented from a number of states, which, to us, are suggestive of a none too careful attention being given by estimators or census takers, in compiling their data. Here are some samples of reports that appear in the table: From New Hampshire, Rhode Island, Connecticut, New York, Indiana, Illinois, Missouri, Kentucky, Alabama, Mississippi and Louisiana, come figures which show that the same number of horses were held on the farms of each in 1915 as in 1914. Mark, with the exception of the three New England states the others are all great horse developing states, in fact, about the best in the country. And the inconsistency of the same statement is further shown by the fact that the 1914-15 figures apply identically to those of 1913 in several of the same states, notably New York, Connecticut, Rhode Island and Kentucky. So that, like the register kept by most cities, no great dependence can be placed on the statistics presented by the Department of Agriculture, as to the number of horses in the country. The want of correctness is no doubt due to the absence of system in states in tabulating numbers precisely, and until this is corrected and a system developed in all, the U. S. department cannot be expected to give out real facts on this subject.

Reverting to comparative figures anent the horse and population, it must be admitted by all that has been shown that the horse has kept up wonderfully well in fact of the opposition that has been put up against him. During the past six years the machine has made greater headway than in all former years put together, yet the number of horses on farms has steadily increased; in fact, their increase alone during these years is, if presented figures may be accepted, more than one-half times greater than the full number of machines in the whole country.—[Horseshoers' Journal, Detroit, Mich.

An auction sale of Holstein-Friesian bulls will take place on Thursday, May 24, at the third annual Butte County Spring Exposition to be held in Chico, May 21 to 26. Twenty head from the best breeders in the state will be sold by the California Breeders' Sales and Pedigree Company.

Harness Horses and Horsemen

L. L. Polk, of the Lawrence-Williams Co., Cleveland, Ohio, distributers of Gombault's Caustic Balsam, made his annual visit to California last week. Mr. Polk is personally acquainted with the horsemen of every state in the Union and his popularity here is just as noticeable as in the East. He says the company has not turned down any orders for "Gombault's" so far and they hope that they will not have to; however, they are experiencing some trouble in getting this valuable preparation to America. One of their largest importations, due here in February, cannot be located. While Gombault's Caustic Balsom was originally used almost exclusively by horsemen, its merits as a household remedy are now becoming appreciated and recognized by the public, and according to Mr. Polk, the big end of the sales is now for household consumption. However, horsemen are using more than at any time in the history of the company's business.

C. A. Harrison at Mt. Vernon.

Sam Ball, of Mt. Vernon, Wash., is a busy trainer these winter days preparing his fleet of hay-destroying pacers and trotters for an early spring campaign. Mr. Ball's horses are all of the submersible type, being wintered and trained where rain, snow, slush and mud are a regular every-day diet. These steeds are quite at home in rain, snow or hail, as Mr. Ball and his assistant, Charley Chambers, never permit any of the Ball fleet of mudlarking hay-destroyers to lay in.

Beauty B. 2:04¼ is in elegant shape. She was a sure enough fast mare last year, as she was an easy second to A. R. G. at Centralia in 2:13¼, and when in the second heat of that race Joe McGuire let A. R. G. step to the half in 1:04 and to the three-quarter pole in 1:36½ ,this mare was right beside him. Joe pulled her up at that point, as a winrace of 2:12 or better was in sight, so the mile was finished slower. Beauty B., not having a winrace record, is Mr. Ball's candidate for the slow trots. Tillamook Maid is a big husky pacer by Zolock 2:05¼, dam by Altamont, and has a record of 2:14¼. When well honed, however, she can pace very fast. She likes any sort of track or weather, and as her name indicates she came from Tillamook, Ore. As a young thing in Oregon she used to swim out to the Tillamook light ship, hence the name "Tillamook Maid." Joseph Ansel is a free-legged chestnut pacer with a three-year-old race record of 2:12½. He is a five-year-old son of Prince Ansel 2:20 and Josie D., by Nutwood Wilkes, and is a very fast pacer, good gaited and dependable.

Van Winkle 2:20½ is a trotting stallion by Gambetta Wilkes and a well bred and good looking horse. He is a fast and game trotter, but has had trouble with an ailing leg for some years. The ailment is gone now and the submersible winter training seems to suit the horse.

Ann Winkle is a good looking black mare, sired by Van Winkle, dam Dewey Ann 2:16¾. She is a good gaited trotter and is in every way a pleasing student. Mr. Ball expects to race his horses in the Middle West and says it's best to go where racing begins the first of June.

I had a pleasant time at Sacramento, drove a few horses, saw a lot of nice ones in Walt Tryon's stable. Walt has a very nice pacing three-year-old filly by Peter the Great. She is a fast one and does it well. Jas. Thompson has some well bred ones and good lookers. These Peter McKlyo colts are real regular good boned, good horses. I believe Jim Thompson's Bon Watts is the classiest colt in California. Gee whiz! that scamp should be a sire; he is a royal swell.

Jim has a great yearling by Vernon McKinney out of Mary Gordon. This colt is about as good a yearling in every way as I ever saw.

Mr. Stetson leaves on Tuesday for Kearney. Grey Hal goes along. I saw him pace in 2:28 and back in 2:24, and I said "No faster for me." Last quarter in 33½, all easy. Inasmuch as Mr. Stetson broke the horse and only got him last October, I can't figure how I could honorably take him away from him, so I said, "Take the gray steed along."

I sold Chris the Great; he goes to Nebraska and he is a fast horse, and came to Stetson all scabby, skinny and in bad order . Today he is a nice horse, but I am all through with him and my best wishes go with him.

Am sure glad your circuit is framed; it looks good to me. Now if each town gets a real press agent and booms the meetings in all the daily and Sunday papers every day, and keeps it up, they will find it pays to advertise. Printers' ink is a great medium, and the public believes in it, and a race meeting wants as much publicity as a ball game or auto race, a prize fight or a breakfast food, and wants men to put it over so the public will eat it up; and the meeting will be so good the first day that every patron will be pleased and go away praising the whole show.

Say, man, it wants brains, and then some!

C. A. HARRISON.

EIGHTEEN WEEKS' CONTINUOUS RACING IN CALIFORNIA ASSURED.

After having conducted several meetings of more or less indifferent success, the California Fair and Racing Association, Saturday, March, 24, at the Hotel Manx got down to brass tacks, all present realizing that unless every one was willing to "give and take" a little that nothing in the way of permanent dates, classification and all that goes into the organizing of a fair circuit would be accomplished. While every man present argued for his particular plan, harmony prevailed throughout the session and there was a general feeling of good-fellowship by everyone present. The line-up of the circuit was announced by secretary Waddell as follows:

Salinas, July 11 to 14; Petaluma, July 18-21; Woodland, July 25-28; Dixon, August 1-4; Ukiah, August 8-11; Eureka, August 15-18; Ferndale, August 22-25; Santa Rosa, August 29-September 1; Sacramento, September 8-15; Hanford, September 19-22; Fresno, September 24-29; Bakersfield, October 3-6; Riverside, October 10-13; Ventura, October 17-20; Santa Maria, October 24-27; Los Angeles, October 29-November 3; Santa Ana, November 7-10; Phoenix, Ariz., November 12-17.

While the association will leave the purses entirely to the fair officials, they will recommend a tentative program, classified, and purses for each stake will be recommended . C. Z. Hebert, who represented Salinas, the first fair of the circuit, and which will open its gates July 11 for a four-day program, stated that Salinas would give $6,000 in purses for the harness horses and two running races every day which would be worth about $100 each. It is probable that the majority of the smaller towns in the circuit will offer a similar program. Fresno, Bakersfield, Sacramento and other larger towns will, however, give larger purses.

C. F. Silva, owner of the Woodland track and one of the leading fair promoters and horsemen in the West,made a motion that the horses be reclassified every two meeks; the motion, however, was voted down and a motion to re-classify once every month made and carried. This will necessitate late closing events.

As in previous meetings, there was a strong sentiment in favor of giving the free-for-allers good stakes clear down the line. It also was the opinion of those present that there would be two good stake races every day

The circuit will be raced under the rules of the National Trotting Association, of which every track in California except Hanford is already a member.

Officers elected were: L. L. Cannon of Santa Rosa, president; C. E. Silva, vice-president; I. L. Borden, treasurer ,and Joseph Waddell, secretary. In addition to the above, C. J. Berry, M. L. Woy, J. E. Montgomery, C. A. Durfee and D. L. Hackett were named directors.

Notes of the Meeting.

Prominent horsemen and fair representatives who attended the meeting of the California Fair and Racing Association in San Francisco Saturday were: M. C. Delano, Sacramento; C. A. Durfee, Oakland; J. Dupon, Petaluma; W. J. Kenney, San Francisco; Fred. H. Hall, Bakersfield; D. L. Hackett, San Francisco; Henry Helman, Salinas; C. Z. Hebert, Salinas; Wm. S. Clark, Eureka; Dr. A. M. Dinsmore and W. S. Moore, Ferndale; Chas. Silva, Woodland; H. Cohen, San Francisco; Harry McFadyen, Dixon; J. E. Montgomery, Davis; H. B. Smith, Ukiah; A. T. Jackson, Stockton, and C. A. Spencer, Santa Rosa.

Communications from others who assured their support of the organization and agreement to dates were read, from Eureka, Phoenix, Riverside, Fresno, Los Angeles and Bakersfield.

✤ ✤ ✤

Charles Silva, owner of the famous Woodland Stock Farm, was a "stickler" for re-classification every two weeks during the circuit, but was overruled by the majority of those present. Every one was in favor of re-classification once every month.

✤ ✤ ✤

C. Z. Hebert, of Salinas, who has not missed a meeting since the organization of the association, can always be counted on as one of those who knows what he wants and when he wants it; and what his association will do, and states his proposition in a business like manner.

✤ ✤ ✤

Dr. A. M. Dinsmore and W. S. Moore, of Ferndale, who are prominent business men of that city and officials of the Ferndale fair, came to the meeting with the assurance of Ferndale's joining the circuit, and though forced to make their dates almost one month earlier than is their custom, they accepted the dates and assured the horsemen of a big meeting there. Ferndale is in the center of one of the richest live stock and agricultural sections of California and the Ferndale Fair is one of the most successful live stock shows on the Coast. Their live stock and agricultural show attracts visitors from every section of that part of California as well as the best live stock exhibits in the state.

✤ ✤ ✤

There were five different horsemen in San Francisco last week who claimed they had the fastest young trotter in the state. When they get together the fur will fly.

IN BEHALF OF THE TROTTER.

A bill has been introduced in the Maine Legislature in behalf of the American trotter. The author of the measure proposes that at agricultural fairs having harness races with purses amounting in the aggregate to $1,000 at least one-third of the events at each meeting be for trotters, exclusive of pacers. E. E. Briggs, of Lewiston, we believe, is sponsor for the measure ,in behalf of which a number of prominent and influential horsemen of the Pine Tree State have appeared. So far as we know, no one has urged the defeat of the bill, although one representative, who is also a fair secretary, has suggested that the total amount of purses mentioned in the proposed statute be raised to $1,200, it being his belief that some of the minor fairs would suffer for lack of entries if the smaller figure were allowed to stand.

Maine at one time was quite prominent as a horse-breeding state, and within her borders were more trotters than pacers, but times have changed. Today she can boast of but comparatively few breeders, and the number of pacers is far in excess of horses of the diagonal gait, the latter contingency, however, being due to the fact that a great majority of the associations offer purses for mixed races, in which free-legged trotters have little chance of beating the hoppled pacers. Hence there is little demand for trotters, because it requires an exceptionally good horse to earn his oats, while one can dispose of a hoppled pacer in short order, for the purchaser knows the animal has more than an even chance of earning good dividend on his investment.

The measure in question is a move in the right direction and should pass without a dissenting vote. It will raise the status of the trotter of Maine to a higher plane and encourage breeding, besides giving spectators at the various fairs an opportunity to witness contests between horses of the highest type.—[American Horse Breeder.

An organized movement against race track speculation has been started in Maryland, with what appears to be a lot of influence behind it. The organization will declare war on betting on racing of whatsoever character. With praiseworthy prudence the racing interests of Maryland some time ago abolished the bookmaker and installed the Pari-mutuel system, in the hope of forestalling the popular clamor and saving the sport. The plan has demonstrated its efficiency in Kentucky, and might have been counted on to do so in Maryland, but for another abuse of the sport just as bad as the bookmaker, and this is the almost incessant racing. The Maryland running tracks are in operation continuously when the weather is fit, and a new course has been projected nearly every season, until the State is full—too full—of them. The motive is greed, not a desire to gratify the reasonable needs of the public for sport, and this seems to be a natural propensity of the promoters of thoroughbred racing when they are not hindered by legal restraint. It spelled ruin to the race tracks in New York, Chicago, Cincinnati and other cities where the sport once flourished, and it apparently will do so in Maryland. The Jockey Club has allotted dates to the metropolitan tracks providing for 102 days of continuous racing this season, yet the Sun's sport writer says it is not enough and hundreds of racegoers demand that the racing should start earlier and continue longer. It is the old story of the needy and the greedy. Harness racing with reasonable speculation legalized might exist in nearly every State but for the debauchery by bookmaking and interminable racing at the running tracks. An outraged public sentiment recognizes no degrees or stratas in morality in a crusade against social evils, and the innocuous sport of the trotter must suffer for the sins of the runner.—[Trotter and Pacer.

The Gem State Fair News.

"We are still unsettled as to our plans for the 1917 fair on account of appropriation made by the last Legislature, which is now in the hands of the Governor awaiting his autograph. If the Governor signs the bill we will be in splendid shape to give a great fair this year, as the Ada County Commissioners will maintain grounds, buildings ,etc., giving us the entire appropriation for fair purposes, which, with the gate receipts, grand stand, advertising and concessions would bring us up to about $25,000, which should put on a pretty good fair.

"Under the bill creating the Idaho State Fair, it is to be put in the hands of a State Board of Agriculture, five members, which are to be appointed by the Governor. Under this new plan the secretary will be expected to take care of the Lewiston Live Stock Show; the Idaho State Fair, the Idaho Seed Show, and be secretary of the State Board of Agriculture.

"I wish to congratulate the California horsemen for securing the services of Joseph Waddell as secretary of their circuit, and I trust that he will be compensated for his work and time," writes O. P. Hendershot, Sec'y, Boise, Idaho.

J. B. Stetson, who has been training at Sacramento for some time, on Friday shipped his stable to Benson, Nebraska, from which place he will prepare to race in the Middle West. Most of the horses are the property of the Midway Stock Farm, Benson. He also has C. A. Harrison's good young pacer, Grey Hal, in his stable.

Thoroughbred Matters

The judges took a hand in distributing many decisions and fines last Sunday at Tia Juana. Jockey C. Burlingame was suspended thirty days for an unsatisfactory ride on the mare Little Dipper, in the third race of March 20. The further entries of the Palace stable will be refused. Jockey Metcalf was fined $25 for striking Jockey Kelsay with his whip after the finish of the first race of Friday.

✤ ✤ ✤

Four California thoroughbred mares have been shipped to Reno to go to the court of Honeywood, George Wingfield's English-bred sire. Ray Egan was down from his farm at Petaluma Monday with the information that he has sent the good producer Mitten to the Nevada Stock Farm. Charles W. Clark has sent the former sensational filly Cluny and John H. Rosseter, Roman Lady and the imported aged matron Elsie Velasquez. The latter only recently arrived at Pleasanton from England, and had the misfortune to lose a foal that would have been a full brother to Volta, the best sprinter in England for two seasons.

✤ ✤ ✤

The breeding industry is being revived somewhat by reason of the hope that racing will be re-established in California shortly. Thirty-three mares were mated with Honeywood this spring, and Charles W. Clark, John H. Rosseter, Edward Cebrian, the Napa Stock Farm and other enthusiasts are taking an interest in the sport. There is also the possibility that A. K. Macomber will establish a farm at Burlingame.

✤ ✤ ✤

Dangling their legs over the rails surrounding the Pleasanton race track was a large gathering of horsemen on Sunday morning to witness a band of thirty-odd head of two-year-old thoroughbreds make their first speed tests. It was the initial tryout for the baby California racers, many of which will be shipped across the Rockies to sport silks on the metropolitan courses.

Standing out as a comer was a racy-looking chestnut colt by Rey Hindoo-Margie D. that has been named Rey El Pleasanton. Like a streak of lightning he bolted from the barrier and negotiated the quarter-mile dash in 0:23 1-5. Others of the youngsters, including S. Christenson's imported War Shot, also turned in creditable workouts, and it was a day well spent by the devotees of the thoroughbred.

The horses are the last of the stock raised by Lawrence & Comstock on their Oakwood stock farm in Placer county. The days of the past, when California produced dozens of similar bands, were recalled, and it was a source of regret among the horsemen that no more colts and fillies will be raised at the famous nursery.

The occasion of tryouts was also taken advantage of to have one big christening party. Twenty-seven of the juveniles were given names that they will carry to the races. The list, with the breeding, follows:

By Rey Hindoo.

Rey Alfalfas, b. c., out of Dod Anderson.
Doc Vaughn ,ch. c., out of Sulu H.
French Nurse, b. f., out of Trained Nurse.
Do Admit, b. f., out of Admit.
Charles Greggus, b. c., out of Directa.
Alf Vezina, br. c., out of Dalley.
Rel El Pleasanton, ch. c., out of Margie D.
Armador Valley, ch. f., out of Armadora.
Mazie Barber, ch. f., out of Chico.
Rey Green, b. c., out of Gracious Dame.

By Salvation.

Sal Sempronius, b. f., out of Bertie V.
Miss Rosetta ,ch. f., out of Palizado.
Miss Pauline, ch. f., out of Colonia.
Magician, ch. c., out of Illusion.
Clarisse O'B., b. f., out of Mi Reina.
Nora Lee, ch. f., out of Arcadia Belle.
Miss Mabel, ch. f., out of Ellen Atkin.
Pleasanton Belle, b. f., out of La Reine Empress.
Naomi Walton, ch. f., out of Alondra.
Honolulu Boy, ch. c., out of Zorita.
Bernice E., ch. c., out of Bertola.
Joe Mullender, ch. c., out of Sister Modred.

By Tim Payne.

Norfolk Star, ch. c., out of Cheridah.
Ben Payne, b. c., out of Gottlieben.
Tom O'Day, ch. c., out of La Poeta.
Gale, b. c., out of Gano Belle.

By Joe Carey.

Katherine Carey, b. f., out of Katherine Ennis.

In addition to the above, two three-year-olds were on display. Heydo, by Rey Hindoo—Trinta, stepped a half in 47 3-5 seconds, closely followed by Lonie Lissak, by Salvation—Bonnie Lissak.

———o———

To my mind Americans will get far better results by importing good brood mares and stallions than by taking the always doubtful chances of buying yearlings or foals. It is all very well to buy a brood mare with a foal at foot, but to buy foals alone is a hazardous proposition. At any rate those who do so have no right to complain if results are not profitable.—W. Allison in London Sportsman.

Jockey Frank Keogh, well known to California racegoers, has signed a contract to ride this year for the stable of J. E. Widener.

✤ ✤ ✤

Jno. Lowe had a good day at Hot Springs a week ago; he won the handicap at 5½ furlongs with David Craig ,and the Morris Bath House handicap at 1 1-16 miles with Brynlimah.

✤ ✤ ✤

The keenest interest is being displayed in the hurdle race at a mile and a quarter Sunday next. President Coffroth plans on staging many hurdle and steeplechase events next winter and the jumping sport should attract much interest. Foxhall Keene, regarded as one of the greatest gentlemen riders over the jumps, as well as owning some of America's finest jupers, is enthusiastic regarding the sport out west. He will give all his aid in the promotion of Sunday's event and unless all signs fail it should provide great sport. First Degree has worked wonders over the jumps in training and many are tabbing him as a winner over the high sticks in Tia Juana's first effort.

✤ ✤ ✤

The extensive racing establishment of A. K. Macomber, the California sportsman, in charge of Walter B. Jennings, now in training at Palmetto Park, Charleston, S. C., is due to reach Churchill Downs about the first week in April, according to advices received at the offices of the New Louisville Jockey Club from Mr. Jennings. In his communication Jennings asks that fifty-five stalls be reserved, and he states that he will bring the entire stable in training, comprising fifty-one head.

✤ ✤ ✤

New Orleans (La.), March 14.—Two new racetracks probably will be built within a few miles of New Orleans this year. Permission has been asked to construct one of them between Shrewsbury and Haralan, in Jefferson parish, while it is planned to locate the other at Shrewsbury. If the authorities say the word the New Orleans racing season will open on October 1 and will continue at the new tracks until New Year's Day, when the Business Men's Association will resume operations at the Fair Grounds until the Mardi Gras festival. After that the proposed tracks hope to split the dates until June, 1918. This means continuous sport in the Crescent City for almost 200 days.

Dr. Chas. F. Gebke, Mayor of Gretna, the principal city of Jefferson parish, announced today that he would fight against the establishment of two racetracks in Jefferson parish. Gebke, who has always led the reformers in Jefferson parish, says that he will take the matter before the Governor, Grand Jury and Legislature to stop the running of races in Jefferson parish.

———o———

Revival of Racing Expected in Detroit.

Windsor, Ont., March 12.—Quiet efforts that have now reached such a stage that full publicity is about to be given seem to have accomplished what the racing public of Detroit has long desired, the revival of the sport of the turf in that city.

While harness racing has always flourished in the City of the Straits, and the Blue Ribbon trots form the greatest and most noted meeting of the Grand Circuit, there has been no running meet since Highland Park was sold to become the site of the Ford motor works. The racing at the Old Grosse Point track was a memorable gathering of race horses from East and West, and the return of the sport has long been desired.

With adequate equipment it may be anticipated that Detroit will send to the races, somewhere within Wayne county, the greatest crowds of people ever known on an American track. Even the palmy days of Washington Park, Chicago, or Sheepshead or Derby Day at Churchill Downs, would not, in the opinion of old turfmen, equal the showing Detroit will make if it only has the opportunity.

That is now said to be assured, and so much progress has been made as to justify the expectation of a meeting this summer, which would be under the direction of Jos. A. Murphy, who thus returns to a scene of earlier labor, as he was the chief official of the Grosse Pointe meeting of the Detroit Driving Club when Detroit had its first taste of thoroughbred racing. Behind Mr. Murphy are such well-known turfmen as J. W. Schorr, the Tennessee breeder, whose stable is one of the strongest in America, and J. A. Gibson, Detroit contractor and horse owner.

Interest on this side of the river centers chiefly on the probable effect of the three tracks here, and it is generally considered that Devonshire, which was the latest, and is not included in any circuit, will be the chief sufferer by any selection of dates that may be decided on by Detroit.

The expectation is that the mutuels will be the means of speculation, as they have been sanctioned by use for several years at the Blue Ribbon meetings and have met with no objection. The State law is so stringent that it has always been regarded as a dead letter, and that feeling permits open-booking and pool-selling at scores of meetings of harness racers throughout the State.

✤ ✤ ✤

San Diego, March 23.—President James W. Coffroth of the Lower California Jockey Club made official announcement that the Tia Juana race meeting will close on Sunday, April 1. It was extended over the announced 100 days indefinitely.

THE WOODLAWN VASE.

Another valuable and historic turf trophy has been put into competition for the coming season in the Woodlawn Vase. The Maryland Jockey Club has come into possession of this beautiful silver trophy. The Woodlawn Vase is, historically, if not actually, the most valuable "cup" on the American turf. Designed and produced by Tiffany, in 1860, to the order of Col. R. A. Alexander, it was presented by him to the Woodlawn Association, of Louisville, Kentucky. It was won that year by Captain Morris' great mare, Molly Jackson, beating Magenta, Sailor and Bettie Ward. The next winner was Idlewild, from the stable of the same owner.

During the Civil War the Vase was buried with the family plate, at Woodlawn. In 1866 it was won by Harry of the West, and in 1867 by Merrill. It was next won by that good horse Bramble ridden by James McLaughlin, in the great American Stallion Stakes, at Louisville, in, 1877. Bramble's owners the Messrs. Dwyer, brought the Vase east and presented it to the Coney Island Jockey Club.

In 1883, Mr. F. Gebhardt's Eole added his name to the list of illustrious winners, by defeating Bushwhacker ,for the Vase, at four miles. The peerless Miss Woodford then won it two years in succession. The Vase was not offered again until 1893, when it was won by Pickpocket and later by the great Raceland.

In 1894, Sir Excess beat Banquet and was in turn beaten by Banquet, in two races, for the Vase, at Jerome Park . The next contest for the Vase was at Morris Park, in 1901, when Gold Heels won it. In 1902 Advance Guard was the winner. Finally in 1903 and 1904, Shorthose duplicated Miss Woodford's record by winning the Vase twice, consecutively.

By the victories of Shorthose, the Vase became the property of Mr. Thomas Clyde, who has now, in the interest of the sport, presented the Vase to the Maryland Jockey Club, to be added to the Preakness of 1917, and so make this valuable piece of plate more historic in value, if such a thing is possible, by associating it, in years to come, with the victories of many illustrious thoroughbreds.

It is the Maryland Jockey Club's belief that a trophy of such unique importance should not again become private property, in the sense that it may be withdrawn from competition indefinitely. Therefore, its successive winners hereafter shall be required, each in turn, within one year from his coming into possession of the Vase, to offer it again, through any reputable racing association, and for a suitable race. Thus the Vase will pass back and forth, North, South, East and West, ever growing in value and in time, let us hope, reviving some, at least, of the sectional rivalries that lent such intense interest to racing in the good old days.—[Thoroughbred Record.

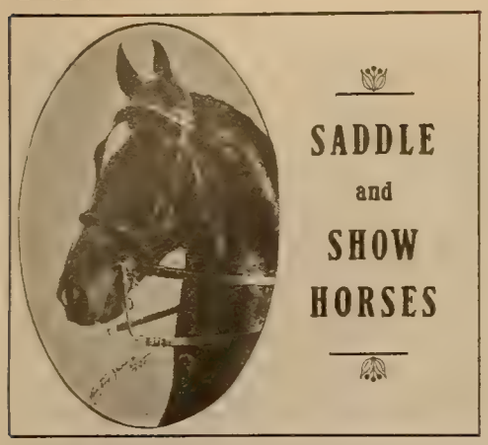
———o———

General has been the most consistent performer at the Tia Juana meeting this season. He is the only horse which has been racing there which has won as many as eight races.

✤ ✤ ✤

New Orleans, La., March 15—Carrying out her threat at the meeting of the board of directors at the Fair Grounds Monday night, Miss Jean M. Gordon, through her attorney, Solomon Wolfe, has filed a petition in the Civil Court restraining the Business Men's Association, Inc., from donating the City Park track property to the city. Miss Gordon files the suit as owner of a certificate for two shares of the Business Men's Racing Association's capital stock.

✤ ✤ ✤



The horse racing bill, providing for a system of pari-mutuel betting and for virtually the same regulations that govern racing in Kentucky, was killed in the Missouri Senate by a vote of 12 to 16. The Senate also killed the Casey racing bill, which would have provided for a thirty-day annual race meeting in St. Louis and Kansas City. This ends the chances for horse racing in Missouri, at least for another two years.

✤ ✤ ✤

In the spring season labor is a bit scarce around racing stables ,and some trainers have the habit of enticing rubbers away from their employers, also exercise boys when they show any ability. This is much against the rules of all governing bodies of racing and a source that arouses the indignation of horsemen who lose their help. The New York Jockey Club has decided to put a stop to this sort of thing occurring under its jurisdiction, and, upon complaint, will go to extreme measures to punish those who attempt to hire an employe away from another stable. The rules are explicit on the question, the punishment for infraction also.

Regarding this subject, G. D. Wilson, Secretary of the Kentucky Association, wishes to call especial attention to Rule 137 of the State Racing Commission of Kentucky. The rule follows:

"Owners and trainers employing riders, grooms or attendants, shall make their contracts in writing, properly signed and witnessed, in case the time covered by the contract exceeds thirty days.. Any person who shall entice or attempt to entice away from an employer, a rider, groom or attendant, who is under contract, may be fined not exceeding $250, or ruled off."

O. J. Mooers, of Columbia, Mo., will have his strong stable of heavy leather wearing horses at Tulsa next month.

✤ ✤ ✤

Miss Loula Long's incomparable stable of saddle and heavy harness horses have been entered in the Tulsa, Okla., horse show.

✤ ✤ ✤

Jas. Buford, of Paris, Mo., will be one of the exhibitors of saddle horses at Tulsa, Okla., next month. Mr. Buford will have the best small stable in the state, it is said.

✤ ✤ ✤

Tulsa, Oklahoma, has joined the ranks and will give a big horse show next month. Horse shows are finally getting the support they deserve and the commercial clubs of the smaller cities of the United States are proposing them as the drawing card of their spring and autumn season.

✤ ✤ ✤

Blades & Holeman, Holliday, Mo., horsemen, have dissolved partnership. This firm has developed and exhibited some of the best horses in the United States in recent years. Mr. Blades will conduct the stable at Holliday and Mr. Holeman has accepted a position with Houchin & Anderson, Jefferson City, Missouri.

✤ ✤ ✤

San Vicente Rancho, Los Angeles, Cal., has sold their clever saddle mare, Annie Waxy Hunt, by Red Eagle—Cora Waxy, which is one of the best bred mares in California. This mare with proper attention would make a high class three-gaited animal, and while the name of the purchaser was not made public it is hoped that it is some one who will have the mare exhibited.

✤ ✤ ✤

The marriage of Dr. Winslow Anderson, of St. Winifred's Hospital, and Miss Ethel B. Davie, which took place at 1065 Sutter street Saturday, does not come as a surprise to the friends of these well known horse lovers; however, it is of interest to all just at this time. Both Dr. Anderson and the bride are the owners of some good horses and have been prominently identified with California horse shows for several years. Mrs. Anderson's gelding, Kildare, was one of the best winners at the last state fair in both three-gaited saddle and heavy harness events. Dr. and Mrs. Anderson, who are prominent in San Francisco hospital circles, left Tuesday for New York and will return to San Francisco after an extended tour of the East.

✤ ✤ ✤

Judge E. A. Bridgford announces that he has moved his great young stallion, Le Grand McDonald, from the Hulda stables, North Panhandle Park to the San Francisco Riding Academy, at 701 Seventh Avenue, which is near the main bridle paths of Golden Gate Park. Judge Bridgford is giving this horse a lot of good hard work every day and the youngster is improving amazingly well in his gaits as well as looks. It is said by those who saw him show last fall that he is fully fifty per cent better now than then; and they predict an unusually successful show from him in the autumn. His being located in San Francisco at this time presents the owners of good mares in this section an excellent opportunity to secure his services. He probably will be moved to the Bridgford Company's ranch at Kingston later on.

✤ ✤ ✤

The writer saw more equestrians Sunday than at any time since arriving in San Francisco. There was an attractive string of horses and riders at every turn of the bridle paths in the park and along the Beach. Some exceptionally good horses were noticed and some skilled equestriennes; however, there were the usual number of "dogs and bulls" that are so prevalent in the cities. It seems that all those who ride would realize what added pleasure they would get from a really good horse and that the cost of keeping a good one being no more than the common kind, and would buy better horses. There are so many high class horses used here that the comparison is all the more noticeable and it is most evident from the expression on the faces of those who ride the "dogs" that they are not really enjoying themselves.

✤ ✤ ✤

Fully fifteen couples took part in the music ride at the San Francisco Riding Academy last Tuesday evening, which was commanded by Gordon L. Smith, the instructor, who, by the way, was a former instructor at Durland's and is said to be one of the most expert masters on the coast. Among those who took part in this highly enjoyable affair were: Mrs. Helen Cox, Mrs. Gordon, Mr. Fortune, Mr. Ahlers, the owner of Mavis; Mr. Lynch and Misses Davies, Rosthchild, Fortune, Ulrick and others. There was also a class under Mr. Smith Monday and Friday evenings.

✤ ✤ ✤

The Kentucky Saddle Horse Company's sale at Sedalia, Mo., March 16, was attended mostly by local buyers, with a few from Missouri and Illinois. The horses that were prepared for a sale of this character were well sold, and there was more of demand than supply. D. Schilling, of Chicago, accompanied F. T. Fowler, proprietor of the Edgewater Beach Riding Academy, Chicago, and bought a load of extra nice riding academy horses. The old sire, Prince Rupert, now 20 years old, sold for $17.50. The only decent thing to have done with him was to have administered a "sleeping potion" to prevent the old horse from falling into bad hands. Youngsters brought all they were worth and using horses sold high.

✤ ✤ ✤

Longview Farm, Lee's Summit, Mo., announces the sale of their noted young saddle stallion, Garrard Hunt, 4, by Garrard Chief—Miss Hunt, to D. Schilling, of Chicago and Aroya, Col., who was a visitor to Missouri stables last week. Garrard Hunt is one of the most attractive horses living; it is not an exaggeration to say that he is as attractive as My Major Dare, and the quickest and easiest way to describe him is to say that he looks very much like the premier of Longview. He is a bay, with one or two small white marks, perfectly made and splendidly educated and mannered. In 1915 he was the champion two-year-old of Missouri and went so far as to win in some of the best contested junior stakes of that year. He was not shown as a three-year-old last year and Mr. Schilling has not announced whether he will have him exhibited this season or not.

✤ ✤ ✤

D. Schilling Writes of Missouri Visit.

D. Schilling of Chicago, was in Missouri last week and visited several of the leading show stables. The following are news items taken from a personal letter, not meant for publication, but which will be of much interest to saddle horse lovers:

"Longview has a lot of using horses ready to go, as well as a splendid show stable. They are having a lot of inquiries and are making some good sales. Among the show horses I saw worked was the beautiful stallion, Kentucky's Best, which will be their headliner this season instead of My Major Dare, now retired. He is going in great form and is more beautiful than ever; the gray gelding, Silver Zizz, has improved wonderfully since the Denver show and is filling out to be a great looker as well as doer. Joan Sawyer is getting finer every day, if such a thing is possible, and worked like a streak. I saw the new walk-trot mare purchased recently from Langhorn Tabb Anderson, and while I did not see her work, she is a fine type and will make them all sit up and take notice.

"Dell Holeman has been employed by Houchin & Anderson, of the Astral King Farm, Jefferson City. This good rider under the splendid guidance of Trev Anderson ,will prove a great acquisition to the stable, which, from appearances, will be better this year than it has ever been. Mr. Houchin has bought the four-year-old stallion Beauchamp, winner of the junior stake at Chicago, Denver, etc., and second only to My Major Dare in aged stallion stakes . I would like to see the horse that will beat him this year in the junior stakes. This stable will feature I Am King in the aged classes, and though he is younger than most stake horses, he is sure "some pumpkins." For the mare classes they have the talented beauty owned by Col. Judy of Tallulla, Ill., called Adelaide Jeane. Mr. Houchin tried to buy the mare but at the last moment the deal fell through. They also talk of a wonderful gelding they are going to show, but he is still under cover. Mr. Anderson has picked up a lot of ready to use horses which will go like hot cakes this spring, judging from the present demand.

"Ed Moore, as you know, has the gray gelding Jack Barrymore, heading his string.

"Dr. W. C. Gadsby, of Kirkwood, has some stable if I am a judge. In the stallion classes he will show that magnificent horse, Crimson Chief, one of the finest, fastest and best gaited horses anywhere; for the mare classes he has Blanch Ring, a mare that will be hard to beat anywhere, very fine, a good doer and possessing great class. Dr. Gadsby, like every one else in the country, is looking for a good rider as he cannot devote so much of his personal attention to the training and showing of horses on account of his extensive practice in St. Louis county. But, where is the rider who can be trusted, does not drink or carouse and knows the game? Answer: Nowhere. What an opportunity for a young man who loves and knows horses; can train and show one and be trusted. I know of several men who would buy a stable of show horses if they had such a man.

"In St. Louis there are and have been many enthusiastic horsemen who own great stables and they have had bad experiences with their riders. I am sorry to say Col. Paul Brown is quitting the game and seems disgusted with it. He was one of the best. His entire stable is catalogued to sell at the April auction in New York. I trust something will occur to cause this wealthy sportsman to reconsider and withdraw his horses from the market.

"P. H. Donnelly of St. Louis is as enthusiastic as ever about his saddle horses, and now has his show horses with Pete Vogetzzer, at Taylorville, Ill., one of the best young trainers in this section. He is a painstaking chap and with some good horses in his hands will go to the top of the profession. Mr. Donnelly also keeps two good horses in St. Louis for his personal pleasure.

"The Busch stable is not 'long' on saddle horses, in fact, has none of the five-gaited variety; but are getting together a good stable of heavy harness horses. They are very keen to show this year and I trust the fair associations of Missouri will offer enough attractive purses to keep them in this country.

"By the way, while in St. Louis I dropped in to see Mr. Behymer of the Sickles Saddlery Co., a horse-lover and one of the boosters of the game, and he showed me an assortment of saddles, bridles, and accessories such as no house west of New York can display, and I do not know of a New York firm that can compare with this assortment as regards show horse equippage.."

Mooers Will Have Stable of Winners.

For several years O. J. Mooers, of Columbia, Mo., has been the largest money winner of any exhibitor of show horses in the United States. In the course of this remarkable career Mr. Mooers has owned many horses of great renown and famous throughout this country and in England. There is a belief among many of the well informed horse show devotees of the Middle West that there is only one smarter horseman in this country than Mr. Mooers, and most every one agrees to this; it is Mrs. Mooers, whose judgment ,ability to exhibit and everything that goes into the game is marvelous. Mr. Mooers has just sold to Longview Farm his great young walk-trot mare, Chloe Malone, a daughter of the incomparable Grand McDonald, and a young gelding that will best be remembered as Charlie Cherry, which was brought out for its first and only public appearance at the Commencement Show by R. B. Glenn, last year. The following letter from Mr. Mooers is so interesting and describes his stable and activities so thoroughly that, instead of rewriting his notes, I am publishing them just as "O. J." wrote, as I am sure they will be of interest to horse lovers in this form. The letter which was written under date March 23, follows:

"I have just sold Chloe Malone to John Hook—for Miss Long's stable—and if you could have heard old 'Foxy John' trying to separate me from her for his price you would have laughed; but before he got her he paid $2500 for her—not in conversation, but in R. A. Long's hard cash. Take it from me, at this time of year $2500 looks good; still I am like you in a way, I do not think there is a walk-trot horse, little or big, that can or will approach her this year. She has settled down and is so much smarter than I ever thought she would get. Her trot is wonderful and her canter is simply poetry turned into music, and no horse living has such a walk. You know I had Poetry of Motion two years and he was the Grand Champion of the world; and I want to say right here: Chloe Malone has a better and faster walk; better trot and just as good a canter ,and can smother the old champion getting off her hocks. I had bought the young gray gelding of Ben Glenn, that he showed at the Commencement show last year and also sold him to John. He was about the smartest little gray horse one ever saw. You should see Pick of Basket and Dainty Miss now. I want to say I have never seen a pair improved like these have since Denver, and the fact is I don't think there is a fifteen hand pair alive that can beat them ,and it is certain there is not a better matched pair anywhere.

"The Spring Maid looks and is also going better than ever, and Adora, the four-year-old Hackney mare, is going to her elbows, and Troublesome Tommy is only waiting for the bell to tap. He has more speed and snappier than ever.

"But I want to say I have a chestnut gelding 15.2 strong, that is the finest harness horse in America, and the handsomest I ever saw; can go to his elbows, pull his hocks accordingly, with a finer, longer neck than Chloe Malone, and will be shown as a gig horse, and has as much speed as Galland Lad—guess that's poor? I will make my first show with him at Tulsa, Okla. I have never shown him and he is as fine, handsome and as smart as Revelation, with speed and action, and will be shown under the name of Bit of a Devil, and if I only had 'Jump' down here to see him parade just once—well, Major Dare, Jack Barrymore or none of the rest would even get an honorable mention for at least three weeks; how do you like his name?

"I also have a new pair of chestnut stallions, half brothers to Reginald Vanderbilt's Dr. Selyonf. They both have their long tails yet, are 15.2½ high, and maybe before I get through with the 1917 shows some one will be good enough to say that O. J. has 'some' stable.

"I don't see why you can't get heavy harness classes put on out in California. If you could I would come out there for this season, that is if a circuit could be formed as good as Galesburg, Burlington, Des Moines, Hamline, Topeka, and so forth. See what you can do and let us know."

"I also have a new bay gelding 15.1, that I am going to educate and prepare for the Ladies classes to take The Spring Maid's place. I have some job, eh, if I expect him to take her place? He is the type and a beauty."

Notes and News

There should be at least 100 horses at California's first meeting.

✤ ✤ ✤

There are 30 head of good trotters and pacers now in training at the Fresno track.

✤ ✤ ✤

California horsemen will get their first impressions of who's who and why at Salinas this year.

✤ ✤ ✤

Several of California's leading horsemen are training at the Stockton, Cal., track this year.

✤ ✤ ✤

Binjolla 2:17¾ and Ortolan Axworthy (3) 2:07½ are in public service at Park Farm, Springfield, O.

✤ ✤ ✤

Salinas will be the first meeting for California horsemen this year. Their dates are July 11 to 14 inclusive.

✤ ✤ ✤

The Pacific Coast Circuit will furnish engagements for the horses from the first of July until well into November.

✤ ✤ ✤

Joe Gahagan, well known driver and horseman, has been made secretary of the Lima, Ohio, meeting, July 23 to 26 inclusive.

✤ ✤ ✤

Sutherland & Chadbourne, the Pleasanton, Cal., trainers, have about twenty head in their stable this spring, and report all in good condition.

✤ ✤ ✤

John E. Madden has purchased three tracts of The Elmendorf Farm lands, comprising a total of some 400 acres of the best land in the estate.

✤ ✤ ✤

The California Fair and Racing Association is now incorporated with $10,000 capital stock and is doing things in a business-like way.

✤ ✤ ✤

Applications for registration of stallions have been coming to Secretary C. W. Paine of the California Registration Board at the rate of 25 per day.

✤ ✤ ✤

It is estimated by the most conservative horsemen in California that there are more than 150 "top notch" harness horses in training here.

✤ ✤ ✤

McCloskey 2:06¼, formerly owned by Stoughton A. Fletcher and Lon McDonald and raced at the Panama-Pacific Exposition races, is now the property of C. K. G. Billings.

✤ ✤ ✤

Secretary Joseph Waddell of the California Fair and Racing Association is now arranging classifications and purses and will be glad to assist the officials of any fair in the circuit with their program.

✤ ✤ ✤

Willie Green, the young man who went from here to Australia in charge of Don Pronto, enlisted in the Colonial Army and is now in France; word has just been received that he has been wounded in the arm, but not seriously.

✤ ✤ ✤

President Hall, of the Bakersfield Fair, who was in San Francisco this week, says he does not know much about the horse business but he is strong on the agricultural end of Fairdom and that if the horsemen will give them a chance they will give them the best meeting in California this year.

✤ ✤ ✤

There probably will be more racing over the half mile tracks in California this year than ever before. It has been most forcibly demonstrated in other sections of the country that the spectators like to see them go by the grand stand, and after this season's racing California horsemen will welcome them.

✤ ✤ ✤

Great interest is taken at Lexington in the report that Mr. W. E. D. Stokes had refused an offer of $50,000 for the stallion Peter Volo 2:02. The offer is said to have been made by Thomas W. Murphy for some breeder whose name is not given, but it is not thought that any breeder in the Blue Grass region was the party making the offer.

✤ ✤ ✤

The Dowling-Bell-Boldstein bill which was aimed at the Harlem River Speedway and which, if passed, would have taken the Speedway away from New York horselovers, was pigeonholed last week when brought up to its third hearing before the state senate. This assures rest in the minds of metropolitan road drivers, for a while at least.

✤ ✤ ✤

Frank Caton, the American trainer who spent many years in the practice of his profession in Russia, but who is now at his home at Cleveland, Ohio, to remain permanently, will employ himself this season by developing five colts that he purchased at the last Old Glory sale, and for recreation will participate in the matinees at the North Randall track. At the Midwinter sale Mr. Caton purchased Axworth (3) 2:10; Binvolo 2:07¾, and Mirthful 2:06¼. The latter mare will probably be raced in the fun sport, while the two stallions will probably find a home in Russia as soon as it is safe to ship them.

Carrietta 2:18, the only mare in the world with four standard yearlings in the list, will be bred this spring to Peter Scott 2:05, as will also Katherine Winston (dam of Cabel 2:05¼, eac.), by Ashland Wilkes.

✤ ✤ ✤

M. L. Woy, Fresno's veteran horseman and a leading sportsman of California, has been "under the weather" for several weeks, but writes friends in San Francisco that one day in the sulky will bring him 'round in good form and there will be no danger of his going wrong at any time during the 18 weeks of racing he expects to attend this year.

✤ ✤ ✤

Walter Gallup, of Fresno, has sent his good young mare, Maggie Spier by Directum Spier 2:11¼, to Sacramento to the court of Bon Watts, the splendid young stallion by General Watts, which is owned by the well known horseman, Jas. Thompson. The dam of Maggie Spier is Maggie Hall, one of the Moko mares C .A. Harrison bought in New York in 1913 for the Woodland Farm. Mr. Gallup secured her when she was a filly in a trade for his mare, Clara Mac 2:04¼, which he sold to the Woodland Stock Farm.

✤ ✤ ✤

Failures in the stud after due publicity being given a horse are few and far between, if any judgment has been displayed by the breeder when he originally selected his stallion. Success of moment and duration without publicity are never encountered. The optimists we find in the breeding business, the successful stallion owners, are those that have kept their charges before the public; the group that are continually predicting the collapse of the industry are the type of men that expect to succeed without publicity. —[American Sportsman.

✤ ✤ ✤

The fast trotting mare, Iula Arion (4) 2:08¼, by Peter the Great (4) 2:07¼, foaled recently a chestnut colt by Guy Axworthy (4) 2:08¾. This is one of the most popularly bred trotting foals that will be dropped in the Blue Grass this season. It is the property of C. W. Leonard, of Boston, Mass., and arrived at Castleton Farm where the mare is now located. As its sire is the sire of Lee Axworthy 1:58¼, the newly made champion stallion, and its dam by Peter the Great, the premier sire of trotters, including Peter Volo (4) 2:02, its breeding could not be well improved upon.—[Jesse Shuff.

✤ ✤ ✤

Petereta, a son of Peter the Great and Recoleta, is a young horse, now eight years old and in the stud at Christchurch, New Zealand. He was bought in this country by Mr. R. McMillan, who still owns him and shipped him to his present home. Two of his get have been trained and have given a good account of themselves; Pita Roa won two races at the Poverty Bay meeting, and reports credit this youngster with being somewhat above the ordinary. Peter Mac, the three-year-old colt, won the Ladies' Bracelet at Blenheim. In spite of this being his first start he found little difficulty in beating a good sized field, and showing himself to be a most useful performer.

✤ ✤ ✤

The prospects for matinee racing at the City Park in Denver are very bright. These races are held as heretofore under the management of the Gentlemen's Driving and Riding Club. They are races not for prizes, but for ribbons, the winner of each heat being rewarded with a small knot of blue. Last summer the races were failures mainly because some of the members were lured away by the hope of capturing honors on the professional tracks of this and adjoining states, while the auto fad has cut deeply into the game by carrying the folks off to the mountains for the day's outing . Twenty-two members of the club have declared their intention of racing at the matinees this year. In addition several new members have been initiated and they have joined with the purpose of putting horses in the events. Some of these already own good performers and others have their eyes on animals that they expect to purchase. The season will open earlier than it has for several years.

✤ ✤ ✤

A letter has just been received at this office from R. C. Simpson of Armisdale, Australia. Dr. Simpson is the gentleman who purchased Don Pronto 2:02¼ and shipped him to Australia, and he writes as follows regarding the horse:

"Don Pronto's first crop of foals have arrived and I am receiving letters every day from owners expressing satisfaction with his progeny. A majority of them are pacers and good gaited at that; Don Pronto is also controlling color. I have a black rascal named "Don Durfee" that is quite a classy bit of horse meat, and with a sweet disposition. Don Durfee's dam is bred as follows: "Jewell Bells,,' full sister to Jewell Chimes (2 miles in 4:33) and winner of the Auckland Cup ,also full sister to Law Chimes 2:15. Jewell Bells is out of Jewell's Heiress 2:19, dam of 5, by Heir at Law 2:05¾. sire of Minor Heir 1:58½, etc.; second dam Nellie Gray 2:19¼. dam of 2 by Conway 2:18¾, and so on. Jewell Bells is by Abbey Bells, he by Bow Bells, out of Russia, sister of Lord Russell, Maud S. and half sister of Nutwood 2:18¾. Quite a nicely bred fellow for this country. Australia and New Zealand have yet to breed their first 2:10 trotter, so that there are no Peter the Greats in this country."

The San Francisco-California Driving Club will hold its annual meeting Tuesday, May 1, when a board of officers for the current year will be elected, and other matters pertaining to the conduct of the summer's matinee racing will be taken up.

✤ ✤ ✤

The number of trotters now in the 2:05 list (fifty-three) is exactly equal to the number in the 2:10 list twenty years ago. The best time on record then was 2:03¾. Twentyfour horses have equaled this mark and nineteen have beaten it since 1896, while the best time on record is faster by five and three-quarter seconds than it was twenty years ago.[Spirit of the West.

✤ ✤ ✤

California breeders can not secure the services of that great sire, Peter the Great 2:07¼. For that matter, breeders of his immediate neighborhood can not at this time unless they have made previous arrangements, as that illustrious stallion's book was filled several weeks ago. They can, however, secure the services of one of his most illustrious sons, Peter McKlyo, a proven sire of early and extreme speed, and offered for public service at Sacramento, Cal., by L. H. Todhunter.

✤ ✤ ✤

The American Red Star Animal Relief, with headquarters at Albany, N. Y., promises to become one of the greatest agencies for the conservation of army animals in America. With its corps of trained veterinarians, properly equipped with veterinary supplies, field and base hospitals, ambulances and other necessary veterinary appliances, it will save the lives of thousands of animals in event of war that otherwise would be destroyed from lack of proper care. Similar volunteer relief work in the British armies resulted in a saving of more than $21,000,000 during the first 16 months of war and the restoring of 105,000 sick and injured army animals to active service.

✤ ✤ ✤

Mutuels For Lexington.

Lexington, Ky., March 9.—The Kentucky Trotting Horse Breeders' Association is considering doing away with bookmaking at its track here and substituting pari-mutuel betting machines, which have proved so successful on the running race tracks in this state. The directors will take up this matter at their next meeting and the change will likely be made before the next trotting meeting in October.

There had been murmurs of discontent among a certain element over the continued use of bookies at the trotting track when the law forced running tracks to use the mutuels and the reform element promised to become troublesome. The death of Andy Welch, who had long held the contract here, also hastened the decision to make the change.

✤ ✤ ✤

Del Monte Polo Tournament Opens.

The spring tournament of the Del Monte Polo Club will be held on the club's fields at Del Monte, starting today, March 31 ,and continuing until April 15. Four events are on the schedule, entries for which include some of the best polo players in the country.

The first event will be the high handicap cup, open to teams under handicap, for which a cup will be given. The second event is the Del Monte challenge cup, open to teams of four without handicap, the cup to become the property of the team winning it three times. The Northern California championship is open to teams of four whose aggregate handicap does not exceed twelve goals. This cup ,emblematic of the championship, will become the property of the club winning it three times, and replicas of the trophy will be awarded to the individual players on the winning team. The fourth event is the major championship, open to teams whose handicaps are eight goals or under.

With the close of the Coronado tournament most of the stables have been shipped north and the players arrived at Del Monte during the week.

The Del Monte four, winners of the California Challenge Trophy will be intact at Del Monte. Tom Le Boutellier II at No. 1, Tom Driscoll at No. 2, Hugh Drury at No. 3 and Willie Tevis at back were the four who successfully went through the California Challenge Trophy matches and won in a hair-raising final from the Midwick four.

Meadowbrook will have a team in the field. This club will have Malcolm Stevenson, rated at nine goals handicap by the Polo Association; C. Perry Beadleston, a six-goal man; George Hickscher and Carleton Burke, one of the best backs in the game.

The Miami Valley team of Cincinnati will be led by Earle Hopping, another six-goal man, and Max Wleischman, his brother Julius, and Harold Talbot will wear the orange and black.

These teams will compete in the scratch events and the high goal handicap.

In the low goal events San Mateo will have its team composed of Captain Reginald McNally, Christian de Guigne, William S. Texis Jr. and Harry Hastings, while Riverside will play a team in which Alvin Untermeyer, H. E. Lett, Hugh Drury and C. J. Hudson will have places.

Foxhall Keene, the highest rated polo player on the association's handicap list, will also be at Del Monte, and if he has sufficiently recovered from a fall that put him out of business some time ago will be seen in some of the matches.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Killing Rabbits in Australia.—James Allen, a Butte boy, has returned to Montana from Australia, where he has been a government contractor for the extermination of rabbits. Australia has spent $27,000,000 for rabbi textermination, and has within its borders 98,000 miles of fence. One of the West Australia fences extends entirely across the continent. The state of South Australia has, since 1891, erected 29,148 miles of "vermin fences," as they are called, enough to encircle the globe and with the remnant build a double line fence along the southern boundary of the United States.

Of late years the rabbit has been repaying in part for his keep—paying board, as it were. He goes to swell the total food exports of the commonwealth. Along the country roads rabbits may be seen hung on the fences awaiting the coming of the rabbit carts which convey them to the packing houses, to be prepared for shipment as frozen meats and hides. Practically all are exported, and during 1913 frozen rabbit and hare to the value of $1,400,000, and skins to the value of $3,000,000 were sent from ports of the colony.

Los Angeles Club—Frank Free and W. A. Hillis were the winners of the big prizes at the Los Angeles Gun Club on Sunday. Free was the winner in the event for the V. Powley sole leather gun case with 94x100 smashes, while Hillis won the H. E. Sargent cuff links by breaking 43x50 double targets.

Both these men were, however, forced to compete in a shoot off for their prizes. H. E. Sargent tied with Free for high gun on the gun case event, but in the shoot off Free won by breaking 24x25 to Sargent's 23x25. In the doubles shoot for the Sargent prize Heinie Pfirrmann tied with W. A. Hillis, but in the shoot off at 20 yards Hillis broke 16x20, while Pfirrmann broke only 15x20.

More than forty shooters attended the weekly shoot at the L. A. club, but the scores made were nothing exceptional. P. O. Long, L. M. Packard, H. E. Sargent and George Melford all won solid gold take-home trophies, while Owen Evans, N. W. Nelson and Al Pachmayr captured silver trophies.

During Sunday's shooting program 7,(035 targets were thrown. This brings the total for the season up to 298,835. This mark for the season is quite a remarkable one. In the practice shooting Heinie Pfirrmann broke 122x125 targets, while H. A. Hine broke 121x125. The scores:

Frank Free, 18 yards, 94x100; H. E. Sargent 18—94, L. J. Petit 17—93, L. M. Packard 20—93, P. O. Long 18—92, H. Pfirrmann 20—91, O. A. Evans 19—90, J .W. Meek 17—90, C. W. Fish 19—89, Geo. Melford 17—88, O. Council 19—87, B. H. Carnahan 16—86, A. Pachmayr 18—85, J. F. Dodds 21—84, Mrs. Pfirrmann 16—84, C. F. Nichols 19—84, H. A. Hine 19—83, N .W. Nelson 16—83, C. W. Clement 18—83, F. H. Hall 17—83, C. H. Betz 18—82. Others at 16 yards—Wm. Kennedy 82x100, S. C. Miller 80x100, Seth Hart 65x75, R. Hendricks 50x75, A. W .Childs 45x50, C. M. Wood 46x60, L. Garnsey 45x50, J. Funk 45x50, G. Persinger 42x50, F. G. Schriner 41x50, F. H. Nichols 40x50, C. H. Richards 40x45, A. W. DuBray 39x50, M. D. Towne 39x50, T. S. Parker 37x50, J. L. Shand 35x50, E. L. Frisbie 30x50, H. W. Hawley 29x50, H. C. Peet 22x25, F. H. Teeple 22x25, J. D. Cantrell 20x25.

Doubles Shooting—Sargent, 16 yards, broke 33x50; Pfirrmann 18—43, Packard 18—42, Melford 16—26, Fish 16—35, Pachmayr 16—35, Hall 16—29, Nichols 16—31, Betz 16—26, Hillis 16—43, Clement 16—29, Kennedy 16—33, Evans 16—33.

Dont's For Trapshooters.—Trapshooting is a sport that demands an alert mind and keen judgment. The shooter's degree of skill depends entirely upon his ability to think and act quickly. No one else can do it for him. There are, however, a few simple facts in the shape of "dont's" that may be kept in mind by the novice.

Don't worry if you miss a target. Get the next one and the following.

Don't worry if when you call "pull" the target breaks as it leaves the trap. Take things calmly. Tell the puller to pull another and let him keep on doing it until a good one is thrown ,or wait until the trap is fixed.

Don't worry because the referee decides you missed a target when you (and perhaps some of your friends also) thought you had broken it. No referee is infallible. His decision, however, goes, so accept his ruling in a sportsmanlike manner.

Don't worry if the puller pulls the trap too fast or too oslow. Don't shoot at the target but drop your gun from your shoulder and then get ready to call "pull" once more. The referee watches the game very closely. He knows whether the target went an appreciable length of time before or after you called, and he also knows that the rules provide for a trap to be pulled promptly. Very often, however, it is the shooter's own fault when the puller balks him in this way.

In giving the word of command to the puller to pull the trap, avoid three mistakes:

Don't call in a low, hesitating voice, otherwise you run the risk of the puller not hearing you; or if he does hear you the pull is apt to be somewhat slow. Call in a sharp, clear voice; the puller is watching you and is keyed up to pull immediately he gets the word, so that if you call in the manner suggested you in a sort of way startle him and he instinctively pulls promptly.

Don't call in too loud a voice, for the effort is quite liable to disturb your aim by exhausting the air in your lungs, causing you to inhale when you should be doing nothing but pointing the gun at the target.

Don't call immediately after the man ahead of you has fired. Give the referee time to call "Dead" or "Lost," as the case may be; and at tournaments give the scorer also time to answer back. If you call too quickly you run the risk of having the trap not loaded or having the puller miss your call on account of the referee's decision or the scorer's answer being mixed up with your voice.

It is also a good plan not to call "pull" when the shooter ahead of you has missed a target, until the target has reached the ground. It might happen that your target took the same flight as the previous one, and thus your eye would be liable to see both targets ,and your calculations be disturbed. The same caution could profitably be observed when, although the previous target was broken, a large piece was left sailing through the air. This may seem a small matter, but small things count when you are trying to make a perfect score.

Fine Fishing Days.—Fishing days are here again, which will be of interest to disciples of light tackle and gaff. According to Hip Justins, several of San Diego's lakes are full of hungry black bass, that tarry not to investigate, but grab anything that looks like lunch.

"At Sweetwater bass are taking artificial bait with a swirling dash, while live minnows always are the stuff," says Justins.

"And 'outside' anglers announce," continued the expert, "that Neptune's bronchos have appeared in the sea pastures off Point Loma. That good news will bring quickened memories of surging battles with ocean outlaws, when fierce fighting bonita, albicore, yellowtail and leaping tuna matched savage strength and cunning against man's boasted superior wiles. Nearby the kelp beds and the whistling buoy finny mustangs are roaming, waiting to do battle with any marine vaquero who can rope them. During the season splendid deep-sea fishing is but a step (perhaps a Talus stride) from the foot of Broadway, where boats, bait and skilled launchmen can be enlisted for a day of sport on the big wet.

"So it's time to go fishing. Hook up with an outfit and tackle some reel sport."—(San Diego, Cal.)

Psadena Kennel Show.—The bulldog of Mrs. Anita Baldwin, Failsworth White Knight, won for best dog in show and also for best bulldog at the recent show held in Pasadena. Mrs. Baldwin, however, did not fare so well with her other dogs. Boris of Romanoff, a new Russian wolfhound owned by Mrs. Loos of Coronado, was declared a better dog than any of the breed.

The show as a whole was a great success, it being a three pointer with 300 dogs on the bench.

Dr. Billings of San Mateo won for best Airedale bitch with Foiderol, and in this breed Mrs. Baldwin was also worsted, her dog White Birk Tyrant being beaten by Frederick C. Hood's Tintern Star, a Boston dog.

Dr. A. T. Leonard's Irish terrier, Nappier Tandy, one of the dogs taken to Pasadena by Jack Bradshaw, won the special cup for the best of his breed. This is the young dog that won at the P.-P. I. E. show, and which has beaten every Irish terrier he ever met.

Mrs. Walter Duncan won special for best collie with Southport Salute, and she also won best of opposite sex with a bitch of her own breeding, Glen Isla Janice.

Tacoma Club—Notwithstanding the fact that old Jupe Pluvius was very much in evidence, members of the Tacoma Gun Club had a fine siesta at the Manitou traps on March 18th.

Dr. S. L. Blair scored a win on the Dave Bales trophy, Dupont handicap system, with 49 out of 50. J. A. Dague won the spoon for long run with 26 straight and Mrs. E. E. Young the one for low score with 24 out of 50. Dague and Al Riehl tied for high place from scratch with 46 out of 50. The scores: Bales, actual, 39; Bales cup 47; Howe 28—44, Campbell 44—48, Werner 35—45, Smith 37—39, Young 42—46, Mrs. Young 24—40, Mrs. Bales 31—45, Schweinler 33—48, Dr. Blair 37—49, Coon 38—42, Turnbull 31—48, Dague 46—46, Mellinger 30—44, Riehl 46—.., Scofield 39—47, Cooper 41—44, Windsor 10x25, Mrs. Blair 5x15.

TROUT SEASON OPENS MAY 1.

Law Calling For April 1 Opening Will Not Go Into Effect Until Next Year.

Anglers are looking forward to the resumption of their favorite sport of trout fishing. Many sportsmen were building up fond hopes that the season would come in on April 1st, a month earlier than last year. The Fish and Game Commission and the anglers in general seem to agree on one point at least ,and that is that the April 1st instead of the May 1st date is the proper date to open the season. Several bills were introduced in the present session of the legislature making the change and no trouble is expected in getting them through.

The trouble is that a bill does not become effective until ninety days after the adjournment of the legislature . Under the circumstances, the season will come in the same as last year.

It is hoped that the sport will prove better on the Coast streams than last season, when the late opening played havoc with the plans and results obtained by the boys who turned out. There was a very dry month of April, consequently the streams were low and conditions generally poor for taking goodly strings.

Perhaps there will be more rain this year to help matters along. At all events, the anglers in northern California along the coast should give congratulations that there is going to be a change to the old opening date, and in the future there likely be an investigation before the opening dates are switched around.

That Southern California is looking forward to a banner season is indicated by the following account from Los Angeles:

With the opening of the trout season in Southern California only five weeks off anglers of the Southland are beginning to pick out their favorite fishing stream. From all indications a banner trout season will be had this year. That is, if the heavy rains do not come and flood the streams and wash the young fish into the ocean.

Freddie Kennard earnestly believes that a great season is bound to result. Kennard is very thankful that the bill that would open the trout season on April 1 did not pass. This measure would have ruined fishing, for the trout are not entirely through spawning at that time.

The fish are always planted in the streams in October. The ygrow about an inch in a month until they are about six inches long and they they start broadening out. As soon as the trout are large enough they always start working up stream to cooler and clearer waters.

There has always been much discussion among the trout anglers as to what is the best gait to use. Some people think that it is best to use salmon eggs all the year around. However, Kennard believes that a number of different kinds of bait must be used during the season in order to have successful fishing.

During the early part of the season salmon eggs are the best bait because it is the trout's natural food. However, as soon as the trout stop spawning they go after insects and then the flies are the best. Spoons are always good, especially in the early season for the large trout. When the water is thick the fish lie on the bottom of the stream or lake and do not have to work for their food as it is very plentiful. The best thing to fish with at this time is a spoon with a heavy shot.

Many people fishing with spoons make the mistake of always pulling their spoon the same way. This is very wrong. The spoon should be first pulled one way, then another. When a fisherman gets a trout on the end of the line he sometimes makes the mistake of not letting the fish stay in one end of the pool, but starts reeling it in across the water. This is a mistake. The fish should be kept in the corner so as to not scare the other trout.

Shooting School Opens.—The Du Pont Shooting school on the Million Dollar Pier at Atlantic City, N. J., which proved such a success last year, will reopen on or about April 1st, and even greater success than last year's is expected. In addition to Manager H. H. Stevens and his assistant P. H. Apgar, a trapshooting instructress will be on hand to give special attention to lady visitors. Mrs. B. G. Earle of New York City has been engaged and she is well fitted for the position. At present she is serving in the same capacity at the Laurel House Gun Club of Lakewood, N. J. The women at this resort are taking a great interest in the sport and some of them, while newcomers to the game, are making good scores.

The addition of Mrs. Earle will surely increase the popularity of the school, for many timid ones will be willing to test their skill, when they have the benefit of an instructor of their own sex.

There will be plenty of prizes for the Golden Gate Kennel show at the Civic Auditorium April 30 and May 1 and 2, for there are 300 silver cups and trophies to be given the winners. George Steadman Thomas of Hamilton, Mass., will judge all breeds. Among those to offer prizes are: Mayor James Rolph Jr., Ben I. Blouch, James Woods, Mrs. E. F. Brown, Mrs. Anita Baldwin, Irving C. Ackerman, Alec Wolfen, Walter W. Stettheimer, Miss Lydia Hopkins and many others.

COST OF SPORT IS INCREASING.

Scarcity of Material and War Has Raised Price of Everything in Athletic Line.

[By Peter P. Carney.]

That the high cost of living is not by any means confined to food, clothing, paper or gasoline is known only to the millions who are active participants in various outdoor pastimes.

With everything on—or near—the market hitched to airships, we must expect to pay more for our sport—and we will. The fellows who keep a close tab on statistics tell us that one dollar today goes no farther than 60 cents did three years ago in the purchase of food or clothing, and if potatoes and onions continue to soar one dollar will look like 30 cents.

There has been increase in the cost of all articles used in the various branches of sport—excepting smokeless powder, and everything that goes with powder has advanced.

It makes no difference whether you are a trapshooter, fisherman, golfer, yachtsman, poloist, or a tennis, squash, handball, racquet or baseball player, you will have to help foot the bill.

The increase in the price of all goods, as a rule, has been from 10 to 50 per cent. The reason given for the increase in cost is the scarcity of raw material and the ever-increasing cost of labor.

Prices have been mounting up for more than a year, and every sport has more followers today than it had a year ago, with the possible exception of baseball. While the 25 cent seat has been tabooed in polite baseball society, this has not injured the sport. The magnates and players by their continued wrangling and their willingness to wash their dirty linen in the newspapers, have caused many persons to turn to other avenues for recreation.

That more persons are actively engaged in sports than one year ago is proof that Americans are not only sport-loving, but are willing to pay for their sport. Cost appears to be a secondary consideration.

Materials that enter into the manufacture of baseballs have increased 60 to 100 per cent, and the balls have advanced from 10 to 50 per cent. Tennis balls have advanced 25 per cent, and golf balls about 50 per cent. Baseball uniforms have advanced about 30 per cent because of the scarcity of good dye and the high cost of cloth. Shoes made especially for use in sporting events are high and going higher, and gloves are almost out of sight as far as price is concerned.

The fisherman pays about 15 per cent more for lead sinkers and steel hooks, and about 5 per cent more for the smaller incidentals that he needs.

The hunter and trapshooter pay about 25 per cent more for their shells, which isn't very much increase when one bears in mind that copper, brass, spelter, mercury and lead have advanced from 200 to 400 per cent during the past two years. A box of 25 shells that formerly cost 65 cents now retails at 90 cents. Firearms have advanced, too. Rifles bring 50 per cent more, and shotguns 25 per cent more than they did a year or so ago. Trapshooting had its best year in 1916, despite the increase in its cost, and gives every indication of doing even better in 1917.

Football players will have their inning next fall. They will be compelled to pay more for leather head harness, leather and felt knee, elbow and shoulder pads and for shoes than ever before.

The increase in the cost of articles of leather, of course, is directly ascribed to the war; the tremendous export trade in shoes, leather and raw and canned beef, which has cut down the supply of cattle to an almost alarming degree.

However, it is not the war that has brought about the increased cost of shafts for golf clubs—that is, the type known as "extra selected," always used for the best clubs. The scarcity of the best grade of second growth hickory has brought about this condition.

In selecting club shafts an average of seventy in every one hundred first grade sticks will be discarded as of poor grain, too "whippy" or not "whippy" enough. The shafts go through three inspections by experts before being passed. This and the increasing scarcity of good materials have brought an increased cost of fifty per cent for the rough, unfinished shafts.

Persimmon and dogwood are also becoming more scarce, and as the majority of drivers, brassies, spoon and bulldog heads are made from these woods, the clubs are twenty-five per cent higher than a year ago.

The "listing" cloth used under the leather grip on a club shaft has increased 100 per cent; the glue used in "setting" shafts and in many other ways in golf club construction has increased nearly 20 per cent; the brass soles for brassies cost 20 per cent more, while the "pitched" string with which the whipping on the shaft is done has increased 50 per cent.

Americans who live in the great outdoors do not consider the cost of their recreation. They go into it because they feel that no matter what the pastime, it induces health—and having health, they are well satisfied.

Donald (Ore.) Club—Donald, Ore.—James W. Seavey, of the Portland Gun Club, was high gun here on March 18th, in the big 150-bird race, held under the auspices of the Donald Gun Club. Mr. Seavey broke 145 bluerocks, while his team-mate, Frank M. Templeton, winner of the Pacific Coast handicap last year, was next in line with 143 out of the 150.

Mark Siddall, of Salem, finished third with 141, while one point behind him was Frank M. Troeh of Vancouver, Wash., holder of the National amateur championship. Charles Leith, of the Woodburn Gun Club, rested in fifth position, while sixth honors were won by Carl J. Schilling, a Portland professional, with 138.

Peter Whitney, of Hubbard, won the handicap event and with it the 30-30 Remington rifle. He was standing at the 18-yard line and broke 24 out of 25. Carl J. Schilling, a Portland professional, tied Whitney, while E. H. Keller, Portland Gun Club amateur, were next with 23. Twenty-three nimrods shot in the 150-bird race. Following are the scores:

J. W. Seavey 145, Frank M. Templeton 143, Mark Siddall 141, Frank M. Troeh 140, Charley Leith 139, Carl J. Schilling (pro.) 138, Peter Whitney 137, Ed B Morris (pro.) 135, R. P. Knight 134, E. H. Keller 132, T. J. Mahoney 128, Mrs. Ada Schilling 127, H. H. Ricklefson (pro.) 126, Henry R .Everding 122, C. H. Knight (pro.) 122, E. G. Hawman 122, A. L. Zachrisson 111, James E. Reid (pro.) 124x135; A. Woelm 85x120, O. Berg 86x105, G. G. Clark 12x15, Miss Gladys Reid 9x15.

Following are the scores in the handicap event of 25 birds: Peter Whitney, handicap 18 yds., broke 24; *Schilling 17—24, *Knight 17—24, Keller 19—23, Everding 18—22, Templeton 21—22, C. Feller 18—22, E. Feller 16—22, Clark 16—21, Mahoney 17—21, Ricklefson* 17—21, Siddall 21—20, Leith 20—20, R. P. Knight 19—19, Hawman 16—17, Seavey 21—17, Zichrisson 18—17.

Green Lake Club—Pleasant weather, together with the opening of the Northwestern League and the rapidly approaching state tournament, to be held at Green Lake May 19, 20 and 21, resulted in bringing out an exceptionally large crowd of trap artists at Green Lake on March 18th.

Forty-five marksmen shot through the regular program of fifty targets, several stretching their string to 100. George Scripture, a member of both the Green Lage Club and the Seattle Trapshooters' Association, headed the list of both amateurs and professionals, with a perfect string of breaks, never faltering once. W. H. Carstels and Harry M. Williams lost but one target each, finishing with 49.

With their added targets, E. Chantrell, Dr. S. W. Griffin, George Scripture, Dr. M. A. Winningham, Carsten and W. B. Taft were left tied. Each shooter was then placed upon a yardage handicap, W. H. Carstens finally winning out with five straight dead ones from the 20-yard line.

Negotiations have been entered into with the Dupont Powder Company in an endeavor to secure a quantity of their individual "trapshooter" design silver sterling spoons, which the club will offer as their weekly prizes for club members.

Harry M. Williams, a top-notch shot and now stationed in Seattle for the federal government on naval recruiting duty, together with E. L. Blake, D. G. Huber and J. H. McDiarmid, shot with the club for the first time Sunday and enrolled as members. The scores:

George Scripture 50, W. H. Carstens 49, Harry M. Williams 49, Hi Follerich 47, W. B. Taft 47, Matt Grossman 47, Deskin Reid 47, H. E. Poston* 46, R. S. Searle 46, Dr. King 46, J. H. Hopkins 46, J. H. MacDiarmid 45, George B. Baker 45, E. K. Van Vleck 45, L. S. Barnes 44, D. G. Huber 44, E. Chantrell 43, Dr. S. W. Giffin 43, R. W. Kinzer 42, C. E. McKelvey 42, W. C. Brown 42, Dr. M. A. Winningham 42, Dr. R. V. Mills 42, Al Mertens 42, James F. Hill 42, C. W. Bandy 41, Dr. A. B. Kidd 41, J. W. Geltz 40, J. H. Davis 39, J. P. Houston 39, F. E. Bronson 39, E. W. Eller 39, H. E. Gleason 37, Dr. E. C. Lanter 37, W. M. Elliott 36, C. F. Rinehart 35, George O. Colwell 33, M. A. Rosenfield 32, J. F. Rohowits 32, Ed W. White 32, Mrs. L. S. Barnes 26, Will T. Curtis 26, C. L. Hoffman 26, E. L. Blake 24.

At 100 targets—Scores in the 50-bird event are added to the totals that follow: Scripture 95, Follrich 95, Van Vleck 93, Barnes 91, McKelvey 89, Kinzer 83, Dr. Mills 82, Dr. Kidd 80, Davis 72, Rinehart 68.

Results of A. A. T. A. Contests—In February 76 medals were awarded to prominent trapshooters throughout the United States and Canada in the medal contests conducted by The American Amateur Trapshooters' Association.

The solid gold medal awarded for an average of 95% in the 1500 target contest, the highest honor in the trapshooting world, was won by C. E. McKelvey of Seattle, Washington, and L. S. West of Rochester, N. Y., who each turned in scores of 1,456.

The list of medal winners on the Coast for February follows:

95% Class—C. E. McKelvey, Seattle, Wash., 1456.

90% Class—Dr. C. L. Templeton, Seattle, Wash., 930.

85% Class—J. H. Hopkins, Seattle ,Wash., 460; Geo. K. Gilmore, Wallace, Ida., 448.

80% Class—R. K. Marsh, Denver, Colo., 462; B. E. Moritz, Denver, Colo., 462.; Hall McLachlan, San Jose, Cal., 440; Herman Wise, East Ely, Nev., 437; M. L. Werkheiser, Wallace, Ida., 421.

75% Class—H. Poston, San Francisco, Cal., 455; Hall McLachlan, San Jose, Cal., 431; Otto Pohl, Fremont, Neb., 418; Dr. B. F. Blosser, Spokane, Wash., 431; E. J. Morgan, Salt Lake City, Utah, 443.

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

April 8—San Francisco, Cal.—Golden Gate Gun Club. C. A. Haight, Secretary.

April 15—Lindsay, Cal.—Lindsay Gun Club. Chas. C. Barieu, Secretary.

April 22—Tacoma, Wash.—Northwest Washington Trapshooters' League Tournament ,under the auspices of the Tacoma Gun Club. E. E. Young, Secretary.

April 23, 24—Lewiston, Idaho—Lewiston Gun Club. C. E. Butler, Secretary.

April 28, 29—Fresno, Cal.—Fresno Blue Rock Club. C. B. Jackson, Secretary.

May 6—Coalinga, Cal.—Coalinga Gun Club. E. N. Ayers, President.

May 6—Bingham, Utah—Utah State Sportsmen's Association. A. R. Bain, Secretary.

May 6—Denver, Colo.—Denver Trap Club. Warren Conley, Secretary.

May 7—Crete, Nebr.—Crete Gun Club. Frank J. Kobes, Secretary.

May 7, 8—Salem, Oregon—Oregon State Tournament, under the auspices of the Capital City Rod & Gun Club. Mark Siddall, Secretary.

May 13—Everett, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Everett Gun Club. C. E. French, Secretary.

May 13—Eureka, Cal.—Eureka Blue Rock Club. W. E. Innes, Secretary.

May 13, 14, 15—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary.

May 14, 15, 16—Spokane, Wash.—Spokane Gun Club. "Old Policy." Chas. A. O'Connor, President.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden, Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24 — Bellingham, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

Seattle Association.—Only two squads appeared on the grounds on March 18th and shot through a very disagreeable wind which shifted the targets in nearly every angle but that which might have ordinarily been expected.

Matt Grossman, Deskin Reid, Hugh Fleming and Ed Ellis tied for the high position in the fifty event, Fred Landwehr taking second with a forty-six.

In the hundred-bird race Hugh Fleming shot high with a ninety-five. Ralph Miller finished second with ninety-three to his credit. The scores:

At 50 targets—Matt Grossman 47, Deskin Reid 47, Hugh Fleming 47, Ed Ellis 47, Frend Landwehr 46, Harry Williams 45, Ralph Miller 45, J. H. Hopkins 41, Jack Lewis 40, C. B. Blethen 36.

At 100 targets—Hugh Fleming 95, Ralph Miller 93, Fred Landwehr 91, Ed Ellis 90, Jack Lewis 85, C. B. Blethen 66. Yours, E. A. FRY,
Seattle (Wash.). Sec'y.

Vallejo Club.—High scores were the order of the day in the first trap shoot of the season at the Vallejo Club at Vallejo on Sunday. They were as follows:—

Fifty targets—J. V. O'Hara 43, J. W. Cooley 47, *O. Feudner 45, *L. Middleton 42, W. E. Mann 38, J. W. Peckham 47, C. F. Nisecarver 38, H. J. Yocom 42, T. D. Humphreys 34, A. O'Brien 11, W. F. King 36, H. Herbert 39, A. McCarrick 30, F. Zeicke 38, P. R. Erler 25, P. G. Magistrini 45, J. Flynn 36, Geo. Fraser 31, A. Atkinson 36, G. Kutz 22, Dr. Saxton 41, J. McPherson 41, J. Ward 27, E. B. Tisdale.

Sportsmen's Row

Look at the way O. N. Jones shot at San Jose. He was third among the professionals with 183 out of 200. "Onion," as he is familiarly and fashionably known these days, is a lightweight, but the way he is coming along indicates that he will soon be among the champions.

✤ ✤ ✤

Distemper has been prevalent in some of the California kennels. Fred Coutts is reported to have suffered the loss of several good dogs in his kennels at Encinitas. His dogs are believed to have picked up the disease away from home, as the kennels have always been free from visitations of the kind.

✤ ✤ ✤

During the past fiscal year there were constructed in the national forests 227 miles of new road, 1,975 miles of trails, 2,124 miles of telephone line, 89 miles of fire lines, 81 lookout structures ,40 bridges, 222 miles of fence, 545 dwellings, barns and other structures, 17 corrals, and 202 water improvements.

✤ ✤ ✤

Walter B. Honeyman of Portland, the well-known trapshooter and all-around sportsman, has added two Walker foxhounds to his kennels. He has tried his new purchases on Oregon bobcats with satisfactory results. His bird dogs are being worked regularly, and will likely be heard from in the Northwest field trials.

✤ ✤ ✤

Edward Swanson, a member of the Butte (Mont.) Anglers' Club, has to his credit a catch of the biggest trout caught in the Big Hole country this season. Mr. Swanson's catch consisted of one rainbow that weighed eleven pounds eleven ounces dressed, and another that tipped the scale at ten pounds, two ounces.

✤ ✤ ✤

The Solomon Derby, the first of the season's classic dog races held in Alaska, was run on March 11, six teams competing, and was won by the team driven by Frey Ayer, who also won the same race in 1917. The distance was sixty-four miles and the time of the winning team was five hours and fifty-seven minutes, ten minutes slower than the record, that was made in 1913.

✤ ✤ ✤

Lakeview (Ore.).—The past few days have seen a large number of rabbit scalps sent into the county court, the cause probably being the suit against the law. The people killing the rabbits evidently fear that the thing may be knocked out and therefore they will be unable to collect their bounty. Up to the present time a total of 59,399 rabbit scalps have been sent in. This means that warrants to the extent of $2,919.95 have been issued by the county clerk.

✤ ✤ ✤

The Chicago boys who visited San Francisco in 1915 and Newark, N. J., in 1916, have not forgotten the royal time afforded them, and it is their intention to return the favors bestowed upon them by giving the visiting casters the time of their lives at the tenth International Fly and Bait Casting Tournament of the National Association of Scientific Angling Club to be held at Washington Park, Chicago, August 31 and September 1, 2 and 3.

Chicago, Ill. BAIT CASTER.

✤ ✤ ✤

Sportsmen throughout Snohomis hcounty are making preparations for the fishing season, which opens April 1 on all game fish. Ten fishing licenses have already been sold at the warden's office in the court house, which is the forerunner of a rush of prospective fishermen to secure licenses as the season draws nearer. There were seventy-five state licenses and ovr 8,500 county licenses issued last season, and it is expected that this season will record a much larger number. A. R. W.

Everett, Wash.

✤ ✤ ✤

The recent big game hunting season in the Northwest brought forth a discovery of unusual interest t opathologists as well as to sportsmen—the case of a moose that lived, probably for months, with a large leaden bullet imbedded in its heart. A South Dakota banker shot the animal during a hunting expedition in the forests east of Winnipeg, Manitoba. When the carcass was being prepared for shipment, a healed wound was noticed on the heart, and on probing, the bullet was found. The moose was a full grown bull and apparently had been in perfect health.

✤ ✤ ✤

The affairs of the old Pastime Gun Club of San Diego, Cal., were recently wound up, and a new club, the San Diego Gun Club, was organized, and plans laid for an active summer campaign at the traps. The opening shoot of the new club will be held shortly and will be for merchandise prizes. A tournament will be held by the club some time during the summer. The officers of the new club for the current year are as follows: President, Charles Julian; vice-president, Jos. Hinckley; secretary, H. Justins; treasurer, "Nellie" Barker; board of directors, Warren Beckwith, Capt. Jack Merrill and Stanley Andrews.

The date of the Del Monte registered tournament has been changed to July 27, 28 and 29th. The event will undoubtedly attract shooters from all sections of the Coast.

✤ ✤ ✤

Tacoma, Wash.—Bills for the purchase of 325 Chinese pheasants and 12 dozen Bob White quail, costing $1,302.90, were signed by the county commissioners. The birds were recently purchased by Game Warden Ira D. Light from various places in Washington and Oregon and have been liberated throughout the county. During the last year Light has turned loose nearly 1,000 Chinese pheasants. The distribution of the birds is not confined to the game preserves but is general throughout the entire county. Funds for the purchase of the birds come from hunting license fees and from fines paid by violators of the game laws.

Inland Empire Tourney—Spokane and Kalispell teams in the Inland Empire Telegraphic trapshooting tournament retained their positions in first place on March 18, while Wallace and Kellogg dropped into second place. The four teams were tied for first place as a result of last week's shoot.

Although Kellogg defeated Wenatchee, its opponent in the matches, its score was less than that of Kalispell, in the shoot-off of their tie. Harry Gayhart of Kalispell retains his lead for individual honors, with a total of 122 birds out of 125. The scores:

Sunnyside 109, Garfield 116, Spokane 117, Palouse 110, Potlatch 119, Pendleton 111, Kalispell 124, Wallace 114, Wenatchee 114, Kellogg 118, Lewiston 118, Pomeroy 104.

RED MALLARD ON EXHIBITION.

Sportsmen Interested in Only Specimen Said to be in Existence.

In the show window of H. C. Golcher's store, on Market street, San Francisco, there is a red mallard duck, said to be the only specimen in existence. It was loaned to H. C. Golcher through the courtesy of Judge F. W. Henshaw. Because of the controversy over the white mallard, the exhibit is proving doubly interesting to sportsmen.

Data on the red mallard is furnished by the following communication on the subject, written for the Breeder and Sportsman:—

Mallard (Anas platyrhynchos). Abnormal in color and markings (and in some measurements), but apparently not a hybrid. About all that can be said in explanation is that the Mallard (as is well known) is a species that is prone to produce occasional individuals showing startling variation from the normal. Abnorma lexamples of wild mallards have been described many times. Some of the variations noted have been due to hybridism between the Mallard and other species (usually Muscovy Duck or Pintail). Others can not be explained in this way, for as in the present example, the peculiar color and markings do not point to a connection with any other species.

Several specimens described from the U. S. National Museum are somewhat similar to this bird, though none presents exactly the same combination of characters. The cinnamon coloration occurs to a greater or less extent in some of these aberrant birds.

Where this specimen differs in measurements from the ordinary Mallard it is of larger size, as is the case in most of the other abnormal birds recorded.

(Signed) H. S. SWARTH.
Curator of Birds, Museum of Vertebrate Zoology, University of California.

Vernon Club.—F. A. Breist was the victor in the weekly shooting program at the Vernon Gun Club Sunday. He smashed a total of 59x60 targets, which is considerable shooting. Breist hails from Toledo, Ohio ,and from the way he handles the scatter gun he is considerable tarhawk smasher. Breist was also high man for the day with a grand total of 97x100 breaks.

J. C. Famechon, Harry Hoyt and William Brawner were the runners-up with 58x60 breaks. Bob Bole and Stanton Bruner shot a 100-bird race ,which resulted in a tie, each breaking 97x100 targets. There were twenty-one shooters present and the scores were exceptionally good. The scores:

O. N. FORD HIGH AT SAN JOSE.

Tom Wilkes Wins Singles Trophy and Baumgartner Takes Doubles in Registered Tourney.

The first registered tournament of the season in California was held at San Jose on Sunday with forty-five guns in attendance. The results were highly flattering, although there was a high wind blowing which helped to keep down record scores.

Tom Wilkes of San Francisco took the O. N. Ford championship at fifty targets by running out the string without a miss. Frank H. Mellus of Los Angeles was a bang-up second with 49 and Ford came in third with 48. It was some race.

In the O. N. Ford doubles championship Louis Baumgartner of San Francisco was the winner of the highest score ever made, 47 out of 50. Ted Handman, the San Francisco boy wonder, was second with 44 and Frank Mellus got into third place with 43.

Some of the distinguished visitors who took part in the event were: J. W. Considine of Seattle and San Francisco, F. U. Roseberry of Baltimore, George and Frank Stall, the millionaire mining men of Sweetwater (Nev.), Frank Mellus of Los Angeles, Dr. Martin of Fresno and Tom Wilkes of San Francisco.

In the regular program of 200 targets, O. N. Ford led the way with 192 and Fred Willett topped the pros with 185. The high guns were:

Amateurs—O. N. Ford 192, Frank H. Mellus 191, A. G. Flickinger 189 and Hall McLachlan 188.

Professionals—Fred Willett 185, L. S. Hawxhurst 184, O. N. Jones 183 and R. C. Reed 179.

The showing of McLachlan and Jones in the field of forty-five crack shots was pleasing.

O. N. Ford made a high run of 104. F. U. Roseberry 87, Ted Handman 51, and Hall McLachlan 50.

Hall McLachlan ot San Jose, who has been shooting for less than four months, shot a wonderful race at 175 and led the entire field, but the strain became too great for him and he dropped five in the last 20. This made him fourth in high average with a score of 188 out of 200.

Every shooter on the grounds expressed his desire to come to the Pacific Coast handicap in May and bring others along with him.

Amateur scores follow: O. N. Ford 192x200, F. R. Mellus 191, A. G. Flickinger 189, Hall McLachlan 188, George Stall 186, Ted Handman 186, William Varien 184, L. Baumgartner 182, Dr. Martin 182, Toney Prior 182, F. U. Roseberry 182, H. Lorenson 181, George Anderson 180, Tom Wilkes 179, C. H. Nash 176, A. M. Barker 177, George Ellis 177, Ed Garratt 173, F. Stall 173, H. R. Phinney 173, W. J. Terry 170, William Eilert 170, J. W. Considine 168, F. Chappell 140, F. Tholke 131, F. Pura 130, D. McFadden 126, Dr. Priestley 124, Miss Geneva Meyers 118, C. McFadden 116, W. H. Price 89x100, C. W. Wood 70x100, W. L. Koch 45x50, H. Stelling 43x50, Ed McCormack 41x50, A. Smith 37x50, Charles Stamper 38x50, J. H. Kelley 18x25, Mrs. Hall McLachlan 16x25, George E. Ballantyne 13x25, C. J. Fox 13x25.

Professionals—Fred Willett, 185x200, L. S. Hawxhurst 184, O. N. Jones 183, L. C. Reed 179, J. A. Cook 177, C. A. Haight 175, Charles Knight 175, E. C. Truscott 119, V. Massara 114x150, P. Breschine 124x150.

Championship of California and Nevada at 50 singles—Tom Wilkes 50, Frank Mellus 49, O. N. Ford 48, George Anderson 48, Ted Handman 48, A. G. Flickinger 47, W. J. Terry 46, Wm. Varien 46, A. M. Barker 45, J. Martin 45, Hall McLachlan 45, F. Stall 45, George Stall 45, F. U. Roseberry 44, Toney Prior 44, H. Lorenson 43, L. Baumgartner 42, Ed Garratt 42, C. H. Nash 42, C. H. Nash 41, W. J. Eilert 41, H. R. Phinney 37, J. W. Considine 36.

Doubles championship, California-Nevada, at 25 pairs—Louie Baumgartner 47, Ted Handman 44, F. Mellus 43, Toney Prior 41, O. N. Ford 39, Hall McLachlan 39, George Stall 38, A. M. Barker 37, George Anderson 37, F. Stall 36, N. A. Howard 29, H. R. Phinney 25.

Remarkable Trap Record.—One of the most remarkable trapshooting records that has come to our notice recently is that made by Mrs. B. G. Earle of New York City, at the Atlantic City Trapshooting School and made with a 20-gauge gun.

Mrs. Earle took her first shooting lesson on September 11th, and at the end of the month she had broken 52% of all the targets she shot at. This was a most creditable showing considering the few lessons she had and the fact that she used a small bore gun. During the month of October she improved steadily, getting better scores each day and increasing her monthly average to nearly 67%, or an increase of 15% over the previous month.

During November Mrs. Earle showed a still greater improvement, making an average of 80%. On one of these days she registered scores of 22, 23, 22, 23, or 90 breaks out of a hundred. Think back, Mr. Shooter ,to your first efforts and think honestly—did you do as well as that, and did you shoot a 20 or a 16, or was it a 10?

This record of Mrs. Earle's certainly speaks well for the training at the Trapshooting School and for the small bore gun. If she continues to improve at the rate she has been going there will be nothing left of the targets she shoots at when she starts to use the regulation 12-gauge. We certainly hope she will be at the Grand American this summer to help the Eastern ladies defend their championship title.

("BLUE BIRD.)

BETTER LIVE STOCK
and Agricultural Topics

The Kings County Jack Ranch recently sold a jack to the Cameria Ranch Co. of Ventura for $3,000, and one to Pete Muller, Gustine, for $1250.

✣ ✣ ✣

An experiment at University Farm to learn the relative value of milo threshed dry and soaked and of the head for hog feeding, will be shown to visitors at the picnic April 28.

✣ ✣ ✣

A. R. Hunter, of Island City, Ore., has recently purchased fifteen head of young Percherons from the U. K. L. ranch in Idaho. It is an exceptionally strong lot of horses, all of them being from imported dams and sired by an imported stallion. Mr. Hunter is the largest breeder of purebred Percherons in the state and is using the champion Kroumer 97397 as head of his stud.

Horses and Mules Scarce in the Middle West.

In a letter to the Breeder and Sportsman, Charles F. Green, of the firm of W. L. Green & Sons, Centralia, Mo., one of the largest horse and mule firms operating in the United States, has the following to say regarding the horse and mule situation in the Middle West:

"I have been buying a lot of horses and mules but they are getting so hard to find we are having trouble filling our contracts. We are shoving Artillery horses at the St. Louis yards for the British buyers and it looks now as though the United States will want a lot of the same kind; in which event, it will be a job to supply them. Harper & Co., of St. Louis, have a new contract for 1,000 'riders' for the Cuban government which they started on this week; this helps the local shippers. So with the French, Italian, Cuban and English buyers taking all they can get, we can sell almost anything, as all of them want different types. I have been selling some good walking horses, the plantation kind, at good prices, but they, too, are hard to find and there is a big call for mated horses for pleasure and show ring honors. In fact, anything will sell, but it's hard to find them in the country.

"We have sold a lot of good farm mules from $500 to $575 the pair. I sold one mule to Maxwell-Crouch, St. Louis, that weighed 1,710 pounds; a black mare mule, six years old and one of the best I ever owned. She brought $350. Our retail trade has been the best we ever had. In December we sold 668 head."

Farmers' Protective League Active.

Sacramento, Cal.—C. A. Bodwell, Jr., the active executive of the Farmers' Protective League, said this week: "Among several bills which the League during the past week has been active against were Assembly Bills 1123 and 1337 and Senate Bill 882. The latter affected the hay people and the former the dairy industry. The so-called hay bill made it compulsory for any farmer or hay baler baling hay within the State to place thereon a tag giving the true weight. Also on this tag was to be indicated additionally whether such hay was baled from a shock or stack. It was intended as mandatory that this tag weight should always subsequently represent the true weight of the bale. This manifestly would be impossible as hay is something constantly fluctuating in weight in handling. Furthermore, such procedure would mean at least a cost of fifteen cents per ton, thus placing in the aggregate an enormous and useless expense on the industry."

Bodwell said further about the so-called dairy bills: "These two bills before the Committee on Public Health and Quarantine were vicious in the extreme. Besides many bad minor provisions there were two fundamental points involved which the League would fight. The first of these is that there should be allowed, as now, a number of local inspectors of milk and milk products such as exemplified by different city regulations, county ordinances, et cetera. This is a matter which the officers of the League believed should be covered by the State under some one of its commissions such as Public Health and Quarantine, or the State Dairy Bureau, thus to make one law prevail in any and all parts of the State.

The other fundamental principle is that involved in the provision specifying that all cattle reacting on the tuberculin test shall be branded, so thus to be known. This would practically mean destruction, for neither dairyman or butcher would buy such an animal. Any property taken or destroyed by the State must be paid for by the State. This brings up the question fought over at the last session of the Legislature of remunerating owners for tubercular cattle. Ultimately this will have to be done and the League stands squarely behind this as a matter of justice to the farmer.

Great Spring Stock Shows at Calgary.

There are 504 Pure-bred bulls to be offered at the Annual Auction Sale to be held by the Alberta Cattle Breeders' Association at Calgary, April 10 to 13. The sale commences at 9:30 a. m., April 11. There will be 286 Shorthorns, 168 Herefords, 42 Aberdeen-Angus, 6 Galloway and 1 Red Polled. This is the largest sale of bulls ever held in Canada or the United States, and will present a splendid opportunity to purchase herd headers or bulls for the range.

The Spring Horse Show will be held at the same time at Calgary. Entries close on March 27th. A splendid opportunity to buy or sell horses. Especially attractive evening programs, including regular horse show classes, hurdle jumping, grand stock parades and excellent music.

The Outstanding Draft Sire.

First-class sires are as scarce among draft horses as among other kinds of stock. A number of breeders have been looking all winter for stallions to stand at the head of bands of brood mares, and some of them are still looking. Their mares are among the best in the United States. The offspring of the mares have been prominent in the showrings and the high-priced lists at sales. It requires a stallion of unusual individual merit and the choicest bloodlines to merit consideration for such use. Naturally when a man has spent many years in breeding horses he is particular about each new sire he introduces. His extreme care on that point is the best evidence that the breeder knows his business.

There are many near-great stallions, but few great ones. Any horseman who has studied closely the older stallion classes at the International or any of the larger state fairs must have been impressed by the fact that only a few horses would compare favorably with the best of the prizewinners. In comparison with the larger number of breeding farms the outstanding stallions are still scarcer. Of course not all of the best sires are shown, and it is also true that not all the good show horses are prepotent sires. And even if we consider the get-of-sire classes in the shows, there is only the same conclusion to be drawn and that is that very few sires are nearly as good as the best.

Improvement in breeding comes slowly. The nearer a breeder gets to the top the slower and more difficult it is to make more progress. Then the law of averages checks advancement, as nearly all of the sires he would choose have a majority of their near ancestors of scarcely so high an excellence in type. The leading breeders face the stern necessity of selecting sires which are not only the best of horses themselves but which have the longest possible list of prepotent ancestors of that type. The outstanding draft sire is not an accident. His discovery necessitates a wide acquaintance with the stock of the breed, present and past, and a judgment of horses which is born, not acquired. But the results are worth the cost in time and money. The outstanding sire is the main factor in adding distinction to fame already acquired by the stock of a great breeding farm.—[Breeder's Gazette.

Poland China Sale Successful.

Further evidence that Missouri occupies a conspicuous "place in the sun" of the Poland China world is to be found in the result of the sale held at Mexico, Mo., March 21 by E. H. Carter and Mrs. Frank Coatsworth. Fifty head sold in this sale for a general average of $115.90, one of the best sales held in the state this year.

Ideal weather, perfect sale arrangements and a splendid offering awaited a large crowd of breeders and farmers in a buying mood and these factors combined to make a sale highly satisfactory to the exposers.

These breeders were entitled to a good sale. Ed Carter has been a liberal buyer at a number of the leading sales of the state the past year or two and many an auction owes its success in a large measure to his support and encouragement . His judicious purchases plus real ability to properly develop the produce are reasons why breeders attended this sale with the knowledge that they would have an opportunity to purchase as good as the breed affords.

This sale also brought to the front one of the good boars of the state in King Joe's Masterpiece, a litter brother to G. & A.'s King Joe. The breeders liked this yearling to the extent that they willingly paid an average of $145 on the 22 head of sows and gilts bred to him. Unquestionably this boar is firmly established in popular favor.

Lady Josephine, a three-year-old daughter of Big Joe, one of the Carter herd sows, which was entered in the sale after the catalogues were out, proved a real attraction and sold to E. P. Johnson of Martinsburg, Mo., for $420, the top of the sale.

R. O. McFarling topped the catalogued offering on lot 1, Wonder Beauty by A Wonder, at $220, and secured one of the top sows sold this season.

J. A. Cates of Marshall, Mo., was the heaviest individual buyer, securing a number of the tops. Mr. Cates has been a heavy buyer this winter and is establishing a top herd. A. V. and R. L. Young of Palmyra, Mo.; P. H. Cullen, St. Louis, Mo.; C. F. Clark, Mexico, Mo.; L. A. Harris, Benton City, Mo.; J. W. Ryder, Roadhouse, Ill., and W. W. Pollock, Mexico, Mo., were all liberal bidders and buyers.

Considering the fact that the sale was late and that the sows were necessarily bred late, the average was exceptionally good and attests the high quality of the offering and the esteem in which the sellers are held.—[Poland China Journal.

Profit For Lamb Feeders.

The feeders of lambs are pretty jubilant over the outcome of the fat lamb market. Most feeders report big profits, and those less enthusiastic report satisfactory profits. Where loss has occurred it is traceable directly to some local cause, such as dog and wolf damage, or some other local cause or accident that is no fault of the lamb.

Lamb feeding demands some knowledge of how to care for this kind of stock, and the more experience one has in feeding and handling sheep the better prepared he is to direct the work for successful results. The trained eye of the sheep feeder detects the out-of-condition sheep or lamb at a glance. The skillful sheep handler knows what the trouble or ailment is and how to administer relief.

A sick sheep usually needs a purgative administered as soon as it is discovered. Keep a little medicine department supplied with all the needed remedies so that treatment can be quickly resorted to and the trouble removed; prompt treatment has been the means of saving many a sheep, likewise many a person.

If it pays so well to buy lambs at a big price to feed for the mutton lamb market, what do you think of the farmer who raises his own lambs and feeds them out for the same fat lamb market? Why not take over the whole proposition and get all there is in it? Of course, the summer and all-year care of a flock of ewes and their growing lambs is a responsibility to consider, but there is a crop of wool that comes in to be considered also. The sooner the farmer gets his pastures and feed crops prepared to handle sheep, the sooner he will be on the money-making list.

THE CONSCRIPT.

[By Tom Bodine.]

He was a big amiable looking bay and trotted along submissively behind the spring wagon with his head and neck thrust forward so as not to pull against the halter. The morning was cold, he had come a long distance, and his winter's coat glistened here and there with frost crystals. The man in the wagon ,schooled in a great faith, never once looked back as he drove into the barn where the Jew, combing the upper counties for "gunners," did his buying. Docility was the outstanding virtue of the conscript—docility and love. He was six years old and had been "raised from a colt" by the man in the wagon. All of his life had been spent in sight of the little white house amid the trees back from the road. On idle days in the summer time he had the freedom of a big woodland pasture carpeted with Monroe county blue grass, and sometimes on a sunny day you could see him silhouetted against the blasted elm on the slope, head up and ears erect, listening—maybe to the call of destiny, who knows? In the winter time the barn and barn lot were his home and when not standing with his head over the fence nickering at the children and thrusting his soft muzzle into their hands he was nipping the red calf playfully or romping with the chickens at his feet. Up until last summer he had a friend—a big mule, with a tug mark on his side—and they had spent long hours musing together. But one day the man and the mule went away together and the mule never came back. It grew lonesome for a time, but a roan cow soon supplied needed companionship, only, often after that, the conscript tossed his head up and remained still as if listening to something. But if he was conscious that destiny was near at hand, nothing betokened it as he trotted into the big barn.

"Good horse," said the Jew. "How did he get that wire mark on the neck?"

"Reaching over the fence to play with the children."

"He's worth $175. Here's your check."

And that afternoon, the conscript, as one of what seemed to him a vast company, was loaded on a stock car and began upon a journey that was to take him far by both land and sea. Looking out he saw no familiar faces. There were no flags, no fond farewells, no martial stir, no patriotic appeal. Yet he was on his way to Flanders—"a gunner"—to tug and strive "for civilization." His body would be mangled and mingle with soil "somewhere in France," but nobody seemed to care. Behind him forever and far away were some little children he loved, and a barn lot where the chickens came and a red calf played. Arcady lay in a woodland pasture whose beauties nothing in the bright fields of Picardy could match, but he was leaving it all and going unheralded of name or fame, just an humble foal of the house of Denmark, with a little splash of Flemish blood in his veins, to do man's bidding. Yet they say we have done nothing, though our conscripts by the tens of thousands rot on European battlefields.

THE FARM

Jersey Breeders Organize.

At a gathering of Jersey breeders on the beautiful ranch of Mrs. C. D. Perry at Riverside on March 10th an association was formed to be known as the Jersey Breeders' Association of Southern California. The following officers were elected: President, George W. Thomas; vice-president, W. E. Rough; secretary, W. P. McClaskey, J. E. Wherrell and W. P. McClaskey were appointed a committee to draw up a constitution and by-laws.

900-Pound Record.

Belladia 31909, owned by Walter H. Dupee, Edgemoor farm, Santee ,Cal., has completed a record of 19,631.9 pounds if milk and 934.05 pounds of butter fat in one year. This performance entitles her to seventh place in the aged cow group of the class leaders in the production of butter fat, and fifth place in the production of milk. She takes first place in the state of California ,exceeding the previous high record by 180 pounds of fat. She is also the highest producer west of the Mississippi.

The production of milk and butter fat by this cow, month by month, is very uniform. Only three times did she exceed the requirements for a retest. She received, however, four retests, three by California testers and one by Prof. W. M. Regan of the Nevada agricultural experiment station. In all of them she gave satisfactory results.

New Way of Handling Blackleg.

Blackleg in calves seems to have become more virulent of late. Vaccination will prevent the disease in most cases but not all. Another difficulty lies in the fact that after administering the vaccine, calves are not protected against the disease for a period of about two weeks, and in the meantime, if the herd is affected, many of them may die. There is now a blackleg serum on the market which will give immediate protection and combined with the virus will give lasting immunity. The serum also has curative value if given early in the course of the disease.

The Kansas Agricultural College makes the statement that "A highly potent blackleg serum can be produced from the horse." The claim is also made that the filtered fluid taken from the diseased tissue of the shoulder has great immunizing properties.

This marks a great advance in the control of blackleg but does not in the least detract from the importance of absolutely destroying the carcass of every animal that dies from blackleg and adopting all other possible preventive measures.

In spite of large shipments of hay from Nevada and Lassen county, stockmen fear there will be a loss in cattle shipments before spring sets in, and the same cry comes from Lake county, Oregon, where the situation is reported serious. Several of the stockmen in Lake county declare it is almost certain there will be a loss in sheep. Some of the sheepmen expect their bands to begin lambing in the near future, and any cold weather without shelter for their flocks means a heavy loss in lambs.

Here's to the farmer who's farming now,
Who loves the soil and follows the plow,
And whether it rains or whether it shines
Is doing things to bring in the dimes.

A German veterinary in the government's employ in the Spanish-American war is authority for the statement that one pint each of kerosene and water given as a drench is one of the best remedies for colic in horses. The medicine acts quicker than crotian oil.

The famous Dalrymple farm in Traill and Cass counties, N. D., said to be the largest in the world and known wherever agriculture on a mammoth scale is talked of, is to disappear. That which remains of the great holdings of Oliver Dalrymple, in his day the greatest farmer in the world, comprises 22,000 acres. It is to be cut up into about 100 small farms of 160 to 320 acres.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL
For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment
We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.
A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints

DON CASTANO

Needs No Introduction to the Public

HIGHLAND MONARCH

was the winner of the aged stallions, and class for stallions and four of his get at the California State Fair in 1916.

SAN VICENTE

The Junior Champion Stallion of California

In the Yearling Futurity at the State Fair in 1916, five of the six money winners were by Don Castano and Highland Monarch.

The two-year-old Futurity was won by a Highland Monarch colt.

The $100.00 Trophy, offered by the American Saddle Horse Breeders' Association for the best stallion or mare, three years old or under in California, was won by a Highland Monarch colt, and two years prior it was won by Highland Monarch himself.

If you are going to breed your mare, why not mate her with one of the above stallions and have a winning colt?

The service fees for Don Castano and Highland Monarch are $50.00. Arrangements for San Vicente private.

To encourage breeding in this State we will pay the freight charges on mares to and from any part of California, but will not, of course, be responsible for any accidents which might happen in shipping.

San Vicente Rancho,

1023 Investment Building Los Angeles, Cal.

THREE NOTED JUDGES

-A. S. Thompson, of Kentucky; Jas. H. Bright of Missouri and Florida, and .. M. Monsees of Missouri, recognized throughout the land as three of the best, ost courageous and qualified judges of saddle horses living, selected

MARSHALL CHIEF 2765

ı a field of 22 of the world's most famous stallions, as the most ideal saddle tallion for breeding purposes. The considerations were: breeding, conformaion, soundness, action and beauty.

THE WINNER OF THIS, THE MOST IMPORTANT BREEDING CLASS IN SADDLE HORSE AFFAIRS,

s in public service at E. N. Hamilton's farm, three miles south of Mexico, Mo., vhere blue grass, spring water and feed are to be had in abundance.

IANS BERG, 159 Warren Ave., Milwaukee, Wis., or E. N. HAMILTON, Manager, Mexico, Mo.

WHY EXPERIMENT?--

Hundreds of thousands of dollars are spent annually by horse lovers in efforts o buy or breed a winner.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

Cal. State Thoroughbred License No. 2018.

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

WINCHESTER

.22 Caliber Automatic Rifle

W

This was the first and is the *last* word in .22 caliber recoil-operated rifles. It is the handsomest and cleanest looking rifle of this type, and besides is well-balanced, strong in construction and sure in operation. It weighs but 5¾ pounds, holds 10 shots and takes down readily. It is fired by simply pulling the trigger for each shot. This enables exceedingly rapid shooting with accuracy. A comparison with similar rifles of other makes will convince you of the wisdom of buying the Winchester. Sold by all dealers.

It Is The Peer Of All .22s

Every Good Gun Store Sells Winchester Guns and Ammunition

The Last in a Series of Six Talks about the Evolution of Firearms and Ammunition

—And Now It's *Remington UMC*

Modern Firearms and Ammunition

REMINGTON UMC

REG. U. S. PAT. OFF.

IT was a more important step in the evolution of firearms and ammunition from the stone to the sling than from the flintlock to your solid breech, hammerless, take-down Remington arm. Prehistoric man had no past experience to guide him. He invented his crude weapons out of sheer necessity—the struggle for existence. The stone, the sling, the bow and arrow, gunpowder, the flintlock and its crude antecedents, and the percussion system—all are steps in the evolution of *modern* firearms and ammunition. In Remington UMC you find crystallized the experience of the race intensified by *superior* knowledge and craftsmanship.

A Remington made a gun barrel in 1816, and since that time Remington has stood for the greatest improvements in modern firearms, while for over half a century UMC has been the sportsman's standard in ammunition. For instance, the Remington UMC factories produced:

1. The first hammerless solid breach repeating shotgun.
2. The first hammerless solid breech autoloading shotgun.
3. The first successful high power, slide action repeating rifle.
4. The first lock-breech autoloading rifle.
5. The first paper shotshell and the first metallic cartridge successfully manufactured in the United States.
6. The first perfected steel lined shotshell.
7. The first primer adapted to smokeless powder.
8. The first battery cup for best quality paper shotshells.
9. The first cartridge for automatic pistols.
10. The first standard, high power, smokeless cartridge for big game autoloading rifles.

Write for Modern Firearms Booklet.

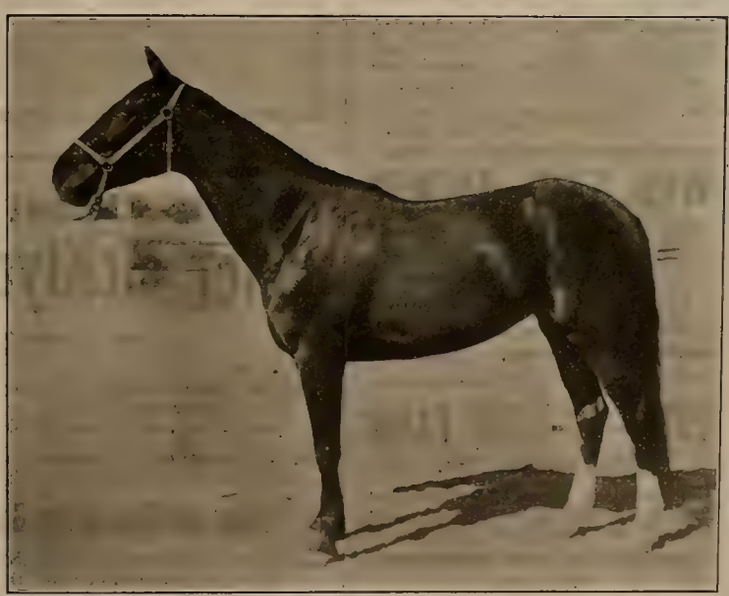
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

VENTURA---California

Pacific Coast Trotting Record
Peter McKlyo 58009- RECORD 2:06

Cal. License Pure Bred No. 105
Sired by

PETER THE GREAT 2:07¼ (sire of 50 in 2:10 list, including Miss Harris 2:01¼, Peter Volo (4) 2:02, Peter Stevens 2:01½, Peter Mac 2:03, Mabel Trask 2:03¼, etc.), dam KLYO by Jay McGregor.

He is from one of the greatest families on his dam's side in the books, as the performances of Susie J. 2:06½ and Trampfast 2:12¼ prove beyond doubt.

Peter McKlyo is the Greatest Son of Peter The Great

westof of Kentucky and is destined to be one of the world's greatest sires.

He is the only son of Peter the Great five years old with two colts in the list. He was bred to three mares as a two-year-old, only two of his colts being handled,—Charlotte McKlyo, winner of breeder's record 2:25¾, and McKlyo Boy, winner of the two-year-old division Breeders' Futurity Stake, record 2:23¼. It can be also said as a matter of record that he is one of the greatest five-year-old trotting stallions ever owned in the state of California, and one of the best individuals to be found in any country.

HE WILL MAKE THE SEASON OF 1917 AT

The Luce Bill, which proposed to end the publication in California of information about races, was defeated Friday afternoon by a vote of 50 to 24.

At a meeting of the Board of Directors of the California Fair and Racing Association, held last Saturday, it was decided to recommend the employment of Jos. Waddell as starter for all the race meetings in the Circuit. This is a movement in the right direction as, if one man officiates for all the meetings, he has an opportunity to familiarize himself with the peculiarities of the different horses and drivers and his work is much more satisfactory than is the case where several different starters are employed.

San Francisco real estate agents who deal in country lands and are in a position to make correct estimates of prospects throughout Central and Northern California for the current year, declare that the California farmer is coming into his own with profits not hitherto considered possible. The same authorities say there is a combination of fortuitous circumstances at present in the interior valleys. After a brief spell of inactivity in selling farms in California a revival is predicted owing to those factors and consequently farm land agents express the opinion that this is a good time to buy farms.

The Northwest Land Bank.

The Federal Land Bank, which has been located at Spokane, Washington, will have for its directors and officers the folloging:

D. G. O'Shea, Red Lodge, Montana, president and director, is the head of one of the largest banks in Red Lodge, a livestock breeder and farmer; has merchandising interests and is a member of the Montana legislature. Mr. O'Shea will sever his other banking connections and devote his entire efforts to the Spokane Federal Land Bank.

C. E. B. Roberts, vice-president and director, is treasurer of the Idaho State Grange and is also president of the local Jersey Breeders' Association. He is a bank director in the thriving city of Rupert, Idaho, which is on one of the government irrigation segregations in the famous Snake River Valley.

George C. Jewett, Palouse, Wash., secretary and director, has had more than sixteen years experience in the banking and farm loan business and is intimately informed on the needs of farmers in the inland empire.

George Dreher, Snohomish, treasurer and director, has had fifteen years experience in banking, and has more recently been an insurance and real estate man. He is an expert accountant and possesses good ideas along farm values.

A. W. Cauthorn, Portland, director, has had practical experience as a banker and as editor of the Semi-Weekly Journal of Portland. He has had practical experience as a farmer and both as a citizen and editor he has constantly labored for the elevation of agricultural standards.

Turner Oliver, registrar and attorney, is well known in the Northwest. His work in the new organization will have to do with land titles.

CHAMPION SADDLE HORSE OF THE WORLD.

In every breed of live stock, these days of improvement and development of herds and flocks, there is a grand champion; a champion of champions, standing out pre-eminently above all of the breed and acclaimed champion through its proven merit in competition with better brothers and sisters and in the siring or producing of young things which are superior to the offspring of others. In all instances the breeders of stock, whether horses, cattle, sheep or swine, point this grand individual out with pride and sing its praises to their friends far and near; creating more interest in the breed it represents and striving through proven methods to breed an individual that compares with and favors the champion.

In the days of Rex McDonald, champion saddle stallion of the world ,the breeders of saddle horses generally admitted his superiority and gave him the credit due him. However, Rex McDonald has been dead more than three years and today there are four or five horses whose friends declare are to the breed now what the old black King was in his day. The friends in singing praises of their favorite, however, drag his rivals in the mud and use every method of "knocking" and making some other with an equally just claim to the championship appear a near-mongrel in the eyes of the public.

There are at present five saddle horses in America, whose owners, every one, declare is the Champion of Champions; the greatest living saddle horse and unapproached in class by any other individual. They are champions, it is true, and I doubt that if the old black horse were to appear today as he was when he won his laurels, he would have any cinch on his title. Rex McDonald, though, won his title through just such competition and the bigger the rival the harder they fell before the grand old champion. He never dodged the issue and wiped the platter clean from pumpkin shows to The Garden, winning, always winning, before all judges and never, in his great career, was his title begrudged him by the owner of his nearest rivals, and many of them were close up to his class at all times.

Now, however good a horse may be and however just his title, he has to contend with a continual onslaught as persistent and as treacherous as the Kaiser'sdiver warfare. There are more champions today than there have ever been in saddle horse history and most worthy of the crown they bear; however, none of them can conscientiously be called the champion of champions and the peer of all others. Recently three publications portrayed different saddle horses in their publications and the inscription declared each the champion of present day horses. One publication referred to two horses in the same issue as the "Champion saddle horse of the world."

Which of these great horses is the peer of the others? No one in the land loves and knows all of them much better than the writer, and when I received the following inquiry this week, I knew not what to say: "Knowing you to be thoroughly familiar with the saddle horses of the present day, I would like to have you inform me which horse of today is the admitted champion of champions." What was I to say? Naturally, I have my private opinion, but my opinion is like every one's—merely one man's opinion; and who am I to designate the champion?

Why not arrange a stake so attractive that all would enter, even though they are retired from the show ring? The stake could be raised by popular subscription. I will guarantee to raise $100 in California . If ten men will raise this much we would have $1,000 clear; then stage the show at the fair bidding the most for the event. I have seen lots of associations give $1,000 for stakes that could not be classed in the same place as such a contest would be. Therefore, if we raised $1,000 by public subscription and $1,000 from the fair where the contest was given we would have a stake with no assessment and worth fighting for, to say nothing of the final distinction. Let's shuffle the cards and see for once and all who holds the King. It would be some show, the like of which has never been seen, and one which would never be repeated.

A TYPICAL MY MAJOR DARE FOAL.

Eight Foals Have Arrived at Longview.

Keen interest at all times attaches to the achievements of youth. If a son is born to some noted statesman, an inventor, or wizard of finance, those who were familiar with the success of the parents watch the development of the youth from his first days. In live stock circles is is more pronounced than in the human family, for here, in the development of great herds and flocks, the best of the breed are mated with the best of the other sex in anticipation of producing something perfect. When, in 1916, Manager C. J. Tucker, of Longview Farm, Lee's Summit, Mo., announced that the once noted show ring winner, Nancy Garland, one of the most beautiful creatures the saddle horse breed has ever known, was to be mated with My Major Dare, the world famed saddle stallion, horse lovers the width and breadth of the land began to make prophecies of what the outcome would be. In a letter to the Breeder and Sportsman, this week, Manager Tucker announces the arrival of the foal; a chestnut stallion, with four white feet, and declares him one of the most attractive foals that has arrived at Longview since its establishment. This colt's development probably will be watched with the same concern that characterized the birth of Edna May's Choice, the great young stallion now owned by Bruce G. Eaton, Eaton. Col., which resulted in the mating of the celebrities, Kentucky's Choice and Edna May. Mr. Tucker states that eight foals have arrived at the farm this year with 15 more mares due to foal.

Keene Out of Game.

"I am through with polo playing for all time."

Foxhall Keene of New York, noted polo player, made this announcement to friends last week on his arrival from Los Angeles, on his way to Del Monte.

Keene a year ago fell fell under his polo pony and suffered injuries which for a time menaced his life.

"I have found that the injuries I received then will keep me from playing polo," Weene stated, "but I shall always follow the game very closely, for I am devoted to horses and the turf. I regret that I shall not be able to compete in the exciting contests, but will be found on the sidelines of polo fields."

Harness Horses and Horsemen

LETTER FROM A. B. COXE.

The following letter from Mr. A. B. Coxe of Nawbeek Farm at Paoli, Pa., to a member of the staff of the Breeder and Sportsman, is self-explanatory. Mr. Coxe is one of the foremost breeders of light harness horses, his stud being one of the most select yet assembled; and the turf triumphs of the Coxe horses have been notable, especially in the matter of colt stakes, a Kentucky futurity having fallen to them:

Thank you very much for your kind letter and pedigree of Ila Moko. I paid $375 for her and think her cheap. Maybe you can give me some information as to the foals she has had . She has no record, so I presume she was bred early. I know of the following foals—can you fill in any of the blanks?

1907—
1908—
1909—
1910—
1911—

1912—Wilca 2:21¼.
1913—Jim Hardman.
1914—Anselila (1) 2:17¼.
1915—By Prince Ansel.
1916—C. by Robt. Bingen.
1917—In foal to Justo.

Wilca was foaled either in 1911 or 1912. The hole in her history seems to mean that she must have had a number of foals that have no records ,or else she was barren in training, with no results.

I also bought Estabella Bingen 2:15 and La Restina p. 2:13¼, tr. 2:13¼, giving me the following 28 broodmares, arranged under their families and the number of their produce, record colts and record colts of their dams. I thought it might be of some interest to you:

Mares From Peter the Great Family.

Czarevna (3) 2:07¼—2 foals over two years old; dam of Czarada (3) 2:17¼; dam has produced 2 in 2:10 and 9 in 2:30.

Miss Pierette (3) 2:09¾—In foal in 1917 for first time. Her dam is Madame Thompson, sister to Lydia and Tillie Thompson, dams of Peter Thompson (3) 2:07¼ and Miss Stokes (3) 2:08¼. Madam Thompson has produced 4 in 2:30 and 2 in 2:10.

Miss Stokes (3) 2:10¼—Dam of Miss Watts (3) 2:19¼; is the dam of 2 colts 2 years old or over; dam The Widow 2:28½, dam of Peter W. 2:08¼ and Sienna 2:06¼¾.

Margaret Prima (3) 2:14¼—No colts 2 years old; dam Margaret O. 2:05¼. Margaret Prima is Margaret O.'s only foal 2 years old or over; grandam Margaret A. 2:12¼, dam of Madden 2:09¼ and May O. and of 8 in 2:30, and sister to Axworthy.

These four Peter the Great fillies have three-year-old records that average 2:10½. Their dams average 1½ 2:10 trotters.

Mares of Bingen Blood.

A Leading Lady (3) 2:07—Dam of Lady Zombro 2:10, Lady Del (3) 2:19¾, Colorado L. (3) 2:10½, Lady Petress (3) 2:13½. These are all her foals two years old or over. Their records average 13½; her dam has produced 7, and 1 in 2:10.

Besa 2:10¼—Second in Kentucky futurity and was timed at 3 in 2:08¾; dam of Peter Allen (2) 2:17½ and Col. B. (3) 2:25¼. Her only foals over 2 years old. Her dam has produced 6, and 3 in 2:10½.

Estabella Bingen 2:15—Never bred; her dam is Court Lady by the Beau Ideal; second dam Estabella by Alcantara. The Beau Ideal was by Dare Devil out of Nettie King and through him we get 2 crosses to Mambrino King, which with Estabella gives me good backing up for the soft Bingen.

The Amazon (2) 2:25¼, 2:18¾—Never bred; dam Jolly Bird, dam of 6, and 2 in 2:10.

Mares From the Baron Wilkes Family.

The Colorado Bell (2) 2:17¼, (3) 2:09½—Now in foal for first time to Peter the Great; dam American Bell (3) 2:12¼. She is the dam of 6, 2 in 2:10.

Bertha C. (3) 2:10¼—Third in Kentucky Futurity, record taken in fifth heat of the futurity. . Dam of Peter Marble (3) 2:17 and Miss Bertha Dillon (2) 2:10. Her only foal 2 years old. Her dam Marble, dam of 7 and 1 in 2:10, and her second dam is Medio, dam of Peter Sterling, winner of Kentucky Futurity, and of Black Robert 2:15 and Marble 2:14 and two others.

Miss Jane Jones (3) 2:14¼—Dam of Colorado Jane 2:21¼, Michailowa (3) 2:15¼ and Mr. Jones (2) 2:22¼. Her only foal two years old. Her dam Medio, dam of 5 and of Peter Sterling, winner of the Kentucky Futurity.

Ila Moko—You know.

Ida Moko—Dam of yearling with record 2:29¼ and out of dam of Bon Voyage 2:08.

La Restiva p. 2:13¼, tr. 2:13¼—dam by Allie Wilkes, but never bred; second dam Ozama, dam of 4 and of Ozanam 2:07, Transylvania winner and by Director.

Audrey Grey 2:12½, by Moko—Never bred; without many producing mares in pedigree, but by Moko and having Aberdeen and Almont in pedigree, and being second in 2:08¼.

Mares of Axworthy Blood.

Muda Guy (3) 2:12¼—World's record when made for 3 years on half mile track (5) 2:09. Dam Muda S., dam of 7; second dam Nancy Lee, dam of Nancy Hanks. This mare has been a shy breeder; has no foals two years old.

Dorothy Axworthy (2) 2:21¼—Second to Tramp-fast in 2 year old Kentucky Futurity in 2:12½, beaten one foot; dam of Worthy Peter (2) 2:24¼; dam Dorothy T., dam of 5 and of Adlon (3) 2:07¾, Rusticoat (1) 2:22¼, (3) 2:08¼.

Nelda Worthy 2:12¼—Dam of Princess Nelda, timed at 2 in Kentucky Futurity in 2:10, record at 3, 2:11; Prinelda (3) 2:09½, Peter Ax (3) 2:15¼, out of Old Nell.

Vonia Worthy (3) 2:22¼—Dam of The Vonia, matinee 2:10; Rose McGee (1) p. 2:19¼, record when made; Vonia Guy (2) 2:24¼; Judge Hall 2:20¼; dam of six.

Mares Having Baron Wilkes on Dam's Side.

Errange (2) 2:21—Winner of Lexington stake at 2; dam of Colorado Range (3) 2:08¼, third in Kentucky Futurity, timed separately in 2:06¼; Zobedak, matinee 2:08¼, public mile at Lexington in 2:05¼; Peter Range (3) 2:25¼; Worthy Range (2) 2:26¾; Directum Prodigal 2:20¼. Errange by Prodigal, dam Ettie Baron by Baron Wilkes, dam of 11; second dam Nannie Etticott, dam of Silk Family; third dam Soprano.

Mares With Bingen Blood on Dam's Side.

Lady Zombro (2) 2:29¼, (6) 2:10—By Zombro; dam Leading Lady (3) 2:07; in foal to Etawah, first time.

Lady Del (2) 2:30, (3) 2:19¾—By Del Coronado; dam Leading Lady; yearling by Etawah and in foal to him again.

Tabulate pedigree of these Etawah foals. See in breeding to Bingen and Arion with the tough outcross.

Mares of Outside Blood, Not Having Peter the Great Bingen, Axworthy or Baron Wilkes Blood.

Denella (3) 2:22¼—Oldest foal coming 2 years old, by Director General; dam Nella Jay (3) 2:14¼, winner of Kentucky Futurity; second dam Paronella.

Excella—Dam of 2 out of Expressive. You know this mare.

Chimes of Normandy (2) 2:27¼, 2:16¼—Dam of Norman Baron (3) 2:17¼, out of Santos.

The American Bell (3) 2:12½—Dam of Col. Bell (3) 2:09¼, Zom Bell 2:06¼, John Dewey p. 2:12¼, The Della Bell 2:20¼, Elegance 2:24¼; Ed Geers' old race mare.

Lady Brussells—Dam of 3 yearlings in 2:30 and 3 in 2:10.

The Zombro Bell (2) 2:30, (3) 2:13, (4) 2:09¼, (5) 2:06¼—Now in foal for first time to Peter the Great; out of American Bell.

I have tried to confine my mares to those carrying the blood of the four leading sires of present day colt trotters, namely, Bingen, Axworthy, Baron Wilkes and Peter the Great. The first three I know are breeding on; whether Peter the Great will or not is a question, but he is himself so great that I feel he must; and then, he furnishes qualities that some of the others do not—gameness and toughness, at any rate. I will stick to him for a while.

Excuse pencil; you must realize that we have little to do here, from this long letter.

Yours truly, A. B. COXE.

OBSERVATIONS AT SACRAMENTO.

Arriving at the State Fair track Saturday morning at 6 o'clock I found the horsemen all awake and on the job. Walt Tryon has about as well furnished a training barn as is to be found anywhere. Walt's horses are all dressed up and receiving the best of everything. Albaloma is big, fat and sound. I saw him being worked some slow miles by Walter along with Rastus 2:04¼. Mr. Henry Cowell, the owner was driving Rastus. Both horses were acting good. No fast miles have been done by any trainer so far this season at Sacramento. Mr. Tryon is training a very classy looking three-year-old bay filly sired by Peter the Great. This most attractive young miss is a pacer and she can sure pace fast and do it right. Mr. Cowell and trainer Tryon are justly proud of this filly.

John Mack is Mr. Tryon's candidate for the 2:12 trots. John is in fine fix. John Mack seems to want to please trainer Tryon and should be a big factor in the California and Oregon fast classes this year.

William Ivey has just started to repeat his trotting mare. I have forgotten her name, but she is by Bon Voyage and is a nice going trotter. I saw her going a few slow miles on Saturday. She is a good going mare and Mr. Ivey says she is a real race mare, reliable and game in all she can do.

John Quinn is a-foot, which fact is not pleasing, for John Quinn is a competent, strictly sober and honorable man, and I hope that he will soon have a stable of good horses in his charge.

Ben Walker is a visitor at Sacramento and of course came out to the fair grounds. Ben looks both well and prosperous and I enjoyed my visit with him. He is a most interesting man and if some good writer would write up Tales of the Turf as Ben Walker can tell them, I believe the book would have a big sale, for Ben has had many years of interesting experiences, aside from being a good fellow and the best of company. I believe Ben Walker is the best reinsman I ever saw sit behind a harness horse.

Col. Jim Thompson has a big stable of choicely bred and good looking horses, headed by Mr. Todhunter's great trotter, Peter McKlyo 2:06, and five the foals sired by Peter McKlyo. Any intend breeder who goes to Sacramento and looks over few foals that Peter McKlyo has sired, and sizes the conformation, great bone and solid color of t horse's foals, and then watches them in action, surely book his mare to Peter McKlyo, for this gr trotting son of Peter the Great is bred to be a ra horse, bred to be a sire, and is a really fast trott for it takes a superb trotter to trot a mile out in 2: on the Sacramento track. That 2:06 mile means 2: on a first class track under favorable conditions, a Peter McKlyo is a young stallion. His developme and that of his foals speaks well for the skill James Thompson ,the man who picked Peter McKl out at Patchen Wilkes Farm and took him to Sac mento as a yearling, developed him and also dev oped his few foals. I think that the horsemen Sacramento can justly be proud of James Thomps as a trainer; and appreciation shown before a m dies is, I believe, always-and-always appreciated. don't want anyone to think that I am accusing Ji Thompson of being old or in danger of dying, for know that he is yet young and sound in mind, wh and limb.

Mr. Thompson is the owner of what I believe to one of the classiest looking and best bred you stallions in the world . This equine aristocrat named Bon Watts; is a son of Gen. Watts 2:06, da Peristeria by Bon Voyage, 2d dam Perza by All Wilkes; next dam by Happy Medium, and if I member just right his sixth dam is that great matr Betty Brown, by Mambrino Patchen 58. Mr. Thom son's colt has everything that a great young stalli should have in breeding, perfect conformation, pe fect color, size and a sensible disposition; also tw minute speed and a perfect way of showing it. hope this young stallion gets a liberal patronage 1917. Mr. Thompson has many other colts and filli and one chestnut filly sired by Peter the Great o of the great brood mare Carrietta 2:18. This fil is a grand looker, sound and good mannered; sl has not had much handling as yet by Mr. Thompso He says she is inclined to pace. I don't know whe on earth a man would go to find one better or bett looking. She is owned by Mr. S. Christenson, as the good colt Natal Day. This colt is filling out a is a fast and attractive young stallion.

John B. Stetson will ship eleven horses to Kea ney, Nebraska. In the lot goes Palina, a very ni going and fast pacer sired by Palite. This gre pacer belongs to Robert Stetson and will be rac over the Nebraska short ship early circuit. In ad tion to the Gould horses, Mr. Stetson is taking ov the very nice looking and good going green trott Joe Watkins, by Kentucky Todd, dam Fair Recluse Moko. Mr. Stetson likes this gelding and has ma no mistake in his choice, for Joe Watkins is a we bred one, a perfect individual and has the corre way of trotting. The dam of this horse is now own by Andrew Albright Jr., Newark, N. J., and is bei bred to San Francisco Grey Hal, green pacer Hal B. and brother to Hal Grey 2:08 and Grey Gho 2:13, goes along in the Stetson car; also Chris t Great by Peter the Great, dam Miss Faribault Axworthy. The writer sold this gelding; he's a N braskan now. Good luck to him. All of Mr. Ste son's horses are in nice shape. Mamonio, a very ni bay filly that was once my property, is a nice pace I bought her before seeing her and sold her to M Gould before seeing her. I hope Mr. Gould likes th filly. When I got my first look at her last Saturda I was highly pleased. I hope she makes good. Sh is by California's good pacing sire, Demonio 2:11

The Empress C. is a compactly built black mar six years old, sired by Mr. Durfee's great sire, Carl kin 2:07½. This mare has the Carlokin conform tion and do-or-die disposition, and she can trot fas and do it well. Her dam, Carruco 2:20, was a fas mare by Alfonso ,son of Baron Wilkes. The Empres C. was bred by the late Sam Ellmore of Astoria, Or I hope owner Gould breeds this mare and keeps her she is a good one.

I was particularly pleased to see Mr. Cowell work ing his horses and enjoying it all. I know of man other American gentlemen who are kings of financ and commerce that would be benefited if they wer to do as Mr. Cowell does—own a few good harnes horses, train and race them, and enjoy the associatio with them and in so doing enjoy good health an long life; for no sport on earth is so good for a ma as the companionship of a good horse. Once in while we hear some man or woman say, "Oh, I can afford the time or money to fool with horses." Ye I notice that when these same people want an auto mobile they manage to get it, and by the way, ofte get killed by the aforesaid automobile. Our bus ness men and bankers and professional men can be ter afford to go back to the driving horse than to g on, fast getting to be nervous, money-mad wreck Many of them remind me of a conversation I hear between two Irishmen. Casey said to Reilly, "Mu phy is dead," to which Reilly said, "Did Murphy leav much?" "Yes," Casey made reply, "he left it all. He was very rich, but no one can take any mone out of this grand old world; they must leave it al behind. Therefore I believe that all those who ca should at all times own and enjoy and associat with a good horse.

I am glad to see the new and early California Ci cuit. I predict that it will be a great success.

Yours truly,

C. A. HARRISON.

Thoroughbred Matters

The new totalisator returns for the meeting at Auckland, New Zealand ,recently, showed that the immense sum of $1,286,440 passed through the machine during the four days, the programme consisting of eight races each day.

✤ ✤ ✤

The war situation has figured in prompting W. W. Finn, the well-known Rocky Mountain promoter, in abandoning his plans to stage a race meet at Tanforan track this summer. Finn was in touch with prominent local horsemen in putting on a limited number of running events. Negotiations were going along smoothly until the prospects of a war loomed up on the horizon.

In view of the situation, Finn deemed it wise not to make such an attempt at this time. He is confident, however, that racing can be promoted in California in spite of the stringent laws against gambling. The system of wagering would likely be the same as is used in New York. Finn has gone to Phoenix, Ariz., where he will look over the ground, with the chances of putting on a meeting next month. Plans for meets at Reno and Denver are being held in abeyance for the time being.

It is likely that the war will interfere with the racing season on the big Eastern tracks, although no announcement on the subject has been given out. The promoters are likely awaiting developments.

✤ ✤ ✤

Hot Springs, Ark., March 22.—The horsemen this afternoon after the fourth race, unanimously decided to drop their controversy with the Oaklawn track relative to increased purses and race out the allotted time that the meeting here is scheduled, under the conditions provided for by the program book as already arranged by Secretary Jack Campbell. The horsemen's decision was received with pleasure by the turf followers, who would have been loath to witness a suspension of the sport at this stage.

A committee of fourteen, acting for the members of the Thoroughbred Horse Association at Hot Springs, made the demand for $600 purses Tuesday, and at that time General Manager J. E. Martin expressed a disinclination to accede to the demands. A meeting of the horsemen followed that night, and they voted to demand $600 purses beginning Thursday. Up until the decision of the horsemen came there was a spirit of unrest that the wind-up here would probably occur with the decision of the racing Friday. Entries for that day were made promptly this morning. But action as to further racing was to be decided later in the day.

✤ ✤ ✤

Winning Owners and Horses at Havana.

With the running of an extra day's racing on Monday, March 19, given for the benefit of the employes of the Cuban newspapers, which were forced to suspend publication on account of the revolution on the island, the Cuba-American Jockey Club brought to a successful end the eighty-five days' winter meeting held at beautiful Oriental Park in Marianao, a suburb of Havana. Opening on December 6, 1916, racing was conducted only three days a week up to the Christmas holidays ,after which a daily program of six races was provided, with the exception of Mondays. During the eighty-five days of the sport 523 races were decided and $215,885 was distributed among the owners fortunate enough to possess a horse capable of winning. The daily average distribution amounted to $2,539.82. On the whole the racing was high class considering the horses available to fill the daily programs. The officials endeavored at all times to keep the racing clean and wholesome and, when the occasion demanded it, dealt severely with those guilty of infractions of the law. The attendance was excellent throughout and the big gatherings on Sundays and other special occasions must have been highly pleasing to H. D. Brown and his associates in the Cuba-American Jockey Club. The ideal weather which prevailed nearly all winter was, in a great measure, responsible for bringing out the big crowds.

A feature of the meeting just closed and one which may have an important bearing on the future of the sport in Cuba was the interest displayed in the racing by a number of wealthy Cubans. Several have purchased horses and raced them, Senor Lezama in particular being quite successful with his table. H. G. Bedwell repeated his success of last year and finished at the top of the list of winning owners with $11,250 to his credit. He was closely pressed for the leading honors, however, by J. W. Hedrick, who was second with $8,445. J. B. Goodman, E. K. Tryson, P. L. Short and the Cuban owner, A. Lezema, were among others who fared quite as well at Oriental Park.—[Thoroughbred Record.

———o———

The Reno meeting is conditional on enough horses being shipped to that track to make the proposition worth while. There will be six races daily, each to be for a $300 purse. Sunday will be the off day. If conditions warrant there will be a derby for three-year-olds. Reno also plans another race meet of fourteen days in August. Horsemen contemplating racing at Reno should communicate with Mr. Rose, who will supply more detailed information.

Word has also been received here from W. W. Finn, Western race promoter ,that he has hopes of staging a meet at Phoenix within the next month.

Hot Springs, Ark., March 31—Racing at Essex Park was called off today after fire had destroyed the grandstand, pres box and judges' stand. Today's program will be run off Monday at Oaklawn course, where the rest of the meeting will be conducted. The loss is estimated at $20,000.

✤ ✤ ✤

On his return from RenoGeorge W. Berry, manager of the racing stable maintained at the Tijuana track by George W. Wingfield, Nevada millionaire, announced that Reno probably will hold a meeting of nineteen days June 19. L. J. Rose, associate judge for the Tijuana meeting which closed Sunday, will have charge of the racing at Reno. His selection is a popular one among horsemen.

✤ ✤ ✤

Maud Bacon has proved herself to be the best three-year-old racing in these parts. In the Berkeley handicap run at Tia Juana on Sunday, the Tony Bonero filly emphasized her superiority over the three-year-olds out this way. She gave pounds and pounds to everything else in the race and at the finish she won by two lengths to chalk up six furlongs in 1:13. Waremore, the speed burner, opened a tremendous gap on his field, but before he had finished the mare made it appear as though he had turned the other way. Mab ran her best race of the meeting to finish second, while Waremore staggered over the line in the third hole.

✤ ✤ ✤

The get of 154 stallions are represented in the Latonia Championship Stake of 1919.

When Hal Price Headley, president of the Thoroughbred Horse Association and the largest individual nominator to the championship stake, put in his entire crop of yearlings, he had the honor of putting Star Shoot as the premier stallion. Twenty-nine colts and fillies by this famous horse are eligible to start.

Celt and Uncle are tied for second place, each having nineteen representatives, with Ogden following with eleven and King James with ten. Thirty-one have two representatives, and seventy-six stallions have a lone entrant.

In the list of 154 stallions, sixty of them are now standing in either England or France, while some have been recent importations into this country. Three more entries have straggled into the Latonia office since the publication of the entries and this makes a grand total of 361 nominations.

✤ ✤ ✤

Harry Payne Whitney, of New York, shipped to Bowie last week the strongest stable of racehorses that have trained at Bennings track to be sharpened up for the Southern Maryland Agricultural Association's spring meeting, which began on April 2, and will continue through April 14.

The Southern Maryland association having taken the place in the Eastern scheme of racing that formerly belonged to the Washington Jockey Club, now opens and closes The Jockey Club's racing season.

The coming season promises to be more successful than any that has been held at Prince George's Park. There will be no opposition, that will count, to Bowie in any part of the country, and six or seven hundred of the best thoroughbreds will be ready to answer the roll call the opening day. Already every available stall at Prince George's Park is bespoken and scores of horsemen, unable to find shelter for their runners there, are seeking it at Bennings, Laurel, Pimlico and at the half mile tracks of Maryland.

✤ ✤ ✤

When James Wood Coffroth, president of the Tijuana Jockey Club ,took hold of the guiding reins of that institution, he said: "So long as I am in power I will only stand for the cleanest sport." And he has kept his word.

But there are persons in this field of sport who fail to observe the fairness of racing. There are those who never look ahead, but work on the spur of sudden wealth. And to make a long story short, a clique or set of persons, the number not yet determined, have tried an old way to enhance their chances of winning. They forced sponges into the nostrils of certain horses that appeared to be contenders in one or two races . Grapeshot, Presumption, Barsac, Sayonarra, Lady Leona and one or two others underwent this suffering to stop their free breathing.

Upon the discovery of these sponges, President Coffroth used every means to keep the work of these persons under cover. Immediately he employed a staff of detectives and gradually they rounded forth the suspicious ones.

In jail today is a negro named Steele. He has confessed that he did some of this work. But it is not Steele that President Coffroth seeks so much. It is the power behind him. Steele has named one of the implicated men, a minor owner. He says that this man promised him $200 to install a sponge in the nose of Lady Leona, and he did. But he did not get the promised sum. He has received only $60 of that amount, he says.

And, strange as it may seem, Claude Williams, T. C. Williams and Jesse Franks have been ruled off the turf for conspiracy and violation of the rules of racing before the stewards even heard of the developments in the sponge case. More admissions and more rulings are expected before the investigation is over.

Jockey Frank Robinson will ride throughout the year for the Harry Payne Whitney stable. This boy was the best jockey developed in the Canadian circuit last season, and showed considerable skill in Maryland last fall.

✤ ✤ ✤

The judges at Tia Juana handed down a series of reprieves and penalties, as well, Here they are:

Jockey Murphy was ruled off the turf for whipping Jockey Tyrell over the head in the Darktown Derby.

Jockey J. McIntyre was restored to good standing, as was G. W. Billerman.

✤ ✤ ✤

Harry F. Beivogel, assistant manager to Col. Matt Winn of the Churchill Downs, Empire City, Lowell and Juarez race tracks, arrived in San Francisco last week from Honolulu, where he has been on a pleasure jaunt. Beivogel will depart immediately for the East to get ready for the opening of the racing season.

✤ ✤ ✤

Baltimore, Md., March 23.—The promoters of the new race track at Bengies, whose application for racing dates was turned down a short while ago by the Baltimore County Racing Commission, were handed another jolt today, when the Maryland Committee of the Kentucky Thoroughbred Association held a meeting, at which it adopted a resolution expressing it as the sense of the committee that the members of the association should not race their horses on any new tracks in Maryland.

✤ ✤ ✤

Three measures providing for the restoration of racing in Shelby and Davidson counties, Tennessee, being the counties in which the cities of Memphis and Nashville are situated, came up for action in the State Senate last week. The bills provided for parimutuel betting and state supervision. An amendment to the bill No. 660, providing for the submission of the matters involved to the voters of the two counties named, was lost on a vote of 13 to 13. Then the bill itself was beaten by a vote of 24 to 4. The other two bills were laid on the table.

✤ ✤ ✤

There was an auction sale in the paddock at Tia Juana on the closing day and several horses were sold. Al Levy purchased Gladys-I-Am for $825. Butch Fisher got Jawbone for $200. W. St. Vincent bought Azurea for $125 and W. Colton got Jake Argent for $375. The stock of Claude Williams, ruled off the turf on Saturday, was also sold at auction. Lazy Lou, the Jack Atkin filly, brought $2,050, and the stewards waited as late as possible for Mrs. Shirley, one of the women in the Williams case, to attach the sale of the mare. Inasmuch as Mrs. Shirley did not appear on the scene until too late, President Coffroth is making new plans to recover some of the money she is said to have lost on Geraldame.

✤ ✤ ✤

Hot Springs Notes.

One of the best bands of maiden three-year-olds seen in a long time went to the post in the first race, and Broom Sweep, owned by E. R. Bradley, was returned the winner. This race was marked by much rough riding on the part of Jockey Lyke, and as a result of his efforts he was suspended for the remainder of the meeting. Pulaski was the chief suffer from the interference according to the report of the patrol judge.

C. J. FitzGerald will serve as the presiding steward at the Essex Park meeting which opened Friday. He reached here Wednesday.

Starter Harry Morrissey, who will handle the barrier at Essex, was among the arrivals here.

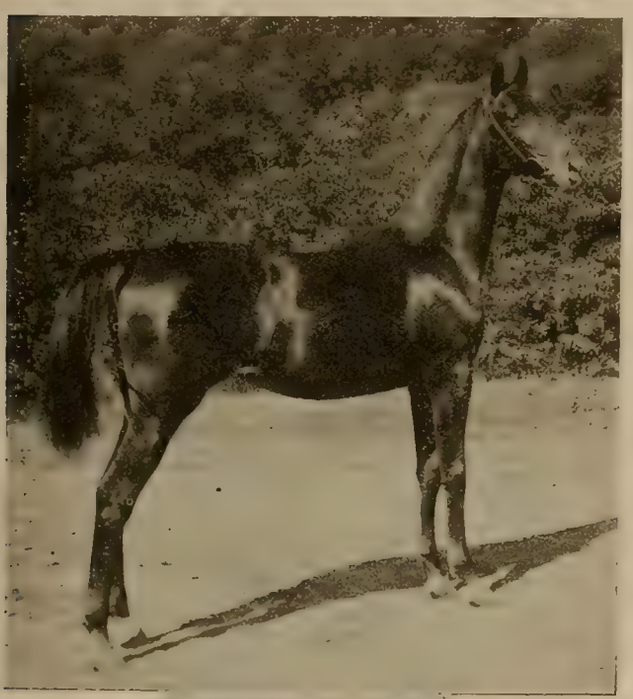
The condition books for the first week at Essex Park have been distributed.

Jockey D. Bloom, who was suspended indefinitely on the opening day of the meeting for rough riding, was reinstated by the judges.

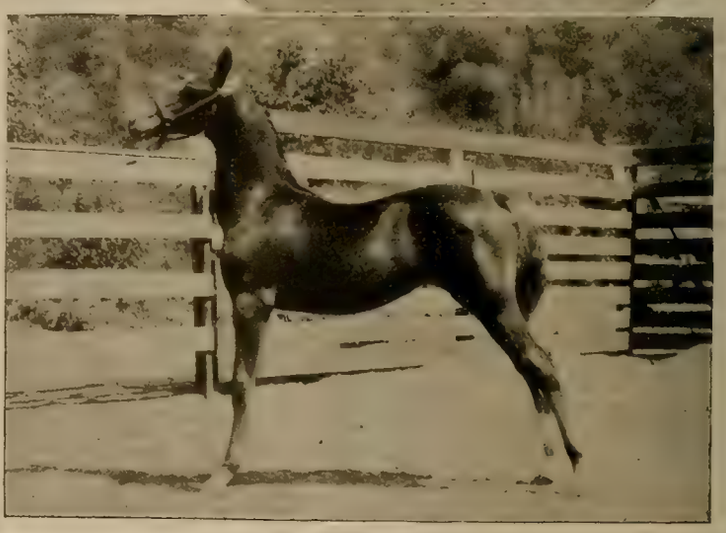
Jockey E. McCown was suspended for two days by the starter, and when he became impudent to Clerk of the Scales Wash Norvall, the suspension was made indefinite by the judges.

✤ ✤ ✤

Hot Springs, Ark., March23.—By far the best racing card ever offered here was served at Oaklawn Park this afternoon with two handicaps, one at six furlongs and the other at one mile and seventy yards, as features, and the best crowd of the meeting to date was on hand to enjoy seeing it run off. The highest class of horses contested in both handicaps, and in one of them, the route affair, the track record was lowered.



This affair fell to Robert Bradley, and he made his own pace all of the way to win by two lengths from Jack O'Dowd. He stepped along at a fast clip, running the first six furlongs in 1:12 4-5, which was one-fifth of a second better than the mark which was made earlier in the week by Aldebaran. Woodstone was third. There were eight starters in the race. The Thornhill stable sent two to the post, Thornhill and Wise Man.



In the sprint handicap Pan Zareta scored her initial victory of the year, and she went the six furlongs in 1:12 3-5. She had a big bulge at the barrier, by far the best of a bad start, and it was lucky she did, as she only beat Colonel Vennie a head, and the latter was fairly running over her at the end. Old Rosebud, who carried 137 pounds, had no chance at all with the poor send-off that he received, but he did manage to finish third. The race of Colonel Vennie was very impressive in view of the fact that he carried 123 pounds.

SAN VICENTE RANCHO, LOS ANGELES, CALIFORNIA, is the home of this magnificent collection of saddle horses, together with many more of similar note. Upper left is Highland Monarch, black stallion that has been one of California's best winners and a proven sire. Center left, Santa Monica, yearling daughter of Highland Monarch-Dolly Rex. Lower left, San Vicente, Junior champion stallion by Rex Peavine-Undine. Upper right, The Stables; Paloma, weanling winner at California State Fair 1916, by Don Castano-Undine; Santa Ynez, yearling filly by Don Castano-Undine, also a winner. Bottom picture shows Highland Monarch and four of get and Don Castano and four of get, winning first and second prize for this class at California State Fair 1916. This grand collection of horses is owned by Mrs. Adelaide Gillis McCormick, of Los Angeles.

Notes and News

. R. Russell of Oakland has mated his daughter o Cupid to Royal McKinney, the good sire owned b A. T. Jackson, of Stockton.

✤ ✤ ✤

Mr. C .K. G. Billings will not dispose of his trotting h se at Curles Neck Farm, Virginia, until the fall, nless he finds a buyer for the whole collection of t animals at a private sale.

✤ ✤ ✤

W. S. Harkey, of Gridley, Cal., has presented a andsome young Standard bred mare to the Univer- y Farm at Davis, California. The filly is a four- ar-old by Aerolite and out of Deviletta 2:10¼ by ablo.

✤ ✤ ✤

John Rowen, one of the oldest horsemen in the est, is a frequent visitor at the Stockton track. is veteran still owns some of the best trotting rses in the country, notable among the five head ing a two-year-old colt by The Bondsman.

✤ ✤ ✤

Among the interesting foals which have arrived California this season, is a stud colt by Royal Mc- nney and out of California, A. T. Jackson's old atron by Sable Wilkes.

✤ ✤ ✤

. S. Mahan has resigned from the secretaryship the Oklahoma State Fair, to engage in private siness. He will continue to give some time to association's business, although W. H. Birdseye, former assistant and successor, has the work ite well in hand.

✤ ✤ ✤

Dan Lieginger, for many years a familiar figure at estern race meetings, is now operating a ranch ar Stockton. However, he continues to "fool" with e trotters and is getting two youngsters ready for e matinees and pumpkin shows of that vicinity is year.

✤ ✤ ✤

Prince Malone 2:15¼, owned by Mr. W. C. Brown Vancouver, is showing plenty of speed in his work is season. Last year making his first start in real cing, he paced the last half of his third mile in 02¾ and was apparently not strung at the finish. e is strong and rugged and seems to be capable of eat things this season.

✤ ✤ ✤

The largest inheritance tax ever collected by the ate of California from a single estate was paid by e heirs of the late James B. Haggin, according to a port filed recently in the superior court. The tal tax paid by the various heirs was $736,089. aggin died in August ,1915, leaving an estate valued : $10,593,271.

✤ ✤ ✤

C. F. "Farmer" Bunch, of Stockton, is visiting his n Ted Bunch at Phoenix, Ariz. Ted Bunch will nip his stable of harness horses East the first of ay. Two youngsters which were not quite ready r the big tracks have been sent to "Farmer" Bunch ho will work them at the Stockton track this pring. Mr. Bunch has four head at Stockton.

✤ ✤ ✤

R. S. Irvine, one of San Francisco's prominent usiness men, who is a devout devotee of the Harness orse, has booked his noted mares, Bloom and Ba- etta, to L. H. Todhunter's magnificent son of Peter he Great, Peter McKlyo 2:06. The mares were aken to the court of this splendid young stallion his week by M. Henry, who is training Mr. Irvine's orses at Stockton. Another great mare owned by Ir. Irvine, Ah La Moscovita, by Alconda Jay, was ent to Pleasanton to the court of The Anvil 2:02¾.

✤ ✤ ✤

At the annual meeting of the Cleveland Bay Horse ociety, A. E. Pease, re-elected president, said the ociety was going through a crisis, and the future of he breed was in a critical state. Unless they could et the military and agricultural authorities to see hat they had a great national asset in the breed, it vas most likely to become gradually extinct or to liminish in numbers so as to be almost in hopeless osition in the markets of the world. He regretted hat the Board of Agriculture would not give a Board's Premium for a Cleveland Bay stallion this oming season.

✤ ✤ ✤

So determined was the opposition to the Luce bill o end the publication of information about horses vhich would tend to increase the betting on races, hat Assemblyman Baldwin of San Diego, sponsor for he measure in the lower house, Thursday requested hat the measure be postponed a day. The bill was passed by the Senate. Opponents of the bill, wish- ng to kill the measure at once, objected to an im- nediate postponement, but their objections were not sustained, and it was made a special order of busi- ness for Friday at 2:30. The bill was sent to the Assembly with a passing recommendation by the public morals committee.

The Detroit Driving Club received substantial entry lists in both of its fixture events; the M. & M. received 24 entries and there were 23 in the Board of Commerce stakes. Two California trotters are entered in the M. & M.—R. J. MacKenzie's Miss Perfection 2:07¼ and V. K. Dunne's Spriggan 2:08¼.

✤ ✤ ✤

Judged by private information, Mars Cassidy, the widely known running turf starter, will have a very promising candidate for all big futurities the coming season, his prospect being Symphony, a three-year-old filly by Tregantle . She has been under the personal charge of George Starr, who drove her a mile last fall in 2:12¼ with such ease as to convince all that she was a notable prospect for this season. Mr. Cassidy bred this filly himself, and she is heavily staked in futurities. She will be raced by Mr. Starr.

✤ ✤ ✤

Eugene, Ore., March 28—By a vote of more than 80 per cent of the members of the board of directors, the Lane County Fair Association last night restored horse racing as the chief entertainment feature of the fair. Horse racing was abandoned last year for a round-up.

The association also decided to hold the fair this year October 3, 4 and 5, the latest dates in the history of the association. This action was taken because the early dates last fall interfered with exhibits and prevented farmers from attending, as their work in the fields had not been completed.

✤ ✤ ✤

The Annual May Races given by the Dixon Chamber of commerce will be held this year on Saturday, May 5. Entries will close April 15, 1917, and must be made with L. A. Morris, Chairman. The program will consist of a race for three-year-old pacers, $150 added; a 2:20 class pacing purse, $150 added, and a free-for-all purse, $150 added. The races will be half mile heats, 3 in 5; entrance fee 10 per cent of the purse, which must accompany the entry. Money divided 60, 30, and 10 per cent. Five to enter, three to start.

—o—

Allen Farm, Pittsfield, Mass., for over 30 years one of the most noted trotting horse nurseries in the United States and where hundreds of trotters with fast records were bred, will still keep its identity as a horse center, but this time as a cavalry mobilization camp. The entire property comprising 1,000 acres has been purchased by the United States government for that purpose and for a cavalry camp and army remount training ground it is one of the best appointed in the country. It contains modern and up-to-date stalls for 200 horses, a covered track and paddocks, besides houses for all employes on the place. The farm, purchased at a reported cost of $250,000, is most admirably suited for experimental breeding of army remounts, but whether or not it will be used in that direction is not known.

✤ ✤ ✤

A correspondent writing from Vancouver, B. C., informs us that Prof. Heald 2:09¼, son of Nutwood Wilkes and Daisy S., is now located at Nanaimo, B. C., a very considerable distance from Victoria, the only race track on Vancouver Island, and 35 miles from Vancouver by boat. His opportunities are very limited and the chances of any of his get being trained are also very limited. This is certainly a great pity as Prof. Heald was a good race horse and remarkably well bred.

Bon Guy, the game son of Bon Voyage and La Moscovita, is located at Vancouver, but his opportunities are not much better for the reason that there are no race meetings in this province except the one given in Vancouver in connection with the exhibition in August, and this renders it almost impossible to induce owners to train their colts, as racing at one meeting cannot give any adequate return, even to the fortunate winner of first money.

✤ ✤ ✤

Directors of the California Fair and Racing Association have mapped out a programme of class events for the circuit, which will be acted upon at a meeting of the members a week from today—April 14—at the Manx Hotel. The classes discussed are as follows:

At Pacing Gait—Free-for-all, 2:08, 2:11, 2:15, 2:20, and for three-year-olds.

Trotting—2:08, 2:12, 2:16, 2:20, 2:24, and for three-year-olds.

On the half-mile tracks a time allowance of four seconds will be allowed and the classes will be changed accordingly. Horses will be reclassed on the system of including the closing of four meetings at a time every four weeks. This will likely have the effect of putting the horses in their proper races, and will keep more horses on the circuit.

The directors further recommend that two running races, with purses of not less than $100 each, be programmed daily at all of the meetings. An effort will be made to have the attraction of mixed cards for the fair crowds. It has been proposed to have the innovation of letting one stable enter and start two horses in a race.

Conditions governing the races will be uniform right around the circuit. The three-heat play with every heat a race, the system that has been in force, will again be used. The matter of the amount of the purses will be left to the discretion of each association. The amounts will range from $400 to $600 at the smaller meetings and from $500 to $1000 at the larger ones.

✤ ✤ ✤

Geo. Stickles, of Lockeford, Cal., this week sent two good trotting mares to Stockton to be bred to Royal McKinney.

THE VALUE OF COLT STAKES.

Keep your mares and their produce eligible to colt stakes if you want to greatly enhance their market and racing value, is an opportune message to breeders who are right now in the midst of their breeding operations, selecting stallions for their mares, the foals are arriving ,while backers and managers of colt stakes have their books open to accept nominations and entries for the future.

The light harness horse-breeding industry and racing sport has arrived at a period in which future engagements for the entire produce of every farm, large or small, should be the chief consideration of every man who owns mares and breeds them. Actual figures presented in respect to each big trotting horse sale have proven beyond all doubt that unless youngsters are staked for future engagements, their market value will always be at a low figure, no matter how highly or fashionably bred they are.

The breeder, no matter whether he owns one mare or dozens, but neglects to nominate them or through them their progeny in future engagements, has about as much foresight as the farmer who plows his land, sows the seed and lets nature take care of the crop. The buyer does not want a colt without engagements ,nor does he care to have one trained for any purpose unless the near future gives him some chance for racing, be it for fun or money alone.

The writer has watched the Garden sales for fourteen years, yet hardly remembers any instance in which a weanling, yearling or even a two-year-old sold at four figures that did not have future stake engagements. Sale records from the last two auctions held by the Fasig-Tipton Company show that youngsters with futurity engagements have averaged by actual figures, a shade over $325 more than those with no such engagements, yet equally well bred in many instances.

Futurity engagements are not only important from the market value point of view, but for the amount of cash prizes offered by all racing associations, mile and half-mile tracks, is large enough to induce buying at high prices, because even as a risk or racing or training luck, it is worth a trial.

Perhaps few interested breeders and horsemen take the trouble of finding out what excellent and paying chances are offered in recent years by racing associations for two and three-year-olds at every important meeting held all over the country, with few exceptions. Unfortunately it is impossible to produce the exact figures through the Year Book, which is most deficient in this respect, even for the Grand Circuit, otherwise the amounts offered will teach a great lesson to breeders as to why they should patronize engagements for youngsters.

Observing horsemen may have some idea as to the amount of money hung up annually down the Grand Circuit, but few hardly know that the amount raced for by two and three-year-olds last season from North Randall to Atlanta was over 40 per cent of the total hung up for the entire trotting contingent and within $45,000 of the amount big line meetings distributed among the entire lot of pacers.

These are not haphazard figures, nor taken from the Year Book, which as stated, is unusually incomplete in matters pertaining to purse amounts, but are the result of calculation through the entire racing season.

Here are some figures which should at once appeal to breeders and mare owners, why they should keep their produce eligible to colt stakes. For every trotting race through the entire Grand Circuit, the purse money averaged in round figures $2,100 and included four $10,000, six $5,000 and many $3,000 purses. The average of each pacing event was about $1,450, including three $5,000 and many of $3,000 and $2,000 purses.

On the entire Grand Circuit program last year there were thirty-seven colt races, twenty for three-year old trotters, five for two-year-olds, and the average purse money for these events was almost $3,000 each, including a three-year-old sweepstakes as low as $665, while two of the richest were $14,000 and $8,500, the Kentucky and the Horse Review futurities.

In comparison with the number of races for juveniles—and one must include the tame pacing events—fields of starters were much larger than in regular trotting and pacing events ,contenders had not cost a fortune for training and preparation, nor were their entrance fees for eligibility and engagements anywhere near what it costs to stake a trotter or pacer for much lesser purse values ,aside from the immense attraction colt races offer to sport lovers.

Many breeders and horsemen look upon futurity engagements as a case of "many are called, but few are chosen," yet a youngster, staked in futurities and sweepstakes, trained and properly prepared for racing and speed exhibitions, will always have a particular attraction to owners and command a much higher price, while as a chosen he will always far excel the same class among aged horses.

Considering the matter from any standpoint, colt futurities ,sweepstakes, and any and all purses for the inducement and encouragement of colt racing, certainly is the only salvation for the sport and the greatest boom for light harness horse values.—[A. G. Asdikian.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

April 8—San Francisco, Cal.—Golden Gate Gun Club. C. A. Haight, Secretary.

April 15—Lindsay, Cal.—Lindsay Gun Club. Chas. C. Barieu, Secretary.

April 22—Tacoma, Wash.—Northwest Washington Trapshooters' League Tournament ,under the auspices of the Tacoma Gun Club. E. E. Young, Secretary.

April 23, 24—Lewiston, Idaho—Lewiston Gun Club. C. E. Butler, Secretary.

April 28, 29—Fresno, Cal.—Fresno Blue Rock Club. C. B. Jackson, Secretary.

May 6—Coalinga, Cal.—Coalinga Gun Club. E. N. Ayers, President.

May 6—Bingham, Utah—Utah State Sportsmen's Association. A. R. Bain, Secretary.

May 6—Denver, Colo.—Denver Trap Club. Warren Conley, Secretary.

May 7—Crete, Nebr.—Crete Gun Club. Frank J. Kobes, Secretary.

May 7, 8—Salem, Oregon—Oregon State Tournament, under the auspices of the Capital City Rod & Gun Club. Mark Siddall, Secretary.

May 13—Everett, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Everett Gun Club. C. E. French, Secretary.

May 13—Eureka, Cal.—Eureka Blue Rock Club. W. E. Innes, Secretary.

May 13, 14, 15—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary.

May 14, 15, 16—Spokane, Wash.—Spokane Gun Club. "Old Policy." Chas. A. O'Connor, President.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden, Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24 — Bellingham, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

The Movable Gun Club.—It is surprising to note the hundreds of sportsmen in all parts of the country who are resorting to the hand trap to get their quota of the pleasure and thrills which this great American sport affords.

Time was when the shotgun enthusiast was dependent upon the trapshooting club for this recreation and was lucky indeed if he did not have to journey many miles to indulge in the sport.

Today, however, the problem is solved in the hand trap, a portable device which may be laid on the floor of an automobile beside the gun case, taken on the train, on the yacht, or easily carried. It is always ready for business and never loses its energy . It is to be found on the country estate and on the farm. The clerk in the city office becomes as independent as his employer, for while the latter may do his shooting at the country club or over the traps of the gun club in the city, the clerk with hand trap, gun, shells and fifty or one hundred targets, may board a street car with his companions and in a very short time be experiencing all of the delights that go with the sport

N. W. Washington League—This was the opening shoot of the Northwest Washington Trapshooters' League and the same was a huge success. The Seattle Trapshooters' Association were the hosts for the christening shoot.

The big trophy of the day was the Everding silver trophy which was won in the shoot-off in the handicap event by Fred Landwehr.

The next shoot of the new league will be held at Tacoma, April 22nd.

Following are the scores March 25th:—

Regular Program, 100 Registered Targets—Amateurs: F. Templeton 95, R. S .Searle 93, A. Blair 92, E. Brackney 92, C. E. McKelvey 92, Hi Follrich 92, C. L. Templeton 90, G. A. E. A. FRY,
N. W. Wash. Trapshooters' League.

Ready For Trout.—On May 1st the trout fishing season in California is scheduled to open and from all present indications the trout anglers are going to have a great year. The one thing that will make the coming season the best ever is that there has been no heavy rains and as a result the fish have not been forced to withstand any floods.

This will make the fishing much better in the streams and will make it just as good in the lakes. Last year many of the streams of the Southland were very poor for trout angling. The cause for this was that the floods had killed most of the young trout and when the summer came there were no fish. However, with the early warm weather, everything points to a most successful year.

Reports coming from Big Bear are that the fish are more numerous in the lake than ever before. When the season closed last year the angling was very good in Big Bear, although it was getting rather cold. With the four months' rest the anglers should find the population of Big Bear lake doubled a number of times.

Anyone who angled in Big Bear last year will remember that if he rowed close to the shore he could see just millions of little trout in the shallow water. All these little fish will be grown this year and added to the thousands upon thousands that were already in the lake, and it should take a good many anglers to make an impression upon Big Bear.

The camps at Big Bear are looking for a great season. All the houses have been enlarged and many additional cottages have been built during the winter months. Just at present it is very difficult to get into Big Bear valley but if the warm weather keeps up, things will be a. pened up by the middle of the month.

Reports from all the streams are that the fish are to be very numerous. The San Gabriel river enthusiasts are expecting a great year, while the fish are also expected to be plentiful in the Ventura, Sespe and other streams of the Southland.—(Los Angeles.)

ALAMEDA ELKS' CLUB SHOOT.

W. G. Becktell, H. B. Vallejo and L. S. Hawxhurst Tie With High Scores of 49x50.

The monthly shoot of the Alameda Elks' Gun Club at the Alameda grounds on Sunday resulted in a ding-dong race for high honors. At the conclusion of the fifty-target program, W. G. Becktell, H. B. Vallejo and L. S. Hawxhurst were tied with scores of forty-nine. Becktell and Vallejo, amateurs, showed the best form they have displayed in months.

Others were close behind. Henry Stelling, after being off stride for several weeks, knocked out forty-eight, a sdid H. Meinecke. Barney Worthen, H. A. Ray and Ted Handman were there with forty-sevens. The shoot was a big success with fifty-eight in the competition. The scores were as follows:

Shooter.	Events. 15	15	20	Total
J. H. Walker	9	10	14	33
A. W. Aitkin	12	11	15	38

*Professionals.

Salt Lake Club.—Shooting in a blinding blizzard, E. B. Heagren and Shepherd tied for the fourth leg on the handicap loving cup at the Salt Lake Gun Club traps on March 25th. The targets darted and sailed far and near through the blinding snow and so far as encouraging a score of a possible fifty was concerned it was out of the question.

In spite of the poor weather conditions that prevailed, thirty hopeful contestants braved the storm and entered the contests. Competition grew keener as the storm increased and when the climax was reached Heagren and Shepherd were found to be at the top of the string, with Reilley and Riter following close seconds. The first event for last Sunday was the shoot-off between Heagren and Shepherd.

Although Reilley lost out by one point in the cup race, he was declared the winner of the club chellenge trophy. He mastered the wind in this event and made a perfect score of 25 out of 25. His closest follower in this event was Tingy, who broke 23.

In the beginners' squad S. Fowler led a string of ten promising artists with a score of 17 out of 25. Following are the scores:

Shepherd, handicap 4, broke 44; E. B. Heagren 5—41, Reilley 45, Riter 1—44, Humphrey 5—39, Bishop 1—42, Tingey 1—42, Bray 5—38, Anderson* 42, Mitchell 4—38, Hood* 41, Moffat 1—38, H. W. Heagren 5—34, Bain 3—35, Cowan 5—33, Welch 4—33, Smoot 2—29, Gallagher 2—33, Fisher 4—29, Brown 30.

Beginners—S. Fowler 17, W. D. Anderson 14, Orlob 14, Spry 13, R. Heagren 13, Pearson 12, Barney 10, Mitchell 9, J. M. Anderson 7, Culbert 6, Sunders 5.

WORK OF PANTHERS IN KILLING DEER.

Four Pesky Devils Slay Eighteen Animals Inside of Twelve Days.

A year or more ago I was making my rounds in Coos county trying to learn the conditions of the different game districts, to get acquainted with the people and see how they felt toward the protection of game and the game law.

I stopped over night with an old man who had lived in that district for a long time. I hold him my business and asked his opinion on a number of things. He said: "I am in favor of protecting insectivorous song birds and would like to see Chinese pheasants get a good start, but there is no use in protecting deer. It would be best to turn the people loose and let them kill the deer as fast as they can and get some benefit of them; at the present time the pesky panther gets them all." I asked him how he knew they got them all, and he replied: "Why, if four panthers will kill eighteen deer in twelve days, how many will they kill in a year? And, if you don't believe me, go to Rowland Prairie and get Jack Warner to go with you and look for yourself."

So I went to Mr. Warner's and asked him if he had any evidence as to this story. He said: "Well, I think I have enough to convince you of the number of panthers without going very far." So he took me into a shed where four panther pelts were tacked on the wall, two very large ones and two about half grown. (This was in March and the two small ones were probably born in May or June, making them almost a year old.) "Well," I said, "here are the four scalps ,where are the carcasses of the eighteen deer?" "Do you see that greasewood point yonder (pointing to a wooden point near a large prairie)? They are all right there and on a spot of ground not to exceed four acres, and these pesky devils (pointing to the pelts on the wall) must be responsible, as I caught all four of them within a quarter of a mile of that spot—two of them right on the point—and got them all in three hours' time."

He told the following story: "Upon going to the Prairie to look for my cattle, I had to pass very near that point. I took my dogs with me (pointing to a large bluish white-faced dog he called 'Old Grit', and a white and black spotted bitch he called 'Foxey'). As I got near, 'Old Grit' scented something and was soon off. I followed and discovered that he had found a deer, buried beneath sticks and leaves, that had been killed, perhaps only that night, as none of it had been eaten. In a few minutes the dog left this spot and began smelling around, and suddenly stopped again and began to dig. He found another deer that had just been killed and buried. He did not linger at this spot and was off again on a dead run up the hill. It was beginning to get interesting to me, so I followed the dog. He was now barking very loudly and I hastened in his direction to find that he had that devil (pointing to the largest hide) treed in a big fir. Unfortunately, I did not have my gun, so I left the dogs in charge and hurried back to the house, a mile away. Upon my return, needless to say, I made peace with that fellow in a very short time.

"'Foxey' and I started back toward the deer to look around further and 'Old Grit' started in another direction. It was only a few minutes until his loud barking drew me to where he was, and, to my astonishment, if he didn't have one of these little fellows up another tree. I killed it and thought it surely was doing a land office business to have killed two panthers in one day.

"I went again to the place where I had found the deer carcasses. 'Old Grit' came with me this time and the dogs became busy at once, digging deer out from almost any place, it seemed. Some of them looked as if they had been killed several days, as they were partly eaten; others had hardly been touched. I followed the dogs as they would move from one carcass to another, and suddenly 'Old Grit' scented something and was off again in a minute, 'Foxey' after him. I was led to them by their barking and found that they had treed the old mother cat up a hemlock. I was not long killing her and felt sure that I had now gotten the whole family of panthers. I felt fine; it was getting late and I did not want to spend the night in a boneyard, so started home. I had not gone far when the dogs simultaneously scented something and were off again in the same direction. Shortly I heard them bark and knew they had something treed again, but it was so dark I could not see to shoot. I debated whether to go home for a lantern and return, and decided that I might as well finish up a good day's business. Upon my return with the lantern, I found that the dogs had this other little fellow up a fir snag. I killed him and reached home in fairly good time at that."

I asked, "I suppose you slept good that night with all your excitement?" "Slept good? Why, every time I shut my eyes I could see big panthers, small panthers—why, everything was panthers. The next morning I went back to the spot and found the carcasses of eighteen deer. Apparently none of them had been killed over ten or twelve days, as they were hardly decayed, but I did not find any more panthers."

So this is the reason the old gentleman wanted the people to have the deer, for certain enough at that rate o fslaughter all the deer in this country would not last long. In the last five years Mr. Warner, with these two dogs, has killed 78 wildcats, 24 panthers and 27 bears . These two dogs are the best in the state and Mr. Warner will put them up against anything in the state for money, marbles or moss agates. —[Warden J. M. Thomas, Oregon Sportsman.

Inland Empire League — Spokane.—Kalispell and Spokane were still tied for first place after the competition in the Inland Empire Telegraphic Trapshooting tournament on March 25th. Wallace and Kellogg were tied for second place. E. Johnson of Kellogg and George Arland of Garfield passed Harry Gayhart of Kalispell for individual honors and are tied for first place.

Standing of the Clubs.

Portland Club.—More new nimrods are stepping out to the Everding Park grounds of the Portland Gun Club to practice than ever before. In the practice shoot on March 25th 16 were out breaking bluerocks and James W. Seavey was high gun, with 93 out of 100, while James P. Bull, a professional, was next in line with 91 out of 100.

John G. Clemson, president of the Portland Gun Club, and Henry R. Everding, secretary-treasurer, led a party of Portlanders to Seattle late Saturday night where they took part in a registered shoot. Following are the scores made out at the Exerding Park traps:

Targets—	15	15	20	25	25	25	25	T'l.
E. Long	18	14	19	23	..	..	..	69

Municipal Traps.—Never has there been such a general indorsement of any line of sport as has been accorded trapshooting in the past two years.

The campaign to educate Americans to handle firearms has been universal, and in quite a number of cities men of affairs have petitioned the Park Commissioners to set apart a tract for trapshooting purposes.

Spokane, Wash., has been given credit for having the first municipal trap, but such is not the case. The first trap to be installed under municipal supervision was in Nichols Park, Jacksonville, Ill., about 12 years ago. But this was so long ago that present day writers are not expected to remember.

Spokane, through Mayor Charles A. Fleming, an ardent trapshooter, placed traps in the Stadium last year. The Stadium is in the heart of the city. The traps are open to the public certain hours each day. Targets and shot fall into the Spokane river.

In Lincoln Park, Chicago, there are a number of traps that are open to the public every day, except Sunday. The Sportsman's Club of America have charge of these traps, from which more than 500,000 targets were thrown in 1916.

Omaha, Neb., Milwaukee, Wis., Minneapolis, Minn., Kansas City, Mo., and Cleveland, Ohio, all have public traps.

Wilkes-Barre, Pa., has a municipal rifle range and the city council has been asked to add traps for the scatter gun enthusiasts. So has the Scranton, Pa., city fathers.

New York City Park Commissioners some time ago voted 20 acres of ground in Van Cortland Park for trapshooting, leaving the erection of clubhouses, traps, etc., to the shooters.

Everding Good Sport.—One of the most pleasing and unexpected surprises that I have experienced in the many years that I have been connected with trapshooting is the one that took place last week. Under date of February 27th, Mr. H. R. Everding, secretary of the Portland (Ore.) Gun Club, wrote:

"My Dear Teeple—I notice in the sporting papers that the Los Angeles Gun Club is a real live club and turns out a goodly number of shooters at all practice shoots. In a few days you will receive by express prepaid a trophy or two, and I hope you will find room on one of your shooting programs to place these prizes. Hoping that the trophies will please you, and that they will draw a number of new shooters, with success to your club, I am,

Yours, H. R. EVERDING.

Several days after the receipt of this missive a large box was delivered at the club and upon being opened disclosed four very beautiful and costly prizes in the shape of a brass shell, standing 23 inches high; an open work silver cake dish; an etched silver water set stand, and a richly designed silver fruit stand, all engraved with this wording: "Presented by H. R. Everding, Portland, Oregon, to Los Angeles Gun Club, 1917." These beautiful prizes will shortly be put in competition and the aforesaid sporting papers will be furnished a copy of the shoot together with conditions surrounding same.

Los Angeles, Cal. FRED .H. TEEPLE.

Bulletins on Forests.—Beginning early in April, the San Francisco office of the Forest Service will issue weekly reports on the condition of the principal automobile roads in the National Forests of California. This information will be obtained from the Forest rangers and will be furnished to newspapers, press associations, automobile clubs, hotels, and other interested organizations, by which it will be made available to motorists. Hunters and fishermen will likely be interested.

The twenty National Forests in California comprise more than 19,500,000 acres of land and contain approximately 8,600 miles of road. There are in addition 9,500 miles of trail which makes accessible the more remote regions. Many of these roads penetrate large stretches of wild mountain country where thousands of people go each summer to escape the heat of the lower valleys.

The present roads are to be supplemented by others, made possible by the Federal Aid Road Act, one section of which provides a million dollars a year for ten years for the construction of roads in or near the National Forests in all the States. Of this fund a total of $281,751 has been apportioned to California for the fiscal years 1917—1918. To provide an adequate road system for the California National Forests the District Forester at San Francisco has tentatively estimated that the construction or repair of 837 miles of road would be required. Of this amount 663 miles would be in the National Forests and the remainder in the nearby localities. The roads are intended primarily for the purpose of developing the resources of the National Forests but would also open up new areas to tourist travel.

Seattle Fly Casting Club—Tournament work, which is one of the important subjects of the Seattle Bait and Fly Casting Club during the summer months, will start about May 6, with other events on July 1 and August 26. One of these dates will likely take in the big Northwest Tournament that the local club will stage this season. The committee is awaiting action by both the Tacoma Fly and Bait Casting Club and the Northwest Association of Scientific Angling Clubs for definite arrangement on the above mentioned dates as approved by the tournament of the local organization.

An outlined report from the legislative committee which has just returned from Olympia was heard at the meeting on March 7. The members of that committee brought out many facts concerning the "inside workings" of the "system" that controls the game affairs of the state. After the completion of a synopsis of the work of this body the club will start a further and systematic fight for better conditions.

The bass men are several points ahead of the trout men in the membership contest waged between these two teams picked for this purpose. The time limit which was to have expired at the meeting of March 21, has been extended one month. Both sides of the contest should hustle from now on, as the extended time will allow the winning of either side. The losers are to banquet the bunch that brings in the most members.

Lewis Treen, Jr., forest supervisor of the Snoqualmie National Forest, together with A. B. J. Ladd, furnished the entertainment at the last meeting. Mr. Treen, with colored lantern slides, showed the workings of his department in the "great out of doors." The lectures that have been the feature of this year's meetings of the club have been of special value to the sportsmen and the club voted on honorary membership to both of these gentlemen in recognition of their service to the organization. R. W.

Seattle, (Wash.).

By the narrow margin of one vote, the House of Representatives of Colorado decided upon the season on deer in that state in the autumn of 1918. The open season will be short ,only five days, from October 1 to 5th, but even that short time will give sportsmen a legal chance to get a taste of venison, which has not been the case for some years past. We have not seen the bill the House passed, but we presume the bag limit was made small enough so as not to endanger the annihilation of the species.

Sportsmen's Row

The Hartmanns, Fred, Adolf and Robert, were hooked up in a three-quarter century race; Adolph put over the low score, due to his using one of a friend's new guns.

✤ ✤ ✤

During the past month, 23 clubs have become affiliated with the American Amateur Trapshooters' Association. The membership of this organization now exceeds 1300 clubs.

✤ ✤ ✤

J. H. Bishop Jr. is coming along fine for a new man at the game. He has put over two 25 straights and numerous 24s. Bishop attended the coast field trials last December at Bakersfield.

✤ ✤ ✤

Mr. J. R. Mead, of Great Barrington, Mass., accompanied Mr. H. E. Sargent to the Los Angeles Park one day last week and after a lay-off of over 15 years broke 23 out of 25 blue rocks in his fourth string.

✤ ✤ ✤

The California-Nevada state shoot will this year be held on the grounds of the Los Angeles Gun Club on May 21, 22 and 23, May 20 being practice day; $1,175 in cash and diamonds and trophies to the value of $350 are among the attractions.

✤ ✤ ✤

Don't permit your 16-year-old boy to fool away his time on roller skates or with a tennis racquet, but get him a gun and teach him how to use it effectively. Your Uncle Sam may need him some day to help protect the Stars and Stripes, and the more he knows about using a gun the better for him and those he goes forth to protect.

✤ ✤ ✤

Quite recently six broad traps were sent to Commander Gillis at Pekin, China, by an American firm. These hand traps will be used by Americans and English residents of Pekin, perhaps by others, in the enjoyment of the "sport alluring." Trapshooting, like baseball, is an American sport, but it is finding a place in all other countries.

✤ ✤ ✤

The many shooting companions of Dr. S. B. Friend, no doubt, will be pleased to learn that the Doctor and his newly acquired "Better Half" have arrived in Yokohama, Japan, after a very pleasant ocean voyage. The Doctor writes that he had his own trap aboard and that they shot at blue rocks every day. He sends his kindest regards to all friends.

✤ ✤ ✤

W. H. Whitcomb, one of the live wires at the Chicago Gun Club back in 1907-8-9, was a welcome guest at Los Angeles. He arrived a little late, but he snuffed out 71 out of 75 in his usual clever style. Capt. C. A. Haight of San Francisco with his new single sticker got quick action on several good shots. The Captain is a little bear when it comes to shooting for a side bet.

✤ ✤ ✤

So many trapshooting tournaments held after October 15th of last year were failures from an attendance standpoint that the Board of Directors of the Interstate Association for the Encouragement of Trapshooting announces that no tournaments will be registered after that date this year. Gun clubs in appiying for registration of tournaments under the "old policy" should govern themselves accordingly.

✤ ✤ ✤

New additions to the trapshooting fraternity are R. C. Folwell, football coach at the University of Pennsylvania and Howard Berry, the brilliant all-round athletic star of that institution . They participated in a shoot of the Philadelphia Electric Company the other day. Folwell broke 36 of 50 and Berry 16 of 50. It was the first appearance of either at the traps. Now they have the fever.

✤ ✤ ✤

Trade Notes.—Perry Frazin of Chapman, Kansas, won high honors at the first two Registered shoots held in Kansas for the year 1917. Shooting Nitro Clubs he won the average at Salina with a score of 143x150 and the high average (tied) at the big St. Patrick's Day shoot held at Chapman. His score of 138x150 was excellent considering the high wind the men had to face.

The Salt Lake Gun Club, of Salt Lake City, Utah, had a good turn-out at one of their shoots. C. H. Reilley, Jr. ,shooting Nitro "Speed Shells" won high general average with a score of 94x100, defeating a field of 3 5shooters.

Geo. Volk of the West Toledo (Ohio) Gun Club won a recent shoot. Using Nitros he scored 93x100.

✤ ✤ ✤

Los Angeles Club.—Frank H. Mellus was the high gun over all in the weekly shooting program at the Los Angeles Gun Club on Sunday. Mellus smashed 93x100 targets from the twenty-yard mark. H. E. Sargent was a very close second, breaking 92x100, while Owen Council was third with 91x100 smashes.

It was the first day's shoot for the H. R. Everding trophies and a very large crowd of tar hawk smashers attended the shoot. The contestants were divided into classes according to their handicaps. There are four trophies up and so there were four classes. The shoot for these prizes will continue for six weeks. Each Sunday the winner in each class will receive five points, while the second will receive four, and so on down.

Mellus won the five points in Class A while J. F. Dodds took second with four digits and E. K. Mohler third with three points. H. E. Sargent was the high gun in Class B, while Owen Council was second high man. S. H. Wilson won high number of digits in Class C. while William Kennedy took high in the final class. Mrs. Pfirrmann won three points in Class C, while Mrs. F. H. Mellon won four digits in Class D.

Owen Council, E. C. Crossman, Fred Grewell and Frank Mellus all won solid gold take home trophies, while Mrs. Pfirrmann, J. F. Dodds, George Tucker, S. H. Hall and George Melford captured silver prizes.

There were 6970 targets thrown at the Los Angeles Gun Club during the past week, which brings the total of the season up to 307,605. Heine Pfirrmann, J. F. Dodds and F. H. Mellon all smashed 97x100 targets in the practice event . The scores:

F. H. Mellus, 20 yards, broke 93; H. E. Sargent 18—92, O. Council 19—91, F. Grewell 18—90, J. F. Dodds 20—89, F. H. Hall 18—89, Geo. Tuckett 18—88, Geo. Melford 18—88, W. J. Tarbell 16—86, R. Hartmann 16—84, Mrs. Pfirrmann 16—83, Wm. Kennedy 17—83, A. Pachmayr 18—81, E. K. Mohler 20—80, Mrs. Mellon 16—79, Seth Hart 18—78, R. O. Pool 17—77, S. C. Miller 16—74, B. H. Carnahan 17—74, F. Hartmann 16—76, F. H. Mellon 19J76, M. Vail 16—60x75, P. J. Curley 16—59x75, E. Lang 15—14x25, C. McAleer 16—11x25. All at 16 yards—F. M. Seely 50x75, E. C. Crossman 49x50, J. Barto 49x50, C. P. Manderville 47x50 ,A. W. Childs 46x50, J. O. Gardner 45x50, B. L. Graves 45x50, F. H. Teeple 44x50, G. L. Pulley 44x50, C. J. Hurst 42x50, D. R. Dickey 41x50, Dr. L. Felsenthal 41x50, M. D. Towne 39x50, H. C. Baner 38x50, E. D. Neff 37x50, Mrs. Crossman 36x50, W. L. Vail 35x50, A. L. Thomson 31x50, E. S. Dulin 29x50, H. F. Keenan 9x50.

Vernon Club—"Pop" Bruner Day was held Sunday at the Vernon Gun Club. Thirty-six shooters turned out for the sport and competed in a distance handicap shoot at 100 birds for "take-home" trophies.

C. W. Fish and Heine Pfirrmann—he has finally decided to quit changing stocks and shoot—tied for the first prize, each breaking 96x100. This called for a shoot-off, which was won by Pfirrmann. He broke 18x20, while Fish scored 17x20.

Sam W. Trout, former secretary of the Vernon Club, won the second prize. He squelched 95 tarhawks out of the 100. Bob Bole, who is responsible for the program, tied with C. E. Groat for the third prize, each breaking 94x100. This tie also called for a shoot-off. Groat won, breaking 19x20 to Bole's 18x20. The scores:

Trophy Handicap—Famechon 90, Stan Bruner 92, Cornelius 88, White 46x60, Dierdoff 88, Forrest 88, Geo. Oliver 90, Greenfield 36x40, Peterson 88, Long 90, Betz 75, Holohan 93, A. W. Bruner 94, Mellus 51x60, Trout 95, Pugh 93, Evans 90, Wilshire 87, Groat 94, Mrs. Groat 93, Meenhuber 31x40, Pfirrmann 96, Mitchell 96, Meek 78, Packard 92x80, Van Ness 62x80.

Open Contest, 16 Yards—Fish 20x20, Bole 85x90, Famechon 17x20, Stan Bruner 121x125, Cornelius 95x100, White 35x40, Dierdoff 25x25, Forrest 35x40, Oliver 36x45, Greenfield 64x70, Peterson 64x70, Long 22x25, Holohan 125x145, A. W. Bruner 18x20, Mellus 16x20, Trout 19x20, Pugh 39x40, Evans 135x145, Wilshire 18x20, Groat 94x95, Mrs. Groat 20x20, Meenzhuber 15x20, Pfirrmann 19x20, Mitchell 19x20, Meek 18x20, Van Ness 17x20.

San Jose Club.—Several new shooters took up the alluring sport of trap shooting at the San Jose Gun Club's traps on Sunday.

Dr. A. M. Barker was high gun on the Everding trophy. C. H. Nash was second, and Hall McLachlan and Kennedy tied for third.

A. R. Kennedy made the high score in the class C contest for new shooters. N. H. Weaver was second, A. B. Jamison third, Kelley, Masters and Kessler tying for fourth.

There will be another contest on April 15 when an extra 25 targets will be shot because of the lay-off scheduled for next Sunday when the crack San Jose squad is to participate in a one-day registered shoot at the Golden Gate club in San Francisco.

Scores follow:—

Everding trophy contest, 50 targets—A. M. Barker 44, C. H. Nash 43, Hall McLachlan 42, A. R. Kennedy 42.

Class C contest, 25 targets: A. R. Kennedy 21, N. H. Weaver 20, A. B. Jamison 18, J. H. Kelley 16, W. J. Masters 16, H. P. Kessler 16, J. H. Weaver 15, J. I. Haskins 12, G. E. Ballintyne 12, A. R. Trogden 12.

San Jose Gun Club's averages up to date for 1917 follow: Class A, on 300 shots—Hall McLachlan 291, George H. Anderson 289. Class C, on 20 0shots—J. H. Kelley 157, Arthur Free 154, A. B. Jamison 151, A. R. Kennedy 149, Mrs. H. McLachlan 141, G. E. Ballantyne 118.

In each class, at the end of the season, October 15, O. N. Ford will give the high shooter a beautiful silver cup, the champion of that class of Santa Clara county.

✤ ✤ ✤

The Inland Empire Shoot this year will be held in the stadium at Seattle, Wash. The stadium, by the way, is in the heart of the city.

BIG SEASON FOR TRAPSHOOTERS.

April and May Will See Many Registered Tourneys on Coast.

Trapshooters of the Pacific Coast and especially of Southern California are going to be very busy the coming two months. During April the local shooters will not have any big shoot, but in May the Southern tar hawk smashers will take part in two big events.

The first will be the annual California-Nevada state shooting tournament, which is to be held at the Los Angeles Gun Club on May 21 to 23 inclusive. The next big event will follow just a week later and will be the Pacific Coast handicap tournament and will be staged by the San Jose Gun Club.

Los Angeles gun club enthusiasts battled long and hard for the stake tar hawk smashing tournament. This is the first big shooting event that Los Angeles has had for more than five years and from the way the Los Angeles club officials have started after things it is going to be one of the grandest affairs ever held on the coast.

Prizes totaling $1525 will be given to the victors in this big California-Nevada tourney. There will be $1175 in cash prizes as well as $350 in diamonds and trophies. This is one of the largest purses ever put up for the big event.

The L. A .Gun Club officials in charge of the tournament will have the program for the shoot out in a few weeks, and, according to those who have it in charge, it will be the best event of the season.

In the past two years the Los Angeles shooting stars have been traveling all over California and Nevada to the state shoots, and on many occasions have come back with the majority of the prizes. With the shoot on their home grounds this year the tar hawk smashers hope to win the big prizes.

From now on until the time of the big shooting event large crowds are expected to take part in the weekly shoots so as to get in shape for the big event. Classy programs have been arranged by Fred Teeples for these weekly shoots and unless things go mighty wrong large crowds will attend them.

A special car will be chartered to carry the local shooters to the Pacific coast handicap event at San Jose. This car is not only for the local shooters, but also for those who come to the state shoot and then wish to travel to the Pacific coast event. All the visiting shooters are invited to go in this car. This arrangement between the Los Angeles Gun Club and the San Jose club was a most favorable one and one that is most advantageous to the shooters.

The San Jose club's shoot starts on May 27, which is just four days after the L. A. shoot closes. By having these two events so close together the shooters from outside the state can take in both events without having to go home again. The Pacific Coast shooting event will last from May 27 to 30, and there will be $1300 in cash to shoot for as well as many beautiful trophies.

It is expected that at least thirty of the Los Angeles shooters will attend the San Jose event as well as a number of tar hawk smashers from Oxnard and other local gun clubs.

Besides these two big events there will be many other registered shoots on the coast during the coming two months. The Golden Gate Gun Club of San Francisco will hold a big registered tournament beginning on April 8. The Lindsay Gun Club of Lindsay, Cal., will hold a registered shoot starting April 15. The Tacoma Gun Club of Tacoma will hold a registered tourney starting April 22.

The event that many of the local shooters will attend is the registered tournament of the Fresno Blue Rock Club at Fresno on April 28 and 29th. A number of the Los Angeles shooters have already planned to make the trip to the Raisin city and many more are expected to decide to go. The Oregon state shooting tournament will be held at the Salem Gun Club on May 7 and 8th, while the Everett Gun Club will stage their big event on May 13 and the Spokane club's big shoot will start on May 14 and last two days.

With this large number of registered tournaments scheduled before the California-Nevada shoot and the Pacific Coast handicap ,the tar hawk smashers should be in rare form by the time the two big events roll around.

Shooting Steelheads.—While Game Commissioner J. H. Hill of Watsonville and Commissioner I. L. Koppel of San Jose were patrolling the Uvas creek last Sunday they came upon one Gus Tischer in the act of shooting steelhead trout with a double barrel shotgun. Eight large steelhead were spawning in the stream when Tischer fired upon them, killing one and wounding others. He appeared before Judge Willey at Gilroy and was fined $100. Mr. Hill stated that the season for steelhead will not open before May 1st and even then they can only be caught with a hook and line. Mr. Hill wants it strictly understood that fish and game law violators will get no mercy from him and the best thing they do is obey the regulations.—[Salinas Journal.

The trapshooter who goes to the Grand American Handicap this year will have the pleasure of shooting at the traps o fthe finest country club in the world—the South Shore Country Club of Chicago.

BEN COLEMAN, OF MISSOURI
Successful College Farmer.

COLLEGE MEN FIND SUCCESS IN OLD ABANDONED ORCHARD.

Borrowing the capital and renting an old "worthless" pear and apple orchard of ninety-five acres, fourteen miles south of Kansas City, two graduates of the College of Agriculture of the University of Missouri, Ben Colman and Paul H. Shepard, both of the class of 1916, began the application of the theories which had been given them in their college course. The orchard was from twelve to twenty years old and the crop had not sold for enough for several years to pay the taxes on the land.

When they took charge of the orchard, after leasing it for five years on a cash rent basis, they began to spray and prune the trees. The trees were sprayed four times during the season. Because of a lack of capital they were unable to spray the whole orchard. They later found that the sprayed trees produced the best apples while the unsprayed ones bore fruit that was not worth the plucking. Then began the culling out on the trees before the apples were ripe. The clusters were cut to one apple and quality rather than quantity was sought.

Apple buyers learned of this and the crop was disposed of easily. The young men kept books on all their operations, placing their orchard on a business basis. At the end of the season they had made 50 per cent on their operating capital and 10 per cent on the capital invested in the farm, orchard, operating expenses and equipment.

In addition to this, they exhibited their apples at the Missouri State Fair and there, in competition with what are said to be the best apples in the United States, won first prize on the best bushel of commercial apples of any variety; first prize for Ingram apples; first on Cauben pears, and second on Keifel pears.

Both Shepard and Colman are well known to horsemen of Missouri as they were active officials during the last two Commencement Horse Shows at Columbia.

Chowchilla, March 30.—Increased production per acre is winning the attention of local farmers. Although this project has been under subdivision but four years, yet many farmers are planting orchards and nut groves with the idea of increasing returns from the land. This means more produce to the acre, which, combined with the enlarged acreage that is being placed under grain, sugar beets and other big crop cultivation each season, will greatly increase the wealth of Chowchilla.

✤ ✤ ✤

The Napa High School Agricultural Club has rented twelve acres of land from Philip Duffy on which to start a corn breeding station for the purpose of producing and desseminating better seed corn. The work will be projected and carried on under the supervision of the United States Department of Agriculture and the College of Agriculture of the University of California, so the best practice in corn breeding will be employed. Better corn crops in California will result in better seed. Good seed corn for California is in great demand and it will be the work of the Napa High School boys to satisfy this demand.

One hundred and fifteen head of horses, mules and cattle sold at W. W. Pollock's sale at Pollock's Place, a mile northeast of Mexico, Mo., last Thursday for $10,492.

✤ ✤ ✤

Efforts are being made by the alfalfa growers of the Dinuba and Kingsburg districts to secure sufficient acreage for the purpose of forming an Alfalfa Growers' Association.

✤ ✤ ✤

Owen Duffy, business manager at the Napa State Hospital, is in the State of Washington in quest of Holsteins to be added to the fine herd at the asylum. Dr. Iverson, Assistant State Veterinarian, accompanied him.

✤ ✤ ✤

Oakdale's entire rice crop has been sold, the total harvest of 30,000 sacks from less than 1000 acres of land bringing about $60,000. This is an average of $60 per acre, although the yield was really larger, as on about 200 acres, where the land was seeded late in the season, the crop did not mature.

✤ ✤ ✤

That hogs will do as well if not better on rice stubble than on other kinds of stubble is the opinion of J. H. Harlan of Yolo county, who pastured a large band of mixed hogs on 75 acres of rice stubble from December 1 till time for spring plowing last season. Portions of the band were marketed weighing up to 300 pounds each, and Mr. Harlan states that they were in as prime condition as any hogs he ever shipped ,also that they put on weight faster than when run on barley stubble in previous years.

✤ ✤ ✤

Elias Gallup, for more than forty years a resident of the Hanford section, died last week. Gallup was one of the pioneer breeders of pure bred stock in California. Sheep hogs and chickens were his specialty. He was for many years recognized as one of the foremost sheep and hog breeders in the country, and had at different times shipped stock to all parts of the world. Gallup was already interested in breeding Poland-China hogs when he moved to Hanford, and in 1879 took his first prize at the state fair. In 1880 he became a charter member of the Poland-China Record Company, holding the first share sold west of the Rockies. In 1885 he took up Holstein-Friesian stock breeding.

✤ ✤ ✤

The extraordinary demand and the resultant high prices obtainable for mules is responsible for the present activity in the sale of Missouri jacks and jennets, is the opinion of James Hamilton of the firm of Hamilton Bros., proprietors of Blue Grass Stock Farm, south of Mexico, Mo., and extensive handlers of horses and jacks . Over fifty head of jacks have been sold to Iowa, Kansas and Illinois customers by Hamilton Bros., since January 1. "The farmers of the Corn Belt realize that the present prices justify the breeding of mules," Mr. Hamilton said. "Mule colts are now born to be delivered at weaning time for prices that the average mature horses will not fetch, and the farmers are arranging to breed their mares to jacks." Mr. Hamilton is a great believer in pure-bred stock and his advice to mare-owners has always been to breed to no stallion unless the stallion is of the best. "Good horses are now bringing as good prices as I ever knew them to bring, but the scrubs and medium-classed stuff, if not suited for 'war-horse' purposes, is not finding ready markets." Therefore the farmers of the Corn Belt are turning their attention to the more profitable end of the breeding industry and their good mares will be bred to good stallions and their medium-classed mares will be bred to jacks.

After the Cattle Thieves.

Sacramento, Cal.—The farmers' Protective League is endeavoring to aid the livestock interests of the State by promoting a get-together spirit of cattle owners and farmers. The end in view is the securing of legislation at the present session which will create a means of apprehending and convicting the cattle thief.

C. A. Bodwell, Jr., the League executive officer, said: "Cattle thievery is by no means suppressed in this State. Complaints are frequent of cattle lost from ranges and even from dairies in thickly settled communities.

"One of the latest stunts which shows the thief is keeping in step with modern stealing conditions, is the conveyance at night by motor truck of either live or slaughtered cattle to some selling agency far distant from the place where they were stolen.

"As the bills already introduced have so far failed to meet with the general approval of people interested, a meeting was arranged last week and largely attended by stock men, as well as a few tanners and packers. A thorough discussion of the matter took place. This action has resulted in the draft of amendments making a practically new bill of Senate Bill 159. Through this measure it is intended by means of inspection of brands on live cattle being moved, as well as hides, to trace thievery to a positive proof . The matter of proof has always been the great stumbling block in securing conviction of the thief. Unbranded pure bred and dairy cattle need not be affected by the proposed legislation unless owners so elect."

Said Bodwell: "It is always the aim of the League to unite agricultural interests on legislative measures as exemplified here, because we have enough fights with the enemy outside, to necessitate full union of action within our own ranks.

"We hope something generally satisfactory may result from the meeting and the legislation which is proposed to enact."

✤ ✤ ✤

Pure Bred Stock.

At the last meeting of the Board of Managers of Napa State Hospital, Business Manager Owen Duffy reported the number of cattle and hogs sold since July 1, 1913—the amounts derived from sale of same and also the amount of beef and veal furnished the institution from the hospital's dairy herd, as well as the amount of pork produced.

The sales on different dates within the time mentioned included 2 bulls, 18 bull calves, 90 calves, 54 heifers, 53 cows, 2 boars and 2 hogs at prices aggregating a grand total of $10,774.18.

In the meantime the institution has credited to the dairy for deliveries of meat from July 13, 1913, up to the present time: Beef, 1,395.65; veal, $1,297.50; pork, $9,947.50; hides, $734.48.

At the present time the State Hospital carries 510 head of hogs (20 of them pure bred); 248 head of cattle, 3 pure bred bulls, 5 cows and 4 heifers.

In making the report from which these figures are taken Mr. Duffy asked for the Board's approval of an estimate for the purchase of more pure bred cattle and hogs.

He said: "I think you can readily see that the investment in more pure bred stock is a wise one, inasmuch as we have established a reputation over the State of having good stock, and because of the number of inquiries we have received to purchase the same from this hospital. I think, while our record in the past has been good from a financial point of view, we can still do better."

✤ ✤ ✤

As lands increase in value reclamation becomes profitable. Steep, badly washed hillsides may be set to hardy forest trees . Small ditches may be filled with litter and soil and seeded down to grass. Large ditches may be filled by obstructing with brush and coarse litter staked and weighted down, by planting willows, or by specially constructed dams protected by tile so laid that most of the water passes under the dam while the sediment is deposited in the ditch.

Michigan Holstein breeders are elated at the latest achievement of one of the bovine members of the Black-and-White breed. Was it not time that a Michigan cow once more took the lead? The answer has come in the shape of a world's champion junior 4-year-old record, made by Wandermeere Belle Hengerveld 193784. This great butter cow, who freshed at the age of 4 years, 5 months, 12 days, gave 570 pounds of milk, which produced 42.61 lbs. of butter, in her 7-day test, and in doing this she became the 18th cow of the Holstein-Friesian breed to make over 40 lbs. of butter in one week.

Evidently our Michigan friends grew tired of the championship milk and butter records that have so persistently been recorded from other parts of the country.

MICHIGAN'S NEW WORLD'S CHAMPION HOLSTEIN.

THE FARM

The farmer and breeder who is earnestly endeavoring to improve his herd is constantly turning his breeding problems over in his mind. Silently he works on a given problem. One day he reaches a conclusion as to what is best to do. He has thought it out from every angle he knows and finally reaches a decision. He retires at night feeling relieved and sleeps on the decision. The next day he again takes up the threads of the subject for a sort of review. Again in his mind he goes over the ground, only to find a weak link in the chain, and he rejects the decision. There are momentous questions for breeders to decide. High priced sires do not always cross well with the herd. Various other decisions must be made. Cows must be culled out at great loss, and so on. But his success comes at last, if he only persists along the lines of progress and wise investment.

The Northern California Counties' Association, comprising Modos, Lassen, Siskiyou, Shasta and Trinity, has sent telegrams to points in the Sacramento and San Joaquin valleys asking quotations on hay, which will be purchased for shipment to Modoc county to relieve the shortage in that county.

With but $3000 yet to be raised to make a Fresno county site for the Universal Meat Packing Company of Chicago a sure thing, the Merchants' Association is bending every effort to acquire the money within the next two weeks. A $14,000 site is to be donated to the packing company near Calwa provided it erects a $150,000 plant there. Plans for the structure have already been prepared by a Chicago architect, and are now in Fresno.

The normal wool clip in Montana is under 30,000,000 pounds, the largest production of any state in the union. At normal prices this clip is worth about $70,000,000 ,and on this basis flock masters accumulate wealth quicker than any other industry akin to agriculture. At present prices, if they should obtain until the 1917 clip goes to market, Montana wool will bring to the state in excess of $20,000,000, and the lamb and wether crop at least as much more.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¾); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

Cal. State Thoroughbred License No. 2018.

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

COLTS AND FILLIES BY WILBUR LOU ALWAYS ON SALE

HEMET, CAL.

Offers for service the best grandson of McKinney 2:11¼

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion Two-Year-Old Race Trotter of the Pacific Coast.

ZETA LUCILE (2) 2:12½

Champion Two-Year-Old Filly of the Pacific Coast.

HEMET QUEEN (1) 2:16¼

Champion Pacing Filly of the World.

KINSMAN LOU (2) 2:23½.
MATILDA LOU (2) 2:22½.
FIESTA LOU (p) (1) 2:25, (2) 2:22½.
GOLDSMITH LOU (2) 2:29.
BILLIE BOYD (2) 2:30.

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of Louise Carter (3) 2:24, the only mare to produce two yearlings to trot in 2:20 or better:

WILBUR LOU (1) 2:19½,
EDITH CARTER (1) 2:18¼.

Breed to him for colts that will race. Fee for 1917, fifty dollars, with usual return privilege, or money refunded at our option. Mares kept, $60.00 per year. All information gladly furnished.—Licensed Pure Bred Cert. 23.

Superbly Bred Young Saddle and Harness Horses FOR SALE

SADDLE BRED:—
- Dark Bay Gelding by Lord Denmark—Sonia.....Foaled 1914
- Black Gelding by Highland Squirrel King—Armin.....Foaled 1914
- Bay Colt by Lord Denmark—Dixie Queen.....Foaled 1915

STANDARD BRED:—
- Bay Gelding by Don Sonoma—Chula.
- Black Colt by Silkworthy—Sonia.

Anyone looking for some youngsters of either breed will find these colts as attractive as it is possible to breed them. They will be sold at reasonable prices; are in good condition and may be seen at Oakridge Ranch, Sonoma Co., Cal.

The superbly bred stallion, Silkworthy, is also for sale. He has been bred to a limited number of mares and has proven himself a sure foal getter, and we have the quality of his colts to show.

Address W. G. COWAN, OAKRIDGE RANCH, KENWOOD, SONOMA CO., CAL. or BREEDER AND SPORTSMAN, SAN FRANCISCO, for further information.

THE STANDARD BRED STALLION **SILKWORTHY 58175** LICENSE NO. 2069

Son of MORGAN AXWORTHY 47430. Dam CLEAR SILK (dam of Crystal Silk 2:28¾). Silkworthy is bred in the purple. His sire, Morgan Axworthy 47430, is by Axworthy out of Kinglyne, a full sister to Bingen; and his dam by Prodigal out of Red Silk by Baron Wilkes.

He will make the season of 1917 at Kenwood, Sonoma Co., Cal.

SERVICE FEE, $25.00 WITH USUAL RETURN PRIVILEGE.

Address W. G. COWAN, Oakridge Ranch, Kenwood, Sonoma Co., Cal.

IF you see DUPONT, BALLISTITE or SCHULTZE on the shell box you are sure you are buying a Du Pont brand of Smokeless Shotgun Powder.

Don't just ask for "Shells,"—be particular-a very large percentage of the trap and game shooters always ask for Dupont, Ballistite or Schultze loads.

Look at the Top Shot Wad

DUPONT, BALLISTITE or SCHULTZE is on the top shot wad of every shell loaded with the Du Pont Company's Smokeless Shotgun Powders.

Look at the shell box label,—if you don't see DUPONT, BALLISTITE or SCHULTZE the shells are not loaded with a Du Pont Smokeless shotgun powder. Your favorite shell is loaded with one of these powders.

.22 Caliber
Automatic Rifle

W

This was the first and is the *last* word in .22 caliber recoil-operated rifles. It is the handsomest and cleanest looking rifle of this type, and besides is well-balanced, strong in construction and sure in operation. It weighs but 5¾ pounds, holds 10 shots and takes down readily. It is fired by simply pulling the trigger for each shot. This enables exceedingly rapid shooting with accuracy. A comparison with similar rifles of other makes will convince you of the wisdom of buying the Winchester. Sold by all dealers.

It Is The Peer Of All .22s

Every Good Gun Store
Sells Winchester Guns and Ammunition

ALL THE POWER BEHIND THE SHOT

As in the modern field gun, the barrel of the Remington Autoloading Shotgun recoils against springs and a friction device each time it is fired.

In both cases full power is obtained from the powder charge because the breech block locks the shell solidly in the chamber and no gas can escape at the rear.

Try the Remington yourself. Five shots—simply pull the trigger for each shot. All-around shooting qualities guaranteed.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

THREE NOTED JUDGES

A. S. Thompson, of Kentucky; Jas. H. Bright of Missouri and Florida, and L. M. Monsees of Missouri, recognized throughout the land as three of the best, most courageous and qualified judges of saddle horses living, selected

MARSHALL CHIEF 2765

in a field of 22 of the world's most famous stallions, as the most ideal saddle stallion for breeding purposes. The considerations were: breeding, conformation, soundness, action and beauty.

THE WINNER OF THIS, THE MOST IMPORTANT BREEDING CLASS IN SADDLE HORSE AFFAIRS,

is in public service at E. N. Hamilton's farm, three miles south of Mexico, Mo., where blue grass, spring water and feed are to be had in abundance.

HANS BERG, 159 Warren Ave., Milwaukee, Wis., or E. N. HAMILTON, Manager, Mexico, Mo.

Pacific Coast Trotting Record

Peter McKlyo 58009- RECORD 2:06

Cal. License Pure Bred No. 105
Sired by

PETER THE GREAT 2:07¼ (sire of 50 in 2:10 list, including Miss Harris 2:01¼, Peter Volo (4) 2:02, Peter Stevens 2:01½, Peter Mac 2:03, Mabel Trask 2:03¼, etc.), dam KLYO by Jay McGregor.

He is from one of the greatest families on his dam's side in the books, as the performances of Susie J. 2:06½ and Trampfast 2:12¼ prove beyond doubt.

Peter McKlyo is the Greatest Son of Peter The Great

westof of Kentucky and is destined to be one of the world's greatest sires.

He is the only son of Peter the Great five years old with two colts in the list. He was bred to three mares as a two-year-old, only two of his colts being handled,—Charlotte McKlyo, winner of breeder's record 2:25¾, and McKlyo Boy, winner of the two-year-old division Breeders' Futurity Stake, record 2:23¼. It can be also said as a matter of record that he is one of the greatest five-year-old trotting stallions ever owned in the state of California, and one of the best individuals to be found in any country.

HE WILL MAKE THE SEASON OF 1917 AT

James Thompson's Training Stables

State Fair Grounds, Sacramento

TERMS: $100 FOR THE SEASON.

Usual return privilege. Mares pastured at $5 per month. Good care will be taken but no responsibility assumed for accidents or escapes. For further particulars address,

In the advertising columns of this issue will be found notice of the sale of the horses belonging to Miss A. E. Farnum. This is an unusually fine lot of young horses, both thoroughbred and standard bred. The thoroughbreds are all sired by Marse Abe, son of Yankee and Halo by St. Blaise. Marse Abe is a grand individual and was himself a superior race horse and winner of many stakes during his turf career. Only one of his get has been trained, but that one proved to be a good winner at Pimlico last summer. The dams of these horses are by Bright Phoebus and St. Carlo and they have proved themselves to be producers by the performance of their get.

Dillcara, the sire of many of the standard breds shown in this lot, is one of the best bred sons of Sidney Dillon and is doubtless the stoutest made and handsomest son of that champion sire. He was never trained but showed himself to be possessed of a high degree of natural speed. His full brother, Walter Dillon, the only one of his dam's colts to be trained ,obtained a record of 2:10½, and his full brother Harold Dillon has for many years been the champion sire of New Zealand, securing that honor again for the season of 1916-1917.

The dams of these standard breds are by Monbells, Marengo King, Flossnut, Cupid, etc., all sires of both speed and conformation ,and carrying the blood of Electioneer, Nutwood, Geo. Wilkes, McKinney and other celebrated sires.

Ohio imported 6700 Mexican quail last year and they had no sooner arrived than they began to die, and now there are but few left.

Picnic Day, University Farm, Davis, April 28.

Picnic Day at the University Farm at Davis, has been definitely set for April 28. The committee chairmen in charge of the day have been chosen and work is already progressing rapidly which will insure its success.

The entire program has not yet been decided upon, but it will include stock judging contests for which several valuable prizes have already been secured. Speeches will be given by prominent Californians and members of the faculty of the University. In the parade will be seen the University's prize livestock, which is some of the best in the State, besides the floats of ornamental and humorous nature.

IF THE editorial writers on some of the big dailies of California would spend one-tenth of the time in reading the report of the State Market Director of California that they do in "ripping him up the back" they would, in all probability, change their attitude in respect to this live-wire and efficient state official. Any one who reads their attacks on Mr. Weinstock appreciates the fact that they have not taken time ot read his report. Every farmer-stockman and consumer in California should get a copy of this important report. Director Weinstock has largely devoted his energies during the first year of the life of the Commission to organizing the growers of California, with the result that never before in the history of the state has there been so much activity along organizing lines as during the year of 1916, and the indications now are that in due course the farmers of California will be the most effectively organized farmers in America, especially along the line of marketing associations. When this shall have been brought about, a great stride will have been made in the direction of bettering the marketing conditions of California farm producers.

A Future Mule Country.

California is taking the lead in its every undertaking. If it be politics, mining, horticulture, farming or stock growing; those who take hold of the venture go at it in earnest and the result is most apparent. It is inconceivable to think of California and other Coast States, however, raising Jacks on a large scale, and it will surprise most readers to know that one Californian has privately sold 500 jacks in Oregon, Washington and California, in the last three years. It will be better evidence of the magnitude of this comparatively new venture here to state that $1,500 has been the smallest figure received for any of these jacks and that the prices have ranged from that figure to $5,000. H. B. Thornberry, of Los Angeles and Stockton, is the dealer who has made this record and his sales of jennets have been just as remarkable. In fact, in most instances, where he has sold a jack he has sold from ten to twenty jennets to the same buyers. Is it a wonder that Mr. Thornberry has achieved the title of being the Jack King of the West?

Mr. Thornberry's success is mostly due to the good business methods he has applied in the building up of this great business and in the knowing of what he was about. He was raised in Missouri, where jacks and mules long ago reached their highest state of perfection, and his earliest training was in the jack business. Mr. Thornberry knows the ups and downs of the business and has succeeded through this knowledge. Every jack he has ever purchased had to come up to his standard in size, breeding, age, weight, color and heartiness. Every jennet he has purchased had to meet the same requirements. No matter how hard it has been to find them and how much they have cost he has demanded the best. The result of his strict adherence to this rule is his success.

Every jack and jennet he has sold has been guaranteed to be just as represented, and they have made good and been the cause of his selling more in the same locality. Every herd he has sold has made money for the purchasers. Several years ago Mr. Thornberry sold a herd of bred jennets to Dill Bros., prominent ranchers of Clements, Cal., for $12,600. Recently he paid this firm $13,400 for the colts from that herd. Most of them were three-year-olds—the colts the jennets carried when he sold them to Dill Bros. This sale and purchase by Mr. Thornberry is not a rare thing in his business, as he has made a number of similar transactions.

California should become the leading jack state of the Union. Its favored climatic and grazing conditions permit jennets to make their own way the whole year round. The ranchers, appreciating this and realizing the magnificent profits which are to be made in the mule business, are taking hold of it as they took to dairying, farming and other successful ventures here. With these good jacks and jennets and the great herds of big draft mares coming to the Coast States it will be only a matter of few years when the buyers of mules, who have lifted the mortgage from many a Missouri farm by their liberal prices, will be invading the West in their search for hybrids. The next few years will be exceptionally prosperous ones for the man who raises mules as the cornbelt is positively depleted of all ages and sizes, and the demand promises to grow. Mr. Thornberry now has in his stables at Stockton 25 of the most magnificent big jacks ever seen under one roof. There are several that can win championships in the biggest shows in the country. All are proven breeders, well broke; and ready to go into a big service at once.

THE CARE OF THE COLT'S FEET.

[Written for The Breeder and Sportsman
By D. J. O'KEEFE.]

This is a subject of which much has been written. It is one of the most important factors in horseshoeing which is generally disregarded. As a rule horse owners pay very little attention to their colts until they are ready to break them. The care of the hoofs of colts is of special importance.

Abundant exercise upon dry ground which is not too stony is most beneficial. Such exercise will cause the hoofs to wear gradually, and it will only be necessary to observe from time to time whether the wear is taking place uniformly, and, if not, to correct the uneven wear with the rasp.

If the colt is reared in the stable and no attention paid to its feet, when turned out with their long toes they begin to break off in chunks; first a piece on one quarter and then the other. Consequently, the colt is strained and in misery the largest portion of the time; even permanent distortions of the bones of the foot gradually occur.

Weak quarters bend (curl) inward and encroach upon the space occupied by the frog (contracted feet of colts.), when the toe becomes too long, and this gives rise to too steep a position of the pastern. Therefore, the hoofs must be shortened from time to time. The incurved quarters should be removed and the outer edge of the wall well rounded with the rasp. In the base wide and base narrow standing positions the outer and inner walls become relatively long and induce the colt to assume a still more abnormal position.

The young and pliant pasterns may thus become permanently twisted and distorted. We know that the majority of hoof and leg troubles are caused by neglect of the colt's feet in early life. Then, do you wonder that we have so many horses with ring bone, side bones, weak tendons, dished toes, bulged hoofs, toe-in or toe-out horses, to handle and shoe?

The first thing the shoer should do is to determine whether the fault is in the foot or in the conformation of the leg. An imaginary line should be drawn through the center of the leg in front to determine if there is more hoof on either side of the imaginary line. Another imaginary line should be drawn through the center of the leg at the side of the ground to determine if the colt stands at proper angles. Under no consideration should one apply a knife too excessively to the sole, bars or frog of the foot. In case of thrush one must try and save all of the frog that is not infected, consequently, only the ragged edges should be removed, for by carving out the healthy portions of the frog or bars we only invite future trouble in the form of contraction.

One of the most important factors in keeping the feet of weanlings and yearlings in proper condition, as is specified in this article, is to see that you are keeping the leg in the middle of the foot; otherwise many a good horse suffers, as the concussion and strain is not equally distributed on both sides of the foot when in action, which is the case when neglected.

Pork Cure May Be Used For Preserving Beef.

Many farmers who kill and cure their own pork never attempt to supply themselves with beef. According to P. F. Trowbridge, of the University of Missouri College of Agriculture, any of the brine or dry mixtures which give good results in curing pork can be used satisfactorily for beef, but since beef is leaner than pork it should not be allowed to remain in the brine or mixture quite so long or it will become hard and salty.

The corned beef cure should be used for dried beef but care should be taken not to let it get too salty. The excess of cure may be washed off and the meat smoked if the smoke flavor is desired. Mr. Trowbridge suggests a good dry cure for beef can be made with salt and brown sugar in a proportion of one part sugar and five of salt. Rub the meat thoroughly with the cure every two or three days for about two weeks. It should then be washed, wiped, and hung up to dry in a warm place if it is not to be smoked, or transferred to the smoke house and given a light smoke.

Corned beef is at its very best when it has been in the cure about ten days. If it is subjected to the cure more than a month, it needs considerable freshening before cooking. The red color of the beef may be preserved with a small amount of saltpeter, not more than two ounces to each 100 pounds of meat. This improves the color but is detrimental because it hardens the lean fibers.

One gallon of commercial lime sulphur to eight gallons of water as used for the San Jose scale during the dormant season is quite effective. An oil spray as recommended for the scale is also beneficial. Stiff whitewash with a pint of crude carbolic acid added to each ten gallons is also used. These washes may be applied as sprays before the buds open but where it is necessary to repeat the application after the leaves appear they can be applied to the trunk and main limbs with a brush. The best and cheapest remedy is prevention by keeping all trees vigorous.

Harness Horses and Horsemen

ENTRIES IN STANFORD-OCCIDENT STAKE.

The following fifty-two colts and fillies foaled this year have been entered in the Stanford-Occident Stake No. 3, which closed April 1, 1917:

Guy Dillon—Gold Lilly by Copa de Oro; I. L. Borden, San Francisco.

Guy Dillon—Cleopatra by Zolock; I. L. Borden.

Major's By Guy—Cherry B. by Barney Barnato; I. L. Borden.

Black Hall—Cora Wickersham by Junio; Jas. L. Bulloch, Tulare.

Jim Logan—Little Lucille by Palo King; John Clark, Woodland.

Jim Logan—Ruby C. by Palo King; John Clark.

Vernon McKinney—Mabel Dillon by Sidney Dillon; B. Cohen, San Francisco.

Onward McGregor—Yolanda by McKinney; J. N. Holcomb, Hollister.

Peter McKlyo—Dione H. by Cupid; S. H. Cowell, Santa Cruz.

Panama—Hulda C. by Dexter Prince; S. H. Cowell.

Vernon McKinney—Gracie Pointer by Star Pointer; C. L. DeRyder, Selma.

El Volante S.—Letter B. Jr. by Benton Boy; J. F. Dunne, Gilroy.

Copa de Oro—Subito by Steinway; W. G. Durfee, Los Angeles.

Cariokin—Honey Healey by Zombro; W. G. Durfee.

Manrico—Helen Stiles by Sidney Dillon; W. G. Durfee.

Vernon McKinney—Sweet Hallie by American Hal; A. Edstrom, Oakland.

Expressive Mac—Beautiful Morn by Iran Alto; L. L. Gilpin, Richfield, Utah.

Alhambra Prince—Sona by McKinney; Alex Grant, Los Angeles.

Alhambra Prince—Sima by Limonero; Alex Grant.

Kinney de Lopez—Louise Carter by Chestnut Tom; Hemet Stock Farm, Hemet.

Wilbur Lou—Lady Zombro by Zombro; Hemet Stock Farm.

Wilbur Lou—Eradiate by Geo. W. McKinney; Hemet Stock Farm.

Wilbur Lou—Hemet Girl by Geo. W. McKinney; Hemet Stock Farm.

Expressive Mac—Dollie K. by Athadon; L. Karns, Lindsay.

Expressive Mac—Beauty N. by Nushagak; L. Karns.

The Proof—Nada by Nushagak; M. C. Keefer, Santa Rosa.

Wick Hall—Policia by Best Policy; Mrs. Mabel Lipson.

Wick Hall—Jane C. by Zolock; Mrs. Mabel Lipson.

El Volante S.—Copper the Ore by Direct Heir; Geo. W. Lowery, San Francisco.

Vernon McKinney—Ramona by Demonio; Roy D. Mayes, Dixon.

Jim Logan—Leota by Diablo; Roy D. Mayes.

El Angelo—Modesto Maid by Summerset Prince; Alex. McDougall, Newman.

Jim Logan—Beautiful Bird by Nutwood Wilkes; J. E. Montgomery, Davis.

Jim Logan—Winnie Bond by The Bondsman; J. E. Montgomery.

Jim Logan—Margaret M. by Chestnut Tom; J. E. Montgomery.

Airlie Demonio—Sister Mary W. by Kinney Lou; Chris G. Owen, San Francisco.

The Anvil—Expedio by Lijero; F. J. Ruhstaller, Sacramento.

Moro Ansel—Melmonio by Demonio; J. E. Short, Santa Maria.

Skidoo Wilkes—Honda Girl by Cubino; J. E. Short.

Morris A.—San Luis Bell by McGinnis; A. B. Spooner, San Luis Obispo.

Haldine—Queen Rapallo by Rapallo; Harry Steinhart, Santa Maria.

Peter McKlyo—Tennie Hall by Moko Hall; Jas. Thompson, Sacramento.

Peter McKlyo—Ruby by The Bondsman; Jas. Thompson.

Peter McKlyo—Janet Bondsman by The Bondsman, L. H. Todhunter, Sacramento.

Peter McKlyo—Leavinette by Zombro; L. H. Todhunter.

Peter McKlyo—Osmuda by Bon Voyage; L. H. Todhunter.

El Angelo—Mary W. by Dictatus; D. W. Wallis, Los Banos.

Vernon McKinney—Plumado by Advertiser; G. Wempe, San Francisco.

Panama—Leona Wilkes; Jay Wheeler, Sacramento.

Peter McKlyo Loma B. by Stam B.; M. L. Woy, Fresno.

Stanford McKinney—Florence B. by Bon Voyage; M. L. Woy.

Stanford McKinney—Strathalie by Strathway; M. L. Woy.

WITH "JUMP" AT THE STOCKTON TRACK.

When "Old Sol" made his brilliant appearance on this favored land Tuesday morning, he found me at the historic Stockton track; my legs dangling over the fence; my "Missouri meerschaum" going smooth and sumptuously grand; me backed up in front of the stand, where California's always prevalent breeze could not reach my comfortable body but filled me with its invigorating, flower-pollened air and wherever my eyes rested, filled with entrancing views; with some of America's foremost reinsmen driving horses, as famous in deeds and rich in lineage as the most noted crowned head, for my edification and in their preparation for what will undoubtedly be the most sensational racing season California has known in many years.

Could anything have been more ideal? As I crouched lazily on that fence and viewed the multitudinous charms of the San Joaquin with genuine appreciation I wondered if I could make things more pleasant; if I could have everything more to my taste and for my pleasure after I have acquired my "first" million.

However, the readers of the Breeder and Sportsman don't care a tinker's damn how or what I felt. All they are interested in is what I saw—not of the charms of this favored land, all of which have been thoroughly exploited, diagnosed and described by everyone from "back yonder' 'who has taken advantage of the annual excursions to this "land of living color" and has good standing with the editor of the Daily Bugle "back home"—but of the horses and the horsemen I saw at Stockton. Where they will race and what they think of the California circuit. What they are doing for feed and bedding and the thousand and one other things too numerous to mention that go into the making of every day life at a good track where good horses are being trained.

In a whirl around the stables I found these well known horsemen actively engaged with from two to fifteen head, eating good $30 hay the Stockton boys are forced to pay and sleeping on straw that cost $15 a ton. That is, some of them were bedded on straw and some had "shavings," which, by the way, looked good by the side of the bedding others had. M. Henry and his able assistant, E. D. Kirk, are working five young ones; the veteran driver and stallioneer, J. T. Jackson, has five; J. M. Jones has eleven head from babies up to the far-famed Leata J.; W. H. Williams has four good ones; A. F. Palmer two; W. E. Humpville has two young ones and "Farmer" Bunch four head.

* * * *

In the Jones stable there are four or five that will get in the money all the way down the line and several others with bright prospects. Leata J. 2:03, the noted daughter of Royal McKinney and Geraldine 2:17¾, is as "fat as butter" but is taking her spring work with a lot of "pep" and promises to be a big winner this year. This attractive mare is one of the few that the Royal McKinney horse has sired who had a chance and she made good easily. That this will be her most successful season of her rather varied career is the confident expectation of Trainer Jones. A green pacer that was worked a little last year and showed miles around nine and halves in 1:02 is Irene D., by Charley D. out of Lady Irene by Diablo 2:14½. She is getting regular and careful attention and will undoubtedly be a noted character at the tracks before they have progressed very far. The handsome chestnut mare, Modesto Maid, trotted some fast heats last week and her way of doing it is worth a trip to any track at any time. This good looking daughter of Guy McKinney which is owned by Mr. Frederick, a well known Modestan, has been a mile in eleven and looks as ready and fit as any trotter in California.

The fast son of Nearest McKinney, One Better, has produced a splendid prospect in a five-year-old mare out of Lady Irene. This pacer with 90 days' work under her belt last season paced miles in 16, halves in six and quarters in 31 seconds. Mr. Jones expects her to pace in four and five this year.

Another mare in the Jones stable that in all probability will prove a strong contender in this year's events is a chestnut mare owned by Frank Groom, the popular Stockton horseshoer. This mare is by Dexter Derby and out of a mare by a son of Diablo, whose dam was the good matron Geraldine. Mr. Jones stepped her a mile in 25 the fifth time he hooked her and the good clean way she can do it makes one want to see her get to the big shows and in fast company. She is level headed and as sound and clean as a bullet. That Mr. Groom has one of the prospects which will make good is the prediction of every one who visits the Stockton track.

* * * *

The popular Stockton business man, Ed. Lavin, owns several of the best horses in the Jones stable that would make any man proud of possession, and when one looks them over he doesn't blame Mr. Lavin for spending money freely on them. They will get the opportunities they deserve and in addition to the pleasure the owner gets in driving them and seeing Mr. Jones work them, he will unjuestionably reap a good harvest from their engagements this year. Among the Lavin horses is a chestnut trotter called Poodle Dog, by Dexter Derby, dam by Guy McKinney; Eddie L., two-year-old trotter by George Hammett 2:08¼ by Nutwood Wilkes. This good colt's dam is Stella McKinney 2:17¼ by a son of McKinney. He is entered in the State Fair Futurity and is going to be one of the best colts in the bi stake. Mary Osborn, a green mare by Dexter Derby dam by Linwood, that is a splendid looker and goo open gaited, who, I think has a good chance to wi some money if she continues good. Last week M Lavin added the good looking green mare Lady Alic T., by Geo. W. McKinney, to this attractive stabl He bought her from A. F. Palmer of Santa An This mare's dam, Mayme Redmond, is a full siste to the once famous John A. McKerron, making he a three-quarter sister to Louise Carter, the dam o Wilbur Lou. She is a free legged pacer, a big, clean good looking mare, and was a purchase worth th money.

* * * *

In the stable of M. Henry, there are only five hea and most of them are youngsters; however, they are a brilliant lot and with the present treatment they are getting from Mr. Henry and young Kirk, they will certainly be primed for battle by the time the battle opens. Most of these horses are owned by R. S. Irvine, a prominent business man and horse lover of San Francisco, who believes in them and who never fails to give them the best opportunities Mr. Irvine is breeding some good horses every spring, mating his good mares with the best stallions offered for service. They are: Baretta D., green mare by Charlie D. McKinney; Lanark P., four-year-old by Zorankin, by Zombro, dam Bloom by Nushagak. This colt went a mile in eleven and one-quarter last season with very little work and Mr. Henry expects him to be one of the best winners on the Coast this year; Vannon, a two-year-old by The Bondsman and out of the good matron, Bloom; Bertha, brown mare, five years old, by Patchen Boy 2:10¼, dam Baretta, and a two-year-old of exceptionally good class whose breeding I did not get.

* * * *

A. T. Jackson's Royal McKinney is the attraction of his stable; however, The Icicle, by The Iceman 2:10, is doing wonderfully well and promises to be a headliner this season. There are three or four youngsters in his stable, all by Royal McKinney, that with proper attention will get to the top rung of fame.

* * * *

In the stable of W. H. Williams is the beautiful trotter, White Sox by Bon Chaville, by Bon Voyage and out of Kitty Fox, by a son of Prodigal. She is one of the most attractive trotters at the track and has worked miles in eleven and a half. Bird, a four-year-old trotter owned by Ed. Speckerman, of Lodi; Prince Demonio, pacer, owned by Jas. Parino, Lodi, and Kate Bingen, a fast trotter by Robert Bingen, owned by Mr. Williams, make this one of the most attractive small stables in the state.

DEATH OF COPA DE ORO.

News is at hand that the recently imported American stallion Copa de Oro died in Dunedin last week. Copa de Oro was imported to New Zealand by Mr. C. D. Hudson, of Dunedin, who, although not a racing man, takes a keen interest in the light harness sport. The son of Nutwood Wilkes had a record of 2:01 for a mile aaginst him, and but for a technicality would have been credited with 1:59. He was a fine upstanding free-legged pacer, never at any time having had a strap on his legs. Last season he was leased to the well-known West Coast sportsman, Mr. H. W. Kitchingham, who found little difficulty in filling his list, which was limited to twenty-five mares at a cost of twenty guineas, besides serving a few of Mr. Kitchingham's own mares. Mr. Hudson's importation was one of the highest priced stallions that ever left America for these parts, and he was the fastest pacer ever imported to Australasia. That he was highly thought of there is no doubt, several keen judges speaking in glowing terms of his qualities, and his loss will be keenly felt amongst breeders. Although insured, there is little doubt that Mr. Hudson will be a considerable loser financially by his death. Among the mares to visit Copa de Oro in his first and only season in New Zealand were: Lady Sybil, Sylvia K., Black Angel, Mrs. Howard's Young Irvington mare, Mrs. Howard's Blackbird mare, Lindawood, Lady Linton, Marie Corelli, Daphne, Mary Lincoln, Atalanta, Princess Peri, Tongonni, Lady Salisbury, Fern Tree, Regina Belle, Galindo Maid, Gertie L., Merry Bell, Mr. Rutherford's Young McKinney mare, Sirrah J., Norah McKinney, and Savannah.—[New Zealand Referee.

Good leather stock is becoming a rare article and the dealers in all leather goods are having considerable trouble in getting their stocks complete this spring. It is said that in some sections good saddles, bridles, harness and all accessories of a show or racing stable cannot be had at any price. San Francisco's enterprising dealer, J. David West, whose attractive store is at 1018 Fillmore street, however, got his orders for this season's goods in early and has received his entire line. His stock is complete with every necessity for a good stable and the quality of the best. Horsemen should order their goods from Mr. West now, while he is in a position to give them the best made at let-live prices.

Thoroughbred Matters

EARLY RACING EFFECTS.

In America the racing of two-year-olds before April 1st of this year on tracks under the supervision of the Jockey Club has been barred, and a similar course has been decided upon by Kentucky clubs—which seemingly do not come under Jockey Club rules—and in Canada. Despite this, some of the American clubs have held two-year-old races from January 1, as in the past, and it was anticipated amout two hundred youngsters would come under the ban.

In Australia owners setting the ruling bodies at defiance would, in conjunction with their horses, be disqualified, but in America they do things differently. Owners offendiing against the rule referred to are not punished, and the disqualification for racing earlier than April 1 only applies to the youngsters during their two-year-old careers. As three-year-olds they can race under Jockey Club rules, as if nothing had happened, and next year a deal of interest will attach to the meeting of horses which started in January of this season with those whose earliest appearance as two-year-olds was not until April. It is not improbable that some of the early-beginning youngsters will have a slight pull over the others in one respect. The two-year-old commencing in January is likely to get a longer rest before it is three years old than the one which does not start until April, and will in consequence be racing later in its first season.

It may be reasonable to assume that the two-year-old which is raced at the earliest possible opportunity will deteriorate sooner as a racehorse than the one given greater time in which to mature, but it cannot be said this idea always works out correctly. Various prominent Australian horses started as soon as the rules permitted as two-year-olds, and notwithstanding that, were racing and winning over long distances when they were five years old. Those people who are not opposed to early two-year-old racing also point out that most of our three-year-olds of recent years have been horses which showed form in the spring as two-year-olds, and contend that early tuition as a galloper is in most cases productive of better results than to wait until a horse is nearly three, and less adaptable.

Some of Australia's best stayers have been horses which did very little racing early in their careers, but the fact also remains that several prominent at the present time were trained some months before they were actually two years old, and were raced early in the spring. For instance, Woorak, our greatest sprinter, which is now five years old, won in the spring as a two-year-old, and Carlita, Australia's best mare and a rattling stayer, was raced as early as possible. It was the same with Cetigne, and Wolaroi, Australia's best three-year-old, was another early beginner, opening his winning account in the A. J. C. Breeder's Plate. On the other hand, Patrobas, which probably now represents top w. f. a. form at middle distances, was not seriously trained as a two-year-old, nor were Kandos or Ulva's Isle, others of the best of our older division over a journey. "It depends upon the horse," is the way a leading Sydney trainer sums it up. That is to say, one youngster will thrive on work that would quickly break another. However, in these days of big two and three-year-old prizes in Australia, most owners would sooner have their yearling purchases tried early than put by until they were three years old, or near it, even if that course might tend to lengthen their days of racing usefulness.—[The Referee, Sydney, Australia.

Washington, D.C., March 26—The constitutionality of the Kentucky State Racing Commission act is attacked in a brief received in the Supreme Court today, which will be filed formally in support of a motion to be submitted later for an injunction to restrain the enforcement of the act.

The Douglas Park Jockey Club of Louisville, which was defeated in the Kentucky Courts in its effort to hold up the operation of the act, is the complainant and asserts that immediate action is desirable, because it may be compelled either to give up the May meet or put up purses, involving a possible loss of $21,000.

In the brief, signed by John Bryce Baskin, it is asserted that "the effect of the rule complained of is to require purses offered by plaintiff in error to be not less than $800 each; while purses given by the Lexington association need not exceed $600 each. The difference on seven races a day amounts to $1,400; and at a race meeting of fifteen days that difference may be $21,000.

"Unless a temporary injunction or restraining order is issued plaintiff in error will be compelled either to quit business until this case is decided in this Court or to pay the $800 purses. If the rule of the Racing Commission is held to be void, no part of the purses can be recovered and the loss of plaintiff in error will be final and complete.

"The races are held in May. The Kentucky Court of Appeals decided the case on February 6, 1917, and the plaintiff in error, by the advice of its counsel, had deferred the making of contracts for the meeting in May hoping that an injunction may be obtained from this Court restraining the enforcement of the rule complained of. The affdavit of counsel filed herewith shows that fact. As the race meetings occur twice a year, it will be seen that the loss of the plaintiff in error will be very considerable, if this Court reverses the case, unless a temporary injunction is issued."

It is pointed out that the Racing Commission act gives the owners of the track or owners of horses the power to fix and give purses, and this power is not in the Racing Commission. It is also asserted that the power to give purses cannot be delegated to the Commission and that the act is void because it is discriminatory.

The State Court has construed the act, holding that its purpose is to "foster the industry of breeding thoroughbred horses in the State," says the brief. "Any police regulation, therefore, must have for its object the purpose of fostering that industry. It retards rather than fosters the industry to give $600 purses at Lexington and $800 at Louisville. The larger the purses at all tracks the greater the inducement to breed horses."

Walter B. Jennings, in charge of the large racing establishment of A. K. Macomber, now at Charleston, in a letter to Col. M. J. Winn, declares that all of his Derby eligibles are training soundly, and that he expects all will be in good shape when they are shipped to Churchill Downs the first week of April. North Star, the stable's most formidable eligible, is going along in fine fashion, and has not missed a workout since his active training commenced.

✤ ✤ ✤

As has been the rule for the past few seasons, the Westchester Association will have a free field on each public holiday, as well as every Saturday of its meeting. These free days have done much to popularize the sport, and every free day has seen immense crowds in the infield. Unfortunately, on various occasions, there has been rain on these free days, but many of the faithful in the free field have braved a wetting to witness the racing.

✤ ✤ ✤

Jefferson Livingston's string of fifteen horses in charge of Mose Goldblatt, arrived at Lexington from Hot Springs last week, the shipment being made up of Colonel Vennie, Jack O'Dowd, Othello, Aldebaran, Diamond, Matin, White Crown, Syrian, Sansyming, Solid Rock, Julia L., Ed Howard, The Baroness, Prince Toi, Como and Ben Hampson. Manister Toi, recently purchased by Emil Herz, was brought along and will be shipped to Louisville to Trainer J. J. Finnigan.

✤ ✤ ✤

The executive committee of the Kentucky Association has decided there will be seven races daily durinf the Spring meeting, opening April 28 and closing May 10, and that added money to purses will average $600. This action has the sanction of the State Racing Commission.

In view of expected action of the Legislature at Frankfort, by which big daily license tax will bt put upon racetracks, the executive committee used the blue pencil on its badge list and the number of complimentary admission tickets to be given out this year will be reduced to a minimum.

Judge William H. Shelley was authorized to place copy for the program book for the entire meeting in the hands of the printer and it will be out in about ten days.

✤ ✤ ✤

The "War National" Steeplechase ,substitute for the Liverpool Grand National, was run at Gatwick, England, Wednesday of last week, and was won by Sir G. Bullough's bay gelding Ballymacad, by Laveno—Ballymacarney, 138 pounds, with H. Trimmer's chestnut gelding Chang, by Cupid—Threnody, 135 pounds, second and Lady Nelson's bay gelding Ally Sloper, by Traveling Lad—Sally in Our Alley, 164 pounds, third. The places were filled by outsiders in the betting, it being 100 to 9 against the winner, 5½ to 1 against Chang and 20 to 1 against Ally Sloper. The latter was the winner of the last Liverpool Grand National. The race was for a $500 cup added to $2,500 and a sweepstakes of $100 each for acceptors. Carrig Park was the favorite ,but fell and brought down six others. Nineteen ran.

✤ ✤ ✤

New Orleans, La., March 26.—Fred A. Middleton, attorney for the Jefferson Fair Association, returned from Hot Springs today, where he had gone to interview horsemen as to the prospects at the Jefferson track, which proposes opening Thanksgiving Day for thirty days.

"Our race meet is assured," said Mr. Middleton, "provided, of course, that the present interpretation of the law is upheld in the suits now filed and pending. Two horsemen now at Hot Springs will supply all the capital we need in addition to the $85,000 which we have raised to insure the first meeting.

"Racing at the Fair Grounds next year will be for only thirty-six days. Two of the largest owners at the Springs told me that it would not pay them to ship their stables here for only thirty-six days. We propose thirty days, which will give sixty-six all told at New Orleans, about the correct length of time to insure any profit to the owners."

THE FIRE AT HOT SPRINGS.

Hot Springs, Ark., March 31.—Flames consumed the Essex Park grandstand this morning and caused a temporary suspension of racing in these parts. The sport will be resumed Monday, over the Oaklawn track. The latter plant having been tendered to the Essex Park management, the meeting will be continued.

The fire was first discovered about 10:30 this morning in the upper part of the west end of the stand and spread with alarming rapidity, the entire massive structure being a seething mass in no time.

It was a physical impossibility to save the building and the hundreds of horsemen who acted as volunteer firemen at once centered their energies on preventing a spread of the flames and to confine the conflagration to the stand. Their objective point was the paddock. If successful in their efforts to keep this part of the plant from becoming ignited it would mean the saving of the stables and numerous horses.

For a time it appeared improbable that a disaster would be averted, for a north wind was carrying the flames toward the paddock, but luckily the wind suddenly shifted and soon after the remaining portion of the grandstand collapsed. These fortunate incidents put a check on what might have been a calamity.

Oaklawn Is Offered.

When it became patent that all danger of the fire spreading to other sections of the plant, excepting the grandstand, was over, plans of a continuance of racing here were at once put into action. General Manager Joseph E. Martin of Oaklawn, who was still in the city, was appealed to and arrangements quickly completed to put the Oaklawn plant at the disposal of the Business Men's League for running off the Essex Park racing dates. Announcement to this effect was immediately made to the horsemen.

The fire was discovered when the horsemen were busily engaged around the secretary's office making entries for Monday. They at once lent their aid to stopping the conflagration and did yeoman service. The hardest of the workers were R. E. Watkons, Fred Gerhardy, Patsy Bowman and George Reardon, who organized the valets into a bucket brigade.

Jockey Stearns especially distinguished himself by climbing the paddock roof, carrying a hose with him, and playing the stream steadily on parts most exposed to the flames from the grandstand in spite of the intense heat and danger of injury.

After it was definitely established that Oaklawn would be available for a continuance of the racing here, Secretary Fred Gerhardy announced that the entries intended for today were declared off, and those made for Monday would be run as scheduled.

Stand Destroyed Rapidly.

An idea of the intensity of the fire can be had from the fact that fourteen minutes after the discovery of the flames the huge grandstand was in total collapse. Word of the conflagration spread rapidly, and hundreds of automobiles and other conveyances were Essex Park bent from Hot Springs. The five miles intervening was literally blockaded with sightseers.

The grandstand was a total loss, it being uninsured.

The fire originated in an old store room over the restaurant kitchen aid is thought to have been caused by a defective flue.

Horsemen immediately began arrangements for transferring their establishments back to Oaklawn, and all o fthem will resume their former quarters. To avoid confusion, owners were requested to move back to their old stables. This eliminated the necessity of allotting stalls which would have entailed much time.

A partial list of jockeys and their contract employers for 1917, gathered from Juckey Club records, shows that the following engagements have been made:

Jockey.	Employer.
Butwell	August Belmont
Robinson	H. P. Whitney
Keogh	J. E. Widener
Byrne	Andrew Miller
Phillips	A. K. Macomber
Buxton	A. K. Macomber
Loftus	A. K. Macomber
Schuttinger	Wickliffe Stable
Garner	Wickliffe Stable
Kleeger	Wickliffe Stable
Fairbrother	O. Lewisohn & D. Gideon
J. McTaggart	R. T. Wilson
T. McTaggart	G. A. Cochran
Crumb	Ed. Moore

A stallion registration law has been passed in Missouri.

✤ ✤ ✤

R. A. Long and Mrs. Long have been spending several weeks in Honolulu.

✤ ✤ ✤

The University Farm, Davis, reports the sale of four head of light horses to the Nevada State Penitentiary.

✤ ✤ ✤

Lee Bros., of Mexico, the leading dealers of high class horses in Missouri, report a big demand for high class saddle horses.

✤ ✤ ✤

Col. Ab Dingle, of Moberly, Mo., has leased the Moberly Fair Grounds. Moberly will have her fair July 30 to August 2. Moberly will open the Missouri-Kansas Grand Circuit.

✤ ✤ ✤

During the last decade three states — California, Colorado, and Michigan—contained three-fourths of the area under sugar beets in this country and produced three-fourths of the beets and sugar.

✤ ✤ ✤

Jas. A. Houchin, president of the Star Clothing Manufacturing Company and owner of the Astral King Farm, Jefferson City, Mo., has been made president of the Missouri Federation of Commercial Clubs.

✤ ✤ ✤

Miss Loula Long, of Kansas City, with her cousin, Mrs. Bertie Reed Ellis, are visiting friends in New York and Boston. Before returning home they will visit Miss Long's sister, Mrs. Hayne Ellis, in Washington, D. C.

✤ ✤ ✤

A. R. Shaw, prominent Chicago publisher and horse lover, is a Southern California visitor this month. Mr. Shaw is the owner of the good gelding, Lord Roberts, which has been a consistent winner in local classes at the South Shore Country Club and International Horse Shows.

✤ ✤ ✤

The Breeder and Sportsman has been commissioned to sell one of the most attractive saddle stallions ever owned in Missouri. A horse of superb blood lines, well gaited and educated and a proven sire of the most sensational horses. This horse should find a new home with little trouble and those interested may have full information upon request to this paper.

✤ ✤ ✤

Jas. Buford, Paris, Mo., who now has the big fair ground stable that was built for John Hook and John Woods, has more than 20 head of splendid horses in training. Buford in the two years he has been running a stable for himself, has been highly successful and is credited with being one of the most talented horsemen and "squarest men" in the business.

✤ ✤ ✤

The well known California saddle mare, Black Belle, the property of Mr. W. Bernstein of Hanford, California, has been sent to San Vicente Rancho, Los Angeles, to be mated to the sensational young stallion, San Vicente. This mating will be watched with interest by California admirers of saddle horse affairs San Vicente is attracting some of the most noted mares in California to his court.

✤ ✤ ✤

Frank B. Luschinger, of Monroe, Wis., president of the fair at that place and known to horse lovers everywhere as the owner of the good Rex McDonald mare, Miss Cliff, last week purchased from Jas. Buford, of Paris, Mo., the great young mare Easter Girl, a daughter of Randolph King. Easter Girl was the champion two-year-old of Missouri in 1915. She is one of the most beautiful mares in Missouri.

✤ ✤ ✤

Wm. Timmerman, Manning, Iowa, saddle horse breeder, is advertising for sale a splendid young stallion by his good son of Rex McDonald, Timmies Rex, and out of Mildred Barton 8860, by Bourbon King. Mildred Barton was a great show mare and has produced some splendid foals. The colt advertised by Mr. Timmerman is a model, is the ideal type and is one of the most beautiful stallions living. He is beautifully gaited for a colt and has extreme action and a splendid way of going.

Dr. E. W. Berg, the well known Minneapolis veterinarian and horseman, reports the purchase from Longview Farm, Lee's Summit, Mo., of a very fine five-gaited saddle mare which he has shipped to his home in Minneapolis.

✤ ✤ ✤

Dr. P. H. Gregory, of St. Charles, Mo., has purchased a fine farm near the suburbs southeast of Mexico, Mo. Dr. Gregory, who is a noted veterinary surgeon and a breeder of purebred Jersey cattle and Poland-China hogs, will move to the farm soon. Dr. Gregory will stock the farm with purebred cattle and swine and will carry on an extensive breeding business. He is a well known saddle horse breeder and at present owns some very high class youngsters and some splendid brood mares.

✤ ✤ ✤

S. J. Miller, wealthy stockman of Kirksville, Mo., was seriously injured in a big fire at Kirksville last week, and his condition is considered critical. Mr. Miller is one of Missouri's most extensive breeders and dealers in horses and jacks and for many years has been a prominent importer of Percherons, having brought many noted horses to America. He also owns a magnificent collection of saddle horses. Mr. Miller has a host of friends throughout the country where he has exhibited and judged at horse shows who will regret to learn of his injury.

✤ ✤ ✤

Ever since the Sage of Winchester, Col. Geo. J. Peak of Winchester, Ill., announced his retirement from the show ring, horsemen in every section of the country who have known him and his invincible stable of roadsters have been keenly interested in the outcome of the Chicago sale ,where they were dispersed. Joe T. Harris of Columbia, Mo., owner of the champions, Peter Pan and Prince Albert, offered the last bid on John D. 2:15½ and got him at $725; Jack O'Brien & Son, Chicago, getting the clever gelding Tommy Piper at $900; and Hans Berg of Milwaukee got The Semifore for $200.

✤ ✤ ✤

Langhorne Tabb Anderson, of Maysville, Ky., owner of the Point-au-View Farms, has made several sales of three and five gaited horses since the first of April. Every one sold was up to the well known and now always expected Anderson standard of excellence and sold for the big prices that sort always command. Notable among the sales was the heavy weight three gaited gelding, Sport King, purchased by Myron H. Oppenheim, of New York, for $2,000. Mr. Anderson says Lillian Terry, the young mare he purchased from Jump Cauthorn in January, promises to equal the brilliancy of her illustrious full brother, The Intelligencer.

✤ ✤ ✤

L. B. Barnett, more familiarly known as "Splint" and famous as the exhibitor of such horses as Rex McDonald, Red Bud, Betsy Diamond,, Senator Stone, Astral King and Marshall Chief, is training a class of youngsters at the big Lee Bros.' Boulevard stables at Mexico this spring, which will be starred at all the Missouri county fairs and horse shows of the autumn. "Splint" has the reputation of "having the best stable every spring he has ever had" and in speaking of this year's pupils he declares: "Wah-wah-wah! I never had any such a lot of good saddle horses in my whole life; no, sir, no such lot of pupils as I have wah-wah-wah right now."

✤ ✤ ✤

Every saddle horse lover in the country should have one of Jas. Houchin's new Astral King Farm catalogues, which is the most complete statistical and historical sketch ever given of that famous saddle stallion, Astral King. This catalogue gives a complete list of Astral King's show ring winnings and the horses he competed with in every class. Inasmuch as these horses are the most celebrated the world has ever known it makes his phenomenal success all the more glorious. Write Mr. Houchin today, mentioning this free offer, and secure this splendid booklet free and inform yourself of who's who in the show ring and stud of the American Saddle Horse.

✤ ✤ ✤

Longview Farm, Lee's Summit, Mo., the most gorgeously equipped stock farm in the West, is arranging the most extensive show campaign in the farm's existence this season. In addition to the exhibition of the heavy harness and saddle show stable which is under the colors of Miss Loula Long, the farm will exhibit their magnificent herds of Jersey cattle and Duroc hogs, which, by the way, occupy the same distinguished position in their breed as the show horses do in theirs. The saddle horses, which will be shown under the management of John T. Hook, will include these noted stars and youngsters: Chloe Malone, Greta C, Corrine Gassner and Charlie Cherrie, all members of the walk-trot division; Prince of Melbourne, Silver Zizz and a new bay horse they picked up in the "brush" in the gaited gelding events; Maurine Fisher, Martha LaMar, Joan Sawyer and Rexie Dare in the gaited mare events. Rexie Dare is now a three-year-old. She was champion yearling at the P.-P. I. E. and the same year won the Missouri Saddle Horse Futurity, which was given by the Missouri Stockman, at Mexico; Kentucky's Best will be starred in stallion classes, and a two-year-old stallion and filly, yearling stallion and filly and weanling stallion and filly, all of which will, of course, be by My Major Dare or Kentucky's Best. In the big stakes Kentucky's Best, Martha La Mar, Maurine Fisher and Joan Sawyer will all be shown.

Allie Jones, the North Middletown, Ky., breede and dealer, sold the past week to W. J. Twombley of New York, a three-year-old chestnut colt by hi good sire, Bourbon King, out of a daughter of Wil son's King . The horse was shipped to his new owne last Wednesday. He was bought for show purposes

✤ ✤ ✤

A fine colt by Prince Roe, great saddle stallio owned by V. G. Mullikan, Lexington, Ky., has bee foaled on the farm of the Kentucky Experiment Sta tion at Lexington. Prof. Hooper reports that th colt is large, bay in color, and is out of a grand daughter of Chester Dare. The university now ha four head of saddle stock.

✤ ✤ ✤

W. T. Griffey, who is connected with Harbison an Company, bought the past week a good trotting pros pect from Mike Bowerman in a two-year-old brow colt by Manrico out of Fleda F. (3) 2:21, by Morgan Axworthy; second dam Muda S., the dam of the hal mile track champion three-year-old Muda Guy 2:12½ that later reduced her record to 2:09 against tim over the mile track at Lexington.

✤ ✤ ✤

J. W. Atterbury, of Madison, Mo., has sold his fin saddle mare Catherine Countiss to Houchin & Ander son, of Jefferson City, for $1500. Catherine Countis has been a consistent winner in her class in all th big shows in which she has entered. She was firs shown in five-gaited classes but has been converte

✤ ✤ ✤

Louisville, Ky. — General John B. Castleman, o Louisville, was re-elected president and R. H. Lillard secretary at the annual meeting of the American Sad dle Horse Breeders's Association. The association by Dell Holeman, into a three-gaited mare of the highest type and class. Catherine Countiss is a beautiful chestnut with flaxen mare and tail and is a daughter of Grand McDonald.

✤ ✤ ✤

adopted a rule admitting female and gelding prog eny of registered thoroughbred mares, sired by reg istered stallions, to registration. Hon. Matt S. Co hen, State Commissioner of Agriculture, in an ad dress asserted the world is facing the greatest horse famine in its history. He estimated that approxi mately one million fine horses had been sent from the United States to Europe since the war began.

✤ ✤ ✤

It is reported on good authority that owner H. B. Thornberry, of Stockton, has sold his sensational saddle gelding, champion of the Kentucky State Fai and of the P.-P. I. E., to an eastern horseman, who it is said, will put him into immediate training in one of the leading trotting horse drivers' stables o the East.

✤ ✤ ✤

Keel & Son Win at Fort Worth.

At the horse show given in connection with the recent Live Stock Exposition at Fort Worth, Texas V. P. Keel, of Gainsville, Texas, won the lion's share of the prizes. This firm was assisted by the well known exhibitor, Jas. Buford, of Paris, Mo., and in most classes was one, two and three. The saddle stallion class proved another victorious performance for Gallant King, second going to Joe Bailey, a new horse of good class, and Forest Ike was given third. In the mare and gelding event, Gentle Times, a gray mare by Chester Times, was first; Miss Alice, second and May Belle McCann, third. Championship class, Gallant King, first; Joe Bailey, second; Miss Alice, third. Combination class, Gentle Times, first; Forest Ike, second; Joe Bailey, third. Three-gaited class, Gentle Times, first; Alorma Bay, second and T. M. third. In the breeding classes Gallant King won all his shows; Gentle Times, the mare classes, including the championships. The firm of V. P. Keel & Son won 20 first prizes, 18 seconds and 14 thirds. General Gano was the big winner in the harness events. Gallant Girl won second in number of prizes and money. R. P. Sterricker was the judge.

✤ ✤ ✤

Mr. Jos. Hock and Ralph E. Thomas, prominent Chicago business men, this week made their second spring pilgrimage to Missouri and in company with Jas. Buford, the well known Paris horseman, visited Monroe City, Paris, Holliday, Excelsior Springs and Kansas City. At Monroe City they got from Gabe Johnson's stable the beautiful chestnut gelding owned by Buckman Bros., and which is by their noted sire, Bob McDonald. At Holliday they selected from the Blades' stable the handsome stallions, Robert E. Lee and Milan Chief. Both of these horses are well known show horses of the most noted blood lines and perfectly gaited. They were turned over to Mr. Buford at Paris where Robert E. Lee will be gelded and they will be prepared for the personal use of Messrs. Hock and Thomas. They left attractive bids on horses at Paris, Excelsior Springs and Kansas City and it is most likely that they will get two more of the horses inspected. These three horses will be a magnificent addition to the stables of these well known Chicagoans and an added asset to the already famous mounts now becoming so familiar on Chicago bridle paths. In a letter to the Breeder and Sportsman Mr. Thomas stated they wanted more horses but the prices asked and the quality offered were prohibitive. A three-year-old which Mr. Thomas bought at the Lexington sale will be sent to Buford for training this year.

Notes and News

J. H. Dreyer of Ukiah wants the address of Frank Hazzard, formerly a trainer at Dixon.

✤ ✤ ✤

Bon Voyage 2:08¾ was sold at the Chicago March Auction and was bought for $475. The purchaser was Mr. C. Murby of Stratford, Ontario.

✤ ✤ ✤

George Ryan's stable at Pleasanton is attracting more attention than any other stable in the state at this time. Mr. Ryan is working a grand lot of colts and has some regular whizzes in the stable.

✤ ✤ ✤

Ventura's fair, September 26 to 29 inclusively, will be the biggest and best the association has ever conducted, says secretary Hathaway, who is busy arranging his classification and purses.

✤ ✤ ✤

The Kern County Agricultural Fair Association will hold its annual meeting for the election of officers for the coming Kern County Fair on Saturday, April 28th, at 10:30 a. m.

✤ ✤ ✤

J. Janson Jr. has a full line of new horse goods and invites the inspection of horsemen of his attractive stock at Pleasanton, Cal. Mr. Janson keeps his stock up at all times and horsemen looking for up-to-date equipment will not be disappointed if they visit his establishment.

✤ ✤ ✤

Wilbur Lou 2:10¼, the head of the magnificent stud at the Hemet Stock Farm, should attract the best bred race mares in the state. This young horse's services are most reasonable and the Hemet Stock Farm accommodations are unequaled in California. Mares sent there will receive the best of attention and treatment, whether they are there for one month or the entire year.

✤ ✤ ✤

A telegram received this morning from T. D. Shaughnessy, Secretary of the Arizona State Fair, announces nineteen days of running races under the pari-mutuel system at Phoenix on the State Fair race track, commencing April 30. Four hundred horses are going from Tia Juana. They are also planning a fall meeting commencing fair week, Nov. 12 and continuing until Christmas.

✤ ✤ ✤

The fact pacing mare, Miss Cappy 2:07¾, daughter of McElroberts, a good breeding son of Robert McGregor 2:17½, was bought the past week by the Louisville trotting horse fancier, J. E. Dawkins, from the Pine Tree Stable, Lewiston, Maine. The interests of the matter were looked after by John W. Engleman acting for Mr. Dawkins, and Ken Walker, secretary of the Kentucky Sales C., for the Maine aggregation.

✤ ✤ ✤

An effort should be made to give a fair at Stockton. The track is one of the best in the country and the location is ideal. The live stock of that vicinity is the best in the West and the breeders are anxious to have a big fair. If the business men of Stockton could be made to understand what a great fair they could have this year by giving a big race meeting in connection with a big live stock fair, they probably would get behind the movement and assure another big meeting for California this year.

✤ ✤ ✤

H. G. Cox ,of Forest Grove, Ore., is working his good mare Hazel Patch and expects to race her this year. She is very fast and is working around 2:06 at the present time. He is also working his good mare Lady Hal 2:05¼ and reports her faster than ever. She is being worked without the straps and is going good. Lady Hal is a real race mare and will undoubtedly be a winner this year. Mr. Cox writes he probably will race in Nebraska or Dakota this year and expects to ship there about June 1.

✤ ✤ ✤

In a letter received from W. H. Nesmith of Humphreys, Mo., he states that King Lily Pointer 2:14, Happy Clay 2:29, Embro Clay and Queen Pointer have wintered fine and will be in good condition for racing this year. He thinks King Lily Pointer will get a record close to two minutes this season as he has been a mile in 2:07, half in 1:01 and a quarter in 28 seconds last year on a half mile track. His dam, Lily S. by Direct, is also the dam of Zomrect who took a record of 2:03¾ at the trotting gait last year. King Lilly Pointer was bred by C. L. DeRyder at Pleasanton, Cal.

✤ ✤ ✤

The well known trainer, Charles Guion, of North Yakima, Wash., went to Baker, Ore., last week and brought back the black trotter Amy McKinney 2:19¼, who upon the arrival at Yakima was very sick with lung fever and died a few days after arrival. She was owned by A. A. Fiddler of Haines, Oregon, and was sired by Captain McKinney, son of McKinney 2:11¼. Her dam, Amy May, was by Alexis, son of William L. She was to have been trained and raced by Mr. Guion this year and she makes a big vacancy in his good stable. He is now looking for a good trotter to replace her.

The nineteen-day race meeting scheduled to open at Reno, Nev., on June 19 has been called off. Lee Rose, who was to manage and be presiding judge at the races, arrived in San Francisco Thursday and gave out the announcement that, due to a shortage of horses, the meeting will not be held. Plans are now under consideration for twenty-five days of the sport to be conducted at Reno in September. At that time the Reno promoters expect to attract many horses that will be on their way to Tia Juana.

✤ ✤ ✤

Racing in the United States will not be affected materially unless the war situation becomes serious. This is the opinion of local horsemen and those in the East(who are going ahead with the program of meets that have been booked. The cases of England, Germany, Russia, Canada and Australia, countries that have been in the European conflict, are cited to show that the turf sport has been running along. In Europe the races have materially been curtailed, but Canada and Australia have been promoting meets on the same extensive scale as existed before the war. The authorities permit races, as they assist in the war operations. Extra taxes are imposed ,and the turf sport has the additional benefit of stimulating the breeding industry and furnishing remounts for the cavalry.

✤ ✤ ✤

A meeting was held recently in the city hall at Salinas by the Salinas Valley Fair and Racing Association, and officers were elected for the ensuing year.

The race meet will be held the second week in July and the best trotters and pacers in the state will take part. In conjunction with the meet there will be a blooded stock show in which the prize livestock of every description will be shown.

The officers elected were: C. Z. Hebert, president; C. A. Storm, vice-president; R. A. Stirling, treasurer; James Anderson, secretary.

The directors are: S. N. Matthews, C. Z. Hebert, Henry Struve, Ross Nissen, R. Garside, C. A. Storm, R. A. Stirling, J. A. Trescony, F. McFadden and J. B. Stirling.

✤ ✤ ✤

President James W. Coffroth of the Lower California Jockey Club will arrive in San Francisco the latter part of this week and will have announcements to make for another meeting at Tijuana to start on Thanksgiving day. Leon Wing, an official of the Jockey Club, declares that horses from all over the country will come out to participate in the sport.

During the meeting just closed there were never less than 600 horses at the course, reports Wing, and the number will be increased for the coming events. President Coffroth is going to exercise more care, however, in making reservations for stable accommodations, so that the suspicious owners will be barred out with their strings.

"Tijuana has been established as the racing center of the West now," declares Wing, "and the sport will improve as the years go by. The people of San Diego and Coronado have taken a fancy to the races, and the attendance during the 125 days was remarkable. On the last day there were over 28,000 present, which gives you an idea of the interest that is being attracted."

✤ ✤ ✤

Cricket, the first pacing mare that ever took a record of 2:10 and who afterwards developed into a wonderful producinng dam, when relegated to the stud, died on March 24 at the age of thirty-two years. She was bred by the late H. W. Meek of San Leandro and was owned by him all during his lifetime and afterwards by his estate. She was foaled in 1885 and made her first appearance in public as a three-year-old in 1888. She was raced successfully both in California and down the Grand Circuit for two years, and finally took her record of 2:10 at Independence, Iowa, in 1890. This was her most successful year on the turf, winning ten out of twelve races and breaking three world's records. She was then retired to the stud where she produced eighteen foals, nine of which took standard records. The fastest of her get are Coleen 2:05¼ by Charley D. and Bold Harry Aerolite 2:07¼ by Aerolite G. Another of her sons, Wm. Harold 2:13¼ by Sidney, is the sire of nine performers including the trotter Janice 2:08¾ and the pacers Frannk N. 2:07½ and The Iceman 2:10, while one of his daughters is the dam of Harold Welcome 2:08¼.

✤ ✤ ✤

News From Forest Grove.

"I want to tell you about Hal Paxton's only living colt," writes Fred Woodcock, the well known horse lover and breeder of Forest Grove, Oregon. "He was foaled April 27, 1916. I was driving him when he was seven months and the tenth time hitched he could pace a forty gait. I have only hitched him once since then and then to show him. George Swisher, H. G. Cox, Charlie Flanders and the Merrill Bros. all have seen him perform and their verdict is that if he is a fair sample of the kind of horses Hal Paxton sires, he will beat his sire in many ways. Captain Mack has wintered fine. Paxton is going sound and I look for him to be troublesome to the ten-class pacers this year. Lady Hal and Hazel Patchen are working fine for owner Cox. Geo. Swisher has Cavalier Gale, having leased him from the owner . He will train at Myrtle Point, Ore., this year. Bessie L. is in foal to Cavalier Gale. Lou Miller and Lady Julia, the dam of Lady Hal 2:05¼, are both in foal to Captain Mack 2:10¼."

IT'S A LONG WAYS FROM WALNUT HALL TO SALMON, IDAHO.

[By C. A. Harrison.]

When I hear of or see a new man in the harness horse business I always feel like shouting, because every once in a while we meet or hear of some sore head who probably is more often called and certainly more familiarly known as a knocker. I believe as a noted Alaskan, Black Sullivan, believed and once told Theodore Roosevelt, that a booster was worth twenty dollars a night to his gambling house while a "knocker" was a detriment to the whole universe. This certainly applies to the harness horse business.

One of the new men in the game in this great West is Mr. George W. Oliver, of Salmon, Idaho. Where is Salmon, Idaho?—well, it's a long ways from Walnut Hall. Salmon is 200 miles southwest of Butte, Montana, on a privately owned railroad. Trains run from Armstead, Mont., to Salmon three times every week. This town is in the center of the great Idaho cow country and Mr. Oliver is the owner of a large cattle ranch. People are scarce and good cows and fat steers are most plentiful.

Mr. Oliver, being a former New York rider and crack amateur driver, is a genuine lover of the Standard bred horse and he has on his big ranch a few choicely bred mares; some with fast records, which he drove in New York. With the brood mares Mr. Oliver brought from New York, a stallion which I believe is beyond any question one of the most fashionably bred ones ever brought west of the Missouri river.

This horse is Mannister 51735, a five-year-old son of Walnut Hall 2:08¼, sire of the wondrous race horse The Harvester 2:01. Mannister's dam is one of the most prized matrons, May Rosa, by Moko; second dam the good producing mare, Mary Sprague, by Governor Sprague, the sire of Rosa Sprague, dam of the great sire and race horse McKinney! 3rd dam by Edwin Forest 49; 4th dam Bayadere, by Bay Chief. Mannister is a stallion of superb conformation and is formed like a breeding stallion should be. He stands up on his legs like a model, is 16 hands high, weighs 1,100 pounds and is a glorious brown without a white hair on him. In disposition and manners ,Mannister is a perfect gentleman; his feet and legs are like finely chiseled black marble and no defects of any sort are in sight. This grand stallion is a real trotter, as his royal breeding indicates. While he has never been trained regularly he has been a mile in 2:14, and the way he can pick them up and set them down again is good enough to warm the heart of any horseman who knows and loves a perfect trotter.

As I said at first, it's a long ways from Walnut Hall to Salmon, Idaho; but I have found elegantly bred trotting horses in many out-of-the-way places and I do not recall of having ever seen a more inconveniently located place for as well founded an establishment of Harness horses as the Oliver Rancho, at Salmon, Idaho. However, I congratulate owner Oliver on his enterprise and in owning such horses, and the great Northwest in attracting him to this country.

✤ ✤ ✤

The California Breeders 'Sales Company, which maintains offices at Sacramento, has conducted some exceptionally successful stock sales in the West recently and are now active in the promotion of several others of great importance which will be conducted in the next few weeks. C. L. Hughes, the assistant secretary of the company, is the sales manager and much of the success of the concern has been brought about through his splendid efforts. Other officers of the company are: J. M. Henderson, Jr., president; A. A. Merkley, vice-president; Fred W. Kiesel, treasurer, and Frank L. Morris, secretary. They constitute the strongest and most complete sales company in the West and make a specialty of dispersal and annual live stock sales.

✤ ✤ ✤

Geo. W. Oliver, of Salmon, Idaho, announces in this issue that he must sell his grandly bred stallion, Mannister 51735, at once. Mr. Oliver lives in a country where the horse is unappreciated and where there is not a possibility of his being of any service to the breed and of any income to his owner. He is right to go on and make a good season and race this year, and in the right hands will undoubtedly prove a winner. Last season with 40 days jogging he was taken to the Montana State Fair, at Helena, and won second and third money in two starts. The same week he was given a heat record of 2:22, stepping the last quarter in thirty-two and one-half seconds. He is a sure foal getter and a bull-dogger of a race horse. He should be retained in the West and given every opportunity in the stud and in his speed development. An article by C. A. Harrison appears in another column of this issue, which gives that well known authority's opinion of him. Mr. Harrison's article was printed before the advertisement was received and is his honest opinion of this good horse. Write Mr. Oliver, at Salmon, Idaho, mentioning this paper if interested.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

✦ ✦ ✦

Revive Dog Racing.—New York.—There's to be a revival of the old English sport of dog racing on Long Island this spring. A lot of forty whippets, some from the kennels of Lady Decies, the daughter of George J. Gould, are now on the way to this country consigned to James C. Cooley, polo manager of the Meadowbrook club, and now acting in a similar capacity at the Aiken, S. C., Polo Club. He already has found new owners for nearly all of the fleet little dogs among residents near the Meadowbrook club, and the first race will be on its polo fields.

Two hundred yards is the orthodox distance for a dog race, which is just two-thirds the length of a regulation size polo field, and there are stretches of suitable turf overlooked by the verandas of every golf or country club that will furnish courses for the flying little greyhounds.

The American Kennel Club has no rule that governs dog racing. Yet the sport has been popular in the United States for many years. More than one British mechanic coming to this country as an immigrant has brought in a whippet or two with his luggage, and they have kept up the racing near Providence, R. I., Fall River, Mass., and Paterson, Passaic, and Newark, N. J., or wherever weavers of silk and cotton millhands have settled.

H. L. Herbert, chairman of the Polo Association, believes the experiment will meet with success. "I have heard of the Meadowbrook importation of whippets," said Mr. Herbert, "and from what I have seen of dog racing on my trips to England I often wondered why it has not been introduced at our country clubs. The polo fields would be fine courses and an attractive point is that there is no element of cruelty in the sport."

Salt Lake Club.—Gunsters from Idaho, Montana, Colorado, Wyoming and Utah flocked to the Salt Lake Gun Club traps to participate in the first of three state registered tournaments which the scattergun artists of Utah arranged on April 1.

In class A. H. S. Mills and A. P. Bigelow tied for the high general average with scores of 141 out of 150. To decide the rightful titleholder of the trophy for this class it was necessary to hold a shoot-off. Mills won, making a perfect string of twenty, while Bigelow dropped two birds in the race.

H. W. Heagren and C. L. Bray tied for honors in the class B race. Both broke 127 out of a possible 150. It was then necessary to stage a twenty-bird shoot-off in order to decide the winner of the class trophy. There was much enthusiasm aroused during this event, as competition between the two contestants was very keen. It proved a fight to the last, bringing Bray out at the long end of the string with a score of 20 to Heagren's 18 out of 20.

Perhaps the most interesting event was the one in which C. H. Reilley, Jr., challenged and defeated L. E. Riter for the State Association challenge trophy.

E. B. Heagren won the fifth leg on the handicap loving cup which is being so keenly contested at the club. The scores:

Mills 144, Bigelow 141, *Hood 139, Riter 138, Nelson 137, Moffat -35, Smith 135, Bishop 134, Reilley 134, Mitchell 134, *McGanney 134, Welch 131, Siddoway 128, H. W. Heagren 127, *Anderson 125, Luff 125, Bain 124, Humphrey 123, Bray 123, Fisher 122 Ruttle 122, Fowler 117, Stoney 108, Ackerman 98, Hudson 90, Smoot 74, J. F. Cowan 72x90, Heppler 44x75, Gallagher 43x60, E. B. Heagren 42x50, W. D. Anderson 34x50, R. Heagren 31x50, S. Fowler 31x50, C. Mitcheli 26x50, Orlob 23x50, Spry 19x25, Baldwin 18x25, Seydell 11x25, Brown 8x25. *Professionals.

Fish in Inyo County.—The fifth installment of the fish fry data as compiled by Robert Paulsen gives the complete distribution in Inyo county. They are:

Distribution of black spotted trout—Haiwee reservoir 14,500.

Loch Leven trout—Bishop creek, south fork, 7,000, Big Pine creek 8,000, Lubken 3,000, Tuttle creek 5,000, Lone Pine creek 2 500, Olancha creek 5,000, Shepherds creek 3,000, Walker creek 1,500, Oloncha creek 2,000.

Eastern brook trout—Bishop creek, north fork, 11,500, Big Pine 8,500, Lubken 5,000, Tuttle 3,000, Lone Pine 5,500, Mirror Lake 5,000, Consultation Lake 7,000, Headwaters of Lone Pine 5,000, Olancha 6,000, Shepherds 4,500, Thieban creek 3,000, Lake at head of south fork of Oak creek 5,000, Walker creek 1,000, Olancha 2,000, Goodale 1,500, Taboose 2,500.

Rainbow trout—Bishop creek at Andrews Camp, 6,000, Tinemaha 4,000, Big Piine 4,000, Syma creek 6,000, Charles creek 2,000, Little Onion Valley, south fork of Oak creek 3,000, Goodale 2,000, Taboose 2,000.

Due notice is hereby served to trout in the streams of Utah and Idaho to beware of one W. H. "Harry" Shearman ,erstwhile member of the city commission of Salt Lake and prospective banker of Ogden. Said Mr. Shearman has long been a disciple of Izaak Walton, but now he will be more so. The reason is the presentation to Mr. Shearman by the employes of the water works department of a "Hardy" fly rod. The rod is the finest that could be purchased in Salt Lake. Made in England and the exact duplicate of one used by King George V. when the king can find time to go fishing. The rod weighs 6¾ ounces and is 10 feet long.

Rod and Gun Clubs.—Up in Sherman county, Ore., there have recently been organized three rod and gun clubs which bid fair to stir up considerable interest in the preservation and propagation of game in the State of Oregon.

C. L. Ireland ,editor of the Sherman County Observer, Moro, is actively interested in the subject and particularly in the game clubs.

A ninnovation in the form of a shooting contest among the three clubs was staged not long ago. The losing club paid the penalty by chartering a moving picture show for the day. Everyone was a welcome guest.

In the evening state and district fish and game officials attended a smoker given in their honor by the club members.

ALL READY FOR TROUT SEASON.

Streams Reported in Good Condition For the Big Opening, on May 1st.

All streams up and down the coast are reported to be in excellent condition for the opening of the trout season on May 1st. There is just a little more water than is wanted when the fly fisherman casts his lures over the riffles and into the pools. That means that when the season opens the water will be right for the fly caster, with his patient willingness to work for his creelful. The salmon egg fisherman, whose joy is to beat a single pool or lagoon until he has cleaned it of fish or until he has his legal limit, may not be so favored.

If the present month continues dry there may be the same wail that went up at the opening of last season—that there are no trout. When the streams get too low the trout of the coast streams, being steelhead, follow the inclination of their kind and drop out of the creeks and into the ocean. The migrating schools will take with them the best of the fish—the big fellows, the one pounders and the lively half pounders. The fingerlings, of course, remain, to be cursed by the sportsmen and killed and creeled by the "plumpers."

It is agreed among all the anglers that a week of rain will be a blessing on the land and the streams that cut through it. Some even declare that three days of light rainfall will do the trick.

As to the mountain waters, they will take care of themselves. Unusually heavy snows have fallen all winter and have barely begun to thaw. News of a recent heavy fall of snow has been received from Mount Shasta.

Apparently California's anglers are both observant and well behaved, for nary a one has fallen into the clutches of the law for fishing since April 1—so far as can be learned from the reports of the game commission's deputies. This, in view of the general belief prevalent some time ago that the early opening would be had this year, shows that the publicity scattered statewide by the commission to protect the anglers has had its effect.

Be the fishing good or poor in May, the fishermen are a patient lot. They whip five miles of a stream for a limit of trout, and they can wait a year for better conditions. None of them will forget that in 1918 the trout season will open April 1.

Long Run Trophies—The Du Pont Long Run Trophy proposition which proved so popular among trapshooters during 1915 and 1916 will be continued this year with a few minor changes. During the operation of our plan in 1917 an attractive watch fob will be awarded to amateur and professional trapshooters for their first straight run of 50 targets or over. For each additional run of 50 or over the shooter will receive a bar for attachment to his fob, the width of the bar dependent upon the length of his run. When an amateur has made 15 runs of 50 or better he is awarded a standard, open-face, 17-jeweled watch with a 25-year guaranteed case, either lady's or gentleman's model. A professional is required to make 25 long runs in order to win one of these trophies.

As soon as a shooter has made a sufficient number of runs to win a watch, he may start competing for another. It should be understood, however, that the Long Run Trophy winner has the privilege of taking merchandise to the value of $20 instead of the second or third watch which he may win.

During 1917 instead of awarding the shooter a second Long Run Trophy Fob for his sixteenth run, he will be given a pair of appropriate and attractive cuff links. Should he make a sufficient number of long runs this year to entitle him to a third fob, he will be sent a handsome scarf pin instead of another fob. A bar will also be sent to the shooter in addition to the cuff links or scarf pin for attachment to his first fob. If a shooter has won one or more fobs during 1915 and 1916, he will not be awarded another one in 1917. Cuff links will be sent him instead of the first fob he wins this year, and a scarf pin in lieu of the second. This ruling applies to amateurs and professionals alike.

It is understood of course that all runs in order to count must be made in Registered Tournaments and by shooters using DuPont, Ballistite, Schultze or Empire Powder. The DuPont Powder Company feels sure that their 1917 Long Run Trophy proposition will appeal to the trapshooters and that they will avail themselves of the opportunity to win these attractive trophies.

Trophies For Local Shooters.—Notification was received from the American Amateur Trapshooters' Association that W. A. Joslyn, C. A. Haight and Owen N. Jones, professionals, of the Golden Gate Gun Club of San Francisco, had qualified for the 75-per cent proficiency medal for ten certified scores of 38x50 or better.

Joslyn broke 452 out of 500 targets, for the average of 90.4 per cent; Haight broke 446 out of 500, for an average of 89.2 per cent, and Jones broke 428 out of 500 for an average of 85.6 per cent.

The medals are the first of a series of five to be awarded by the A. A. T. A. to amateurs and professionals on the basis of percentages, which represent official recognition of proficiency at the traps.

GOLDEN GATE REGISTERED SHOOT.

O. N. Ford Is High with Toney Prior Second in Trophy Events; Many High Scores.

Fifty-eight shooters turned out on Sunday for the registered tournament of the Golden Gate Club on the Alameda grounds. O. N. Ford emerged winner with a score of 98 out of 100 in the trophy events It was a day of high scores and keen competition for the honors.

Toney Prior and Barney Worthen tied for second place in the trophy events with 96. Others who won trophies were: Ted Handman 94, Dr. R. N. Fuller 94, H. Lorenson 93, Dr. Topham 92, A. G. Flickinger 92, H. A. Ray 92, F. Stall 91 and H. McLachlan 91. Fred Willett topped the professionals with 96 and Len Hawxhurst was a close second with 94.

In the money events, 97x100 scores were turned in by O. N. Ford, Dr. R. N. Fuller and O. N. Jones, the last named a professional. Five gunners were only one bird behind, they being H. Lorenson, Tom Wilkes, Fred Willett, Dick Reed and Len Hawxhurst. Frederick K. Burnham was there with a 95. It was some contest. "Onion" Jones, the young professional, banged the first four frames of twenty each without a miss and had a high run of 87. The scores were as follows:

Shooters.	Trophy Events. 20	20	20	20	20	Tl	Money Events. 20	20	20	20	20	Tl

Football and Trapshooting—I know of no sport that is growing with such rapid strides in the favor of college men as is trapshooting. The sport has become a recognized means of intercollegiate competition and that means that it is on the high road to more complete recognition.

It's only natural that this should be the case. Trap shooting has long been one of my favorite sports, and naturally I can speak with authority on the subject. Every college not only has its trap shooting team now, but has dozens of young men who follow the sport in odd hours at the local gun clubs. In addition to this trap shooting is now becoming the recognized pastime for college graduates and athletes whose active days on the gridiron, diamond or track are over.

Trap shooting has proved a boon to the college man. There's a peculiar reason for this, one that has not generally been noted. More than half of the students coming into the colleges in the big cities nowadays come from small towns and the farming sections. Invariably their boyhood days have been passed with guns in their hands.

In the past when they have left their homes for a four-year period in college they have been forced to lay aside their guns. The only time they are home in the four years is the summer months when there is no hunting.

Now trapshooting has changed all this. The college boy now takes his gun to college, secure in the knowledge that the college will have a gun club, where he can get recreation and do something for his college, or he can compete at least once every week at one of the gun clubs located in and about the city where his college is situated.

Naturally, the prevalence and rapid increase of trap shooting in the colleges has raised the physical and mental standard of the students, for they have improved in general condition, have developed clearer minds, quicker eyes, and more sound nerves than they ever had before. In fact, I'm the strongest kind of a booster for trap shooting in the colleges.—[By Robert C. Folwell, Head Football Coach, University of Pennsylvania.

About Famous Sporting People.—For many weeks baseball fans have been reading and talking about the salaries that the big fellows of the game were going t oget during the coming season.

One star in particular caused extra comment, that was Grover Cleveland Alexander. He being the National League's best, he thought he was worth more than last year's salary, so held out for $15.000. He finally compromised on $12,000. The period of waiting, together with its many conferences, was surely one of suspense, and naturally his nerves were somewhat unstrung. After he had affixed his signature to a two-year contract he no doubt felt that a big load had been lifted from his shoulders, and made plans for recreation. His first enjoyment was a trip to the Beideman Gun Club of Camden, N. J., of which many prominent Philadelphians are members, where he demonstrated his ability as a trapshooter, and got in trim for a hunting and fishing trip he was to take with Pat Moran. Aleck handles a gun as well as he does a baseball and his scores at the traps equal the majority of shooters. He can hardly be classed as the "only one," however, for many other baseball stars are trapshooting enthusiasts. Among them are Chief Bender, Frank Baker, Ty Cobb, Joe Jackson, Wilbert Robinson, Hans Wagner, Christy Mathewson, Harry Davis, Tris Speaker, Bob Shawkey, Eddie Collins, Joe Bush, Doc. Crandall, Walter Johnson, Jack Coombs, Gabby Cravath, Eddie Plank, Bill Killefer, Bill Carrigan and many other notables.

Another famous sportsman is Capt. Jack Wulf, amateur champion trapshooter of America. The captain shoots for the pure love of the sport and he can always give an interesting talk on his trapshooting experiences. He is a bachelor and while not a multimillionaire is wealthy. Of course in these high cost of living days, the average married man hasn't much chance to get any more than he needs, which fact gives Capt. "Jack" a handicap.

He has hit the fifty-five year mark of life and is still a specimen of health and vigor, thus casting aside Dr. Osler's idea that a man is worthless after he has passed the two-score line. He attributes his condition to the hours he has spent in the open. Trapshooting has given him confidence, assurance, and above all else, a rugged constitution. He would not trade his lot with John D. Rockefeller. He doesn't have to, for that matter.

While not a tight-wad, he admits that the cost of trapshooting is an item. But, he argues, isn't it far better to be out of doors, engaging in a healthy, fascinating sport at a cost of a few dollars here and there, than to mope around cafes, restaurants and cabarets at an equal or greater expenditure? This is his argument and it certainly appears to be a sound one. If trapshooting man make one feel well and strong and eager to battle his way through the world, isn't it greatly preferable than to have riches heaped upon you and get your only pleasure in the sordid amusement of the theatre and cabaret? There are other things in this world besides money, and as Capt. "Jack" 'says, he would rather have his health than every dollar he possesses. After all, when you come to think it over, it is health, not riches, that brings happiness.

Picnic For Anglers—All of a hundred anglers and their wives and friends are expected to take part in the California Anglers' Association annual outing to be held Sunday, April 15, at Moss Beach. While the use of their time will naturally be at the disposition of those who take part in the picnic, those who want the real spirit of the outing will fish.

Drop line angling and surf casting will be the order of the day and the valuable prizes will be presented for the biggest fish and for the best baskets. Committee chairman J. V. Jervis is rounding out the plans for the event.

Seattle Association.—Owing to April 1st being the opening of the game fish season in the state, only a few shooters turned out and shot through a program that was featured by the erratic targets that the gusty wind furnished on this date. Hugh Fleming and C. L. Templeton furnished the high scores in the fifty-target race, they both going forty-eight. Fred Landwehr took second with forty-four. Fleming also furnished the high score in the hundred target event by going ninety-six, Fred Landwehr taking second here also with eighty-nine.

The Seattle Trapshooters' Association as well as other clubs of the locality are planning a strong invasion of Tacoma on April 22, the occasion being the second shoot of the Northwest Washington Trapshooters' League, a registered shoot. The scores:

At 50 Targets—C. L. Templeton 48, Hugh Fleming 48, Fred Landwehr 44, Ralph Kinzer 42, Wm. P. Anderson 40, Jack Lewis 38, W. B. Taft 38, C. F. Reinhard 28.

At 100 Targets—Hugh Fleming 96, Fred Landwehr 89, Ralph Kinzer 85, Jack Lewis 81, C. F. Reinhard 53.

Yours, E. A. FRY, Sec'y.

Shoot at Calexico.—Breeder and Sportsman: A newly organized gun club known as the New River Gun Club opened its grounds at Calexico, Cal., April 1st, with a membership of nineteen, and the officers are as follows: President, J. E. Stockdale; vice-president, J. G. Scott; secretary and manager, J. T. Downs.

The grounds are located in the edge of a eucalyptus grove with southern exposure, giving a perfect skylight bird above the mountains in Mexico, about forty miles distant. We are enclosing the official scores of both weeks' shoots and ask you to publish the two, in order to see the remarkable improvement made.

In another week we will be able to start shootinig in classes A, B and C, and if you care to notify any companies that are in the habit of furnishing trophies for beginners we will appreciate it. Our shoots are conducted according to the rules of the Interstate Association.

As I have shot in registered tournaments, I will not expect to compete for them. Have been a reader of your paper for the past four years.

Please address any communications to either J. E. Stockdale or J. T. Downs, Box 112, Calexico, Cal.

Very truly yours,

J. T. DOWNS.

P. S.—Please let me know who the president of the California-Nevada Trapshooters' Association is, as we hope to be registered with them.

[Editor's Note.—G. H. Anderson of San Jose is president of the association. Clarence A. Haight, Chronicle Building, S. F., is secretary, and the man to get into communication with.]

The scores, April 1—J. T. Downs 93x100, J. E. Stockdale 54x100, J. A. Hoblet 55x65, E. C. Stevens 30x50, T .B. Owens 24x40, S. C. Blackman 15x30, A. C. Baskin 14x30, C. M. Higgins 19x25, N. O. Emert 19x25, Ray Bomers 15x25, H. A. Jarvis 10x25, O. E. Campbell 14x20, J. G. Scott 4x20. Visitors: Geo. Dixon 42x50, A. B. Cravath 34x50, O. C. Harris 27x50, W. L. Hefner 26x50, W. L. Wright 25x50, O. L. Peterson 14x25.

Calexico, Cal., April 8.

Left Handed Shooters.—Through the article recently published about left-handed trapshooters my attention has been called to a squad of left-handed trapshooters that seldom missed a trapshooting tournament in the Missouri Valley ten or a dozen years ago. This squad remained intact for two years, and in that time did not suffer a defeat.

The slogan at all the shoots was, "Let's get up a squad to trim the southpaws." Many tried; none succeeded. The southpaws were willing to engage any squad in competition.

This squad was composed of Frank C. Riehl, Geo. L. Carter, Billy Heer, Martin Diefenderfer, as regulars, and the pick of one of the number of southpaws that usually attended the shoots. Riehl and Heer were professionals in those days, and still are. Carter, an amateur then, is a professional now. Riehl is the secretary of the Pacific Coast Indians. Heer compiled the greatest average of any trapshooter until Homer Clark put up new figures in 1916. Diefenderfer won the Grand American Handicap in Kansas City in 1903—making three southpaws who won the G. A. H. Because of ear trouble, Diefender stopped shooting several years ago.

Trade Notes.—One trapshooter is making himself more and more prominent among the headliners in the sport,—B. F. McMahon of the New York Athletic Club. Mr. McMahon struck his gait at Lakewood last week when he carried off the initial "Maplewood Hundred," scoring 99x100 with Nitro Clubs against ninety shooters. The Maplewood Hundred event will probably be an annual feature hereafter and Mr. McMahon has established a high standard for future contestants.

In 1914, in England, Scotland and Wales, nearly 2,000,000 licenses for dogs were issued. This brought i na revenue to Great Britain in taxes of nearly $4,000,000, which shows what a neat little share the dog takes in the support of the government.

L. J. Petit, of Milwaukee, Wis., who has been sojourning in the Golden West for a number of weeks, and has been a frequent attendant at the Los Angeles traps, did a very handsome thing when he presented the club with two beautiful engraved silver loving cups as prizes for the ladies who had been competing in the John Cline trophy events. To put the club still more in his debt two boxes of American Beauty roses accompanied the gifts.

Sportsmen's Row

Iowa has set aside 400,000 acres for game reservations. and North Dakota has three game refugee farms comprising 3480 acres.

✣ ✣ ✣

G. C. Henry of Porterville, Cal., is offering for sale a pedigreed Irish Setter of the St. Cloud stock. The Pointer pups are from the best stock in the West and sportsmen are advised to investigate if seeking a good hunting dog.

✣ ✣ ✣

In a recent shoot of the Hot Air Club, of Philadelphia, Chief Bender broke 239 out of 250 targets; Grover Cleveland Alexander, 130; Joe Bush, 127; Billy Killifer, 125 ,and Izzy Hoffman, 115. It was a ball players' squad.

✣ ✣ ✣

The Masters of Foxhounds Association in England has offered to slaughter a large proportion of the hounds in order to prevent it being suggested that any food which might be used for human beings was being taken in any large quantity for the dogs.

✣ ✣ ✣

Preparedness is the watchword of the trapshooter these days. He is preparing for the great spring drive. The list of registered tournaments has been announced by the Interstate Association, some 500, and the trusty gun is getting its annual overhauling.

✣ ✣ ✣

The sportsmen of Nebraska claim that not in twenty years has there been such an enormous flight of wild fowl in that state as has been seen this spring, which certainly is good news for every man who at the proper season of the year enjoys a few days' duck and goose shooting. With the number of birds that have gone north this spring, if there is a favorable breeding season, there should be a great flight of birds south next autumn.

✣ ✣ ✣

Dr. J. A. Henshall, after twenty-six years of continuous service, has resigned from the United States Bureau of Fisheries, owing to failure of his eyesight, and has moved from Tupelo, Miss., station to Cincinnati, Ohio, where he will make his future residence. Every fisherman knows Dr. Henshall, not only as the author of the Book of the Black Bass, but for the good work he has done in the federal government fisheries service for more than a quarter of a century.

✣ ✣ ✣

A. E. Burghduff was elected president of the Multnomah Anglers' Club of Portland, Oregon, at the annual meeting held March 23. John Gill was chosen vice-president, Walter F. Backus was re-elected secretary and John Joyce, A. K. Downs and R. W. Price were added to the executive committee. William Umbdenstoc and Will C. Block were re-elected as members of the executive committee. The meeting was well attended and the anglers are looking forward to a great year.

✣ ✣ ✣

The 1917 program of the San Francisco Flycasting Club, compiled by Secretary Paul Shattuck, has just been issued. The schedule calls for an informal opening Saturday, April 28, with the real opening ceremonies the following day. On every alternate Saturday and Sunday until October 7 the local exponents of the gentle are will be at their casting grounds on Stow Lake, in Golden Gate Park. The arrangement of the program has been excellently handled, calling for a neat mixture of the various casting and team events.

✣ ✣ ✣

The Tule River Hunting and Fishing Association has elected the following officers for the ensuing year: V. D. Knupp, president; H. F. Brey, vice-president; Wilko Mentz, secretary and treasurer, and these, with George G. Murry, F. W. Velie, A. M. Lumley and H. G. Traeger will make up the board of directors. This association is one of the oldest of the kind in the valley. The members own a club house at the Forks. During the past several years they have been active in planting trout fry in the streams of the upper Sierras. I. W. L.

Porterville, Cal.

✣ ✣ ✣

Three valuable hunting dogs owned by A. Z. Smith, prominent Tacoma electrician and sportsman, were burned to death last week in a mysterious fire that destroyed the kennel. Smith says he cannot understand how the kennel caught fire. Nothing was found that would indicate it had been deliberately set afire. The dogs, Lady and Gale, English setters, and Bess, a Chesapeake, were among the best known hunting dogs in the section. Each was valued at more than $150. All were excellently trained. The fire started about 1 a .m., soon after Smith had retired. The kennel was situated at the rear of the Smith home, 1213 South Ridgewood avenue. Wind blew the flames against the house, setting fire to it also. This aroused Smith, who telephoned in an alarm. Slight damage was done to the house.

✣ ✣ ✣

Trophies For Shooters—Six of the Los Angeles Gun Club tar hawk smashers have been awarded medals by the American Amateur Trapshooters' Association for their consistent shooting during the past year. Heine Pfirrmann, C. W .Fish, J. F. Dodds, E. K. Mohler, Edward C. Crossman and George Oliver are the shooters who have been awarded the special honors.

Crossman, Fish and Mohler received 85 per cent proficiency medals, while the other shooters were recipients of 75 per cent medals. Fish had an average of 466 smashes out of 500, which made his average just 93 2-10 per cent. This is the third medal of a series of five awarded to Fish by the association. Mohler has a certified mark of 480x500 targets, which gives 89 6-10 per cent. This is also Mohler's third medal of the series of five.

Crossman's mark was 447 smashes out of 500 possible tar hawks, which makes his average 89-4-10 per cent. This is Crossman's third medal of the s eries of five . Heine Pfirrmann has the highest percentage of any of the local shooters. He had a score of 475x500, which made his percentage exactly 95. George Oliver had an average of 89 4-10 per cent, while J. F. Dodds had the second high average, which was 90 4-10 per cent. This was the first medal of a series of five awarded to the last three shooters.

This American trapshooting association is an organization less than a year old and its president is John Philip Sousa, the well known bandmaster. There are 130 0clubs distributed among forty-seven states not affiliated with the association. These clubs have a total of 60,000 members.

Vernon Club—Eleven shooters turned out at the Vernon Gun Club Sunday morning to compete for the season's class loving cups. The conditions were 60 birds at handicaps. Stanton A. Bruner was the high gun in class A. He broke 58x60.

Mrs. C. E. Groat, champion woman shooter of the country, was the victor in the B division. She hung a score of 56x60. Bob Bole was second high in this class, breaking 55x60.

The Vernon Club has sent out its programs calling attention to the second annual registered tournament to be held May 13, 14 and 15. May 12 will be practice day. A total of $600 will be up as added money, while the Interstate Association will contribute trophies.

A 100-bird shoot will be held on practice day. It will be an optional pool at $2 to each event of 20 targets. Money will be divided 40-30-20-10 per cent. A jackrabbit sweepstakes at 200 targets will be held on Sunday, Monday and Tuesday, May 13, 14 and 15. The scores:

Bob Bole 55, Dr. Packard 33, S. A. Bruner 58, A. W. Bruner (pro.) 58, Wm. Pugh 51, Fred Kemble 52, C. E. Groat 52. Mrs. Groat 56. Van Nest 50.

Practice—Fred Kemble 16x20, C. E. Groat 36x40, Mrs. Groat 36x40, Van Nest 31x40, Ed Behring 34x35, Wm. Brawner 20x20.

Los Angeles Club—At the Los Angeles Gun Club Sunday F. H. Mellon day was celebrated. Mellon, who has been visiting in Los Angeles for some time, will depart for the east this week, so the shooters decided to hold a shoot in his honor. Mellon put up three beautiful prizes for competition, which were very hotly contested for.

C. W. Fish captured the first prize, while George Tuckett took the second and Harry W. Cline the third. Al lthe prizes were the same and were among the best put up at the club for some time. The Los Angles club members presented Mr. and Mrs. Mellon with a token of remembrance.

C. W. Fish was the high man for the day's shoot. He broke a total of 93x100 targets from the nineteen-yard line and by so doing captured five digits on the H. R. Everding trophies. W. A. Cornelius was second with 92x100 smashes. Fred Grewell was the high man in the class B division, while J. H. Bishop was high in the third class and William Kennedy high in the class D.

There were fifty-eight shooters present at the club and 7,025 targets were thrown. Heine Pfirrmann, W. A. Cornelius. A. Pachmayr. Fred Grewell, J. C. Famechon, William Kennedy, C. W. Fish and R. O. Poll all won gold and silver trophies. The scores:

G. Holohan, 19 yds. handicap, broke 94; C. W. Fish 19—93, W. A. Cornelius 19—92, J. H. Bishop Jr. 16—92, E. Mitchell 18—91, F. Grewell 18—91, P. G. Peterson 17—89, A. Cook 16—89, C. S. White 18—89, O. A. Evans 19—88, Wm. Kennedy 18—88, W. H. Wilshire 18—88, F. H. Mellus 21—87, R. O. Pool 17—87, J. W. Meek 18—87, Geo. Tuckett 18—86, H. Pfirrmann 20—86, F. H. Mellon 19—86. J. C. Famechon 18—84, J. F. Dodds 21—84, Mrs. Pfirrmann 17—84, J. R. Tomlin 16—84, F. M. Gibson 18—84, O. Council 20—83, E. K. Mohler 20—83, S. H. Hall 19—83, H. W. Cline 18—82, A. Pachmayr 18—82, C. W. Clement 16—82, T. P. Smith 17—81, H. E. Sargent 19—80, C. W. Betz 17—80, Geo. Melford 19—80, N. W. Nelson 16—80, Mrs. Mellon 17—80, J. A. Hoblit 18—79, O. D. Ashton 17—76, E. W. Selbach 16—74, H. B. Carnahan 17—63. At 75 targets—P. O. Long 19—68, A. W. Childs 16—62, R. Hartmann 16—60, O. L. Grimsey 16—57, L. B. Mellus 18—56, H. W. Hawley 16—53. At 50 targets: E. C. Crossman 16—45, G. L. Pulley 16—45, F. H. Teeple 18—44, E. E. Ekdale 16—43, F. H. Teeple Jr. 16—42, M. D. Towne 16—40, E. Mueller 16—40, H. C. Bauer 16—40. G Persinger 16—38.

Point winners in the Everding trophies:

Class A—C. W. Fish 5, Cornelius 4, Evans 3, Mellus 2, Pfirrmann 1, Mellon 1.

Class B—Grewell 5, White 4, Wilshire 3, Meek 2. Tuckett 1.

Class C—Bishop 5, Peterson 4, Mrs. Pfirrmann 3, Hall 2, Geo. Melford 1, Betz 1.

Class D—Kennedy 5, Pool 4, Mrs. Mellon 3, Nelson 3, Ashton 2, Selbach 1.

EASIER TO MAKE DOG CHAMPION.

New System of Ratings For Kennel Shows Goes in Effect July 1.

The new system of ratings for a champion of record, based on the number of dogs benched to a breed, instead of the total number at a show, which has been decided on by the American Kennel Club, to go into effect on July 1st, has caused many arguments, pro and con, since the announcement of the change. After a careful study of the new ratings I have come to the conclusion that it will be much easier for a dog to obtain his championship than under the old arrangement. This applies most strongly to the popular breeds, in which champions will be made faster than typical specimens worthy of a title may be bred. This result will nullify the primary reason for forsaking the old method of making champions.

One of the reasons to force me to this conclusion is the facility with which the American-bred dog, the Boston terrier, as an instance, may obtain a championship. Take for example the New England shows, which bench anywhere from 250 to 350 dogs. The number of Bostons benched average as a rule about 100, and this total is often excelled. Whenever there are seventy or more, under the new classification both the winners dogs and the winners bitches get five points toward their championships. It is easy to see that a sequence of three local A. K. C. shows might railroad a Boston to his championship. The three shows may be held within a month or even a fortnight.

Then what happens? The usual procedure is to retire a champion from general competitions once the title is gained, and to reserve him for specials only. This will make way for another aspirant and history will repeat itself and another new champion be returned in short order, to be retired in his turn. And then what happens? Champion So-and-So, which won his title at three shows and which has an actual value of perhaps a few hundred dollars, is, on the strength of his title, sold for $1,000 to some person who has never seen him. Champions will be made faster than the true sort may be bred, and this applies not only to Bostons, but to all the popular breeds.

Take French bulldogs, to go back to another breed specially strong in New England, only thirty-five are required to gain a five-point rating, and any one at all familiar with the energetic manner in which the French Bulldog Club of New England backs up its breeds knows there are sure to be the requisite number benched every time to guarantee the maximum rating. This also applies to the different breeds of terriers, especially the smooth and wire haired fox terriers, Scottish, Irish, Airedale and West Highland white terriers.

In its application the system is as weak in regard to the haste in which a new champion may be made with the less fancied breeds, in which a maximum of five points may be gained from a total entry of from five to fifteen dogs, as it is in the popular breeds. Also, if the energy of the specialty clubs may be depended on always to muster a five point entry in the popular breeds, a similar energy will make it simple for the clubs that have to gather an entry of only ten or a dozen dogs to be quite as successful in the race to make champions.

As a fact it will be easier for a dog to gain a championship without competition under the new than it was under the old system, based on the number of dogs actually benched. For instance, in bloodhounds, mastiffs, Eskimos, St. Bernards, Newfoundlands, Scottish deerhounds and foxhounds, English and others, an entry of one dog gains one of the needed championship points, while there are any number of breeds, where an entry of two dogs equals one point.

In making champions so fast a false valuation will be placed on them, and that germ of commercialism that is getting a place in so many sports and recreations will be strengthened, until finally, should there be no diminution in the outcrop, the title will lose any real significance in fixing the value of a dog. After a tria ltrip experience may teach how the new system may be changed so as to bring about uniformly good and reliable results, but as it stands champions of record in almost any breed may be made faster than it is possible to breed dogs of championship calibre.—[F. F. D. in N. Y. Herald.

The winter is now over, the hunting season in most states is now closed on all game and game birds of every description, and in most localities there is more stock game left over for the coming season than has been known for many years, and now the course for the sportsmen to pursue is to see, so far as they can, that the stock game and game birds are given every chance to replenish the depleted covers; and one way to do this effectively is for every man who cares to see the supply of game maintained to make it his business to destroy every enemy of game or game birds that he comes across. A hawk, a crow, a coyote, a fox, askunk, or a half-wild, half-starved cat or mongrel dog will, during the season of incubation, destroy more game than the average hunter will kill during the open season, and if these are put out of the way game, particularly game birds, will be much more plentiful in every locality where this is done.

BETTER LIVE STOCK
and Agricultural Topics

TO BREEDERS OF DUROC JERSEYS.

During January the National Duroc-Jersey Record Association recorded 5,132 pedigrees, received 90 new members and had an increase in receipts of fully 20 per cent over January of 1916.

We are very much pleased with this condition of the business so far as the Record Association is concerned, but the best part is that the breeders are getting more for their breeding stock than ever before.

Our plans for 1917 are rather elaborate and if we are able to carry out the program it is going to take the earnest support of the press and the assistance of the breeders.

Last year we conducted fourteen futurity shows, which were considered very successful, so we are taking on a larger program this year and will promote three different kinds of futurity shows — the National at Omaha, State Futurities and District Futurities. Any breeder is eligible for the National, one State Futurity, and one District Futurity.

The National Futurity carries a classification of $1,000, and there must be thirty herds nominated; this show will be in connection with the National Swine Show.

State Futurities carrying classifications of $400 each, will be prmoted at the California State Fair, Illinois State Fair, Iowa State Fair, Minnesota State Fair, Missouri State Fair, Montana State Fair, Nebraska State Fair, Oklahoma State Fair, Oregon State Fair, South Dakota State Fair, Texas State Fair and Wisconsin State Fair.

District Futurities, carrying classifications of $200 each, will be promoted at the Colorado State Fair, Boise and Caldwell, Idaho; Hutchinson, Kans.; New Orleans, La.; Columbia, Mo.; Grand Forks, N. D.; Childress, Tex.; Utah State Fair; Burlington, Ia.; Cascade International; North Yakima, Wash.; Malvern, Ia.; Mt. Pleasant, Ia.; Peoria, Ill.; Sioux City, Ia.; Janesville, Wiss.; La Crosse, Wis., and Owatonna, Minn.

Now the only thing that will cause these futurity shows to be a failure, will be that the breeders do not give their support by nominating their herds so as to give us 30 herds for the National, 20 herds for each of the State Futurities and 10 herds for each District Futurity.

It is going to cost the association a lot of money to promote these shows, but the officers are anxious to spend the money as they consider that it is the best promotion work that we can do for the breed. We want to do everything we can to get the best exhibits of Durocs at the fairs this fall and we hope that you can find space for a part of this letter in the next issue of your publication, so we are able to get this information before the Duroc readers of your paper.

J. B. PFANDER,
Secretary.
National Duroc-Jersey Record Association.

FOR BUMPER CROPS OF ALFALFA, DON'T USE TOO MUCH WATER.

If you want to grow the heaviest possible crops of alfalfa, and get the largest money return for the water used, don't apply more than thirty to thirty-six inches of irrigation water a year, under such general conditions as those, for instance, of the loam soils of the Sacramento valley. To apply more than thirty-six inches usually does not produce corresponding increase in yield. Most California alfalfa growers over-irrigate.

Such is the valuable knowledge now made available for every farmer in California through a report written by Frank Adams, Professor of Irrigation Investigations in the University of California, and Ralph D. Robertson, Samuel F. Beckett, Wells A. Hutchins, and O. W. Israelsen. These men have co-operated in six years of experiments carried on jointly by the University of California, the California State Department of Engineering, and the Office of Public Roads and Rural Engineering of the United States Department of Agriculture. Copies of their "Bulletin No. 3" may be obtained by writing to Irrigation Investigations, College of Agriculture, at the University or to the State Department of Engineering in Sacramento. Demonstrations will e be shown also at the University Farm picnic at Davis on Saturday, April 28th.

Four applications of seven and one-half to nine inches each year are recommended for Sacramento valley alfalfa fields in general, this irrigation to be given immediately after cutting. However, it is pointed out that alfalfa planted on very open or very impervious soils should be irrigated more than once between cuttings.

It is urged that the farmer should use a soil augur frequently, to find out whether he is keeping his soil moist enough, and moist enough deep down, to get the best results from his alfalfa. Alfalfa begins to wilt when the soil contains less water than, for silt loams, ten per cent, and for clay loams, sixteen per cent. The soil moisture should be kept from four to six per cent above the percentage at which wilting occurs. This can be brought about by applying from six-tenths to nine-tenth of an inch of irrigation water per foot of soil for loam soils, and from seven-tenths to one and two-tenths inches per foot of soil for heavier clay loams and clays. To apply more than those amounts is not only a waste of water, but threatens positive damage to the crop and permanent damage to the soil.

The reason why many farmers apply excessive quantities of irrigation water is that they have been using too small irrigating heads, or too large checks. Irrigating heads not large enough to enable alfalfa checks to be watered evenly with six acre-inches of water per acre per irrigation are too small, and the remedy is either larger irrigating heads or smaller checks—preferably the latter, especially in the case of the smaller holdings.

The conclusions come from six years of experimenting on the University Farm at Davis, supplemented by experiments and demonstrations on a plat five miles northeast of Willows, and by experiments on between forty and fifty representative farms in the neighborhood of Gridley, Los Molinos, Orland, Willows, Woodland, and Dixon.

These important results, of direct practical value to every California irrigator, have been secured by one of the projects of agricultural investigation of which some two hundred are now being carried on by the College of Agriculture of the University, many of them in co-operation with the U. S. Department of Agriculture or with the various agencies of the State of California.

Col. J. T. Johnson, of Mexico, Mo., sold a span of mare mules recently to C. C. Williams, of Bushnell, Illinois, for $600. The mules were pronounced by judges to be "poppers' 'and worth the money.

THE FARM

FEEDING WORK HORSES.

The conclusions drawn by specialists of the University of Illinois from experiments in feeding farm work horses are interesting and will be of benefit to feeders.

Where a mixed grain ration of corn, oats, oil meal and bran is fed, clover hay is equally as efficient if not a little superior to timothy for horses at hard work.

There was no observable difference in the effect of clover and timothy upon the spirit of the horses or their ability to endure hot weather. Those receiving clover had a glossier coat of hair and their bowels were looser, but not too loose to endure hard work.

A slight saving in grain may be made by mingling it with chaffed hay, but the saving in this test did not appear to be enough to justify the expense.

There may be a benefit not shown in these tests, in preserving the horse's health, by mingling the grain with chaffed hay. The results of this test are not conclusive on this point.

Where the grain was ground and mingled with chaffed clover and with chaffed alfalfa, the latter proved to be a little more efficient in preventing loss in weight of horses at hard work.

The mingling of grain with chaffed timothy hay did not proce satisfactory.

Where alfalfa hay is fed as the roughage part of a ration for farm horses at hard work, less grain is necessary to prevent them from losing weight than where timothy hay is fed. In this test there was a saving of about 22 per cent of grain.

Though too short to be conclusive, these tests indicate that mature horses at hard work can be maintained quite satisfactorily for a short time, at least; on corn fed in conjunction with alfalfa hay, and at a saving in cost.

A saving of about ten per cent may be made by grinding the grain for farm work horses when at hard labor.

It requires twice as long for horses to consume ground grain fed dry, as when the same quantity is fed thoroughly dampened.

Farm work horses at hard labor should receive from one and one-fifth to one and one-third pounds of grain, and from one to one and one-fourth pounds of hay, per 100 pounds of live weight per day, in order that their weight may be maintained.

Satisfactory results have been secured by feeding the grain in three equal feeds, and giving one-half the hay at night ,the other half being divided between the morning and noon feeds.

The grain fed should be reduced one-half on idle days until four days have elapsed, or until they are again put to work, when it may be again increased if desirable. By following this method attacks of azoturia were prevented.

The results of the experiment indicate that the general impression is correct that horses may very properly be given a more bulky ration when idle or doing light work than when at heavy work. It is believed that the practice of permitting work horses to gorge themselves with hay is all too common.

Figures Cost of Producing Stock.

The United States department of agriculture, after making a study of the cost of producing livestock in the northwestern states, concludes that for sections of the west where winter feeding is practiced, the man who thinks of substituting livestock for other forms of agriculture should figure on a cost of approximately $30 for the production of a good yearling steer and $45 for the production of a good two-year-old, this cost to include labor, market value of feeds, taxes, loss, bull service and any depreciation of breeding stock.

In those sections of the northwest where only a part of the stock is fed in winter the cost of producing a yearling is estimated at approximately $25 and for a two-year-old $35. The average weight given for a two-year-old is 960 pounds. With $45 as the cost of production, the cost per pound would be about 4.6 cents.

The cost of producing a lamb in the states of Montana, Idaho, Nevada, Wyoming and Utah is placed at $1.82.

J. F. Parker, of Audrain county, Mo., marketed hogs in St. Louis at $16.05 per cwt., 64 head bringing that price. The hogs were Poland-Chinas.

The permanent pasture will be a very important part of the rotation plan this year. A pasture will be needed when the grazing crops are not ready and when the animals need green food and exercise. If you haven't a permanent pasture it will be advisable to start one the earliest possible time. Even a rough hillside may be used for this purpose. For such locations Bermuda is a most excellent grass. Start a Bermuda pasture this spring so you will have grazing for stock.

GOMBAULT'S

The Pacing Stallion
FRED BRANCH 45525

foaled 1906, by Morris A. 45046, dam Bessie Vachell by Acrobat 15184, grand dam Almina by Altona 8850. This horse is absolutely sound and a grand individual. He took a trotting record of 2:28 as a two-year-old; and won fourth money in the 2:14 pace at Pleasanton in 1912. In this race he was timed separately a heat in 2:11. He is now in condition to be put into training for the California Circuit. For full particulars apply to

"SAN VICENTE",

--the Junior Champion Saddle Stallion of California, will also stand at San Vicente Rancho this season.

TERMS PRIVATE.

'The above photograph shows "Highland Monarch" and four of his get, and "Don Castano" and four of his get, winners of the First and Second Premiums at the California State Fair in September, 1916. The service fee for each of these stallions is $50.00.

WE WILL PAY

the freight, to and from our Ranch, on mares sent from any part of California, but will not assume responsibility for accidents.

SAN VICENTE RANCHO

1023 Investment Building Los Angeles, Cal.,

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

Cal. State Thoroughbred License No. 2018.

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

MARSE ABE
- Yankee
  - Hanover
    - Hindoo (Virgil, Florence)
    - Bourbon Belle (Bonnie Scotland, Ella D.)
  - Correction
    - Himyar (Alarm, Hira)
    - Mannie Gray (Enquirer, Lizzie G.)
- Halo
  - St. Blaise
    - Hermit (Newminster, Seclusion)
    - Fusee (Marsyas, Vesuvienne)
  - Ida K.
    - King Alfonso (Phaeton, Capitola)
    - Lerna (Asteroid, Laura)

Address all communications to GEO. F. RYAN, Pleasanton, Cal.

DILLCARA 57462

Cal. State Standard License No. 2019.

Son of Sidney Dillon 23157 (sire of 9 in 2:10 list) and Guycara by Guy Wilkes 2867 (sire of 3 in 2:10 list), will make the season of 1917 at

PLEASANTON DRIVING PARK, PLEASANTON, CAL.

SERVICE FEE $50 TO INSURE

Dillcara is a full brother to Harold Dillon 39610, the leading sire of New Zealand. Last season the get of Harold Dillon won 41 races, totalling over $25,000.

SHOOT TO WIN

Du Pont Long Run Trophies

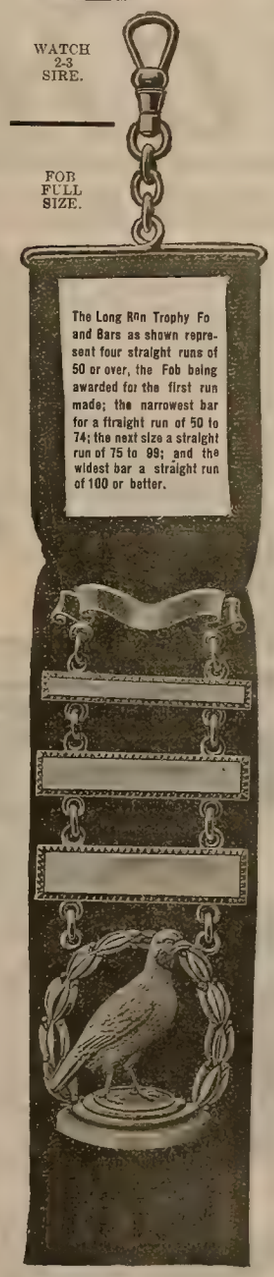
IT is with pleasure that we announce to the trapshooting fraternity our Long Run Trophy plan for 1917, which, with a few minor changes, is a continuation of the 1915 and 1916 plan.

Under the operation of our Long Run Trophy plan, we give the amateur and professional trapshooters, for straight runs of 50 targets or over, in registered shoots.

Watch Fobs, Watch Fob Bars Cuff Links, Scarff Pins, Watches

(Lady's or Gentleman's Style)

The Watch Fob is exquisitely designed, the medallion portraying the Du Pont quail.



The Watch Fob Bars are of varied widths attractively designed and will endance the appearance of the fob.

The Cuff Links and Scarf Pin bear the Du Pont quail, and are both attractive and useful.

The Watches are standard, open face, 17-jeweled watches with a 25-year guaranteed case, the design being selected with a view to satisfyinng the conservative sportsman.

WATCH 2-3 SIZE.

FOB FULL SIZE.

The Long Run Trophy Fob and Bars as shown represent four straight runs of 50 or over, the Fob being awarded for the first run made; the narrowest bar for a straight run of 50 to 74; the next size a straight run of 75 to 99; and the widest bar a straight run of 100 or better.

CONDITIONS

The Watch Fob: Awarded to amateur and professional trapshooters for their first straight run of 50 targets or over.

The Watch Fob Bars: For attachment to the fob, and awarded to amateur and professional trapshooters, one bar for each additional run of 50 or over as follows:

FOR A RUN OF	
50 to 74,	a bar 2-16″ wide (approximately)
75 to 99,	a bar 3-16″ " "
100 and above,	a bar 5-16″ " "

The Watch: Awarded to amateur trapshooters when 15 runs of 50 or over are made, and to professional trapshooters when 25 runs of 50 or over are made.

The Cuff Links: Awarded to amateurs and professionals instead of a second Du Pont Long Run Trophy Fob in 1917. To amateurs for their 16th run; to professionals for their 26th.

The Scarf Pin: Awarded to amateur and professional trapshooters instead of a third Long Run Trophy Fob. To amateurs for their 31st run; to professionals for their 51st.

SCARF PIN Actual Size

Shoot DU PONT, BALISTITE or SCHULTZE They are the trophy winning powders.

WINCHESTER

TEACH YOUR BOY TO SHOOT---

Every Boy instinctively loves a gun. Most fathers have had to listen to the plaintive appeal "Dad! I want a gun!"

WHEN YOU TEACH YOUR BOY TO SHOOT, YOU WILL GET CLOSER TO HIM THAN EVER BEFORE. NOT ONLY WILL THE YOUNG FELLOW ACQUIRE MANLY HABITS AND SELF-CONTROL, BUT HE WILL LEARN TO HANDLE FIREARMS WITH SAFETY TO HIMSELF AND OTHERS.

WHEN YOUR SON ASKS FOR A RIFLE, HE WILL NATURALLY EXPECT A WINCHESTER. HIS BOY FRIENDS WILL SURELY ASK WHAT KIND OF A RIFLE HIS FATHER SELECTED. FIX IT SO HE CAN PROUDLY ANSWER, "A WINCHESTER, OF COURSE!" EVERY MAN AND BOY KNOWS THAT THE WINCHESTER IS THE BEST—THE MOST ACCURATE AND RELIABLE.

A FATHER SHOULD WELCOME THE CHANCE TO BECOME HIS BOY'S "PAL" BY TEACHING HIM HOW TO SHOOT. IT MAY BE VERY VALUABLE KNOWLEDGE SOME DAY.

ASK YOUR DEALER TO SHOW YOU THE COMPLETE LINE OF WINCHESTER .22 CALIBER RIFLES, REPEATERS, SINGLE SHOT AND AUTOMATIC.

All Styles and prices to suit all tastes and pocket books.

Winchester Repeating Arms Co.,
NEW HAVEN, CONN.

ALL THE POWER BEHIND THE SHOT

As in the modern field gun, the barrel of the Remington Autoloading Shotgun recoils against springs and a friction device each time it is fired.

In both cases full power is obtained from the powder charge because the breech block locks the shell solidly in the chamber and no gas can escape at the rear.

Try the Remington yourself. Five shots—simply pull the trigger for each shot. All-around shooting qualities guaranteed.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles, and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

A WINNER IN IOWA--

It is generally admitted that high class saddle horse are scarce. Any one looking for a coming three-year-old saddle stallion, and has not been successful in locating one in Missouri and Kentucky, come and see **WM. TIMMERMAN at Manning, Iowa,** and I will show you one as good as ever lived or as there is living to day, barring none. This stallion can be bought, but not for a song.

WM. TIMMERMAN, Manning, Iowa.

An unusual treat awaits the Shorthorn breeders of California at the great sale of Carruthers Farms, Mayfield, California, May 2. The most noted sires and matrons of rare Scotch breeding are represented in this great herd. They are all in tip-top condition, healthy, hearty and the cows with calves and regular breeders. There are some splendid young bulls and heifers of show quality in the lot and the kind that can win in any company. Mr. Carruthers is in the habit of giving the public even more than they expect and visitors at this sale will be amazed at the quality of the offering . He broke a sale record in his first annual Berkshire sale and every indication points to a banner sale for his superb Shorthorns. Col. Carey M. Jones, of Chicago, one of the best auctioneers in the United States, will cry the sale and everything for the comfort, information and advantage of the visitor is provided for. Good beef cattle, especially Shorthorns, are the best property on earth and the man expecting to found a herd , head a herd, or to buy a show ring winner should attend this important sale. Write for one of the attractive catalogues, mentioning the Breeder and Sportsman, to W. M. Carruthers, Hearst Bldg., San Francisco.

Breed Horses For a Purpose.

There is no longer any room for the breeder of "half-way" horses, says the Horse World. A horse must be one thing or another according to the field his breeder is attempting to supply.

It no longer pays to attempt to breed horses without a distinct purpose in view; but there is a good demand for horses bred intelligently with a purpose in view and that are qualified to fill that purpose. Which purpose a breeder should attempt to breed to fill is a matter of individual taste, to be governed somewhat by the conditions which may surround the breeder.

Any horse fit for work finds a ready buyer these days in the New York horse markets. The demand for serviceable horses really exceeds the supply. A short time ago a carload of draught horses arrived at the auction market of Fiss, Doerr & Carroll, E. 24th street, New York City, and every animal in the shipment found anxious buyers within a few hours. Trade reports show unusual activity in all lines of horse equipment also, the demand for harness being extremely heavy.

A HISTORY OF THE PERCHERON HORSE.

In response to a widespread demand for information touching the origin, evolution, development and distribution of the modern Percheron horse, Alvin Howard Sanders, publisher of the Breeder's Gazette, America's greatest farm paper, and author of "Shorthorn Cattle," "The Story of the Herefords," "At the Sign of the Stock Yard Inn" and other great works dealing with and portraying in prosaic words the progress of better live stock; and Wayne Dinsmore, secretary of the Percheron Society of America, have compiled a new work, a classic in Animal Husbandry affairs, under the title "A History of the Percheron Horse." This magnificent volume includes heretofore unpublished data concerning the origin and development of the modern type of Percherons, drawn from authentic records and manuscripts in the national archives of the French Government, together with the detailed report of the introduction and dissemination of this popular breed throughout the United States, to which is appended a symposium reflecting the veiws of leading contemporary importers and breeders touching the selection, feeding, and general management of stallions, brood mares and foals.

The book is not a breed booster, but gives the most complete work of this character ever published. It has been the intent of the authors to present facts exactly as found. It is large in scope and magnificent in its presentation of the breed, giving in detail every possible phrase of the breed. While its worth will be recognized at once by the pioneer breeders of the country, its real value to the breeders will not have been appreciated until the breeders of the present day have passed on and their sons and grandsons have taken their place in the rank and file of the most progressive of all horse breeders. To the man new in the business, the student of animal husbandry and to those who will at some future time turn their lines of endeavor to the breeding and developing of the heavy horse, this book will prove invaluable. A copy of this intensely interesting and typographically artistic volume should be in the library of every lover, breeder, dealer and student of better stock. It may be procured by addressing the Sanders Publishing Company, Chicago.

PROGRESS OF A HORSE BREEDING EXPERIMENT.

Since the rise of scientific farming in the United States the idea has taken hold of the agrarian mind that rural America should establish its own standards of excellence and produce things purely American, superior to anything of their kind on the face of the earth. One remarkable phase of the extensive activities of the Department of Agriculture in this regard is seen at the horse-breeding establishment maintained at Fort Collins, Col., in co-operation with the Colorado Experiment Station. This undertaking originated in 1905, when James Wilson, at that time secretary of agriculture, appointed a staff of technically trained animal husbandmen and authorized them to purchase breeding stock fit to originate a new type of American carriage horse. These equestrian experts—Prof. C. F. Curtiss of the Iowa Agricultural College, George M. Rommel, chief of the animal industry, and Prof. W. L. Carlyle, then of the Colorado Agricultural College—searched the country east of the Rocky Mountains for animals acceptable as foundation stock. Their choice fell mainly on the Standardbred, and a typical specimen of a trotter is seen in the stallion Carmon, which heads the stud. The Kentucky saddle horse also found a place because of its unexcelled grace of gait and bold carriage. From the Diamond Ranch in Wyoming were bought 6 mares of excellent type, by a purebred stallion, but out of common bronco mares. Some of those grade mares have proved to be the best brood mares in the stud. In time an infusion of Morgan blood was thrown into the stream in the hope of securing stamina and muscularity.

The co-operative treaty provided that the Department of Agriculture should furnish the breeding animals, while the state of Colorado should supply the stables and the land. The operating expenses were borne equally and Prof. Carlyle assumed the management of the establishment.

Colorado offers natural conditions pre-eminently suited to the raising of high-class horses of the lighter type. An equable and bracing climate is an invaluable asset to animal breeding. The topographical and cultural conditions leave nothing to be desired. The dry, calcareous soil, growing nutritious forage, is a tremendous advantage, and in addition are irrigated meadows yielding an abundance of choice fodder.

In the immediate vicinity of Fort Collins, southeast of town is situated this horsebreeding establishment. The main stable consists of a two-story frame structure, which houses 20 horses, besides having ample storage room for hay and grain. Adjoining the main stable are sheds forming a court while extending out from the stables are spacious paddocks and yards equipped with feeding racks and watering troughs. Further away are to be seen alfalfa meadows and pastures, while up in the foothills of the Rockies are to be found extensive pastures, an area of undulating land no less than 500 acres in extent. Such an alpine grazing ground is a great adjunct to the establishment, especially for raising the foals.

James Hutton, a genuine Scotchman, is the head groom. In the old country he was with Galbraith Bros. of New Killern, and when those gentlemen established a business in the United States he came across in their interests. Afterwards the University of Wisconsin engaged him and in 1906 he went to Fort Collins. The visitor does not see anywhere horses better cared for than here. Mr. Howard is the trainer of the colts. It is always evident that he possesses a steady nerve and a keen eye.

The principal forage used is alfalfa and upland hay, bluestem grown on the mountain meadows. This wild hay has proved to be as nutritious as timothy and it is highly valued, a choice quality commanding $15 a ton in the haymarkets of Colorado. The grain feed is a mixture of oats and corn crushed and mixed with bran in the proportions of 7 to 3 to 1. The stallions are fed relatively less corn than is specified in the common grain ration, while the yearlings receive oats and bran 3 to 1, but no corn. An effort is made to compute a proper ration for each individual animal. About 1 pound of concentrates is allowed for each 100 pounds of weight for mature animals, but when alfalfa hay is fed that ratio is even wider.

A peculiar feature of the western field husbandry, the curing of forage on the ground, is in evidence on the mountain pasture. The nutritious native grasses yield an excellent feed for the horses through the winter season. A small supplemental ration of grain is sufficient to keep the brood mares in good condition. In fact, most of the mares and the fillies are wintered on the alpine grazings and in the cultivated pastures. Salt is provided for them and care is taken to feed them hay and grain as the grazing conditions indicate. A healthier group of horses is not to be found anywhere than those wintered under these semi-wild, natural conditions. The foul stable and the small paddock are no place for raising good stock.

Says Mr. Hutton: "The secret of success in raising horses is to ensure normal development of the foal by judicious feeding and plenty of exercise." Liberal feeding of the mares during the lactation period is realized as requisite to sound muscular and active foals. At 4 or 5 months of age these sturdy foals are weaned, but they are not in the least retarded in growth. Gradually they are halter-broken and trained. To one who appreciates fine horses a stroll about the station is full of fascination. The entire stud numbers about 100 head, of which 30 are brood mares. There are 3 stallions. Carmon is now more than 20 years of age. In spite of old age he is very vigorous, although his son Albion now reigns supreme.

The natural increase amounts to about 20 percent a year, which may be considered relatively a high ratio. In order to keep up the standard several mares and colts have to be discarded each year. A board of animal husbandmen appointed by the secretary of agriculture visits the station once a year for the purpose of making selections of breeding stock and at the same time culling out undesirable individuals, which are sold at a public auction in midwinter.

From the present outlook in horse husbandry, what is the ultimate aim of this breeding experiment? The trend of the times has shown the impracticability of breeding a carriage horse, which is relatively speaking superseded by the automobile. As a result the problem of breeding is materially changed andfor the present a serviceable general-purpose horse is in demand as much as ever before. Agricultural development in the mountain states goes on by leaps and bounds. For cultural operations there is needed a medium-sized horse of endurance and economical to feed. The old broncho type is inadequate and unsuitable for the modern farm. On the other hand the heavy draft horse is not adapted to a hilly and broken country. The most practical solution of the tillage problem in an alpine country is the use of a well-bred horse weighing from 1200 to 1400 pounds. Therefore the experiment promises to be of the utmost importance to the Rocky Mountain region, as well as to the vast horticultural districts of central California and the farming communities throughout the northern part of that state.

With the national movement for preparedness there necessarily will be an increased demand for remounts for the army, as well as artillery horses. The opportunity for western farmers to engage in horse breeding is promising and should be highly profitable. The Federal horse breeding work might be extended over a wider territory. Governmental aid to individual enterprise should be welcomes by the public. As in Europe, stallions from the studs of the government might be distributed in the rural communities and regulations drawn regarding their use. Indeed, that system is already practiced in certain sections of the eastern states and is proving itself a success. There is every indication that the same scheme might be somewhat modified to suit western conditions..—[P. A. Ingvason, Yolo Co., Cal., in The Breeder's Gazette.

Harness Horses and Horsemen

WOODLAND TRACK NOTES.

Woodland, Cal., April 17, 1917.

Editor Breeder and Sportsman,—

Dear Sir: The horsemen of this vicinity should take pride and interest in the new half mile track and training grounds as now conducted. The superintendent, L. B. Daniels, is a capable and energetic man. He is on the grounds from daylight until dark, is untiring in his labors and zealous in his efforts to please the horsemen now training at the grounds. The track is in perfect condition and I have never seen a safer track to work horses over. While it is firm, there has been a cushion on it at all times which makes it soft enough. The trainers are beginning to move their charges up a little.

L. B. Daniels and his able assistants have a large stable of good looking horses. Among them are:

Teddy Bear, who has been a mile in 2:17½ and a half in 1:04½;

Bondalin, a mile in 2:17½, last half in 1:08;

Potrero Boy, a mile in 2:26;

San Felipe, a mile in 2:26, just started;

John Malcolm, a mile in 2:25, with the straps;

Lady Silverthorne, pacer, by Del Coronado, a mile 2:26, half in 1:07½;

Raymond, a three-year-old pacer by Teddy Bear, dam Whitehose by Demonio, a mile in 2:23, half in 1:09;

Merril, three-year-old pacer by Teddy Bear, dam by McKinney, a mile in 2:23, half in 1:06;

Little Jack, three-year-old trotter by Teddy Bear, dam Camille by Stam B., a mile in 2:23, half in 1:08. This colt looks like one of the season's coming sensations and if he stays sound the one that beats him to the wire will hang up the three-year-old record for California;

By Pass, trotter, by Lijero, dam Camille, half-brother to Little Jack, a mile in 2:22½ and half in 1:08;

A yearling called Franklin, by Teddy Bear, dam Normono by Demonio, an eighth in 17 seconds unshod;

Green, six-year-old pacer by Jim Logan, dam by Diablo, has been here a short while. All are very sweet on this mare; she has been a mile in 2:19¼, last half in 1:05½. Mr. H. Goodin is the proud owner of this mare and also of a two-year-old pacer by Jim Logan that has been an eighth in 20 seconds;

Yearling by Jim Logan, dam the dam of Little Lucille, an eighth in :22½. They are owned by J. Clark.

The stable by J. E. Montgomery comprises six head: Jim Logan, the old war horse of many hard-fought battles, is in training again, and last Saturday during his owner and trainer's absence in the city Mr. Daniels worked him a mile in 2:21 without the straps over this half mile track. He acts better than in his three-year-old form; stepped the last eighth of this mile in 15½ seconds. He also worked the chestnut filly, a trotter by Demonio out of the dam of Memonio. The boys think a lot of this one; she act like a high class mare, hardly broken. She worked her first mile in 2:57; the following week a mile in 2:47; four days later a mile in 2:38 and last quarter in 38 seconds..

The three-year-old pacer, Marshall Logan, by Jim Logan, stepped a mile the same day in 2:17½; half in 1:05½. This fellow looks strong and good this year and full of pace.

Lock Logan has been a mile in 2:17½ and a half in 1:05¼.

Hal Logan has been a mile in 2:18; a half in 1:05½. My! how this pacer can step when asked to; he is one of old Jim's fastest sons.

Black filly by Gen. Frisbie, dam a full sister to Memonio 2:08½, a mile in 3:10, an eighth in 21 seconds, and is hardly broken.

Ed. S. Parker has the following horses in training: May Demonio (pacer) by Airlie Demonio, dam by Diablo. This mare has been worked only a short while; she has been "clocked" a mile in 2:21½, half in 1:07¼.

Airlie Pointer ,pacer, by Airlie Demonio, dam by Star Pointer, has been a half in 1:14¾, quarter in :34½. These colts are the property of C. Johnson.

Edna Brown, pacer, by Oiamaz, dam by Alex Button, has been a mile in 2:21½, half in 1:07¼ and a quarter in 31 seconds. This one belongs to Ed Fissel.

Across the road from the entrance to the track, is located the stable of H. S. Hogoboom, owner of:

The Bulletin, by Palo King, dam by Diablo; has been a mile in 2:28;

Lilly of the Valley, trotter by Palo King, dam by Iran Alto, a mile in 2:24½;

Rose King, six-year-old trotter by Palo King, dam by Iran Alto, a mile in 2:22½;

Beautiful Baby, two-year-old trotter by Palo King, dam by Iran Alto, a mile in 2:41;

Man-o'-War, trotter, by Alto Express, dam by Diablo, a mile in 2:26. This fellow is a good gaited one.

Eva Dungan, three-year-old trotter by Palo King, dam by Iran Alto(has been a :20 gait;

Chestnut colt, two-year-old, trotter, by Prince Ansel, dam by Mendocino, has shown a 2:20 gait;

Galen, three-year-old pacer, by Jim Logan, dam by Palo King;

A good two-year-old trotter by Jim Logan, dam by Diablo, just broke, showing well at the trot. These two belong to Mr. Hershey.

The pacer Bon Marche, by Bonaday, dam a McKinney mare, is a beautiful looking horse and his owner, Wm. Eires, takes a great deal of pleasure behind this fellow every evening after his day's work, and on Sunday morning he steps him some on the track. He has been a mile in 2:25 and a half in 1:14.

There will be quite a few entries from here at the May Day races in Dixon, and there is a movement on foot to arrange for a day's card here on the following Saturday.

DAN O'KEEFE.

Col. Dingle's Fair.

Missouri horsemen as well as racing men throughout the entire Middle West are rejoicing over the announcement that Col. Ab. Dingle has leased the Moberly, Mo., fair grounds and his expectation to go the limit for an honest-to-goodness race meeting this year. Col. Dingle, one of the most prominent and popular business men of central Missouri, was the founder of the present Moberly Fair Association, its chief stockholder and president, and when his associates announced they were not in favor of giving the usual good program, Col. Dingle immediately called their hand and took full control. The track is one of the best in the state, is located in the center of the greatest agricultural, horse breeding, stock breeding and horse loving countries in the land, has a magnificent steel amphitheatre, spacious stables and is on the main line of several big railroads. The dates are set for July 31 to August 3 this year and the association will be a member of the live-wire Missouri-Kansas Grand Circuit . The fair will be given under the direction of Col. Dingle, by his financial aid and without help of any kind from the citizens of the "Magic City."

AMERICA'S MODEL EXPOSITION.

One of the most important privileges the publishers of the Breeder and Sportsman have this week is that of calling the reader's attention to the announcement on another page, of the great Wisconsin State Fair, to be conducted at the state fair grounds near Milwaukee, September 10 to 15, 1917, giving the conditions and purses. Secretary Remey announces that this year's exposition will surpass in every way all former events and insofar as the racing program is concerned, will be one of the most liberal and important in the United States. The conditions and privileges are the most liberal we have had the pleasure of announcing this season and it is very doubtful if any turf publication will publish a better one this year.

Two stakes for $5,000 each; the Plankington Hotel stake for 2:12 pacers and the Chamber of Commerce stake for 2:12 trotters, perhaps, are the only stakes of such magnitude given outside of the Grand Circuit. The $2,000 Badger State stake for 2:06 pacers and other early closing events as follows: Trotting three-year-old, $800—2:25, $1,000; pacing, three-year-old. $800—2:25, $1,000.

These attractive late closing events, entries to close August 20, also will meet with the approval of horsemen in every section of the country: Trotting—2:21, $1,000; 2:18, $1,000; 2:15, $1,000; 2:08, $1,500. Pacing—2:20 and 2:15, $1,000; 2:09, and Free-for-All, $1,500; Team, $600.

The association is a member of the Great Western Racing Circuit. All events three in five, mile heats, excepting the races for three-year-olds, Free-for-All pace and the Team race. The rules of the American Trotting Association, of which the association is a member, will govern.

Read the announcement as it appears in this issue, and write Oliver E. Remey, secretary, State Fair Grounds, West Allis, Wis., for entry blanks and further information.

FROM KEARNEY, NEBRASKA.

Kearney, Neb., April 14, 1917.

Breeder and Sportsman,
San Francisco, Cal.

My Dear Sirs:—

I am glad to report my car of eleven horses arrived here safe and sound after record-breaking trip via side door Pullman on a fast freight. I find the weather here a little backward for this time of year but trainers are working slow miles and a few are being repeated at this track. By the way, this half mile track has the reputation of being the very best two-lap ring west of the Missouri river, and under the supervision of Ben Rhodes it is kept in perfect condition. The Midway Farm trainers are as busy as bees just now. Rhodes has 15 from which the racing end will be picked for the season. Jack Chandler has 27 yearlings and two-year-olds, mostly the get of the Farm stallions—Judge Maxey, Robt. Bingen and Gold Bingen.

Every one is enthused over the prospect of the early Nebraska Circuit, which begins at Kearney May 31st and continues for eight weeks through the different towns. All are short ships.

Yours truly, J. B. STETSON.

PACIFIC BREEDERS' FUTURITY STAKE No. 17.

Sixty-five payments were made on the first of April in Pacific Breeders' Futurity Stake No. 17, for foals of 1917, as follows:

Ferdinand R. Bain—Wilbur Lou-Vanria by McKinney.

I. L. Borden—Guy Dillon-Gold Lily by Copa de Oro; Guy Dillon-Cleopatra by Zolock; Major's By Guy-Cherry B. by Barney Barnato.

J. L. Bulloch—Black Hall-Cora Wickersham by Junio.

J. M. Clark—Jim Logan-Little Lucille by Palo King; Jim Logan-Ruby C. by Palo King.

J. N. Colomb—Onward McGregor-Yolanda by McKinney.

Hazen Cowan—Guy Dillon-Maud Wilkes by Linwood Wilkes.

S. H. Cowell—Peter McKlyo-Dione II by Cupid; Panama-Hulda C. by Dexter Prince.

C. L. DeRyder—Vernon McKinney-Gracie Pointer by Star Pointer.

J. F. Dunne—El Volante S.—Letter B. Jr. by Benton Boy.

W. G. Durfee—Carlokin-My Irene S. by Petigru; Carlokin-Atherine by Patron; Manrico-Helen Stiles by Sidney Dillon; Carlokin-Honey Healey by Zombro; Copa de Oro-Subito by Steinway; Copa de Oro-Miss Carlokin by Carlokin; Copa de Oro-Pearl Pointer by Sky Pointer; Carlokin—by Copa de Oro.

Wm. M. Ferguson—Alton-Leta K. by Palite.

L. L. Gilpin—Expressive Mac-Beautiful Morn by Iran Alto.

Alex. Grant—Alhambra Prince-Sona by McKinney; Alhambra Prince-Sima G. by Limonero.

Hemet Stock Farm—Kinney de Lopez-Louise Carter by Chestnut Tom; Wilbur Lou-Lady Zombro by Zombro; Wilbur Lou-Eradiate by Geo. W. McKinney; Wilbur Lou-Hemet Girl by Geo. W. McKinney; Wilbur Lou-Zeta W. by Nutwood Wilkes.

H. A. Hershey—Jim Logan-Palo Maid by Palo King.

L. Karns—Expressive Mac-Dollie K. by Athadon; Expressive Mac-Beauty N. by Nushagak.

M. C. Keefer—The Proof-Nada by Nushagak.

R. S. Kernahan—El Angelo-Derby Lass by Arner.

Mrs. Mabel Lipson—Wick Hall-Policia by Best Policy; Wick Hall-Jane C. by Zombro.

A. W. Longley—Pedlar Direct-Lady Gay by Ben Benton.

Geo. W. Lowery—El Volante S.-Copper the Ore by Direct Heir.

Roy D. Mayes—Eon Watts-Bally Pointer by Star Pointer; Vernon McKinney-Ramona by Demonio; Jim Logan-Leota by Diablo.

Alex McDougall — El Angelo-Modesto Mad by Summerset Prince.

J. E. Montgomery—Jm Logan-Margaret M. by Chestnut Tom; Jim Logan-Beautiful Bird by Nutwood Wilkes; Jim Logan-Minnie Bond by The Bondsman.

Jerry W. Moynihan—Healani-Belle Seymore.

Theo. Mueller—Dexter Derby-Maggie Thorn by Mechanic.

R. I. Orr—Warren Dillon-Benito B. by Stam B.

H. B. Robben—Healani-Marie by Diablo.

F. J. Ruhstaller—The Anvil-Expedio by Lijero.

Geo. F. Ryan—Vernon McKinney-Miss Harris by Sidney Dillon.

W. L. Scott — Wilbur Lou-Lady Lou by Stanton Wilkes.

J. E. Short—Mono Ansel-Nelmonio by Demonio; Skidoo Wilkes-Honda Girl by Cubino.

Tony Simas—Teddy Bear—By Best Policy.

A. B. Spooner—Morris A.-San Luis Belle by McGinnis.

L. H. Todhunter—Peter McKlyo-Janet Bondsman by The Bondsman; Peter McKlyo-Leavinettie by Zombro; Peter McKlyo-Osmuda by Bon Voyage.

D. W. Wallis—El Angelo-Mary W. by Dictatus.

G. Wempe—Vernon McKinney-Plumado by Advertiser.

M. L. Woy—Peter McKlyo-Loma B. by Stam B.; Stanford McKinney-Florence B. by Bon Voyage; Stanford McKinney-Strathalie by Strathway.

With submarines operating on the lines of shipment from America to Europe, the transport of fresh horses to the allied armies and of feed for those already in the field has become a formidable undertaking and a serious drain on shipping, enormous quantities of hay, oats and corn being required to keep the animals in working condition. Such is the seriousness of the feeding question that the substitution of furze for hay is being talked about in England. Furze, or gorse, is a kind of shrub, two or three feet high, common in Britain and France, which is sometimes utilized for feeding sheep, and in parts of Wales for feeding; the officers who served in the Peninsular War are quoted as saying that the cavalry forces on both sides were frequently obliged to feed their horses entirely on furze, and that the animals not only lived, but thrived on this rough fare.—[Horse World.

Single G. 2:00 and Ben Earl 2:00½ will meet in a special match race at Youngstown, Ohio, July 12. The race will be three-in-five for a purse of $1,000, winner to take all. A handsome trophy, valued at $250, designating the "world's champion half mile track pacer," will be presented the winner. Tommy Murphy offers to match Directum I. against the winner over the same track for any amount from $500 to $5,000 a side, but the race must be two-in-three.

Thoroughbred Matters

WINNING OWNERS AND HORSES AT TIJUANA.

The winter meeting of the Lower California Jockey Club, which came to an end on Sunday, April 1, was successful in every way and already ambitious plans are being made for racing on a more pretentious scale next year. The meeting opened on November 11, 1916, and continued for the full schedule of one hundred days, when an extension of twelve days was announced, at the termination of which an extension of twelve days was announced, at the termination of which a further extension of thirteen days more lengthened the meeting to 125 days in all. During that period $300,525 was distributed among the horsemen. The daily purse distribution averaged about $2,400. Six stake races were provided, with the $5,000 Coffroth Handicap as the big feature. Of the owners participating at the meeting G. A. Alexandra has no reason to regret his trip west, as his horses not only won the largest number of races, but also earned the largest amount of money. His stable winnings amounted to $12,650, which placed him at the head of the winning owners. The Nevada Stock Farm did exceptionally well, having $11,970 to its credit at the end of the meeting. W. Walker, Clarence Buxton, J. Fuentez, J. W. Fuller and E. J. Ramsey are others who had quite a profitable season as far as stable earnings are concerned.

The owners, who shared in the distribution to the amount of $2,000 or more, as follows:

Owner.	1st.	2d.	3d.	Amt.
G. A. Alexandra.....	34	32	26	$12,650
Nevada Stock Farm ..	24	11	14	11,970
C. Buxton	6	3	3	6,785
J. Fuentez	17	12	12	6,225
W. Walker	14	22	18	6,220
E. J. Ramsey	16	9	16	5,965
J. W. Fuller	15	12	17	5,900
C. Polk	18	7	11	5,705
C. A. Davies	15	10	18	5,570
A. Neal	10	9	5	5,425
Bronx Stable	12	14	20	5,010
W. Fisher	14	10	11	4,740
G. Sadlo	12	10	10	4,565
Ayeanbe Stable	12	5	6	4,200
F. Gehring, Jr.	9	7	3	3,950
J. M. Stowe	11	7	4	3,895
J. Pelter	10	8	5	3,695

J. H. Adams	5	7	8	2,195
E. C. Griffith	5	8	4	2,070
H. Morris	6	3	7	2,055
C. Henry	5	6	7	2,025

Sasin's victory in the $5,000 Coffroth Handicap was the means of placing him at the head of the money-winning horses, his total being $5,035. The Nevada Stock Farm's speedy gelding Slippery Elm was second on the list, his successes in the Los Angeles Highweight Handicap and the Spreckels Handicap bringing his total up to $3,885. The old Ort Wells gelding General won the largest number of races, finishing in front on eight occasions. The horses which won $2,000 or more are as follows:

Horse.	1st.	2d.	3d.	Amt.
Sasin	4	1	1	$5,035
Slippery Elm	4	1	1	3,885
General	8	7	4	2,845
Sayonarra	5	5	2	2,585
Ed Cudihee	2	1	2	2,565
Inquita	7	6	3	2,510
Scarlet Oaks	5	0	0	2,470
Maud Bacon	7	2	2	2,365
First Degree	7	5	2	2,345
Jawbone	7	1	5	2,330
She'll Do	5	4	1	2,110
Redland	5	6	4	2,055
Dominion Park	5	2	2	2,035

Frank B. Weir has sent Ft. Bliss, Belle Roberts and Helen Atkin, two-year-old winners ruled out for having raced before April 1, to John D. Carr, to be turned out for the remainder of the year.

LIST OF TWO-YEAR-OLDS NOW BARRED.

Of the two-year-olds that had started in races prior to April 1 nothing more will be heard until next season, unless they perform at some unrecognized tracks. The rule disqualifying from competition for the remainder of the year all two-year-olds that raced prior to April 1, holds good with the Jockey Club of New York, the Kentucky State Racing Commission, and the Canadian Racing Associations, and debars until next season the youngsters that took part in racing at the winter meetings. The rule was observed also at the recent Oaklawn meeting at Hot Springs, and though the stables housed plenty of the young horses, ready for racing, no two-year-old events were included in the program. Following is the official list of two-year-olds which raced before April 1:

Anna J.	Imit	Red Clover
Anna Star	Jack J.	Red Snapper
Avon Carey	J. C. Harry	Reilloc
Belle Roberts	Kate Bright	Rita Warner
Billy Nestlehouse	Killdo	Royat
Black Bass	Kio	St. Theresa
Blue Addie	Korin	Sam Hill
Boldness	Lusum	Sandab
Bombast	Macushla	Sena Day
Bracelet	Madelyn C.	Sephus
Candelaria	Man of Honor	Shade
Cavalla	Mary Henshone	Smiling Buck
Copy Cat	May Mauisby	Tampa
Cork	Mildred Euretta	Tantalizer
Curtis Warning	Napoli	Thinker
Doveland	Natty	Trovato Belle
Eastertide	Notate	Tugs
Emily M.	Nowhere	Urapip
Fort Biss	Nudge	Valaspar
Gay Lady	Old Mac	Vanessa Welles
Gertrude R.	Ornery	Victor Munoz
Hargrave	Paula V.	Water Wave
Helen Atkins	Pauline Crowley	Zip
Henry R.	Perch	Zubelda
Ike Mills	Rattan	

Laura Miller (formerly Lizzie Miller).

✤ ✤ ✤

Jockey Charlie Gross, who has been in the saddle for over twelve years, has been engaged to pilot Berlin in the Derby. He has arrived from Tijuana, where he had been riding successfully all winter. Gross will be astride Berlin in all of his future trials, and will the coming season do the bulk of the riding for the Ward stable. Gross rode on the Kentucky tracks two seasons ago, but last year rode on the far western tracks. He can easily tip the scales at 104 pounds.

✤ ✤ ✤

Many Improvements at Churchill Downs.

Louisville, Ky., April 12.—In line with his policy, Col. Matt Winn, General Manager of the New Louisville Jockey Club, is undertaking many improvements at Churchill Downs in preparation for the forty-third annual spring meeting that opens May 12, on which date the $20,000 Kentucky Derby will be decided. Most of the improvements being made are with the view of the accommodation of the record crowd that is expected to turn out Derby day.

In former years the assembling of thirty or forty thousand persons within a limited space worked a hardship on many of the patrons and necessitated much crowding. The lack of sufficient seating accommodations has also proved a big drawback on Derby day.

In order to overcome these disadvantages and give the club's patrons every comfort and convenience, Col. Winn has greatly enlarged the grandstand space by combining it with the paddock grounds, thus turning the two into one enclosure. Hereafter admission to the grandstand will also cover admission to the paddock. The fence that formerly served as the boundary between grandstand and paddock has been removed, and beginning with the spring meeting an extra charge for admission to the paddock will be a thing of the past. This innovation on the part of Col. Winn is bound to prove popular with the racegoers. It has been decided, however, to raise the price of admission Derby Day. The raise stands only on that day. On all other days of the meeting the price of admission will be the same as heretofore.

In anticipation of a record field facing the barrier in the coming Derby, Col. Winn has had the track widened twenty feet near the quarter pole, where the start of the big race will be made. At that point the track is now 100 feet in width. In the work of widening a chute has been constructed, out of which the Derby horses will start on their long trip. This insures a straightaway course from the start, and will obviate the crowding that was inevitable under former conditions when the start of the Derby was made on a turn. It will be possible to line up a field of twenty or more horses under the improved conditions.

In order to provide for the speculatively inclined there will be in operation Derby Day between fifty and sixty pari-mutuel machines, which number is greatly in excess of former years. Forty-nine cashiers will hand out the money to the holders of winning tickets, this being an increase of fifteen over last year. To make room for the additional cashiers, an addition had to be made to the pari-mutuel building.

TIJUANA FIRMLY ESTABLISHED.

James W. Coffroth, president of the Lower California Jockey Club, is laying plans to secure the control of a number of race tracks in the Far West so that an extensive circuit can be launched by the opening of next season. He is negotiating for leases on the turf courses at Phoenix, Ariz.; Denver, Colo.; Reno, Nev., and other points. Coffroth's idea for branching out from his track at Tijuana is to run the meetings in conjunction with the Lower California races, so that the horses attracted here from the East will be afforded places to race the season round.

According to tentative plans already announced, Tijuana will open another 100-day meeting, commencing on Thanksgiving day. Instead of the four stakes that were fixtures at the last meeting, there will be a dozen features with more money tacked on. The value of the $5000 Coffroth handicap will be increased, as will the other handicaps and selling stakes. With the close at Tijuana, the circuit will be arranged with four, and possibly five, meetings in sight.

Coffroth, once the premier boxing promoter, no longer gives the roped arena his attention. It's the "sport of kings" that is the big thing with him, and if his well-laid plans go through he will be the turf power of the West. In August he will make a trip East, and he confidently predicts that he will secure the biggest stables and leading jockeys in the country. He does not figure the war will affect racing.

"Tijuana is now firmly established as a racing center, and no difficulty will be experienced in securing horses," he says. "We have 1,011 stalls at our Lower California plant, and I do not believe they will be enough to accommodate all applicants. At the meeting just closed we gave away $300,525, which is a third more than any other meeting in the country. The statistics prove the bigness of the turf sport in the south."

An innovation to be started next year is the establishment of a breeding farm at the Tijuana track. The Jockey Club will embark in the industry of breeding and raising horses. "The Jockey Club will conduct the breeding farm to supply the necessity for more horses," explains Coffroth. "The horses raised will be sold to the horsemen for the actual cost, plus 10 per cent. This is added because every tenth horse we raise will be presented to the Mexican Government to improve the standard of its horses."

Coffroth points with pride to the fact that the Lower California Jockey Club has adopted rules that are being copied by other associations. The regulations governing the troublesome selling races are the most important. They specify that claims must be filed by owners with horses in the races fifteen minutes before the field goes to the post. The Canadian rule permitted the filing of bids fifteen minutes after the race. Winners are no longer bid up.

Horsemen have hailed the new rule with delight, as it is more of a sportsman's proposition and shoulders certain responsibilities on the claimers. It also has a tendency to do away with the selling-race wars.

The Jockey Club head says that the bookmaking system of wagering will be continued, although he believes the time will come when pari-mutuel machines will be introduced and the length of the meetings will be cut down.

✤ ✤ ✤

STALLIONS FOR SALE.

The Nevada Stock Farm of Reno, Nev., offers for sale the two well known stallions Ossary and Montgomery . Ossary is by the great Ormonde, "the horse of the century," and from the renowned Queen Mary family.

Imp. Countess Langden, dam of Ossary, was also the dam of Count of Flanders (a stake and frequent winner) and Lass of Langden (8 wins). Josyan, his second dam, was dam of winners in England. His next dam, Lady Langden, was dam of Hampton (winner of Doncaster and Goodwood cups, etc.).

Ossary was trained and very highly tried. He started but once as a three-year-old and bowed a tendon in that race, and so was reserved for the stud. Among his get to win in America were Oran, winner of the Great Trial Stake for two-year-olds at Coney Island. He also won the Foam Stake, and was second in the Eclipse and Tremont Stakes. Ossary also sired Sir Wilfred, May L. N., Sir Ormonde, Wiltrude S., Ormuz, Howdy Howdy, Vespasian, Little Red and many other good winners. Among his get to win in England are Ocydrome and Ottery St. Mary.

Montgomery, the other offering, was sired by Pessara, out of Montgomery Cooper by Duke of Kent. Montgomery was a high class stake winner who won the Crescent City Derby, Burns Handicap, California Handicap, etc. He won six races at two years old in 1906, and was a stake winner in 1907, 1908 and 1909 and again a good winner in 1910, 1911 and 1912. He is the sire of Edna F., his first starter who won four races straight. Montgomery is a young horse, having been foaled in 1904 and coming from a great racing family should prove to be a successful sire.

✤ ✤ ✤

"Lucky" Baldwin's daughter Anita, is reported to have patriotically turned over to the government the Santa Anita race track, the Santa Anita ranch and such horses in its stud as are suitable for army use. It is announced that Major-General Franklin J. Bell, the commander of the western department of the army, has accepted the tender.

SADDLE and SHOW HORSES

Read the announcements of the stallion owners in this issue.

✤ ✤ ✤

Write S. E. Kramer, manager, San Francisco Riding School, for a catalogue of the horses to be dispersed by Miss A. E. Farnum, Thursday evening, April 26.

✤ ✤ ✤

Jas. A. Houchin, of Jefferson City, Mo., attended the New York sale the first week of April and reports the biggest demand New York has ever known for saddle horses.

✤ ✤ ✤

D. Schilling, of Chicago, bought a fine young saddle horse from Miss Mary Burnham, of Missouri, last week. He purchased several others of exceptionally clever class from other sections of Missouri.

✤ ✤ ✤

To house the new horse show which will be conducted in connection with the National Dairy Show at Columbus, Ohio, on October 18 to 27, a new coliseum costing $200,000 will be built at the Ohio State Fair Grounds.

✤ ✤ ✤

Bruce Robinson, of Riverside, Iowa, has several nice youngsters in training, among them Iowa Pride, a three-year-old stallion owned by H. F. Griffin, of Riverside. This fellow won the 1916 American Saddle Horse Breeders' trophy at the Iowa State Fair and is a regular "gee whiz," it is said. Another good one owned by Mr. Griffin is Mayla Dare, a beautiful filly by My Major Dare—Mayla, bred by Longview Farm . She is taking to her work in nice shape and both owner and trainer are sure that she will annex the 1917 trophy for this stable.

✤ ✤ ✤

The First Cavalry Riding Academy of Chicago has just issued an attractive circular announcing the appointment of Mr. Holger Rasmussen, as manager of instruction and the boarding departments. The First Cavalry Riding Academy is the most noted institution of this character in the West and Chicago's most exclusive equestrians have made it a highly profitable business. It offers every facility for the full enjoyment of the sport. Beautiful and well trained saddle horses and excellent appointments are furnished. Valet and maid service, also, is maintained. Mr. Rasmussen's extensive experience as an instructor and his national reputation as an exhibitor places his services at a high premium to this well founded academy.

✤ ✤ ✤

Iowa's well known dealer and exhibitor of saddle horses, Bruce G. Robinson, of Riverside, announces the public service of his magnificent young stallion, Rex Ortiz of Denmark, one of the handsomest and most praiseworthy of Rex McDonald's last colts. The colt's dam was Ortiz Belle, a daughter of that most attractive son of old Montrose 106, Ortiz Rose. Black Squirrel 58 and Artist 75 are other great early day sires whose strains are found most frequently in his attractive pedigree. Rex Ortiz of Denmark was bred by the well known breeder and former leading exhibitor, B. R. Middleton, of Mexico, and at the time of the sale Mr. Middleton informed his friends Rex Ortiz was one of the very best stallions his old black King had ever sired. His dam, too, was a beautiful mare and a splendid producer as were his second ,third and fourth dams. As an individual this young stallion stands out head and foot above the average horse, possessing all the qualifications that are expected of a so grandly bred Denmark. He has proven a splendid show horse and there are few animals his age who have more interesting records. He is a horse of the present and future and should receive the patronage of every Iowa mare owner who desires to raise one of the high class saddle horses which are now becoming recognized as the most profitable of all light horses. Mr. Robinson also conducts a public stable and trains and shows many good horses every year. He has splendid facilities and equipment and mares sent to the court of Rex Ortiz of Denmark or to Mr. Robinson to be trained will receive the best of attention and care. Write him at Riverside, Iowa, and mention the Breeder and Sportsman.

THE CHAMPION SADDLE HORSE OF THE WORLD.

The editor of the Breeder and Sportsman desires to acknowledge receipt of several communications from the horse lovers and breeders of Missouri and Kentucky regarding the proposed World Championship Saddle Stake, which we proposed in our issue of April 7. Horsemen everywhere seem to agree with our idea of giving such a stake and declare it will be the most talked-of exhibition of horseflesh the world has ever known. Even the owner of one of the most famous of these horses has written stating that while he had retired his horse from the show ring he would feel that he would be compelled to enter in such a stake as we propose. Most important, however, of the many replies we have received is the following communication from the Hon. Matt S. Cohen, Commissioner of Agriculture and president of the great Kentucky State Fair, who, as is characteristic of his every effort, is a little ahead of all other associations with this communication, which will interest every breeder, dealer, exhibitor, owner and lover of saddle horses in the land:

✤ ✤ ✤

DEPARTMENT OF AGRICULTURE,
LABOR AND STATISTICS.
Frankfort, Ky., April 13, 1917.

The Breeder and Sportsman,
San Francisco, Cal.

Gentlemen: I have just read your suggestion, contained in your April 7th issue, in which you suggest, "Champion Saddle Horse of the World" and taking your "cue," as President of Kentucky State Fair, regardless of the amount raised by public subscription we will duplicate that amount, same not to be less than $1,000; put both "piles" together, charge no entrance, deduct nothing from the money winners, and divide the award as follows: 50% to 1st, 25% to 2nd, 15% to 3d and 10% to fourth, judged by three judges, one to be selected by the State Board of Agriculture of Missouri, one by the same authorities in California, and the third by same body in Kentucky; show to be held at Kentucky State Fair, Friday evening, eight o'clock, Sept. 14, 1917. Besides, we will furnish free stall, free bedding, free feed for each entry, and allow $10 hotel bill for each exhibitor contesting for the award.

Very truly yours,
MATT S. COHEN,
Commissioner of Agriculture.

✤ ✤ ✤

About the best bidding for saddle horses seen in ten years in the New York market resulted last week at Durland's Riding Academy, when eighteen head, owned by S. T. Harbison of Lexington, Ky., were sold under the hammer by George A. Bain for $13,400, an average of $744. Prices ranged from $265 to $2,050, and five horses brought $1,000 or more each. Tiffany Tested, a brown mare of beautiful figure, topped the sale. She was purchased by Miss Marion du Pont, of Wilmington, Del.

✤ ✤ ✤

P. J. Donnelly, of St. Louis, has sold his saddle mare, Dorothy McDonald, by a son of Rex McDonald, to Mr. Harry Lesser of No. 12 Washington Terrace, St. Louis. Mr. Lesser, who is president of the Lesser & Goldman Cotton Company, of St. Louis, is one of the city's wealthiest men and has taken up horseback riding with much enthusiasm.

✤ ✤ ✤

Mr. W. C. Dierks, of Pittsburg, one of the most popular Eastern horsemen who visits Missouri and Kentucky every season, has returned to his home after a visit to some of the leading saddle horse nurseries of the Middle West. He reports a big demand in the East. My Idol was purchased by Mr. Dierks for one of his Pittsburg customers.

✤ ✤ ✤

Ed. White, who has charge of the show stable of John R. Thompson, Chicago, was at Lexington, Ky., the past week in quest of a ladies pair of heavy harness horses, and a three gaited horse, or two of the right sort. Mr. White stated that he had seen several horses that suited his purpose, but none that would go together as a pair. He expects to return to Kentucky and Missouri in about two weeks.

✤ ✤ ✤

The meeting of the Kentucky Fair Association which was to have been held at Lexington, Ky., the past week was postponed until an indefinite date because of the inability to attend of Commissioner of Agriculture Matt S. Cohen, and Secretary of the Blue Grass Fair, Denny B. Goode. Mr. Cohen was on a speaking tour of the southern portion of the state and Secretary Goode was unexpectedly called to Louisville.

✤ ✤ ✤

The announcement of Myron H. Oppenheim, New York sportsman, buying a stable of saddle horses and considering champions only in his selections, is most encouraging news to the breeders of saddle horses, as it substantiates the talk that is going on of the popularity of saddle horses in the East. Included in his purchases have been Jack Barrymore, world's champion, Johnny Jones, Missouri champion, and Sport King, future champion.

While there have been some most remarkable sales of saddle horses in the East and Middle West since the first of April, establishing the truism of the great back to the saddle movement which is sweeping the United States at the present, a California sale has attracted horse lovers' attention with equal notice on account of the prominence of the purchaser in horse affairs. Tom Mason, the well known Santa Barbara, California, horseman, having sold his beautiful young stallion, Cy Mason 6892, to C. K. G. Billings, who has shipped him to New York, along with the other members of his stables he has been using in California this winter. The price paid for this most attractive and grandly bred young stallion was $1,500. Mr. Mason has several high class horses in his Santa Barbara stables and is one of the leading breeders of California.

✤ ✤ ✤

Election of Officers.

The officers elected at the recent American Saddle Horse Breeders meeting were: John B. Castleman, president; Claude M. Thomas, I. H. Thurman and Powhattan Woolridge, vice-presidents. Roger Lillard was re-elected secretary. The Board of Directors selected were composed of John B. Castleman, Claude M. Thomas, E. W. McCormack, Jas. Houchin, J. L. Gay, Gus Ball, I. H. Thurman, John T. Woodford, John T. Collins, L. L. Wells, R. A. Long, Powhattan Woolridge, A. G. Jones, U. G. Saunders and Milo R. Clanahan. The State Vice-Presidents chosen were:

Missouri, Prof. E. A. Trowbridge, Columbia; Alabama, W. E. Reynolds, Warrior Stand; Colorado, Bruce G. Eaton, Eaton; Connecticut, Samuel Russel, Jr., Middletown; Georgia, S. M. Carter, Carters; Illinois, Milo R. Clanahan, E. St. Louis; Indiana, Benj. Johnson, Richmond; Kentucky, J. W. Garrett, Ft. Garrett; Louisiana, G. M. Hutton, Minden; Maryland, E. C. Walton, Cumberland; Mississippi, J. T. Atterbury, Estill; New York, Roswell Eldridge, New York City; Ohio, W. S. Robinson, Mt. Sterling, Ky.; Oklahoma, W. T. Miller, Porum; Tennessee, T. H. Hartmus, Jackson; Texas, H. E. Allen, Gainesville; Virginia, D. W. Mason, Riple Mead; West Virginia, O. H. Hoffman, Thomas; California, C. H. Ragsdale, Merced; New Mexico, H. S. Burnham, Castleberry; Arkansas, Burton O. George, Berrville; Dist. of Columbia, M. E. Joyce, Washington; Hawaii, A. F. Knudsen, Kakaha; Canada, O. D. Weeks, Cardston, Alberta.

✤ ✤ ✤

The most interesting sale of saddle horses made in many seasons was the purchase by Myron H. Oppenheim, of New York, of the two sensational saddle geldings, Jack Barrymore, winner of the Panama-Pacific championship and Commissioner of Agriculture stake at Louisville; and Johnny Jones, the noted chestnut, winner of the five gaited championship at the Missolri State Fair last year and numberless other stakes of similar note and prominence. The price for Johnny Jones is reported more than $10,000. However, a statement from his seller, Col. Paul Brown, of St. Louis, has not been received and until he announces the price we will not publish the scores of prices he is reported to have received. H. B. Thornberry, of Stockton ,Cal., who sold Mr. Oppenheim the famous gray gelding, Jack Barrymore, was in San Francisco this week and said that the new purchaser did not care to make the price public; but that it was a very satisfactory one, and, knowing Mr. Thornberry did not want to sell the horse, the writer is sure that it was one of the biggest prices ever paid for a horse. He also took in two horses as part payment. Both horses will remain in Ed Moore's stable and be exhibited by the well known Missourian through Missouri and Kentucky this year and finally wind up at the National in November. Mr. Moore will exhibit them at Durland show and the Brooklyn show this spring, and immediately after will return them to his stable at Columbia, Missouri, for further preparation.

✤ ✤ ✤

Females of Proven Value as Breeding Animals Profitable During Later Years.

The above photograph shows Ruth McDonald 3229, by Rex McDonald 833, the dam of many noted saddle horses. She is the property of the Missouri College of Agriculture and is the dam of three splendid young horses now owned by the farm and which have attracted much attention. These three youngsters are by Astral King and Kentucky's Best, and it is said are as attractive a trio as these great stallions have ever produced.

Notes and News

The Wisconsin State Fair dates are September 10 15 inclusive.

✤ ✤ ✤

Bowling Green opens the fourteen weeks of racing the Ohio Racing Circuit June 5 to 8.

✤ ✤ ✤

The harness races at the Illinois State Fair this ear will total $26,000 in purses and stakes.

✤ ✤ ✤

Robert L. Taber, secretary, announces the dates of October 9, 10, 11, 12, 12 for the great Riverside ounty Fair.

✤ ✤ ✤

Every one of the thirty-two early closing purses October 9, 10, 11, 12, 13 for the great Riverside regate $43,500.

✤ ✤ ✤

The Wisconsin State Fair is the only racing organzation outside of the Grand Circuit giving two $5,000 takes this year.

✤ ✤ ✤

A. B. Coxe, of Nawbeek Farm, Paoli, Pa., reports he arrival of his first 1917 foal. His great mare, onia Worthy 2:22¼, by Axworthy 2:15½, having oaled by Peter the Great.

✤ ✤ ✤

The Iowa State Fair management has adopted the ne-man-judge plan for the races in connection with he 1917 fair and has secured Magnus Flaws, of Chiago, to act in that capacity, as he has previously one at Des Moines.

✤ ✤ ✤

The article by J. D. O'Keefe, of Woodland ,under he captain of "The Care of the Colt's Feet" in last eek's paper has attracted a great deal of praise rom readers. Saddle horse men especially have expressed their appreciation of this excellent advice nd warning.

✤ ✤ ✤

"We not only aim to entertain the thousands of atrons who attend every day's fair but to encourge harness racing and the breeding of harness acing horses," writes that popular and capable secetary, Oliver E. Remey, of the Wisconsin State Fair.

✤ ✤ ✤

In 1916 the trotters and pacers descending in the irect male line from Bingen won 680 races of the alue of $284,000. The direct male line descendants f Peter the Great won 305 races valued at $172,000. he explanation lies in the fact that sons, grandsons nd great-grandsons of Bingen are siring trotters and acers to an extent never before approached by the escendants of any other horse, while the "Peter amily" makes a notable showing in the first genera-

✤ ✤ ✤

Col. Matt Winn, General Manager of the New ouisville Jockey Club, is enthusiastic about the reat Kentucky Derby which will be decided on May 2. He declares it will be the most sensational one ecided in many years. He lays emphasis on its mportance from an international view, owing to the ecord number of foreign-bred colts in the race. The nere fact that these foreign-breds, representing the est and purest stock of British blood, are to meet he best of the American-breds, is in itself sufficient o make the contest most noteworthy.

✤ ✤ ✤

The stable of George H. Estabrook, of Denver, is working nicely at Overland Park in the hands of Ollie Graves. Both Colorado Range (3) 2:08½ and E. Colorado, the three-year-old son of Colorado E., are working satisfactorily. Ollie has some very promising young things by Colorado E., two twoyear-old pacers by Peter O'Donna 2:08 and Direct Pointer, a young son of Baron Direct. There are around seventy horses in training at Overland Park, and some good material among the other trainers, also.

✤ ✤ ✤

The report of the purchase of Allen Farm by the government for $250,000 turns out to be a canard. The government would like to buy the place and $250,000 has been mentioned as the price, but that's all.

✤ ✤ ✤

Belle Ashland 2:10, one of the last trotters raced by the late Crit Davis, recently foaled a bay colt by Peter the Great at the farm of Rhodes Estill, one of Kentucky's prominent planter-horsemen. Belle Ashland is the fastest trotter ever gotten by her sire.

✤ ✤ ✤

The Stake Book of the North Pacific Fair Association is out and copies may be obtained by addressing Secretary John W. Pace, Seattle, Wash. The Circuit will commence August 20, 1917, with the Vancouver, B. C., Exhibition, followed by the Southwest Washington Fair, then the Spokane Interstate Fair, the Grays Harbor County Fair; the Washington State Fair, and winding up with the Oregon State Fair at Salem the last week in September. $75,000 is offered in stakes and purses and classes seem to have been selected that will ensure a large entry list. Full particulars and conditions for these races will be found in the advertising columns of this issue.

Springfield, Ohio, noted for good fairs and horse shows, announces the date of August 14 to 17 inclusively for this year's fair.

✤ ✤ ✤

J. B. Stetson writes that there will be some regular racing this year in the corn belt.

✤ ✤ ✤

Elmo Montgomery, of Davis, owner of Jim Logan and others of note, was a San Francisco visitor last Saturday.

✤ ✤ ✤

Engle & Latshaw, of Wilson, Kansas, have purchased Todd Echo p. (2) 2:11¼, from E. A. Decker, of Dayton, Ohio.

✤ ✤ ✤

There will be a good race meeting at Beatrice, Nebraska, the last week in June.

✤ ✤ ✤

Dave Wilcox has six head of good horses in training at the Guthrie, Okla., track.

✤ ✤ ✤

George Gano p. 2:02, has been sold by the International Stock Farm, Savage, Minn., to W. J. Buckingham, Onida, S. D.

✤ ✤ ✤

Remember the sale at the Riding School, Seventh Ave., Thursday evening, —twenty-four head sell for the last bid.

✤ ✤ ✤

Col. Carey M. Jones, the noted Shorthorn salesman ,will cry the sale of Shorthorn cattle for W. M. Carruthers, at Mayfield, California, May 2.

✤ ✤ ✤

Harry Brusie, of Windsor Locks, Conn., last season's leading race winning driver on the double-O's, has in his 1917 stable Koroni 2:12½, Monte Volo 2:16¼, Miss Zombro 2:23½ and Donna Belle W. (2) 2:29½, now three.

✤ ✤ ✤

Fanella 2:13, for several years considered one of the greatest matrons, died last week at Hilltop Farm, Buffalo, N. Y., the property of George P. Urban. She was the dam of Todd 2:14¾, Sadie Mac 2:06¼, Magowan 2:09¾, and others.

✤ ✤ ✤

M. L. Woy, of Fresno, one of the leading horsemen in the Pacific Coast states, was a San Francisco visitor last week. Mr. Woy reports his youthful trotters making splendid progress. He came up to register a "kick" at the reclassifying proposition at the California Fair and Racing Association's meeting.

✤ ✤ ✤

It is stated that a prominent New England horsemanhas signified his intention of donating his winnings this year to the Red Cross fund. This is certainly a fine example, and in order not to be outdone in patriotic ardor all who race against this man's horses should see that they win every time they start, and the judges should close their eyes so as not to witness any infraction of the rules. The scheme may be a little tough on the race-goers, but everybody should be willing to make sarcifices in war times—[Trotter and Pacer.

✤ ✤ ✤

Don't sit around worrying about what the other fellow's horse is going to do. Step lively, work your horse regularly, hustle, mind your business and be quiet and you will have 'em all worrying about what yours are going to do.

✤ ✤ ✤

A good deal of curiosity is being manifested as to the reason why Miss Harris M. 2:01¼ has not been named in any of the free-for-alls this season. She was at last accounts in fine condition in Lon McDonald's stable, and it seems strange that she has not been entered. Perhaps she is being saved for some of those big half-mile track free-for-alls at Trenton, Allentown, Rutland and other places.

✤ ✤ ✤

Last Thursday Millard Sanders left for Indianapolis with Peter's Queen, the Peter the Great mare belonging to Geo. W. Lowery. This mare has shown wonderful improvement, in her work, over her last year's form. Last Saturday Millard Sanders drove her a half mile at Pleasanton in 1:04 with the last quarter in 29½ seconds. She has filled out and looks better than at any time before and Mr. Sanders expresses the opinion that he will be able to show her to be the fastest trotting daughter of Peter the Great when he starts her on the Eastern tracks.

✤ ✤ ✤

The United States department of agriculture reports a decrease of 33,000 horses in this country last year, and 69,000 since January 1, 1915. Would-be prophets see in these figures the beginning of a rapid decline in the horse industry, due to the development of motor traction power.

It is evident that fewer colts are being raised than in former years, and without growing stock a decline in number of horses is inevitable; but while we are losing in numbers we are gaining steadily in quality. There are many more purebred horses in the United States today than ever before, and greater interest was never taken in the breeding of high quality horses than at the present time. The Percherons among the heavier breeds are coming to the front in the East, and the old time interest in standard-breds is well maintained.

A continued falling off in number of horses need not necessarily mean a serious decline in the breeding of good pure-bred horses of quality and action, for which there will always be a demand at profitable prices.

Remember, a horse whose owner does not thing it worth advertising is not worth breeding your good mares to.

✤ ✤ ✤

George W. Oliver, Salmon ,Idaho, wants to sell that well bred stallion, Mannister, a son of Walnut Hall; a proven show horse, speed merchant and sire.

✤ ✤ ✤

Let the Breeder and Sportsman get out your stallion cards. We are prepared to do the best work at the most reasonable prices.

✤ ✤ ✤

Preparedness is the word of the hour. The horseman who sends his stable out without every accessory makes a grave mistake. Call on J. David West, Fillmore street horse goods merchant, and prepare for the coming prosperous season.

✤ ✤ ✤

Twenty-four head of royally bred young Thoroughbred and Standard bred horses sell at the San Francisco Riding School, Thursday evening, April 26.

✤ ✤ ✤

Don't forget the auction sale of thoroughbred and standard bred horses which will be held at the San Francisco Riding School next Thursday at 7:30 p. m. It is rarely that such an opportunity to obtain high class and royally bred young horses is presented. The few thoroughbreds offered are sired by Marse Abe, son of Yankee and Halo by St| Blaise. Marse Abe was a superior race horse and during his turf career won many races, including the Juvenile, Carnival and Niagara Stakes. Halo, his dam, also produced Bauble, a two-year-old stake winner, and Red Light, winner of seventeen races. Ida K., his second dam, produced Ida Pickwick, 44 wins at all distances and Indigo, a winner and dam of Go Between.

This family's descendants include such high class winners as Ten Candles, Troubadour, Windrush, Pupil, Cunard, Keenan, Oarsman, Gonfalon, Harry of the West, etc.

The standard breds offered are sired by Flosnut, a son of Nutwood Wilkes, and Dillcara, a son of Sidney Dillon and Guycara by Guy Wilkes. Dillcara is a full brother to Harold Dillon, for many years the leading sire of New Zealand. The dams of these horses offered for sale carry the blood of Electioneer, Nutwood, Geo. Wilkes, Dictator and McKinney. The most fashionable lines of breeding now in vogue. They are an exceptionally fine lot of individuals, all good prospects that have never been handled or abused. Catalogues are now ready and may be obtained at this office or from S. E. Kramer, San Francisco Riding School.

✤ ✤ ✤

Vancouver Driving Association Notes.

Vancouver, B. C., April 17, 1917.

To the Editor.

Dear Sir: The Vancouver Amateur Driving Association held its annual meeting last week and decided to continue in the game for at least another season.

Conditions are not altogether as favorable as we would like them to be but there is a feeling that a better day is about to dawn for the horse interests of this city. There are twenty-five to thirty horses in the vicinity of Vancouver capable of putting up good matinee contests and it is hoped the owners of all of them can be induced to support the game this year.

Mr. George Bell, foreman of P. Burns & Company's horse department, is unfortunately leaving the city and he and his good trotter Chromo will be much missed. George has been an ardent supporter of the game for some time.

A number of young animals are coming on, as about 1911 and 1912 there was a considerable amount of breeding done here. Mr. A. Ronan's two good Belmar fillies, Miss Ross and Miss Ronan, will be trained and matineed as will Mr. Dickson's pacer Belbar by Belmar, dam Delbars 2:11¼ by Monbars. This colt appeared last fall, in the one start he made at the Exhibition races, to be a pretty fair pacer. T. A. Morrison's Bland S.—Nellie Wilkes colt is now four years old, and notwithstanding his poor showing as a two-year-old his owner expects him to be hard to beat this season.

Nellie Wilkes is, I am informed, out of the dam of the champion William.

It is entirely likely that Mr. F. B. Loomis will move his string, including Frank D. Nichol 2:24¼, a trotter capable of trotting a half mile track in 2:15; Caress, a green pacer but fast; Prince Malone 2:15¼; Prince Pat, three-year-old trotter by Prince Ansel out of the dam of Prince Malone; McKinney Patchen by Bonnie McKinney out of Josie Patchen; Red Squirrel by Bland S. 2:03¼, dam Chipmunk by Lecco, and others from the mile track at Minoru to the half mile track at Hastings Park, this latter being within the city limits and the track where the races are held, which will popularize the game.

Five or six horses from Victoria are likely to be trained this year.

The officers for the Vancouver Amateur Driving Association for this year are: President, W. C. Brown; vice-presidents, A. R. Miller and E. S. Davidson; secretary, Dr. A. Milloy; treasurer, Alderman W. C. Marshall. Executive Committee: Mr. Geo. Hardy, D. W. F. Macdonald, D. K. Campbell, S. Tees, and E Burgoyne, the latter being the present owner of Bon Guy 2:09¼.

Yours truly, W. C. BROWN.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

April 22—Tacoma, Wash.—Northwest Washington Trapshooters' League Tournament ,under the auspices of the Tacoma Gun Club. E. E. Young, Secretary.

April 23, 24—Lewiston, Idaho—Lewiston Gun Club. C. E. Butler, Secretary.

April 28, 29—Fresno, Cal.—Fresno Blue Rock Club. C. B. Jackson, Secretary.

May 6—Coalinga, Cal.—Coalinga Gun Club. E. N. Ayers, President.

May 6—Bingham, Utah—Utah State Sportsmen's Association. A. R. Bain, Secretary.

May 6—Denver, Colo.—Denver Trap Club. Warren Conley, Secretary.

May 7—Crete, Nebr.—Crete Gun Club. Frank J. Kobes, Secretary.

May 7, 8—Salem, Oregon—Oregon State Tournament, under the auspices of the Capital City Rod & Gun Club. Mark Siddall, Secretary.

May 13—Everett, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Everett Gun Club. C. E. French, Secretary.

May 13—Eureka, Cal.—Eureka Blue Rock Club. W. E. Innes, Secretary.

May 13, 14, 15—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary.

May 14, 15, 16—Spokane, Wash.—Spokane Gun Club. "Old Policy." Chas. A. O'Connor, President.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden, Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

✣ ✣ ✣

Southern California Casting.—After spending many hours in diligent search of records and the wasting of much perfectly good lead pencil Ray Shaver of the Southern California Rod and Reel Club gave out the prize winners of the winter casting tournaments. There were many handsome medals up for the casters this year as well as many other valuable prizes.

One of the best things about the winners this year is that no one man gets any great number of trophies. They are very well distributed. However, E. J. Kennedy and Oscar Lane did annex more prizes than any other casters. They were deserving, for they made excellent scores all through the winter tourney.

Following are the winners of prizes in the winter tournament for 1916-17:

H. T. D. F. accuracy—E. J. Kennedy, class A, medal, 99 4-15; J. J. Low, class C, bar, 91; qualified B.

H. T. F. accuracy—Kennedy, class A, medal, 99 24-25; Low, class B, medal, 98 26-45, A.

H. T. F. distance—Kennedy, class A, bar, 94 feet 6 inches; Low, class B, medal, 80 ft. 6 in., A.

Half-ounce accuracy—Oscar Lane, class A, bar, 98 13-30; A. E. Perkins, class B, 96 27-30; S. Baker, class B, 96 27-30; F. Kling, class C, medal, 94 2-30.

Half-ounce distance—Lane, class A, medal, 205 ft.; Perkins, class B, medal, 147 ft. 8 in.; C. J. Lenarth, class C, bar, 129 ft. 8 in.

L. T. F. accuracy—Kennedy, class A, gold medal.

L. T. D. F. accuracy—Kennedy, class A, gold medal; Low, class B, silver, qualified A.

L. T. F. distance—Kennedy, class A, bar; Low, class C, bar, qual. A.

Roll Fly—Kennedy, A, bar; Charles Van Horn, B, bar; Low, c, bar, qual. B.

Quarter-ounce accuracy—Lane, A, bar; S. Baker, B, bar; C. J. Lenarth, C, bar, qual. B.

Quarter-ounce distance—Kennedy, A, gold medal; Perkins, B, silver medal; Geo. Bongreve, C, bronze medal; Lenarth, qual. B.

2½-ounce distance—Perkins, A, medal; George Bongreve, C, medal, qual. A; Kling, qual. A; Low, qual. A; B. C. Hibbits, qual. A.

2½-ounce handicap—Hibbits, gold medal.

Grand total average:—

H. T. D. F. accuracy—Kennedy, A, gold medal;, 99 4-15; Van Horn, A, 98 13-15; Low, C, bronze bar, 97.

H. T. Fly accuracy—Kennedy, A, gold medal, 99 24-25; Van Horn, A, 99 9-45; Low, B, silver medal, 98 26-45.

H. T. Fly distance—Kennedy, A, gold bar, 94 ft. 6 in.; Van Horn, A, 75 feet; Low, B, silver medal, 80 feet 6 inches.

Half-ounce accuracy—Oscar Lane (class A) gold bar, 98 13-30; Kennedy (A) 97 24-30; Perkins (B) 96 27-30; Baker (B) 96 27-30; Van Horn (B) 96 16-30; Lenarth (B) 96 9-30; Frank King (C) bronze medal, 94 2-30; Bongrebe (C) 93 3-30.

Half-ounce, distance—Lane (A) gold medal, 205 feet; Kennedy (A) 154 ft. 8 in.; Perkins (B) silver medal, 147 ft. 8 in.; Baker (B) 147 ft. 4 in.; Lenarth (C) bronze bar, 129 ft. 8 in.; Van Horn (C) 96 ft. 8 in.; Bongrebe (C) 79 ft. 4 in.; King (C) 77 ft.

L. T. F. accuracy—Van Horn (C) medal, 66 7-45; Low (A) 98 12-45; Kennedy (A) gold medal, 99 21-45.

L. T. D. F. accuracy—Kennedy (A) gold medal, 99 27-45; Low (B) silver medal, 99 5-15; Van Horn (C) 96 11-45.

Roll Fly, distance—Kennedy (A) bar, 79 ft. 2 in.; Low (C) bar, 72 ft.; Van Horn (B) bar, 44 ft. 4 in.

L. T. F. distance—Low (C) bar, 79 ft. 6 in.; Kennedy (A) bar, 90 ft.; Van Horn (C) 48 ft. 10 in.

Quarter-ounce, accuracy—Lane (A) bar, 98 19-30; Kennedy (B) 97 11-30; Baker (B) bar, 96 21-30; Bongrebe (C) 93 17-30; Perkins (C) 94 26-30; Lenarth (C) bar, 97 16-30.

Quarter-ounce, distance—Lane (A) 138 feet; Kennedy (A), gold medal, 148 ft.; Baker (B) 78 ft. 8 in.; Perkins (B) silver medal, 76 ft. 4 in.; Lenarth (B) 82 ft.; Bongrebe (C) bronze medal, 48 ft.

2½-ounce, distance—Perkins (A), gold medal, 237 ft. 8 in.; Kennedy (B) 182 ft.; Baker (A) 230 ft. 2 in.; Lane (C) 154 ft. 4 in.; King (C) 174 ft. 8 in; Low (B) 174 ft. 8 in.; Hibbets (C) 167 ft. 4 in.

2½-ounce, handicap—Perkins 138 feet, Bongrebe 186 ft. 2 in.; Lane 135 ft. 11 in.; Kennedy 68 ft. 8 in.; Baker 179 ft. 10 in.; Hibbets 192 ft. 1 in.; King 131 ft. 8 in.

Game Refuge Assured.—Marin county's great game refuge, covering practically all the wooded hills in the southern part of the county, needs but the approval of the State Assembly and the Governor to become an established institution. The Senate has voted in favor of the bill creating the vast park, and all indications point to little or no opposition in the Assembly to Assemblyman Sharkey's measure becoming a law.

The measure provides for the creation of a game refuge bounded by a line extending from Bolinas bay to Fairfax, then south to Sausalito, to a point southerly from Sausalito along the coast to the eastern extremity of Bolinas sandspit and then back to the starting point. The thousands of acres in this area include some of the finest hunting grounds in the state. Deer abound and quail are plentiful throughout the section, which includes all of the Marin municipal water district, the Mount Tamalpais section and Bolinas Ridge.

All game birds and animals will be given absolute protection within the borders of the preserve. To make assurance doubly sure, the possession of grearms, traps or contrivances to kill or take protected birds or animals will be made a misdemeanor, except within the limit of incorporated towns.

Fishing will be permitted, but all anglers will be under certain regulations.

Butte, Mont.—Fishermen in this section of the country will have a dandy trout season next year unless something unforeseen happens. The Butte Anglers' Club has just finished planting 750,000 fry, which is the largest number ever planted in this part of the country. The club now has a membership of 1,000 and shows signs of doubling that number before very long. It was to take care of the expected increase that the officers of the organization had the trout planted.

ONE FISHING TRIP BEFORE WAR.

Sportsmen Getting Ready to Enjoy Opening of Trou Season Before Taking Up Arms.

Sportsmen seem to have made up their minds tha if fight we must, there will be at least one good fis ing trip first.

War has failed to put much of a damper on fly casting enthusiasts. At least the advance sale o angling licenses indicates no dampening of ardor.

In Southern California an increased output of 5 percent is noted as compared with April 8, 191 While some of this is chargeable to the country-wid spirit of "preparedness" manifesting itself even i minor details such as being fore-handed with spor there is a growing opinion that this is to be th greatest fishing season the south ever has seer Those who can do so evidently plan to enjoy i Reports are also encouraging in the northern part o the state.

Fish and Game Commission deputies put in a bus Sunday patrolling streams in their various territorie Reports continue to pile up encouragement for th angler. Wholesale arrests following the announce ment of special watching along the creeks, bego wholesome fines, and while no one thinks every ma can be induced to play square with his fellow fisher the State policy of education covers both the clas amenable to appeal and the class deaf to all but fea of arrest.

Deputy Harry Pritchard gave that picturesque li tle streamlet the Topanga the "once over" and say there is a chance for a little fishing in its mile or s of "navigable water" from the trout's point of view There was only once last winter that it rose enoug to admit "spawners" over the bar at its mouth Santa Monica anglers usually "clean" the Topang the first day, but sometimes a nice basket of fis is taken there by the "early birds."

Deputy Ed H. Ober writes from Big Pine that th snow is nearly all gone from Long Valley and th weather beginning to warm up, but the nights ar still cold. He says there will be good fishing in th Owens River at the opening; no trouble to get all th good-sized trout wanted, but fly-fishing will be late As the seasons on trout and bass open the sam time, May 1, in District No. 1, Ober offers the angle his choice, Halwee Lake being full of the big blac ones, to be caught right from the dam. Continuanc of warm weather will mean better opening sport tha usual by May day throughout the Owens Valley ger erally as there has been normal snowfall this pas winter, and the fish got a good rest last spring January, 1916, set a record for snowfall in the mem ory of the oldest residents.

Reports received last week that the water was s unseasonably low in the Santa Ynez that the ne $300 fish ladder, which the Santa Barbara Wate Company installed over its Gibraltar dam, was no operating, disconcerted the Fish and Game Commis sion seriously, being due to the one thing that law cannot reach, namely, lack of rainfall. Kindly Na ture stepped into the breach Sunday and Monday with showers up the Coast, which probably hav raised the water levels to normal, and permitted th spawn-laden steelheads to pass on up the main river They were reported fairly boiling the water in th pool below the dam. Thousands of fish passed safel up the Santa Cruz some miles below the Gibralta dam. This storm should safely free the fish, and al but those which have retained their spawn longe than normally, will probably be able to do their dut by nature and the angling licensee after all. Fores rangers unite with Deputy Fish and Game Commis sioner Henry J. Abels in predicting a great seasor for the Santa Ynez, a good rain now being the very best thing that could happen to it.

Rain will help all the up-coast streams by riddin them of some of the moss, and sustaining the swapn ing run, as well as keeping up the water levels fo opening day. Low water is dangerous; the trout are too soon cleaned out by those who cannot locate them in higher water when the fish cannot be so readily seen.

No rains will be bad unless showers should rile the streams just before the opening, and then they will merely postpone the sport a few days, keeping it up longer.

Things are moving in Bear Valley, where Louis Phillips of the State Fish Cultural Department is superintending the taking of eggs for the Commis sion. They are hoping for a million harvest this spring, with fair chances of getting them under more favorable conditions than last year, when the floods bar-bound the fish, and many buckets of eggs suf fered from the over-retention, showing in the low fertility. The hatchery, however, put out some three-quarters of a million fry, which were planted in the lake and in San Bernardino mountain streams, where they had a splendid winter with little stream scouring, and should prove the best sport this sum mer that these little creeks have ever given the fly-fisherman. The dreadful flooding of January, 1916, cleaned many of the canyons, and thus may not prove wholly a bad thing in the end, now that Southern California, thanks to the Mt. Whitney hatchery, has the equipment to artificially repair such occasional devastations of the fish life in her watersheds.

W. J. TERRY AND TONEY PRIOR IN TIE.

Close Race at Golden Gate Club Shoot with Four Others Deadlocked For Second.

The Golden Gate Club's monthly shoot on Sunday at the Alameda grounds produced a beautiful race between W. J. Terry and Toney Prior. Terry finally struck his gait after being off form for several weeks and snuffed out 49 out of the regular program of fifty targets. The consistent Toney Prior was there as usual with a like score and the pair had to divide the honors. For second place the contest was just as close and exciting. The youthful Ted Handman, Barney Worthen, H. R. Phinney and H. A. Ray got 48 out of 50. It was a day of high scores with Tom Wilkes, A. G. Flickinger, Al Durney, Frank Webster and C. H. Lancaster landing forty-sevens.

The professionals on the ground had some contest themselves. O. N. Jones, familiarly known as "Onion," topped the bunch with 44x50. Larry Middleton, "Just Wait For Me" Moore, Larry Middleton and Harry Truscott were second with forty-ones. The scores were as follows:—

	——Events——			
Shooter.	20	20	10	Total
*F. W. Blum	14	12	5	31
George Thomas	18	16	10	44
A. M. Gearhart	15	15	9	39

*Professionals.

SALT LAKE CLUB.—Shooting a high wind, which proved fatal to good scores, J. F. Cowan on April 8 led a strong of about thirty promising trapsters in the event for the handicap loving cup with a score of 47x50. Cowan was one of a very few who were able to defy the wind. At the start of the shoot the weather conditions were favorable and it looked as though the gunsters would be given a fair chance to break the dickies and make good records. The race had no more than started, however, when a windstorm swept over the traps.

A special event was arranged between Welch and Fowler for the purpose of determining the winner of the tie shoot March 18th. This proved to be a hard-fought event. Welch was the winner, 20x25.

The match between E. B. Heagren and Shepherd also proved interesting as the event was to decide the winner of the cup on March 25. The race was very close until the last, when Heagren outwinded Shepherd by two birds. Shepherd fell down in his last five shots.

A tie resulted in the event for the club challenge trophy between C. H. Reilley, L. E. Riter and H. W. Heagren. The three men each broke 22x25, but Reilley, the present holder of the trophy, retained the ownership and the other two gunsters received equal portions of the pot created for this event.

L. H. Murdock, president of the Ely Gun Club, was a visitor at the Salt Lake Gun Club traps. The scores:

Cowan 47, Riter 45, Irvine 44, Tingey 43, Fisher 44, Luff 42, Bishop 40, Reilley 39, Humphry 39, Bain 39, Welch 38, E. B. Heagren 38, Murdock 37, Shepherd 37, H. W. Heagren 37, *McGanney 36, Mitchell 36, Orlob 34, Fowler 34, Smoot 25, Brown 23.

Beginners—Pearson 23, Barney 19, Anderson 15, Spry 15, Bailey 12, Culbert 11, C. Mitchell 10, W. Lunden 8.

Portland Club—Frank M. Templeton, winner of the Pacific Coast handicap last September, has issued a challenge for the W. C. Bristol 20-gauge gun trophy and the contest will be shot at the Portland Gun Club traps at Everding Park. A. L. Zachrisson has the cup now.

Before the trophy can be put up at least ten nimrods have to step to the traps along with the challenger . Any one of them is eligible to win the honor ,but all must use the famous 20-gauge gun for the 25-bird race.

Several members of the Portland Gun Club are getting ready to take in at least one of the big registered trapshooting tournaments of the Northwest. Among them are John G. Clemson, Frank M. Templeton, James W. Seavey, E. H. Keller, Arthur K. Downs, E. B. Morris, Peter J. Holohan, James K. ("Our Jim") Simpson, president of the Seventson, Wash., Gun Club; Felix Friedlander, A. W. Strowger and Henry R. Everding, secretary-treasurer.

The shoots which are being considered are Lewiston, Idaho, Gun Club, April 22, 23 24, and the Washington State amateur title at Seattle under the auspices of the Green Lake Gun Club, April 28, 29, 30.

H. A. Pollock, vice-president of the Portland club, will not take in any of the early shoots, for he is waiting for the annual gathering at Palouse, Wash., later in the year.

Pollock was named manager of the Portland team at the Palouse shoot last year and he made such a success of it that he was re-elected. Since he became the team manager several big victories have been recorded. Tryouts for the team will be held within a short time.

Nineteen nimrods were out to the Everding Park grounds April 8th to take a fling at the bluerocks. Allan W. Strowger was high gun with 91 "dead ones" out of 100. James W. Seavey was next in line with 89, while James P. Bull, a professional, broke 84 out of 100.

Following are the results of the shooting:

Targets—	25	25	25	25	T'l
*W. C. Bristol	18	16	15	..	49
†J. P. Bull	20	21	25	18	84

*With .20-gauge gun. †Professional.

Green Lake Club.—With but two weeks more in which to practice for the coming state tournament at the Green Lake grounds of Seattle, Sunday and Monday, April 28, 29 and 30, a good crowd was out to Green Lake both Saturday and Sunday, sharpening up their shooting eyes for the "big shoot."

In the Sunday program of April 8th Matt Grossman and R. S. Searle headed the list, with but one miss in their strings of fifty. Several scores of forty-seven were made, but none of forty-eight. C. E. McKelvey led a field of eight entries in Saturday afternoon's program, getting ninety-five out of his hundred. With the wind and rain, this was a very excellent score.

Matt Grossman won the stirling silver spoon which the club gives each week. Fitzgerald and Grossman were tied, with their added targets, Fitzgerald leaving without shooting off the tie.

From reports received both from within and without Seattle since programs were mailed last week, the Green Lake management feels confident of a hundred marksmen when the state tournament is called to order. From a canvass made of trapshooters in Seattle alone, this city will furnish between forty and fifty contestants. Large delegations from Portland, Spokane, Tacoma and Bellingham have already promised they will be on hand. With the low entrance and large amount of added money, a program has been arranged which should appeal to both the beginner and the "old-timer."

On Sunday, April 22, the second league shoot will be held over the Tacoma traps. Several of the Green Lake members are planning on attending, going over in the morning in automobiles. The scores:

At 50 targets—M. Grossman 49, R. S. Searle 49, A. A. Riehl 49, L. H. Hopkins 47, Dr. King 47, E. K. Van Vleck 46, L. S. Barnes 46, C. B. Fitzgerald 46, G. A. Conklin 46, W. H. Carsten 46, *I. M. Fisher 45, Will Smith 45, Hi Follrich 44, Dr. S. W. Case 44, C. W. Bandy 42, George B. Baker 41, Dr. A. B. Kidd 41, G. O. Colwell 38, H. Gosgrove 37, Dr. E. C. Lanter 36, D. R. Baker 35, M. A. Rosenfield 34, Dr. S. W. Giffin 32, Roy Kinnear 31, H. E. Gleason 26, D. L. West 26.

Saturday, April 7, at 100 targets—C. E. McKelvey 95, Hugh Fleming 93, Dr. O. L. Templeton 93, *L. H. Reid 92, J. H. Templeton 84, J. H. Davis 77, J. B. Lewis 77, J. Gibson 73.

Albert Schumm and Adolph Salmon, two well-known fishermen of Manteca, Cal., while fishing in the San Joaquin River one night recently, caught a sturgeon in their seine which weighed 296 pounds. It was seven feet nine inches long and contained twenty-seven pounds of spawn. This is said to be the largest sturgeon which the San Joaquin has ever yielded up.

Seattle Association—Weather conditions were ideal and some good scores hung up at the shoot held on the Harbor Island grounds on Sunday, April 8. In the fifty-target program, C. E. McKelvey tied with L. H. Reid, professional, for the high score ,each shooting forty-nine out of the total. C. E. Templeton furnished the second high score with forty-eight. Ed Ellis furnished the high amateur score for the hundred race with ninety-five to his credit. L. H. Reid stood high gun by breaking ninety-eight.

A big gain was shown by J. B. Lewis, J. H. Davis and J. A. Fortier.

The Seattle Trapshooters' Association is planning a strong invasion of Tacoma on April 22, the occasion being the second shoot of the Northwest Washington Trapshooters' League and one of seven registered shoots held by the League this season. A feature of the series of contests is the team races. The Bellingham Gun Club took the first contest on the local grounds at the first shoot held by the League. Following were Sunday's scores:

C. E. McKelvey 49, *L. H. Reid 49, C. E. Templeton 48, Ralph Kinzer 46, Ed Ellis 46, Hugh Fleming 46, Fread Landwehr 43, J .B. Lewis 43, J. H. Davis 42, W. B. Taft 41, J. A. Fortier 27.

At 100 targets—*L. H. Reid 98, Ed Ellis 95, Ralph Kinzer 94, C. E. McKelvey 94, Hugh Fleming 94, Fred Landwehr 90, J. B. Lewis 88, J. H. Davis 86, W. B. Taft 86, J. A. Fortier 68, Harry Eddy 46.

Yours, E. A. FRY, Sec'y.

Farmer Boy in Shooting Game.—The wholesomeness of life in the country with its attendant hard work in the open air is never more manifest than at the traps when the country boy, fresh from the farm, pits his nerve and clear-sightedness at the big tournaments against that of the topnotchers.

In the ranks of the aforesaid topnotchers are to be found a majority who shoot regularly once or twice a week throughout the season until, when the bi gtournament is on, their muscles and nerves are trained to a mechanical perfection. The country boy, however, has no such training and many of them let six months or more slip by before they find an opportunity to face the traps for a little practice. Nevertheless, it is these same bronzed and brawny Americans who offer constant surprises to the gallery and contestants at the big state shooting classics, and the old-timer cannot but wonder what the result would be if the farmer lad in connection with his clean, homely life had his weekly issue with the animated targets.

It is true that the hand trap is fast finding its place in the farm house, and who knows but that this combination—the farmer boy and the hand trap —will develop in this country a shooting talent that will make present-day scores seem mediocre.

San Jose Hunters' Club.—The first annual banquet of the recently organized San Jose Hunters' Club took place Sunday afternoon in Cedarbrook park. More than 400 partook of the hospitality of the club and enjoyed the many entertainments provided for the occasion.

Among the principal features was a beef barbecue with its accompanying dish of beans and great pots of coffee, from which the multitude served itself. Concessions, including a shooting gallery and candy booth, were present on the grounds.

A single track event which proved a laughable sensation was a 100-yard dash between Constable Jack Shannon and George Broderick. The latter out-distanced his doughty adversary and won a green baby soap doll. Hundreds danced throughout the afternoon in the big decorated dancing pavilion, the music being furnished by the Will Lake orchestra.

Those who served on the committee were: R. Rotholtz, president; Miles Oneto, vice-president; William Hearst, secretary; Herman Victor, treasurer; Tim Sullivan, Thomas Lane, W. A. Johnson, Ed Bonar, James Tangsly, Al Giannini, M. J. Haley, E. W. Johnson, J. Lazel and J. Texiera.

Big Time Club.—G. I. Fleckenstein, crack shot of Folsom, won permanent possession of the Gerber Causeway cup at the shoot of the Big Time Gun Club held on the Schenk ranch near Fruit Ridge on Sunday. Fleckenstein made a score of 49 out of a possible 50. He won the competition for the silver trophy last year and his two successive victories entitle him to the cup.

The sport was witnessed by a large crowd. The Big Time shoots are rapidly growing in popularity. Announcement of future events will be made in a few days. Follow are the scores—fifty targets:

G. I. Fleckenstein 49, F. Stall 46, D. Ruhstaller 46, A. E. Pearson 45, F. Ruhstaller 44, M. Newbert 44, O. A. Klemmer 44, F. G. Egesdorff 43, J. B. Rickey 43, Dr. Stineman 43, L. Gorman 42, M. Priest 40, A. M. McDonald 39, N. M. Hall 39, W. J. Higgins 39, G. Newbert 36, J. F. Garnett 26, G. Lewis 23.

At a meeting of the board of trustees of the Washington Field Trial Club, held April 3, the date for our 1917 field trials on our trial grounds at Yelm, Wash., was set to begin September 24. Entries will be received until September 17. All entries must be in at that time, as they will positively be closed on that date. Entry blanks and other information may be had by application to the secretary, Box 63.

Tacoma, Wash. F. E. KING, Sec'y.

Sportsmen's Row

Preparation for war tasks may prevent the annual trapshooting championship of the United States Navy from being held at Guantanamo Bay, Cuba, in April.

✤ ✤ ✤

In the last Grand American Handicap we had Captain Breitenstein, a Civil War veteran in his seventies, shooting with Master W. E. Phillips, Jr., of Chicago. Phillips is in his fifteenth year.

✤ ✤ ✤

Governor Stephens on Tuesday signed the King non-sale of trout bill, which produced one of the hardest fights in the Legislature. The law becomes effective October 31.

✤ ✤ ✤

Spokane, Wallace, Kellogg, Palouse, Garfield, Kalispell, Sunnyside, Potlatch, Pendleton, Lewiston, Wenatchee, Pomeroy—all enterprising Northwest cities—are represented in the Inland Empire League.

✤ ✤ ✤

C. L. Griffith was re-elected vice-president of the Tuna Club of Catalina recently by unanimous vote. Griffith is a local man. J. A. Coxe of Los Angeles, incumbent, was made president.

✤ ✤ ✤

Walter Webster of Spokane, Wash., recently captured a fifteen-pound steelhead trout in the Snake River on light tackle. The fish measured thirty-four inches and had a girth of twenty inches.

✤ ✤ ✤

Creighton Armstrong, 13 years old, is one of these. He shoots with the Clearview Gun Club of Philadelphia in the Philadelphia Trapshooters' League and his score is usually found in the first ten.

✤ ✤ ✤

Lou Rayburn, former amateur Oregon state trapshooting champion, is a Portland visitor from La Grande, Ore. Mr. Rayburn is chief of police of the eastern Oregon town and was taking a prisoner to the Oregon State Training School at Salem.

✤ ✤ ✤

D. B. Bolart, of 228 Capp street, San Francisco, is arranging to leave the city and is advertising his splendid Setter dog and several young pups for sale. The dog is the sire of the pups offered and it not only a splendid breeder but one of the best trained dogs in the city.

✤ ✤ ✤

O. N. Ford and George H. Anderson of the San Jose Gun Club have just been awarded medals by the American Amateur Trapshooting Association. Ford was notified that he has qualified for the 95 percent proficiency medal awarded by the association for 30 certified scores of 48 out of 50 or better. In winning the competition Mr. Ford broke 1427 out of 1500 targets shot at, making the high average of 95 per cent.

✤ ✤ ✤

Capt. A. W. DuBray had a good chance to try out his new single-barrel gun, against Henry Pfirrmann in the tie for the silver trophy in the fourth string of a recent shoot at Los Angeles. He shot from 16 yards and broke 8 out of 10, while Henry only accounted for 7 out of 10 from 23 yards. The Captain was much pleased, but said that the bunch from San Francisco would require an affidavit before they would believe that he had scalped little Henry, even though he did stand on the back peg.

✤ ✤ ✤

A determined effort will be made by the Spokane county game commission this spring and summer to rid the county of birds of prey which are largely responsible for the dearth of game and song birds in that section. It is estimated that hawks, magpies, owls and crows kill almost as many game birds during the course of the year as do the hunters during the open season, and if the pests can be exterminated the sport should be much improved and game propogation will receive a decided boost.

✤ ✤ ✤

Salmon are reported as running heavily at Monterey, with many good catches being made. The fish really should be outside the heads here, and it is peculiar that no one tries for them. The local fishing colony has a peculiar habit in this respect that resembles Chinese worship of old customs—they never try what hasn't been done before. Some pioneer is likely to discover some day that the salmon are over at Duxbury reef or down by Mussel Rock as early as April or May, instead of August.

✤ ✤ ✤

All members of the casting auxiliary of the Southern California Rod and Reel club are spending their spare moments just at present in planning how to raise funds to send the local casters to the national casting tournament. This national tourney is to be held in Chicago during the month of August, and the organization has already decided to send three casters to take part in the affair. The three casters who are to make the trip will be selected by elimination series. That is to say, in the very near future all the casters who have a chance toma ke the team will meet in a series of tourneys, and the three with the best averages will make the journey. There is no reason why the hurlers of the fly and bait should not go, for they have equaled the national marks on a number of occasions.—[L. A. Tribune.

Los Angeles Club.—An even fifty trapshooters attended the weekly shoot of the Los Angeles Gun Club Sunday, and despite the poor weather conditions some very good scores resulted. C. T. Meloy, who shot at the club for the first time, captured the high gun prize for the day. Meloy smashed 96x100 targets from the 18-yard wark.

The old favorites, Heine Pfirrmann and Frank Mellus, tied for second high, each having 94x100 breaks, while Jack Milligan of Oxnard was a good fourth with 93x100.

Meloy was not shooting for the Everding trophies, so Mellus and Pfirrmann each received five digits. This gives Mellus a total of 12 points on the Everding trophies and puts him in the lead in the first division by four points. J. F. Dodds is second. H. E. Sargent is leading in Class B, with a total of ten points, while Fred Grewell is second with eight.

Heine Pfirrmann was victor in the doubles shooting just for practice. He broke 42x50. In the practice event, J. F. Dodds broke 143x150 ta rhawks, while Pfirrmann broke 98x100 . F. H. Mellus, H. E. Sargent, N. W. Nelson, C. T. Meloy, J. Arneill, Geo. Melford, Jack Milligan and Seth Hart all won gold and silver take-home trophies . There were 6,980 targets thrown. Following are the scores:

C. T. Meloy, 18 yards, broke 96; F. H. Mellus 21—94, H. Pfirrmann 20—84, J. Milligan 18—93, J. F. Dodds 21—91, J. Arneill 18—91, G. Holohan 18—91, H. E. Sargent 19—90, F. H. Mellon 19—88, J. R. Tomlin 16—89, Geo. Melford 19—87, E. L. Rogers 16—87, S. Hart 17—87, S. H. Hall 19—86, R. O. Pool 18—86, R. H. Morse 19—86, J. H. Bishop Jr. 18—86, R. Witman 19—85, N. W. Nelson 17—85, Geo. Class D—Kennedy 13, Pool 12, Mrs. Mellon 7, Nelson 7, Carnahan 2, Miller 2, Ashton 2, Garnsey 2, Selbach 1.

✤ ✤ ✤

Lindsay Club.—The Lindsay Gun Club entertained the trapshooters of the State, Sunday, in a big registered tournament, fifty-six different shooters being on the firing line.

In the amateur division, Charles Barieau of Lindsay was high over all, with 142x150, while Dick Ostendorf of Lindsay and Dr. R. N. Fuller of Tulare tied for second place, with 140x150.

For professionals, R. C. Reed of San Francisco was high, with 142x150, and L. S. Hawxhurst of Oakland was second, with 138x150.

Long runs were made by Dick Ostendorf, 74; Chas. Barieau, 67, and R. C. Reed, 51. C. A. Haight of San Francisco, the Interstate Association representative on the Coast, cashiered the shoot in masterly fashion. The scores:

Charles Barieau 142, Dick Ostendorf 140, Dr. R. N. Fuller 140, A. P. Halliburton 138, W. G. Harris 138, Harry Ogilvie 137, H. D. Blanchard 135, G. A. Adams 133, Dr. A. W. Sutherland 133, D. F. Appling 132, George Small 132, W. E. Eavateer 132, E. J. Stone 131, F. F. Hostetter 130, R. S. Avery 130, Guy Lovelace 129, Charles McNeil 128, L. W. Slocum 127, J. R. Arthur 127, W. H. McKissick 126, Charles Yocum 126, G. K. Coleman 124, Dr. J. L. Martin 123, F. S. Bair 122, A. N. Moss 119, F. F. Bontadelli 118, J. M. Hutcheson 116, Fay Curtis 116, L. K. Stoner 114, E. W. Bailey 109, L. J. Mook 108, H. S. Drake 108, M. B. Fink 106, A. D. Wilson 105, W. L. Hawkins 100, T. B. Floyd 99, J. N. Shafter 96, J. W. Gallman 91, W. F. Scott 85, E. W. Randolph 84, R. R. Cadwell 83, J. G. Newman 80, H. Thompson 73, George Warrenburg 46, D. B. Baker 31, H. F. Elliott 40, A. L. Terry 26, M. W. Hawkins 12, L. M. Macey 7.

Professiona ls—R. C. Reed 142, L. S. Hawxhurst 138, W. F. Willett 134, J. A. Cook 132, W. R. Ellis 126, C. A. Haight 123, J. R. Brennan 97.

✤ ✤ ✤

Three hundred sportsmen and their wives and lady friends enjoyed the annual outing of the Califofrnia Anglers' Association and the Pacific Motorcycle Club, held Sunday at Moss Beach. The weather down the ocean shore was excellent and a low tide made for some excellent fishing, in which both the men and the fair sex participated. Joe Roberts, host in chief, served a sea dinner that has the others still talking about it. Dr. L. T. Cranz and Colonel C. G. Young, acting as judges, awarded prizes to the following: Biggest basket of fish, Dr. W. O. Ogle; largest sea trout, James Gorman; largest eel, V. C. Howe; second prize, large catch, R. G. Wenzel.

Washington Game Laws.—Seattle (Wash.).—In the matter of laws for the protection and propagation of game and game fish, Washington is the best equipped state in the Union," says State Game Warden L. H. Darwin in summarizing the changes effected by the last legislature. The new law will become effective June 7, which is ninety days following the adjournment of the last legislature. "We have the necessary legal machinery now," says the state game warden, "and to make ituseful and effective requires active work on the part of the state game authorities and the county game commissioners, and, above all, the enthusiastic support and co-operation of all who are interested in the preservation of our wild game, bird and fish life."

One of the noteworthy changes in the regulations is in the water fowl season in Eastern Washington. The state game warden received advice from the federal authorities that in all probability Eastern Washington would be included in a different zone from Western Washington by regulations to be promulgated as soon as congress passes laws making effective the migratory bird treaty between the United States and Canada. Eastern Washington will then be placed in the same zone with Idaho and Montana, and the state game law is changed accordingly to harmonize with the federal regulations. The Eastern Washington water fowl season hereafter will open September 15 and close December 31, which is two weeks earlier closing than in Western Washington, where the law remains as at present (October 1 to July 16).

The new law provides for a greater centering of responsibility in the state and county game authorities in several sweeping provisions. One of these provides that the season for upland birds in any county in the state may be shortened, opened or closed, by unanimous action of the county game commission when such action is approved by the state game warden. Another provision along the same line takes the auditing of the bills of the county game commissions out of the hands of the county commissioners and vests it in the county game commissioners. The county game commissioners will no longer have to send their expense vouchers to the state game warden for approval ,but will audit their own vouchers. Hereafter the game commissions of the respective counties may contribute a sum not to exceed $20 a year to the maintenance of a state association of game commissioners and game wardens.

Boy Scouts Shooters.—The Boy Scout's education is not complete unless he has had instruction in the art of rifle shooting. Edward Cave, in his valuable little book, "Boy Scout Marksmanship," says:

"Almost every boy is by nature fond of a gun. And this is something proper to encourage, if rightly done; for although firearms are sometimes put to bad use, that does not mean they are to be condemned. Everything depends upon the motive back of their use, and it cannot be denied that marksmanship is a valuable and manly accomplishment which makes every good citizen a stell better one. Furthermore, the sport of target shooting, especially with the rifle, provides in addition to a fascinating outdoor recreation, an excellent course in character training, for it inculcates initiative, confidence, self-control, steadiness, accuracy, and concentration,—qualities the development of which is valuable to a man in any and all walks of life—qualities, in fact, which are, with one or two others, the chief character assets of every successful man."

For a Scout to obtain the Merit Badge for Marksmanship, it is necessary for him to make a score of 38 points out of a possible 50 in the standing position at 50 feet, and 42 points out of 50 at the same distance but from the prone position. Before any Scout makes an attempt for the Merit Badge he must promise on honor to comply with the marksman code, which, if followed, will eliminate accidents.

The average Boy Scout usually has a pretty level head and may be depended upon to follow the rules of the game. The Scout who wears on his sleeve the emblem denoting that he has qualified in the test prescribed for marksmanship, may be proud of that honor.

✤ ✤ ✤

Vernon Club.—"Take home" Trophy Day was held Sunday morning at the Vernon Gun Club and splendid trapshooting scores were achieved despite contrary blasts of wind.

The contest was at 100 birds in a self-handicapping even in four frames of 20 birds each. Stanton A. Bruner was the high gun and the big winner of the day. He broke 97 targets. He was awarded a sterling silver trophy.

Dr. L. M. Packard was the second high gun of the day and copped second prize. His score was 93x100. A silver tea service was the prize captured by Packard, and Fish won a silver beefsteak set. The results follow:

J. C. Famechon 87, Wm. Dougherty 89, Fred Grewell 88, S. A. Bruner 97, A. W. Bruner 90, Wm. Pugh 82, F. Nichols 87, C. F. Nichols 91, Van Nest 82, P. W. Fish 93, C. W. Clement 85, O. A. Evans 80, Bob Bole 87, Dr. Packard 94, C. E. Groat 92, Mrs. C. E Groat 88.

✤ ✤ ✤

While it is not really necessary, it is always worth chronicling that trapshooting is the sport of contrasting ages.

BETTER LIVE STOCK
and Agricultural Topics

Col. Fred Reppert, the best known auctioneer of reford cattle in America, will do the selling at the O. Lively sale, May 3.

✤ ✤ ✤

A Farmers' Week speaker said, "You can tell a mer who doesn't read the farm papers wherever u see him, but you can't tell him much."

✤ ✤ ✤

H. B. Thornberry, of Stockton, will receive an press car load of fine Missouri jacks and jennets first of next week. They have been purchased in ssouri for Mr. Thornberry by Dr. S. Sheldon, one Missouri's best known veterinary surgeons and k men, who for several years has been Mr. Thornrry's agent in Missouri. Dr. Sheldon was formerly ate Veterinarian and this probably accounts for good luck Thornberry has had with the stock rchased in Missouri. Dr. Sheldon got the last connment in the "Kingdom of Callaway."

✤ ✤ ✤

orthorn Secretary in the West.

Secretary F. W. Harding, of the American Shortrn Breeders' Association, has spent the past four eks among Shorthorn breeders of the Southwest, e Pacific Coast and the Northwest, getting in closer uch with the present Shorthorn activity in these ctions and laying plans for trade extension in the ture. He attended the important sales of the rthwest at Portland and Spokane. This is one of e most interesting and encouraging trips Secretary rding has made into any section. He has encounred a very active demand for Shorthorns for both ef and milk purposes and has observed everywhere determination on the part of the buyers to acquire tter standards. He has been particularly impressed th the growing inclination of ranchmen to make larger use of Shorthorn bulls on the ranges. Since cretary Harding has taken charge in his present pacity of the affairs of the American Shorthorn reeders' Association he has made many trips of vestigation and inspection into all parts of the nited States and an extended trip into Argentine. hese journeys have proven definite trade builders d the Shorthorn interests have greatly benefited as result.

The Carruthers Shorthorn Sale.

The 45 Shorthorns to be sold at Carruthers Farms, Mayfield, Cal., on May 2 are almost all of Scotch ancestry. There will be 15 mature cows, 13 yearling heifers, 8 two-year-old bulls and 9 bull calves in the auction. The choicest of breeding is represented. Among the cows are 2 Lady Dorotheas, bred by Leslie Smith & Sons, St. Cloud, Minn. One of them is by Ringmaster, the International champion, and bred to Count Glory, a son of Count Avon which was grand champion at the California State Fair last year. Lady Dorothea 10th is by Superbus and out of a March Knight cow; she is a large red cow and will have a calf at foot on sale day; she is one of the top cows of the offering. There are 3 Count Avon cows in the sale. Golden Queen is a remarkably good two-year-old, red and a show cow. Rookwood Ury and Rookwood Ruby are the other Count Avan heifers. One of them is safely in calf to Count Glory and the other will sell with a bull calf at foot. These two-year-olds are large, smooth and very thick. Two of the Orange Blossom cows have calves at foot; the other is safely in calf. These are large red cows with excellent Shorthorn character. The other cows are smooth and richly bred; each will sell with a calf at side or will be in calf. Th ey were bred by C. E. Clark, St. Cloud, Minn., and partake of the merits of the famous Meadow Lawn stock. The 13 yearling heifers are an unusual lot. A Bruce Mayflower yearling, bred by White & Smith, St. Cloud, Minn., is probably the outstanding one of the lot. She will show this year as a senior yearling. The red junior yearling Mayflower Victoria is better liked by some than the Bruce Mayflower heifer; she is compact and smooth and a rare prospect for this year's show. Gloster Miss 2d, Mayfield Rose, Mayfield Lass and Mayfield Red Lady are junior yearlings fit to go into any herd. This is a quartette of rare breeding and individuality. The other yearling heifers are mostly Orange Blossoms. Catalogues are ready and will be mailed on request to W. M. Carruthers, Hearst Building, San Francisco.

✤ ✤ ✤

Reports received by The Poland China Journal from all sections of the country in response to its request for information in regard to spring farrowing give the lie to the ancient libel that Poland Chinas are not prolific. In the majority of reports both sows and gilts have farrowed an average of from 8 to 11 pigs, which is prolificacy enough for any breed of swine. While the reports indicate that the Poland China breeders have been more successful than usual in saving the litters farrowed, they indicate a considerable shortage of pigs in farmers' herds. High prices and shortage of feed induced many farmers to market brood sows, and this has resulted in a material reduction of the spring pig crop from normal.

✤ ✤ ✤

Artichokes for Hogs.

Jerusalem artichokes are much better hog feed than many people suppose. One of the advantages of this crop is that it can be produced with very little work and the yield is unusually heavy. Jerusalem artichokes grow well in sandy loam.

This plant has a stem somewhat like a sunflower, but tubers grow on the roots like a potato. It is more frost resistant than potatoes and has a longer growing season. In fact, the artichoke will live over winter in the ground and come up year after year. It is not difficult to eradicate, however, as spring plowing followed by corn or some other cultivated crop will quickly kill it out. The culture of this crop is similar to that of potatoes, but it may be planted earlier, as the spring frosts do not harm it so much . In late fall the tubers may be dug and pitted or put into the cellar in the same way that potatoes are handled. They wilt more readily than potatoes, however, and will keep firmer if covered lightly with earth to exclude the air.

They may be grown anywhere that potatoes or sunflowers do well. They are more drouth resistant than potatoes and are not considered hard on the soil. In composition the tubers of the artichokes are very similar to potato tubers and the tops are about equal to meadow hay.

Probably the most general use of the Jerusalem artichoke is for hog feed, but dairy cattle do well on the tubers, and in the absence of silage it is one of the best succulent feeds for milk production. The artichoke was first cultivated for human food, but the smoother, starchier Irish potato has now largely supplanted it in spite of its smaller yield per acre.

While the artichoke will never be a major crop, yet as a minor pasture crop for hogs it should have a wider distribution in this section. An acre of these tubers will keep 20 to 30 hogs (weighing from 125 to 175 pounds, rooting all fall and winter when the ground is not frozen, and pork can be produced much more economically by supplementing the grain feed in this manner than by a straight grain ration.—[Beaumont Enterprise.

THE FARM

Close of Entries in the State Dairy Cow Competition.

Dairymen and breeders of dairy cattle who are considering the question of entering cows in the State Dairy Cow Competition are reminded that entries in the Competition will close on May 1st, in accordance with the announcement made. The object of this Competition, which is being conducted by the College of Agriculture of the University of California, is to improve the dairy herds of the State by stimulating the interest in production tests of the cows. Nearly 100 prizes varying in value from $300 to $10 each, are offered for records of production by cows entered in the Competition, the aggregate value of the prizes amounting to nearly $8000. More than one-half of this amount will be awarded for records of production by grade, and common cows only. It will be well worth the effort of any dairyman who owns good cows to enter these in the Competition, on account of the prizes they may win, the knowledge that will be gained as to the value of the individual cows, and the advertising that will be received through the publication of good records of production in the herd.

Members of cow testing associations may compete for the prizes offered for yearly herd records without extra expense, and at greatly decreased cost for prizes for individual cows and groups of cows in their herds. The complete list of prizes with copy of the rules governing the Competition, will be found in Circular 153 of the College of Agriculture, which may be secured upon application to the Director of the Experiment Station at Berkeley, California. Further information concerning the Competition and entry blanks may be obtained by writing Professor F. W. Woll, University Farm, Davis, California. In order to have cows included in the Competition, applications for entry must, however, be forwarded prior to May 1st, this year.

Most of the current talk about the food problem has been about growing potatoes in the back yard or eating rice instead of potatoes. As a matter of fact, the opportunity for saving here is almost nothing. Potatoes and rice together do not cost more than six per cent of the annual expenditure of an average family for food, while two-thirds of all the average Pacific Coast family spends for food goes for foods of animal origin—meat, eggs, milk, butter and fat. Hence the immense importance of producing the greatest possible quantity of fodder for meat and dairy purposes.

California Sale of Shorthorns

— TO BE HELD AT CARRUTHERS FARMS —

Mayfield, Cal., at 1 p. m. on May 2.

A rare lot—15 matrons, 13 yearling heifers, 8 2-year-old bulls and 9 bull calves, nearly all of Scotch breeding—will be sold. The cows include 2 Lady Dorotheas, bred by Leslie Smith & Sons, St. Cloud, Minn., 3 by Count Avon, 3 Orange Blossoms and 7 bred by C. E. Clarke, St. Cloud, Minn. The yearling heifers are Bruce Mayflowers, Orange Blossoms and other esteemed sorts. Golden Master by Ringmaster and out of an imported Lord Roseberry Duchess cow, is a proved herd-header; see his calves on sale day. Seven 2-year-old bulls are Orange Blossoms put up in packages to suit the particular buyers. The bull calves are mostly by Fair Knight and Mayflower Sultan. Here you have championship breeding represented in Shorthorns of choicest individuality. Many are sired by Ringmaster, twice an International champion. Others are by Count Avon, C. F. Curtiss' noted International champion which heads the Rookwood herd. A combination of the blood of Whitehall Sultan and March Knight; see the result in the Carruthers calering. The females of breeding age are in calf to noted sires. Write now for catalog, mentioning Breeder and Sportsman, to

"SAN VICENTE",

--the Junior Champion Saddle Stallion of California, will also stand at San Vicente Rancho this season.

TERMS PRIVATE.

"The above photograph shows "Highland Monarch" and four of his get, and "Don Castano" and four of his get, winners of the First and Second Premiums at the California State Fair in September, 1916. The service fee for each of these stallions is $50.00.

WE WILL PAY

the freight, to and from our Ranch, on mares sent from any part of California, but will not assume responsibility for accidents.

SAN VICENTE RANCHO

1023 Investment Building **Los Angeles, Cal.,**

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¾ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

Cal. State Thoroughbred License No. 2018.

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

MARSE ABE	Yankee	Hanover	Hindoo — Virgil; Florence
			Bourbon Belle — Bonnie Scotland; Ella D.
		Correction	Himyar — Alarm; Hira
			Mannie Gray — Enquirer; Lizzie G.
	Halo	St. Blaise	Hermit — Newminster; Seclusion
			Fusee — Marsyas; Vesuvienne
		Ida K	King Alfonso — Phaeton; Capitola
			Lerna — Asteroid; Laura

SHOOT TO WIN
Du Pont Long Run Trophies

IT is with pleasure that we announce to the trapshooting fraternity our Long Run Trorhy plan for 1917, which, with a few minor changes, is a continua ion of the 1915 and 1916 plan.

Under the operation of our Long Run Trophy plan, we give the amateur and professional trapshooters, for straight runs of 50 targets or over, in registered shooes.

Watch Fobs, Watch Fob Bars
Cuff Links, Scarff Pins, Watches
(Lady's or Gentleman's Style)

The Watch Fob is exquisitely designed, the medallion portraying the Du Pont quail.

The Watch Fob Bars are of varied widths attractively designed and will endance the appearance of the fob.

The Cuff Links and Scarf Pin bear the Du Pont quail, and are both attractive and useful.

The Watches are standard, open face, 17-jeweled watches with a 25-year guaranteed case, the design being selected with a view to satisfyinng the conservative sportsman.

WATCH 2-3 SIRE.

FOB FULL SIZE.

The Long Run Trophy Fo and Bars as shown repre sent four straight runs of 50 or over, the Fob being awarded for the first run made; the narrowest bar for a ftraight run of 50 to 74; the next size a straight run of 75 to 99; and the widest bar a straight run of 100 or better.

CONDITIONS

The Watch Fob: Awarded to amateur and professional trapshooters for their first straight run of 50 targets or over.

The Watch Fob Bars: For attachment to the fob, and awarded to amateur and professional trapshooters, one bar for each additional run of 50 or over as follows:

FOR A RUN OF	
50 to 74,	a bar 2-16″ wide (approximately)
75 to 99,	a bar 3-16″ " "
100 and above,	a bar 5-16″ " "

The Watch: Awarded to amateur trapshooters when 15 runs of 50 or over are made, and to professional trapshooters when 25 runs of 50 or over are made.

The Cuff Links: Awarded to amateurs and professionals instead of a second Du Pont Long Run Trophy Fob in 1917. To amateurs for their 16th run; to professionals for their 26th.

The Scarf Pin: Awarded to amateur and professional trapshooters instead of a third Long Run Trophy Fob. To amateurs for their 31st run; to professionals for their 51st.

SCARF PIN Actual Size

Shoot DU PONT, BALISTITE or SCHULTZE They are the trophy winning powders.

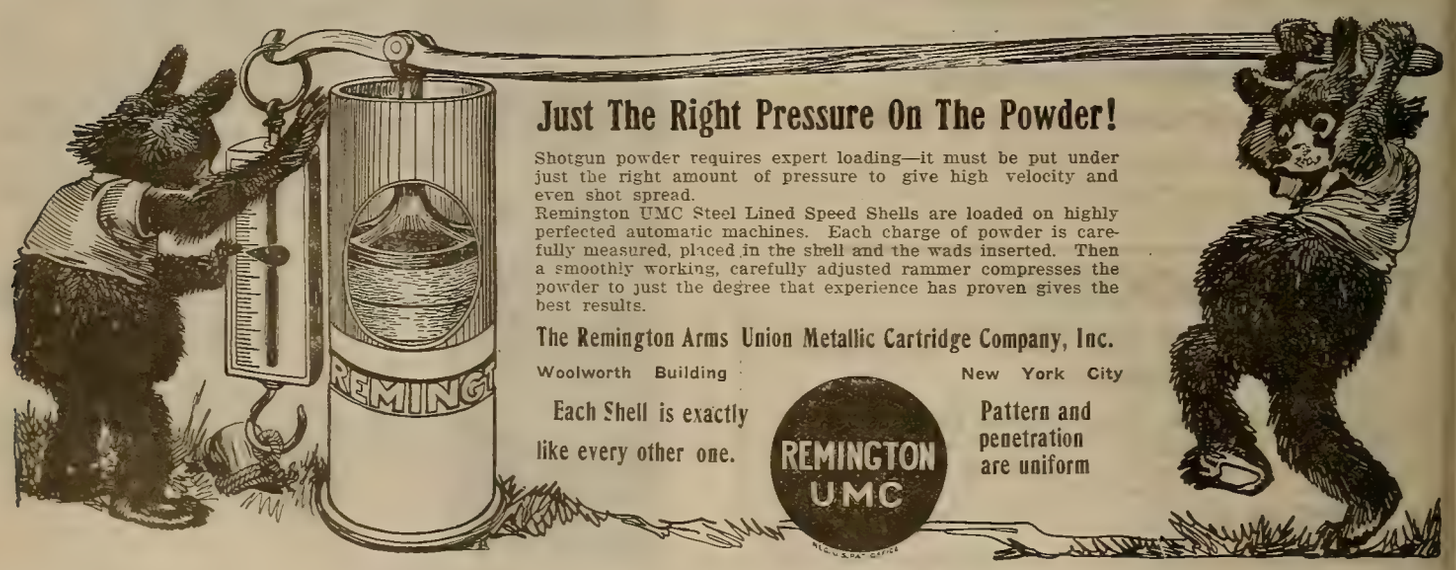
WINCHESTER

TEACH YOUR BOY TO SHOOT---

Every Boy instinctively loves a gun. Most fathers have had to listen to the plaintive appeal "Dad! I want a gun!"

WHEN YOU TEACH YOUR BOY TO SHOOT, YOU WILL GET CLOSER TO HIM THAN EVER BEFORE. NOT ONLY WILL THE YOUNG FELLOW ACQUIRE MANLY HABITS AND SELF-CONTROL, BUT HE WILL LEARN TO HANDLE FIREARMS WITH SAFETY TO HIMSELF AND OTHERS.



WHEN YOUR SON ASKS FOR A RIFLE, HE WILL NATURALLY EXPECT A WINCHESTER. HIS BOY FRIENDS WILL SURELY ASK WHAT KIND OF A RIFLE HIS FATHER SELECTED. FIX IT SO HE CAN PROUDLY ANSWER, "A WINCHESTER, OF COURSE!" EVERY MAN AND BOY KNOWS THAT THE WINCHESTER IS THE BEST—THE MOST ACCURATE AND RELIABLE.

A FATHER SHOULD WELCOME THE CHANCE TO BECOME HIS BOY'S "PAL" BY TEACHING HIM HOW TO SHOOT. IT MAY BE VERY VALUABLE KNOWLEDGE SOME DAY.

ASK YOUR DEALER TO SHOW YOU THE COMPLETE LINE OF WINCHESTER .22 CALIBER RIFLES, REPEATERS, SINGLE SHOT AND AUTOMATIC.

All Styles and prices to suit all tastes and pocket books.

California Sale of Shorthorns

— TO BE HELD AT CARRUTHERS FARMS —

Mayfield, Cal., at 1 p. m. on May 2.

A rare lot—15 matrons, 13 yearling heifers, 8 2-year-old bulls and 9 bull calves, nearly all of Scotch breeding—will be sold. The cows include 2 Lady Dorotheas, bred by Leslie Smith & Sons, St. Cloud. Minn., 3 by Count Avon, 3 Orange Blossoms and 7 bred by C. E. Clarke, St. Cloud, Minn. The yearling heifers are Bruce Mayflowers, Orange Blossoms and other esteemed sorts. Golden Master by Ringmaster and out of an imported Lord Roseberry Duchess cow, is a proved herd-header; see his calves on sale day. Seven 2-year-old bulls are Orange Blossoms put up in packages to suit the particular buyers. The bull calves are mostly by Fair Knight and Mayflower Sultan. Here you have championship breeding represented in Shorthorns of choicest individuality. Many are sired by Ringmaster, twice an International champion. Others are by Count Avon, C. F. Curtiss' noted International champion which heads the Rookwood herd. A combination of the blood of Whitehall Sultan and March Knight; see the result in the Carruthers salering. The females of breeding age are in calf to noted sires. Write now for catalog, mentioning Breeder and Sportsman, to

Pacific Coast Trotting Record

Peter McKlyo 58009- RECORD 2:06

Cal. License Pure Bred No. 105
Sired by

PETER THE GREAT 2:07¼ (sire of 50 in 2:10 list, including Miss Harris 2:01¼, Peter Volo (4) 2:02, Peter Stevens 2:01½, Peter Mac 2:03, Mabel Trask 2:03¼, etc.), dam KLYO by Jay McGregor.

He is from one of the greatest families on his dam's side in the books, as the performances of Susie J. 2:06½ and Trampfast 2:12¼ prove beyond doubt.

Peter McKlyo is the Greatest Son of Peter The Great

westof of Kentucky and is destined to be one of the world's greatest sires.

He is the only son of Peter the Great five years old with two colts in the list. He was bred to three mares as a two-year-old, only two of his colts being handled,—Charlotte McKlyo, winner of breeder's record 2:25¾, and McKlyo Boy, winner of the two-year-old division Breeders' Futurity Stake, record 2:23¼. It can be also said as a matter of record that he is one of the greatest five-year-old trotting stallions ever owned in the state of California, and one of the best individuals to be found in any country.

HE WILL MAKE THE SEASON OF 1917 AT

James Thompson's Training Stables

State Fair Grounds, Sacramento

TERMS: $100 FOR THE SEASON.

Usual return privilege. Mares pastured at $5 per month. Good care will be taken but no responsibility assumed for accidents or escapes. For further particulars address,

TO THE FARMERS OF AMERICA.

[By the Editors of American Farm Journals.]

With the entrance of the United States into the world's war, farmers of America are laid under the most insistent and inexorable obligation. It is a war of food more than of munitions. Nature has turned a forbidding face on the early harvests of the world. A shortage of more than 50,000,000 bushels of winter wheat at home, and a deficiency in all crops abroad, sound a trumpet call to farmers to bend every effort, to the limit of human intelligence, energy and ingenuity, to wring from the earth its maximum yield in all the coming harvests.

Patriotism and profit should stimulate them. The life of the nation hangs in the balance . The rewards for intelligent farm toil never were so alluring and certain. Every man in his own field must judge of methods.

This appeal, coming from the publishers and editors of farm journals in session in St. Louis, representing a combined circulation of 11,000,000, seeks to arouse producers to the gravity of the situation, and to encourage them to enlist in the army most necessary to the nation's defense—the army of farm men, women and children whose devoted, tireless, intelligent effort will sustain our fighting forces, bring succor to starving peoples, and insure inevitably the enduring peace the world.

Just at this time all effort possible must be made to gather and most economically distribute the food output. Not a pound should be wasted. The necessities of the times are calling so many from agricultural pursuits to mechanical industry, that it is necessary to seek unusual means for their replacement.

THE BREEDER AND SPORTSMAN, through the courtesy of Roland C. Drake, Manager of the Live Stock Department of the Hartford Insurance Company, for the territory west of the Rockies, has received the Lexington, Ky., Herald's House Warming Number, which, in the editor's opinion, is the most wonderful live stock edition and farm home number any newspaper has ever issued. It portrays the progress of Kentucky as no other publication has ever done. Handsomely illustrated articles of commercial activities in far-famed old "Kaintuck" are shown in an entirely new light. Unlike the average special edition of metropolitan papers, which undertake getting up a special live stock edition, the Herald failed utterly to "ball things up." The average special live stock edition of a daily is a huge joke to the tiller of the soil and the breeder of better live stock. The Herald, however, has used good judgment, and swine men have prepared their swine department; horsemen, their horse section; cattle breeders their cattle department, and so on, in every page of this magnificent edition.

Lovers of horses, Race horses, Saddle horses and farm horses will find stories of keen interest which have never been published and written in a manner that will make one take the time to go over them carefully. Histories of famous horses and farms of Kentucky are published in complete form; and the only regret the editor of the Breeder and Sportsman has, is that the present price of paper prevents our reproducing the entire live stock section.

OUR FRONT PAGE PICTURE.

On our cover this week, we present a group of the magnificent Holsteins found in the herd of The Bridgford Co., Inc., on the ranch at Knightsen, Contra Costa county. In the center of the picture is the junior herd bull, King Segis Alcartra Prilly, which, at one year weighs 1,150 pounds and possesses the most mature and perfect conformation. He is one of the most royally and meritoriously bred bulls in America; his first six dams all having made better than a 30 pound butter average in seven day tests. He promises to not only improve the Bridgford Company's herd, but the breed in the West. The cow at left top is Upland Zeffie Wayne, four years old. Record, 26 pounds of butter in seven days; 1,448 pounds of milk in 14 days; 109 pounds milk in one day and 105 pounds of butter in 30 days.

Right top, Ormandy Mechthilde Piertey, which, shortly after arriving here after trip across the continent, made 31.70 butter record in seven days and 580.10 pounds of milk in the same period.

Bottom left, Miss Pontiac Nudine of Springvale, a beautiful cow, five years old, weighing 1,840 pounds. Produced 30.3 pounds of butter in seven days from 601 pounds of milk.

Bottom right—Miss Korndyke Mercedes; first prize winner in full aged cow class at 1916 California State Fair; dam of junior champion female at 1916 State Fair. Butter record for seven day test, 25 pounds; milk record, seven day test, 520 pounds.

These are fair samples of the entire herd of 130 fine registered Holsteins owned by the Bridgford Company, Inc., of which Judge E. A. Bridgford of San Francisco is president, and his son, H. V. Bridgford, vice-president and general manager. The foundation for the herd was selected in the Eastern Holstein growing states by H. V. Bridgford, and is considered one of the most profitable herds in all the coast states. Judge Bridgford told the editor of the Breeder and Sportsman last week their herd was making good beyond their highest hopes and expectations. The ranch is one of the best adapted and equipped stock ranches in California; and, in addition to the Holsteins, they breed all kinds of better stock and fine saddle horses. Their herd is being prepared for the California fairs of 1917, and well informed breeders declare when the season is closed the Bridgford Company, Inc., will have annexed many championships to their herd by their merited competition with the best herds in the West.

Horsemen throughout the country will learn with much regret the serious illness of Col. Willard Potts, of Mexico, Mo., who recently underwent a serious operation at the Jewish Hospital in St. Louis. Col. Potts has been in bad health several months and his condition is considered critical. This well known sportsman has been interested in some of the best horses in Missouri; first the trotters, then the saddle horses. It was Col. Potts who was a joint partner with W. D. Lee, in that well known horseman's first experiences in the business. He has served two terms as mayor of Mexico and has been responsible as much as any other individual for that town's reputation of being the horse center of the earth. He is one of central Missouri's largest property owners.

During these days of high priced grains many farmers who are just getting started are apt to overlook the fact that the only profitable form of farming that carries with it the brand of permanence is livestock farming. While all grains are high in price it must also be remembered that cattle are worth good money, hogs are selling up to 16 and sheep are worth in the neighborhood of $12 a head. These prices are all more or less abnormal, but at the same time the grain prices will drop far more rapidly than those on livestock.

BREED BETTER HORSES.

While the agricultural schools and press of the country are emphasizing the importance of more crops and better yields to the acre in this time of stress, Wayne Dinsmore, in his always alert manner, is doing all in his power, using his every resource and influence to bring about the production of better horses. "Not mere numbers, but quality, is what the country needs," Dinsmore writes, and his letter to the Breeder and Sportsman should be read by every man interested in the welfare of the land as well as the breeders of the country. Mr. Dinsmore, who by the way, is secretary of the Percheron Society of America, with offices at the Union Stock Yards, Chicago, will gladly assist all horse breeders in their efforts to improve the horse stock of this country. No matter what breed you are most interested in you will be benefited by reading the communication which follows:

Breeder and Sportsman,
San Francisco, Cal.

Gentlemen: The United States, now actually at war, confronts the tremendous task of increasing its production of food stuffs sufficiently to provide amply for its own people and to supply all the food stuffs needed by the allied nations.

Maximum crop production requires plenty of horses, men, and efficient farm machinery. Powerful draft horses do more to compensate for labor shortage than any other factor. Gang plows of two 14-inch bottoms, with five powerful draft horses, will turn from five to five and a half acres per day; will, on a 20 wheel disc harrow cutting 9 feet in width in the field, disc from 14 to 18 acres per day; and on a 20 hole disc seed drill will seed from 18 to 20 acres per day, and cover it in the same operation. Only heavy draft teams can make such efficiency possible. Horses weighing over 1600 pounds each in working condition are needed, and five of them to each farm teamster employed. Where such heavy draft horses are not available, smaller implements are used, and the daily turnover in work accomplished falls to approximately half of that which is being done by men with heavy teams and plenty of them.

The United States does not need an increase in mere numbers of horses and mules. It does need an increase in well proportioned, powerful draft horses. There is no danger of an overproduction of good thick farm chunks weighing from 1300 to 1600 pounds. The latter can be, and are being, produced by breeding common light mares of mixed blood weighing from 900 to 1400 pounds each, to sound, well proportioned Percheron stallions. Every mare of this kind should be bred to the best draft stallion available, and every draft mare should be bred to the best stallion within reach. The demand for heavy draft horses is already far in excess of the supply. Prices have increased from $50 to $75 per head, and the difficulty of obtaining the very best draft horses has been so great that city buyers have been obliged to purchase horses that are only three years old this spring in order to fill the demands of their trade. The best informed men in the market respecting city trade are agreed that draft horses will never be entirely displaced in our large cities, and that they have already reached what is practically a solid basis for the future. They are more efficient and do trucking more cheaply on short hauls than auto trucks, and for thes reason will continue to be used.

The demand for Percherons has shown steady improvement within the last 12 months. Transfer certificates issued by the Percheron Society of America during the first four months of the present fiscal year exceeded 3,000, an increase of more than 16 per cent over the same period during the preceding year.

The breeders of small numbers of Percheron horses, who make up 90 per cent of American breeders, are unanimously of the opinion that they have never had so prompt sales for good stallions rising two or rising three nor received so satisfactory prices as during the past eight months. Importations are practically nil, and the steady increase in demand for good draft horses gives promise of a most excellent future for the shrewd farmer who realizes the advantage of using Percheron mares in his farm work.

Exports of horses to Europe for war purposes from September 1, 1914, to March 1, 1917, totaled 853,116 head, valued at $182,994,406, and 289,062 mules, valued at $58,051,914. British army officers have given unstinting commendation to the grade Percherons which have been sent from this country to Europe for artillery purposes. The effectiveness of the Percheron has been so great that studs of pure-bred Percherons have been established in Great Britain in consequence.

The vast majority of the mares in the United States will be bred or left unbred within the next ninety days. All good mares should be bred to the best available draft stallions. I hope, for this reason, that you will give publicity to this article in the news columns and emphasize the importance of intelligent horse production in your editorial columns as well.

With kindest personal regards, I am,
Very truly yours,
WAYNE DINSMORE, Sec'y.

Silence Is Golden.

Jack: "That horse shows as much sense as I do."
Belle: "Well, don't tell anybody. You may want to sell him some day." —Phila. Bulletin.

Harness Horses and Horsemen

OBSERVATIONS AT WALLA WALLA.

April 18, 1917.

Arriving in this city of wheat kings, horses and horse enthusiasts, I hurried and and finished my business, then I did a marathon to the Walla Walla race track, and while the day was not pleasant yet I saw all the trainers out on the track. Naturally my first visit was to my friend Wm. Hogoboom. Greetings over, I began to look at the hay destroyer —and hay costs big money here, and oats, well, oats are so high that a farmer found a burglar in his house and on asking the burglar not to kill any of the family the burglar said, "Be not afraid; 'tis not your money nor your wife I come to steal, I just want the key to your granary so I can steal a sack of oats and sell it in Walla Walla and make a trip to Boston and back before harvest time." So you see oats are oats in Walla Walla, and wheat is selling here at $2.05 per bushel, and will be higher.

Well, Bill Hogoboom showed me a big slashing three-year-old out of Lida Carter and sired by Blue Peter 2:16¼. I will say right now that in any land it will be hard to beat this filly for looks, and she had the fast step idea born in her. She belongs to Jas. Dacres, as does a full sister a year younger. Huck was high in his praises of these Loda Carter youngsters. A two-year-old gelding, a trotter sired by Blue Peter and out of the dam of Joe Buckley, makes one think he is looking at Peter Volo. The colt belongs to a New Mat Ennis and in no land on earth can a better gaited or more determined going young trotter be seen. It is only a question of time and development for this young Blue Peter, and his name will be in print often . Joe Buckley 2:11¼ is also owned by Mat Ennis; Joe Buckley looked good to me last year in all his races; today he looks every inch a race horse, and right here and now I will say that the pacers that beat Joe Buckley this year will be going some, and they may come from east, west, north or south. Joe Buckley is, I believe, a good enough pacer to take to any western track and race and win money and glory for his good sire, Bonnie McK., the good son of the great McKinney and Bondaline by Stamboul, the great brood mare Bon Bon by Simmons. Some reader may say I am daffy on Joe Buckley. Well, time will tell, and when the scalps are counted next fall, Joe Buckley will be the big winner, unless he breaks a leg.

Mr. Shell has seven head of choice young stuff up, mostly all by Bonnie McK.; one, however, is a Blue Peter. Shell's horses are a bit rough yet but the lines and the good blood of such horses as Alexis, Antrim, Bonnie McK. and Blue Peter will, if properly developed, turn out valuable horses.

My old friend Geo. Kelly is here, having sold out his walnut farm in Sunkist California and bought a place in good old Walla Walla. Mr. Kelly has Bonnie McK. and believe me, I am pleased to see Mr. Kelly and to see the bond of affection between this man and his stallion; and Bonnie McK| is beyond any question one of McKinney's best speed siring sons. There are only a few of his colts, yet no man ever saw one that was not a naturally fast trotter or pacer. Mr. Kelly is developing a very fast gaited young trotter by Bonnie; she is a roan, being from a long line of Jay Bird dams. In just twenty days' handling from a wild thing this filly recently pulled a breaking cart an eighth in 22½ seconds. Her breeding and her type pleased me so that I asked, "Was she registered?" Mr. Kelley said "No, the owners of her dams were men who did not believe in registration." I said, "Put her away. To me a man who is raising standard bred horses and neglects to register them looks like a man standing in his own light."

I did not have time to visit all the stables. I must not forget to say I saw Fred Heavener feed his seven choice thoroughbred horses in his barn, and Fred's all look ready to parade right now. Heavener is a first class jockey and a first class trainer ,and his horses always win money and behave well at the post, which speaks well for Heavener's ability as a trainer.

Returning to the city, I heard that Jas. Dacres had a two-year-old filly by Blue Peter, dam Frances Ansel by Prince Ansel, and as it was I who traded Frances Ansel to Mr. Dacres I went out to the Dacres place, and what I saw there would bring joy to any horseman. This Blue Peter filly out of Frances Ansel is a brown in color and she is classy enough to show in New York or anywhere on earth. She had a bitting harness on and the way she was trotting around the field and the beauty of her more than repaid me for my trip to Walla Walla. A yearling chestnut colt out of Frances Ansel and sireby Lou Crellin, son of C. The Limit 2:03¼ and the dam of Bon Guy is a whale of a good colt, and while he is all that one could ask for yet he is not near the beautiful thing his half-sister is. A bay yearling by Lou Crellin out of the good mare Lida Carter is a perfect model in every way, a little smaller than the chestnut and with less bone. I don't believe I could choose which of these royal bred yearlings looks the best; they both look great. Lida Carter is about due to foal to Blue Peter, and Lida is a grand looking matron. Her companion is about as elegant a looking matron as I ever saw, but unfortunately she has just lost a foal by Blue Peter and I hope Mr. Dacres will breed Frances Ansel this season to some one of the four good stallions in Walla Walla, namely: Blue Peter, Lou Crellin, Bonnie McK. and Prince Axworthy. Any one of the four is good enough.

Returning from Mr. Dacres' place, Mr. C. E. Bowman met me and said I must come out to his place and see Blue Peter, Prince Axworthy, Rapidan Dillon and Lizzie Dillon. To his invitation I said, "Ready." Away we went in Bowman's auto and the ride was a nice one over good roads, past thousands of acres of new wheat, and just beyond the hill where the Whitman monument stands and where the great man and his brave followers were buried, begins the Bowman 2,000-acre wheat farm. It is all good land, all producing; big barns and big and well arranged machinery building and electric light plant. A big barn full of hay and feed, large, airy box stalls and large hillside paddocks.

In 1908 Bowman and Maurer sent William Hogoboom to the Chicago Sale with a bank roll and an order to purchase one or more good standard bred horses. Mr. Hogoboom returned to Walla Walla with three horses, namely: Blue Peter 2:16, son of the great sire Peter the Great and the great brood mare Kahla Belle 2:29¼ by Pilot Medium, sire of Peter the Great. Kahla Belle is a great brood mare; she is, I believe, dam of six. Blue Peter has so far only sired about twenty colts, his stud services having been light. Yet no man who has seen a Blue Peter can say that he ever saw a poor one—already one or more that can trot or pace fast. All the Blue Peters that are now in training are well liked by trainers, and I look on Blue Peter as a coming first-class sire. He should be on a place where he has access to a lot of first class mares. So far this season not a mare has been served. His stable-mate is a horse that is good enough looking and bred well enough to be on the most fashionable stock stock farm in America. His name is Prince Axworthy by Axworthy, dam Brochade B. by Baron Wilkes; second dam the great brood mare Lemonade 2:27½, dam of Bessie Wilton 2:09¼, Petigru 2:10½, Lady Wilton 2:11½ and grand dam of Lady Thisbee 2:11¼. So I need not make any apology for Prince Axworthy's breeding. His colts are just coming on, the oldest being three years, but only a few, as this horse shortly after his arrival here got out of his stall, ran into a barb wire and cut his whole bowels out and cut a shoulder off. Only the greatest skill and nursing saved his life, and for nearly two years he hovered around the door of the grim Reaper. He is a grand horse even in his scarred-up condition and will beget race horses if the owners of his foals will only do their part and pay for the development; for what good are they if not raised and educated and raced?

Lizzie Dillon 2:09¼ is big and fat and sound. She has not been bred and it is the intention of Mr. Bowman to send Lizzie Dillon and her stable-mate, Rapidan Dillon, to a trainer now. Rapidan Dillon is the mare Walter Maben developed; she is a fast, elegant mare by Sidney Dillon, dam Bye Bye by Nutwood; 2d dam Rapidan by Dictator. I need go no further on her nedigree for everyone who knows anything must know that few if any mares in the world are better or more fashionably bred than Rapidan Dillon.

Mr. Bowman and his wife are real horse fans, especially Mrs. Bowman. It pleased me to listen to this nice woman and mother talk intelligently and agreeably about the horses and say that she loves and enjoys them and that she wants Mr. Bowman to send them to a good trainer.

Well, my visit is over. I have taken too much space; accept my apology, for when I get at it I have hard work to stop, for I love the subject.

Yours truly, C. A. HARRISON.

DEATH OF SORRENTO.

The great broodmare, Sorrento, died March 17 at the farm of her owner, W. T. Clasby, at the extreme old age of 32. She was bred by S. A. Browne, of Kalamazoo, Mich., and was bought by Mr. Clasby as a two-year-old out of a sale here at Lexington. Mr. Clasby has owned her since. She produced thirteen foals of which seven took standard records. Some of her fastest ones were never given records, but each one either took a record, sired or produced something. Three of them got winners of the Kentucky Futurity and two others sired 2:10 performers. She produced five 2:10 sires. The old mare was not sick until the morning of her death, Mr. Clasby finding her down in the stall, something he had never done before during his ownership of her. Se was made as comfortable as possible and he went to the done before during his ownership of her. She was he returned.

Though bred first as a three-year-old, giving her a long term as a broodmare, she produced only thirteen living foals. At first she was a "shy" breeder, but later produced foals more regularly. She was a daughter of Grand Sentinel 2:28, and her dam, Empress, was also the dam of Edina 2:13¼.

The produce of Sorrento are as follows:

Sorrento Todd 2:11, by Todd. (Sire.)

Jay Hawker (3) 2:14¾, by Jay Bird. (Sire of Country Jay 2:05¼, Susie Jay 2:06½, Jay McGregor 2:07¼, Nella Jay (3) 2:14¼, winner of Kentucky Futurity.

Belle Sentinel 2:15, by Jay Bird. (Producer.)

Eola 2:19¼, by King Clay.

Teddy Sentinel (2) 2:26½, by Todd. (Sire of Wanless, p. 2:08, Teddy Brooks 2:16¼, trial 2:08¾.) Died at three years of age.

Lazy Bird 2:26¾, by Jay Bird.

Iowa Sentinel 2:29¾, by Ellerslie Wilkes. (Sire of Dick Sentinel 2:06¾, Wapello Girl 2:07½, Major Gantz 2:08½, Prince Edgar 2:09¼.)

The Bondsman (trial 2:11), by Baron Wilkes. (Sire of Colorado E. (3) 2:04¾, Grace Bond (3) 2:09¼, Lizzie Brown 2:05¾, The Plunger (4) 2:07½, Creighton 2:08¾, and three others in 2:10.)

The Tramp (trial 2:10), by Jay Bird. (Sire of Bervaldo 2:08¼, The Wanderer 2:08¼, Dr. Long (4) 2:10.)

Una May, by Phantom 2:29¼. (Dam of Victoria Direct 2:25¼ and grandam of Director Todd 2:07¼, sire of Young Todd (4) 2:02½.)

Lady Bird Clasby, by Jay Bird. (Producer.)

Sorrento Moko, by Moko. (Producer.)

Sorrento Direct, by The Director General.

The following paragraphs in reference to the record of Sorrento as a producing matron were taken from the columns of the Horse Review and cover the subject thoroughly:

It will be observed that Sorrento produced thirteen foals that lived ,of which seven took standard records and twelve either performed or produced or both. There is only one "blank" in the baker's dozen of her offspring, and this, her last foal, may yet be heard from.

The record is an astonishing one, but as much for quality as for quantity. Only one other mare, Beautiful Bells 2:29½, has surpassed Sorrento as a dam of sires of 2:10 trotters, the former having four and the latter three—namely, Jay Hawker, sire of four; The Bondsman, sire of five, and The Tramp, sire of three. To the glory of Sorrento it may be stated that she is the only mare with three sons each of which have sired three or more 2:10 trotters—in this respect she stands alone. In addition she has two other sons that have sired 2:10 pacers, Iowa Sentinel and Teddy Sentinel, making five sons in all that have begot 2:10 speed. That another of her sons, Sorrento Todd, will be represented in the 2:10 list ere many seasons is very probable. Jay Hawker and The Bondsman are both sires of three-year-old Kentucky Futurity winners, Nella Jay 2:14¼ and Grace Bond 2:09¼, respectively; while The Tramp is the sire of a two-year-old Kentucky Futurity winner, Trampfast 2:12¼. Colorado E. (3) 2:04¾, winner of four futurities, including the Horse Review, and the first 2:05 colt trotter in history, was inbred to Sorrento, being by her son The Bondsman, dam by Jay McGregor 2:07¼, a son of her son Jay Hawker (3) 2:14¾. The early death of Jay Hawker (at eight years) undoubtedly robbed the breeding interests of one of the most remarkable extreme speed sires ever fcaled, both in the male and female lines, for from among his scattering few foals not only came Country Jay 2:05¼ (winner of almost $25,000), Susie J. 2:06½, Jay McGregor 2:07¼ (sire of ten 2:10 trotters), and Allie Jay 2:08¼, but also the dam, among others, of Al Stanley 2:08¼, sire of Etawah 2:03, a Kentucky Fututrity winner, and the holder of the world's record for three consecutive heats by a trotter. While the daughters of Sorrento have not thus far made as deep a mark as her sons, one of them, Una May, is the grandam of Director Todd 2:07¼, sire of the champion four-year-old pacing geldingYoung Todd 2:02¼, a candidate for two-minute honors; and another, Lazy Bird, produced Cummer, sire of Camelia, p. 2:04¼. All told, she has five producing daughters, nearly all of which are now actively breeding, and by whose families much is liable in the future to be added to her fame. It should also be remembered that two of the produce of Sorrento without records showed themselves to be very fast public performers, The Bondsman winning third money in the historic three-year-old Kentucky Futurity of 1899, won by Boralma 2:06, after six heats; while at the same meeting her son The Tramp won second money in the two-year-old division of the same event to Fereno 2:05½. Circumstances prevented both these horses from acquiring technical marks, otherwise their dam would rank as having at least nine standard performers.

As a progenitrix, a family-founder in her own right, Sorrento is held by breeding experts to rank among the foremost—and at the time of her death she was undoubtedly the greatest brood mare living in this respect.

American horses are now coming into their own. Successes by Canada's cavalry in recent fighting at the front are described from Canadian headquarters in France. For the first time in more than two years, the cablegram says, cavalry galloped straight at a position occupied by Germans defending a high ground position with rifles and machine guns. During the enemy's recent withdrawal, the dispatch says, Canadian horsemen were used with such success that within four days six villages were captured. This advance was made ahead of the Entente infantry on a 12-mile front to a depth of six and a half miles.

Thoroughbred Matters

Country Club of Brookline Not to Race.

The announcement that the Country Club of Brookline has decided not to hold its race meeting arranged for June 16 and 18 will be a keen disappointment to the devotees of amateur racing, for since 1881 two days more have been provided each year over the spacious and attractive grounds of the club. The program for the meeting had been distributed, in fact entries for the first closing of the Chamblet Memorial, the Country Club Annual and the National Hunt Club had been received in numbers which would have assured contests in keeping with the glories of the place and its racing.

The decision not to race was due solely to the feeling of the members that with the country at war and conditions as a consequence unsettled, with many of the younger members already in the ranks of the various branches of the Army and Navy or other defensive organizations, it would be best to give up the meeting, and in this the race committee heartily concurred.

By some it was feared that the action at Brookline might affect other organizations, but it is not probable that any others will be called off. The subject has been, of course, considered, and it is solely with a desire to do the right thing that the decision has been to continue. These meetings have been and will be a great help not alone in the work of developing the horse, something that calls for most serious consideration, but the young men who are most active in this line of sport are even now enrolling to serve the country in numbers that bespeaks their loyalty and willingness to do their part. From those listed as qualified riders the number that are already in uniform is surprisingly great, and many more are simply waiting for the call for mobilization of the organizations of which they are members.

Among the older men, those whose years are above the limit set by the War Department, there is evidence of their sincere loyalty and readiness to serve when needed. All over the country where they make their homes they are enrolled for community protection and quite a number are flying with different aero divisions.

If the same splendid interest and support develops among the professional riders and horsemen, and it is almost sure to come a little later, the friends of racing will be represented in numbers and ability that will bring credit to the sport and its devotees.

✣ ✣ ✣

English Sires at Lower Fees.

Restricted racing, accompanied by falling prices for thoroughbred yearlings, has finally affected the extravagant stud fees current in England for fashionable thoroughbred stallions. Until this year some of these horses commanded the same fees as before the war, but the most popular and successful of them are now advertised in the Racing Calendar at greatly reduced figures.

"At 200 guineas for 1917 only," is the announcement concerning August Belmont's Tracery, whose fee last year was 400 guineas, or a little more than $2,000. William the Third is one of the few horses now standing at a higher fee than Tracery. "Subscription full for 1917 at 250 guineas," is the announcement concerning him . Prior to 1916 his fee was 400 guineas.

Lemburg, the Derby winner of 1910, by Cyllene; Bayardo, the St. Leger winner of 1909, and Roi Herode, sire of The Tetrarch, have gone down from 300 to 200 guineas this year, and Willonyx, whose excuse for a fee of 300 guineas was always hard to discover, has gone to 150 guineas.

Spearmint, the Derby winner of 1906, now stands at 145 guineas, as compared with 300 guineas in 1915. But the biggest drop of all is reported from the National Stud, in Ireland, where the government's noted race horse, White Eagle, whose fee was $1,500 in 1915, is available at a fee of $300.

At the Manderton Stud, Newmarket, the owner of the good race horse, Rock Flint, that beat Craganour as a two-year-old and won the July Stakes, has gone the limit by announcing free service to approved mares. Rock Flint is a son of Rock Sand and Trigger by Meddler.

✣ ✣ ✣

Restraining Order Denied Douglas Park.

Washington, April 9.—The Supreme Court of the United States denied today the application of the Douglas Park Jockey Club for an injunction and restraining order against the Kentucky Racing Commission to prevent the enforcement of the Commission's rule requiring the distribution of purses of not less than $800 at the Beechmont race track. The decision of the United States Supreme Court in the Douglas Park case means that the State Racing Commission has the right to make what it considers reasonable rules for the government of racing in this State, and that its acts within its own field are not subject to revision by any court. The particular case at Washington was the appeal against the regulation fixing $800, while $600 was the minimum at Lexington. The basis of the regulation was the comparative size of the communities, and the rule applies to Churchill Downs as well as to Douglas Park, both of which are situated at Louisville, a city of more than one hundred thousand population.—Thoroughbred Record.

Spey Pearl Arrives Safely.

New York, April 9.—The Atlantic transport liner Manhattan docked at Pier 58 late yesterday afternoon, bringing but two thoroughbred horses. One of these, however, is an animal whose safe arrival means much to the Canadian horse-breeding interest, as he is a present to the Breeding Bureau of Canada from the King of England.

Besides being a remarkably handsome individual, Spey Pearl—that's his name—is royally bred, being the son of one great Derby winner, and the grandson of another, who has been pronounced by such a shrewd and experienced horseman as John Huggins, the greatest horse he ever saw.

Spey Pearl is a golden bay colt (solid colored), four years old, by Spearmint, winner of the Derby of 1906, out of Pearl of Loch, by Persimmon, winner of the Derby of 1896, for the then Prince of Wales, afterward Edward VII. of England.

Richer breeding than that of Spey Pearl would be difficult to imagine. Many noted English turfmen insisted that Spearmint, his sire, was the greatest Derby winner which had appeared for a quarter of a century, and away back when his sire, Carbine, won the Melbourne Cup in a field of thirty-one in 3:28¼ with 145 pounds up in 1890, he was hailed as the greatest racehorse ever saddled in any country.

Along with Spey Pearl came a rather large and useful looking dark bay three-year-old colt, by Fugleman out of Laveuse, by Laveno, the sire of Short Grass.

✣ ✣ ✣

New York, April 10.—While the incendiary fire at Belmont Park worked a great havoc to the magnificent stands and grounds of the Westchester Racing Association, August Belmont said subsequently that it would be possible to make repairs that would restore the grand stand so that the big course could be used for its race season that will begin May 29.

Architect C. W. Leavitt has made a thorough examination of the burned stand and one plan that was suggested was that the front part of that structure could be rebuilt in a manner to make it commodious and safe and comfortable for the coming season. Other plans were discussed and it is practically certain that the work will quickly be decided upon that will keep Belmont Park in the circuit for this season.

Another work of repair that is contemplated is the rebuilding of the administration quarters and jockey house. The site for this building will be closer to the paddock than the one that was destroyed by fire, and it will be a much more convenient one for its purposes.

✣ ✣ ✣

RACING OFFICIALS APPROVED.

Officials for the various Kentucky race tracks for the year 1917 were named at the regular meeting of the State Racing Commission of Kentucky on Friday the 13th. Attending the meeting were J. N. Camden, T. H. Talbot, Judge Allie Young and Charles F. Grainger. Licenses were granted to four Kentucky tracks, the Kentucky Association, Lexington; New Louisville Jockey Club, Douglas Park Jockey Club, Louisville, and Latonia Agricultural Association, Covington. The Secretary was notified to send licenses to each.

Vernon Sanders, of Louisville, was appointed telegraph censor for the year on Kentucky tracks, and T. H. Talbot, C. F. Grainger and S. K. Nuckols Jr. were appointed on the License Committee for the year.

The following list of racing officials for the Kentucky Association for the year 1917 was submitted to the Commission and was approved:

Presiding Steward—Capt. T. J. Clay.

Judge, Racing Secretary and Handicapper—W. H. Shelley.

Starter—Harry Morrissey.

Entry Clerk and Assistant Secretary—J. S. Wallace.

Paddock Judge—Dr. James T. Shannon.

Patrol Judge—Peter Wimmer.

Timer—S. K. Hughes.

The officials for the New Louisville Jockey Club are:

Stewards—Charles F. Price and Charles F. Grainger.

Judge and Clerk of Scales—W. H. Shelley.

Judge, Racing Secretary and Handicapper—J. B. Campbell.

Paddock Judge—Dr. Henry Harthill.

Starter—Harry Morrissey.

Patrol Judge—Wm. Phillips.

Timer—George Lindenberger.

The officials for the Douglas Park Jockey Club and the Latonia Agricultural Association are:

Steward—Charles F. Price.

Judge, Racing Secretary and Handicapper—J. B. Campbell.

Judge and Clerk of the Scales—W. H. Shelley.

Starter—Harry Morrissey. Paddock Judge—Henry C. Harthill. Timer—S. K. Hughes.

✣ ✣ ✣

A. K. Macomber, son-in-law of the late L. V. Harkness, has recently purchased from the estate of James B. Haggin 1,200 acres of Elmendorf Farm. The land is located on the Russel Cave pike and is known as the Early farm. Mr. Macomber owns a few trotters and one of the biggest stables of thoroughbreds in the country, but it is said that he will devote the major portion of this farm to Shorthorn cattle.

.R. J. MacKenzie, owner of the Pleasanton track, was a visitor at Bowie, Md., on the closing day.

✣ ✣ ✣

Jockeys Loftus and Buxton are now at Louisville and are assisting in galloping the Macomber Stable horses.

✣ ✣ ✣

At the conclusion of the Pimlico meeting Jockey W. Collins will join the stable of J. K. L. Ross and accompany the latter stable to Canada.

✣ ✣ ✣

I. D. Bogan, racing agent for C. W. Clark, was in Lexington last week en route from Hot Springs to Chicago; he made arrangements for the stabling of the string John Lowe has in training.

✣ ✣ ✣

E. T. Colton has purchased Pan Zareta from H. S. Newman. Pan Zareta was at her best form at the Hot Springs races and won two races out of three starts, finishing second in the other event.

✣ ✣ ✣

Trainer Jack Goldsborough had Andrew Miller's crack distance runner, Roamer, measured a few days ago, and was surprised to find that the horse had grown an inch since last fall, and this in spite of the face that he is now six years old, an age at which most horses are popularly supposed to have long since attained their full growth. The horse now stands fifteen hands three inches.

✣ ✣ ✣

New York, April 19.—W. H. Baker, owner of one of the largest and most successful strings of thoroughbreds that raced in Kentucky last year, was denied a license to train horses on metropolitan tracks at a meeting of the stewards of the Jockey Club today. A. Matthews and J. Bergen were refused jockey licenses. M. M. Allen, for many years a trainer of race horses, was appointed official timer of all Jockey Club race tracks.

✣ ✣ ✣

The most sensational workout of the spring training season at Louisville was registered by Old Miss, a highly-bred three-year-old from the stable of Joe Umensetter. This filly is the property of Tom Murphy and is a candidate for the Kentucky Oaks and the Ashland Oaks. She was allowed to step five furlongs in 1:00 flat, going the first three furlongs in :34 3-5. Trainer Umensetter also worked Grover Hughes, Billows, George C. Love, Country Court, Fascinating and Trappoid, but no fast time was registered by any of these performers.

✣ ✣ ✣

Much interest is manifested in the work of the Macomber stable's horses, principally that of the seven Derby eligibles which have been all sent a mile. North Star III., War Star and Hollister went together a mile in 1:47 3-5, while Starmaster, Stargazer and Le Chevesne raced a similar distance in 1:46 2-5. The showing of Starmaster appealed most to the critics. North Star III. also showed up well with his long easy stride and the manner in which he holds himself. Ed Crump, The Cock and Hank O'Day went a mile in 1:50, while Boots negotiated the distance in time two seconds slower.

✣ ✣ ✣

Sandy McNaughton's string of horses is now at Havre de Grace. This stable gives promise of doing considerably better than did his two-year-olds of 1916 . The best looking of the lot is the big brown colt by King James out of Mary Stuart, for whom he paid $5,000 at the Oxnard sale last summer. This handsome colt has grown splendidly during the winter and now he is much the biggest of the McNaughton lot, but he has preserved his admirable balance and high finish right along and now he is a hard two-year-old to beat as far as appearance goes, to say the last of it. Mr. McNaughton also has a nice pair of two-year-olds by Jack Atkins which showed excellent yearling trials.

✣ ✣ ✣

Hot Springs, Ark., April 7—Trainer Charles Patterson gave C. K. G. Billings' crack three-year-old Omar Khayyam a stiff mile and a quarter workout, and the colt impressed the watchers by his splendid fashion of handling himself and the ease with which he covered the distance in 2:09 1-5. He had his weight up, Borel being in the saddle. His time by fractions follows: :24 2-5, :49 1-5, 1:14 3-5, 1:54 and 2:09 1-5. The colt was well in hand at the end. He will be shipped with the others in the Billings & Johnson consignment to Louisville and will be a starter in the Kentucky Derby and other rich Kentucky stakes.

✣ ✣ ✣

Louisville, Ky., April 14—Entries to the Bashford Manor Stakes, the principal two-year-old fixture of the Churchill Downs Spring season, have been announced by Secretary H. C. Applegate. They number 103, an increase of thirty-three over last year's list. They comprise the pick of the juvenile colts and geldings of the land and represent practically all of the prominent stables in this counttry. The largest nominators are J. W. Schorr, who won the stake last year with Harry Kelly and who has eight named in this year's renewal; the Wickliffe Stable has named seven, W. H. Baker seven, E. R. Bradley six, A. K. Macomber five, Jefferson Livingston four and George J. Long and H. P. Whitney three each. The stake has been run continuously since the year 1902, when it was won by Von Rouse.

The favor with which San Franciscans are taking up horseback riding was demonstrated this week by Manager Kramer, of the Riding Academy, having to get outside horses to supply the demand, although he has more than 100 head in his stable.

✤ ✤ ✤

"The saddle horse game here is growing steadily and many new recruits are found on the bridle paths through the city parks every time one ventures out. There are fifty or more regular riders who own their own mounts, and good ones, who are spreading the popularity of the 'Back to the Saddle' movement throughout the city," writes Geo. A. Kingsley, attorney for the Minneapolis and St. Paul R. R. of Minneapolis and the owner of one of the best pleasure horses in Minnesota.

✤ ✤ ✤

Black Belle, by Black Rose 2, son of Black Rose by Montrose 106; dam also by a son of Black Rose, has foaled a beautiful stallion foal by Le Grand McDonald, at the Bridgford Company's ranch at Knightsen, California. Judge Bridgford is justly proud of this intensely bred Denmark, as it is from his most noted show and brood mare and one of the first young things to show by his great young stallion, Le Grand McDonald. In this stallion California will have every good Denmark strain in the books and blended most successfully.

✤ ✤ ✤

San Vicente Rancho, of Los Angeles, announces that the books of their magnificent young stallion, San Vicente, the sensation of the California State Fair last year, are filled and no more mares will be permitted to his court this season. San Vicente is one of the most promising young saddle horses in the entire land and his books filling so rapidly is most assuring evidence that the people of California appreciate his worth, and also that it pays to breed good ones. The aged stallion, Don Castano, and Highland Monarch, will be allowed to make an extensive service; however, early booking is advisable.

✤ ✤ ✤

Buyers of saddle horses got about the best bargains of the season at Durland's Riding Academy on Tuesday evening when the consignment from Powhatan Woolridge's Peewee Valley Stock Farm was sold by George A. Bain. Prices were unformly fair to the seller without being too high to prevent wide awake dealers like M. B. Newcomb, George Watson, Alfred Meyer and Joe Collins from picking up some that will bear selling again. The average was about $300, with $600 the top price. Mr. Newcomb was a contending bidder for nearly all of the best ones and succeeded in buying three of them.

✤ ✤ ✤

The disappointing performance of Johnnie Jones in Brooklyn last week shows how difficult it is sometimes to convert a five gaited saddle horse into one of the wal-trot type, or, in other words, to make him forget his peculiar Kentucky gaits, the fox trot and running walk. The Western champion tried to trot in thirty-eight different languages, as a well known horseman put it, and got the gate in a class he might have won with well established action. It was an illustration of Charles L. Railey's famous saying, "No trot, no saddle horse." If he learns to trot he is going to be a formidable one at Eastern shows, but just now he looks like another Judge Cantrill.—[New York Herald.

✤ ✤ ✤

The Mid-Continent Live Stock Exposition of Tulsa has been organized to stage a live stock exposition at Tulsa, Okla., May 17 to 19. It is proposed to conduct a show of national importance. The cattle prizes total $7,500 and the horse show prizes $8,000. The Tulsa Free Fair Grounds will be the seat of the exposition. The enterprise has been underwritten to the extent of $15,000. The Madison Square Garden classification will be used for the horse show, with prizes ranging from $500 down. In the cattle classes the first prize on individuals is $35. Frank A. Gillespie, the Tulsa Shorthorn breeder; W. L. Lewis, Col Suppes, John Kramer, Cyrus Avery, J. E. Crosbie, Glen T. Braden, F. D. McDonald, J. A. Chapman and H. H. Rogers are among the organizers of the new stock show enterprise.

THAT WORLD'S CHAMPIONSHIP TITLE.

From every section of the United States letters commending the idea of giving a World's Championship Saddle Stake, with the present day champions contesting, as proposed by the editor of the Breeder and Sportsman, are pouring into this office. From the Hon. Mat. S. Cohen, Commissioner of Agriculture of Kentucky, comes the magnificent offer of duplicating any amount of $1,000 or more raised by popular subscription, by the Kentucky State Fair Association, for conducting the stake at the Kentucky State Fair this year. However, the owner of only one of these grand horses has acknowledged notice of the proposed stake, and he comes out strong for the contest. Commissioner Cohen offers to make the stake free entrance, free expense for the horses and an allowance for hotel accommodations for the owners during the fair.

There have been some magnificent stakes given at Louisville, Mexico and Sedalia; however, the horsemen who entered paid most of the stakes. This stake is free entrance and nothing deducted from money winners. It will be the biggest cash stake the world has ever known and the greatest title. The title alone will make the horse that wins the contest worth just twice his present value and I do not care how high his owner values him now. There has been a lot of dodging the issue and beating about the bush with the owners of the present day champions; which are, in my judgment, the grandest lot of horses that have ever lived at one time. There is one in the lot, however, which should be able to demonstrate to the public his superiority over the others and the public wants to know which horse this is. The idea of three or four horses being advertised and touted as the world's champion at the same time is rapidly becoming a joke, and the lovers of all are not taking the claims of any of the owners seriously. This stake provides for the champions of the last few years to meet. The Kentucky State Fair ,through its president, Mat. S. Cohen, offers to duplicate any amount raised of $1,000 or more ,and Jump Cauthorn, to stimulate the public subscription will give $100. Now, let's hear from every horse lover in the land. I start the subscription by guaranteeing $100. Every man who loves a good show horse should lose no time in his offer. The list, providing it goes, will be published every week in this paper. A contribution of one or one hundred dollars will be appreciated and accepted with the same spirit, and remember, you are giving for a prize which will go down in history as the greatest prize of cash and glory for horses the world has ever known. Write today informing me how much you will give or guarantee to raise in your section for the stake. Payments will not be due until the stake is guaranteed and will then be due and payable to the Kentucky State Fair Association, at Louisville.

✤ ✤ ✤

Lee Bros., of Mexico, Mo., this week sold to Frank W. Tracy of Buffalo, N. Y., an excellent type of the three-gaited saddle horse. To J. S. Pitt, a wealthy planter-merchant of Clarksdale, Miss., this firm sold an extra good five-gaited saddle horse.

✤ ✤ ✤

With afternoon and evening sessions, at which twtenty-six classes were judged, the twenty-fifth annual horse show of the Riding and Driving Club of Brooklyn, N. Y., ended Saturday at the club house in Park Plaza. About two hundred entries were tried out by the judges of saddle and harness horses and ponies, hunters and jumpers, making a long day's work for the officials. The show was well attended and very successful from every point of view.

✤ ✤ ✤

When James W. Gerard went to Berlin as Ambassador he took with him the saddle horses he had been riding in Central Park. When he came home he could not bring them with him, so he sold them to a circus for exhibition purposes. One of them, the bay mare Natoma, had been trained by the late Charles L. Railey in high school airs, and she was much admired in Germany, where this style of equitation is in high favor. Natoma won several prizes at the Brooklyn and Washington horse shows in 1913.

✤ ✤ ✤

At the forthcoming Washington Horse Show an effort is to be made to draw the line more sharply in saddle classes as between typical park and road hacks and the hunter. While the last named is a fine "riding horse" and unequaled in his special calling, there has been too much tendency, especially of late years, to put this type in the forefront of all saddle horse classes.

✤ ✤ ✤

LONGVIEW FARM NOTES.

Longview Farm, the property of R. A. Long, of Kansas City, is the show place of Missouri. It is the most elaborately equipped stock farm in the West and breeds prize winning Duroc-Jersey swine and Jersey cattle. It also is the home of the great stable of show horses owned by Miss Loula Long.

John T. Hook, manager of the saddle horse department, left last week for a trip through Missouri and Kentucky, looking for good sale horses, and would buy good show prospects if he should run across the right kind.

We have sold the three gaited gray gelding, Charlie Cherry by Charles Reade, to Mr. Lehmann, o Chicago.

We recently purchased from R. W. Hipple, o Marion, Ohio, a spotted gelding of good class whicl we will use in the lead of our road-four. We gav in exchange a big brown white-footed horse.

We also traded a nice bay gelding which we re cently purchased from Hugh McElwain, of Richmond Ky., to Matt Beers, for a big roan horse, which w think is a splendid prospect for a good gig horse.

Interesting arrivals at the farm recently are stal lion foals from Miss Belle and Show Me by My Majo Dare, and a filly foal by the Major and out of Mar Kirby.

Mabel Whirlwind, dam of many of the best horse in Missouri, also has foaled a nice filly by My Majo Dare.

Our trade on Durocs and Jersey cattle has beer exceptionally good this year and it is our present expectation to raise from 800 to 1,000 registered Durocs in 1917. So far we have 350 pigs and more to come. Signed,

C. J. TUCKER, Gen'l Manager

Lee's Summit, Mo.

New York's Best Spring Horse Show.

With 465 entries reported in the forty classes which make up the program, the New York Spring Horse Show at Durland's Riding Academy opened on Tuesday evening, continuing on Wednesday and Thursday. It was the twenty-second annual exhibition at Durland's, and the bumper list of notable exhibits indicates that it was one of the best. The last National Horse Show at Madison Square Garden had no better saddle horses than some of those entered for the spring show at the riding academy, and the same thing may be said of the classes for harness horses and ponies in which the stables of James Cox Brady, A. W. Atkinson, Felix M. Warburg, John L. Bushnell, Mrs. C. W. Fletcher, Mrs. Joseph S. Sylvester and Miss Isabella Wanamaker were among those represented.

Particularly gratifying in the harness division was the filling of the four-in-hand classes with four road teams entered by Messrs. Atkinson, Brady and Warburg and Mrs. Sylvester. The show of road fours has been a feature of the last two exhibitions at Durland's, but J. Campbell Thompson, John L. Bushnell and Emil Seelig, who filled these classes in 1916, are not represented this season, and yet the number of entries is as large as before.

Interest in the saddle classes was enhanced by the presence of the superb gray gelding Jack Barrymore. Among his competitors were Mrs. Daniel Guggenheim's The Knut, reserve champion of the last National Horse Show; Mrs. David Wagstaff's black gelding Pointex, winner of five blues last year; Mr. Atkinson's champion Sparkling Moselle, winner of twenty-one first prizes in 1916, and Vincent S. Mulford's Early Morn, reserve champion at Morristown last fall.

The New York Appearance of Jack and Johnny.

[Written for the Breeder and Sportsman by one of the best informed judges in the United States.]

I think you may be interested in what I have to say about the New York appearance of Johnny Jones and Jack Barrymore. I had quite a chat with Moore while looking them over in the stable before the show and think, before he is through, he will make good with them.

Barrymore I like much; he's a beuty and I would have him come foraging in my pocket inside of a week if I owned him. He has a good presence, and fair gaits; at the trot he has to be watched all the time when tried out for any length of time; just as though he tired of the one gait and wished to change to the single foot. Except that I think his neck might bear a little sweating I have not much to fault him about. He won the blue.

Johnny Jones is a different matter. I think he is rather coarse and harnessy in the quarter and along the ham. As he is, he will be gaited all through the East, but am glad to say Moore has caught the right idea. What Johnny wants is work and lots of it. He should be walked and walked until his ebullient spirits are cooled; then he should be square trotted until he can go for half a mile or so without a "slither"; now he has hard work to go the length of the ring (200 feet) without being pulled up at the corners and started afresh. This to keep him from changing from the trot to another gait. This, of course, will take time, but I told Moore he was worth it . I also thought his canter was a trifle rough —in the East a cardinal fault—but I have not the slightest doubt—strange to say—that he gives a wonderfully "good ride." From what I could learn, Johnny has been ridden by about a dozen different people since he closed his western season of success—there you have the gaited horse's drawback—and even now they are talking about putting a side saddle on him to admit him into a Ladies' class. What idiocy! I'm going to be sorry for the girl that tries to ride him, for Moore was riding on the curb all the time and if he let his nose down Johnny "slithered" at once.

Now mind, I think Johnny is some horse, but he needs a lot of training before he will do in the East. As one of the judges said to me afterwards: "It was the gate or the blue" and it was NOT the blue.

Notes and News

Western horsemen who contemplate shipping to the Middle West and Eastern tracks this year will make a keen mistake if they pass up the Wisconsin State Fair.

✤ ✤ ✤

Just a postal, mailed to John W. Pace, Sec'y., Seattle, Wash., will get you the stake book of the North Pacific Fair Association. Wide range of classes with good purses and tracks will make this association's races fill.

✤ ✤ ✤

The Wisconsin State Fair, which conducts its race meeting September 10 to 13, offers horsemen unlimited inducements as well as the most attractive stakes and program with big purses of any fair outside of the Grand Circuit.

✤ ✤ ✤

Five $150 purses will be offered for the races which are to feature the annual Lockeford picnic this year. The picnic is to be held May 11th, although the racing program will extend over another day . Harness races, free-for-all running races and a mule race are among the events planned for.

✤ ✤ ✤

J. Janson, Jr., of Pleasanton, carries everything for the harness horse in his well equipped store and is prepared to do your repairing on short notice and in the best possible time. He makes a specialty of parcel post selling and repairing and guarantees quick delivery and satisfactory service.

✤ ✤ ✤

Mr. L. Karns writes from Lindsay that his mare Dollie K. by Athadon foaled a bay filly on March 25. This youngster was sired by Expressive Mac, and Mr. Karns is so well pleased with its appearance that he has already commenced to spend the big end of the stake offered for the three-year-old Breeders' Futurity for foals of this year.

✤ ✤ ✤

The new McMurray fifty-first catalogue is ready and will be mailed to any one on request to The McMurray Sulky Co., the original sulky makers of Marion, Ohio. It contains 48 pages in colors; over 100 illustrations showing seventeen different styles and models. Write now, mentioning this paper, for one of these attractive catalogues.

✤ ✤ ✤

The absence of Miss Harris M. 2:01¼ from the fast pacing classes in the entry lists is said to be due to the fact that Lon McDonald is preparing her for an effort against the watch at North Randall, at which point he hopes to give her a record of two minutes or better, after which she will be trained at the trot in view of a campaign in 1918 at the diagonal gait.

✤ ✤ ✤

President Gianninni of the California-San Francisco Driving Club has appointed Tuesday, May 2d, as the date for the annual meeting and nomination of candidates for officers of the club for the ensuing year. The election will be held on the following Tuesday night, May 9. It is planned to open the racing season on Sunday, May 13, when the first matinee of 1917 will be held.

✤ ✤ ✤

Oscar D. Ames, 56 years of age, died at Iron Mountain, Mo., April 22. He was one of the most prominent trotting horse trainers and race drivers in the Middle West. Born and reared near Belton, Mo., his initial successes in the trotting horse game were achieved through Missouri. For the past several years he has been employed by Mr. W. H. Smollinger at the Iron Mountain Stock Farm and was in charge of his owner's consignment at the recent Chicago sale.

✤ ✤ ✤

Purchase of additional land for the state fair grounds was practically assured last week when the senate unanimously passed Senator Rush's bill, which would appropriate $10,160 for this purpose. Inasmuch as the measure is one of the regular budget bills of the state board of control, it is certain of passage when it comes up in the assembly. The land which adjoins Agricultural Park in its southeastern portion has long been wanted by the State Fair directors. The tract that will be added to the state's holdings under the bill contains more than five acres.

✤ ✤ ✤

Rebuilt carts, when offered by the Houghton Sulky Company, are found by experienced trainers and drivers to be the most economical thing a horseman can buy. If they were not almost as good as new the Houghton Company would not offer them for sale and as they are priced at only about half their original cost, it stands to reason horsemen will save money by buying them. Write now, to the Houghton Sulky Company, 320 Lincoln Ave., Marion, Ohio, mentioning this paper, and you will receive free of any charge a complete description of their present stock, which they desire to close out immediately. The carts are priced right and the wise horseman will get his order in while the selection is good, as they are bound to go in a hurry.

Lexington, Ky., April 13.—The announcement is made by the Kentucky Trotting Horse Breeders' Association that 983 mares have been named in the $21,000 Kentucky Futurity for foals of 1917, which closed April 2. An increase of nearly sixty-three has been scored over last year, notwithstanding the fact that a number of the biggest breeding farms of the country have been dispersed in the fall and winter sales, all of which have for years been among the heaviest nominators, and besides, this is the first of the renewals of the Futurity confined exclusively to trotting colts, the pacers having been eliminated. Undoubtedly the gratifying response of the breeding public is principally due to the change made in the conditions by the setting aside of the tidy sum of $3,000 for the winners' dams in recognition of the right of the original nominators to a larger share of the purse than they have been getting. At the same time, the substantial increase under the circumstances brings out far stronger than mere words the fact that the breeding of the trtoter has by no means lost its popularity, but on the contrary, interest in same, as well as in the Futurity, is growing anew.—Western Horseman.

✤ ✤ ✤

Lost sight of by horsemen for more than a quarter of a century, the once noted trotter, Shamrock 2:25, died of old age at Columbia, S. C., a few days ago, revealing another interesting instance of man's benevolent solicitude for the welfare of favorite horses. Shamrock was the last of three equine veterans owned many years by the late Charles Logan, of Columbia, who left $40,000 to the city for educational purposes and $9,000 more to be used in promoting justice to animals. John M., the first of the trio to die, at the ripe old age of 28, was buried in the grounds of the Logan school. Luck Norton, another of the trio, died shortly after John M., in the fall of 1913, at the advanced age of 35.

Thirty years ago, when sensational performances by yearlings, two-year-olds and three-year-olds from the breeding farms of Governor Stanford, L. J. Rose and Count Giudo Valensin were attracting attention to California as a nursery for colt trotters, Shamrock was the fastest youngster of his age and sex in the world. Foaled in 1884, at Count Valensin's Arno ranch, he trotted in 2:25 in a race for two-year-olds at San Francisco in 1886. Mr. Logan bought him in Cleveland in 1891. His dam, Fern Leaf, by Flaxtail, produced the pacers Thistle 2:13¼ and Gold Leaf 2:11¼, for which the late John H. Shults once paid many thousands of dollars. The owner of Shamrock was an old-time horseman, who had the chestnut mare Emma Patchen, dam of George W. 2:24¾, and Lena Wilkes 2:29¼, in his stable nearly forty years ago. In a section where fast harness horses were few ,and men who drove them for pleasure in approved metropolitan style were still more rare, Mr. Logan was long a conspicuous figure on the roads about Columbia, with his pearl-buttoned buff driving coat and his natty Brewster wagon, drawn by one of the speedy trotters he loved so well. In the light of his actions toward his equine dependents one can understand how the slaves of such men as Mr. Logan might refuse to recognize the emancipation proclamation.—[N. Y. Herald.

✤ ✤ ✤

DIXON PREPARES FOR MAY DAY CELEBRATION

Dixon is preparing a good program of entertainment for the 41st annual May Day which will be held on Saturday, May 5. The park is being cleaned up and put in readiness for the picnic dinner, the racing and other amusement features of the afternoon. An unusually large list of entries has been received for the races and some of the best horses in the State have been entered. The entries are as follows:

2:20 Class Pace.

Lou Matavia's	Alton S.
Chas. Johnson's	May Airlie
Geo. Weed's	Donald
D. Greame's	Dorothy M.
B. H. Brewster's	Billy Bounce
F. Goulart's	Idiot Light
L. B. Daniels'	Lady Silverthorn
Benton Riber's	J. C. L.
J. E. Montgomery's	Hal Logan
Al Schwartz's	Directress Mac
Joe Ryan's	Glenwood Mc
H. G. Smith's	Gertie D.

Free-for-All Pace.

C. F. Silva's	Teddy Bear
H. Cohen's	Vera Hal
J. E. Montgomery's	Lock Logan
L. B. Daniels'	Bondalin
Geo. Giannini's	Bold Harry Aerolite

The three-year-old pace did not fill.

✤ ✤ ✤

With a big bunch of trotters and pacers Dick McMahon is finding plenty of work at Macon, Ga. The members of the stable are pleasing Dick with the form displayed by them and while none of them has been a mile as good as 2:20 they do all that is asked of them . Of the horses owned by R. J. MacKenzie, Miss Perfection has been a mile in 2:30, half 1:10, quarter :34; Anvilite in 2:40, half 1:15, quarter :36; Carl Vernon, two-year-old by Vernon McKinney, in 2:40, quarter :33½; three-year-old by Vernon McKinney, dam Merry Widow, in 2:25, quarter :33; Terry Patchen, two-year-old son of Joe Patchen 2d, in 2:40, half in 1:15, quarter :36.

A happy family party "came to town" recently in an old-fashioned surry drawn by an old-fashioned horse. There was none of that distraught automobile look on the faces of the five members of that party. They were each and all having a good time in a good, old-fashioned comfortable way. They hadn't been to town for a long time and they were going to "make a day of it." The pedestrians who saw that party smiled in sympathy and wondered why it was that a family in an automobile could never have quite that carefree happy expression.

✤ ✤ ✤

Secretary Oliver E. Remey, and his speed superintendent, Richard J. White, are well informed horsemen and know how to get up a program that will not only give their big crowds their money's worth but will make it profitable for horsemen. There is a chance for any good stable to win big money at Milwaukee this year. Write O .E. Remey, Secretary, State Fair Grounds, West Allis, Wis., mentioning the Breeder and Sportsman, for entry blanks and any further information you desire. An announcement of their dates, stakes, rules and conditions appears on page two of this issue.

✤ ✤ ✤

Magnus Flaws, the Chicago speed merchant, had an unusually busy week. To John H. Lawrence, Hoboken, N. J., he sold the eight-year-old green pacing gelding, King D. C., by Clipper Hal (son of Martin's Tom Hal), dam by a son of Shadeland Onward. King D. C. is a handsome roan and, although never trained until 1916, paced an easy mile in 2:15¼, quarter in :31¼, on a half mile track. He goes free-legged. To Holt & Cartwright, Lloydminster, Sask., Can., Mr. Flaws sold the trotting mare, Natomah 2:24½, by Idol Chimes p. 2:12¼, and the four-year-old trotting colt Sanfrano, by San Francisco 2:07¾, dam Susan Norris by Moko; to L. F. Montgomery, Vesper, Kan., the green trotting stallion, Prince Patch, trial 2:24¼, by Dan Patch p. 1:55¼, dam by Directum (4) 2:05¼, and the four-year-old trotting filly, Clara Heir, by Minor Heir p. 1:58½, dam by Directum (4) 2:05¼; to M. C. Preys, Barryton, Mich., the yearling colts, Erving, by Exalted 2:07¼, dam Signia, by Sidney p. 2:19¾, and Grey Echo, by Echo Bell 2:22¼, dam Greyling, by Lagonda Chimes; while to an eastern party he disposed of Ansel Moko, a two-year-old trotting colt by Prince Ansel (2) 2:20&, dam Eocita by Moko; grandam the dam of Mary Putney (4) 2:04½.

✤ ✤ ✤

Small Demand For Farnum Offering.

The sale of Thoroughbred and Standardbred horses by Miss A. E. Farnum, of San Francisco, Thursday evening resulted in 20 head of young mares, stallions and geldings selling for a total of more than $2,200, or an average close to $115. The sale was well conducted under the management of Samuel E. Kramer, manager of the San Francisco Riding Academy, where the sale was held, and Wm. Higginbottom of San Francisco was the auctioneer. Gordon Smith of the academy acted as clerk of the sale.

The offerings were presented in splendid shape; all being in fair flesh, well mannered and their hair in excellent condition. The sale, however, was about the dullest the writer ever attended. I should say 100 persons, representing the most prominent horsemen and horse lovers of the Bay region being in attendance; however, there were only three or four of those present who ever offered a bid and they made their bids with the greatest reluctance. The auctioneer must be given credit for doing his part well as he had no assistance and had to create a demand for the animals as they were presented.

The offering, perhaps, was as well a bred lot as will be sent under the hammer in San Francisco for some time; however, only a few of them were broke, and as most of those present were looking for saddle horses there very naturally was much work for the auctioneer. I believe, had the majority of the offerings been broken to ride and shown under the saddle the sale would have been much more lively and the average just double what it was. Many of those sold were bargains, in fact, if their breeding is never referred to they will make money. As brood mares, the fillies sold are worth much more than they brought, and some of them would even be cheap for mule producing mares as they possessed plenty of size, good big flat bone and lots of middle.

The noted Thoroughbred stallion, Marse Abe, was exhibited before the sale and attracted much attention. He is one of the handsomest horses in California and the colts sold which were sired by him were those in greatest demand.

Fritz Cebrian, of San Francisco, was the biggest buyer, getting the majority of the offerings. Included in his purchases was the first horse sold, which topped the auction at 360. This was a four-year-old chestnut stud by Marse Abe—Miss Whitemouse, and one of the best individuals and prospects in the state. G. D. Newhall was another good buyer, getting three or four of the youngsters worth the money. S. E. Kramer, manager of the riding academy, also was a buyer.

———o———

There are 30 good horses getting their preparation at the Woodland, Cal., track. Among them are some real headliners. The trainers are busy and expect to race down the line to Phoenix this year.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29. 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

April 28, 29—Fresno, Cal.—Fresno Blue Rock Club. C. B. Jackson, Secretary.

May 6—Coalinga, Cal.—Coalinga Gun Club. E. N. Ayers, President.

May 6—Bingham, Utah—Utah State Sportsmen's Association. A. R. Bain, Secretary.

May 6—Denver, Colo.—Denver Trap Club. Warren Conley, Secretary.

May 7—Crete, Nebr.—Crete Gun Club. Frank J. Kobes, Secretary.

May 7, 8—Salem, Oregon—Oregon State Tournament, under the auspices of the Capital City Rod & Gun Club. Mark Siddall, Secretary.

May 13—Everett, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Everett Gun Club. C. E. French, Secretary.

May 13—Eureka, Cal.—Eureka Blue Rock Club. W. E. Innes, Secretary.

May 13, 14, 15—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary.

May 14, 15, 16—Spokane, Wash.—Spokane Gun Club. "Old Policy." Chas. A. O'Connor, President.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden. Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24 — Bellingham, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

* * *

Golden Gate Kennel Show.—The premium list for the eighth annual show of the Golden Gate Kennel Club is to hand and contains a big list of trophies to be competed for this year. The show, which is to be held at the Exposition Auditorium, Civic Center, San Francisco, May 2, 3 and 4, is to be one of the largest given by the club. Quite a number of fanciers from Southern California, Washington and Oregon, are expected to be on hand with the best dogs from these sections and Superintendent Dick Halsted is being kept busy attending to the details of the show . With Mr. Geo. S. Thomas as judge of all breeds the club should be able to pull off a five-point show this year. Entries closed promptly on Wednesday, April 18. The office of the club is at 528 Market street, San Francisco.

Trout Fry Planted.—More than 16,000,000 trout fry have been planted in California streams by the State Fish and Game Commission against the season that starts May 1.

Streams adjacent to San Francisco have been well favored and the only regret is that the heavy plantings do not by any means insure an abundance of trout. The Fish and Game Commissioners fear that with the late start many of the larger fish will have made their way out into the ocean and that only the smaller specimens will reward the patient anglers.

San Mateo, Marin, Contra Costa, Alameda, Santa Clara and Santa Cruz counties, all of which are fished extensively by the bay city anglers, have been well provided with fry.

In San Mateo county, where the Pescadero, Purissima and San Gregorio flow, there have been planted 77,500 rainbow and 307,000 steelhead fry. In Marin county 600 Eastern brook trout and 120,000 steelhead have geen placed, while the smaller creeks in Alameda county have been planted with 144,000 steelhead.

Five hundred and ninety-four thousand fry have been planted in Santa Cruz county, where the San Lorenzo is the principal stream. Contra Costa county has received 27,000 for the Mitchell's Canyon and the San Ramon.

Revolver Association Aids Sport.—The United States Revolver Association bears the same relation to the revolver and pistol shooters as the National Rifle Association does to the men who are interested in the rifle and the Interstate Association for the Encouragement of Trapshooting does to those who are interested in trapshooting.

In March, 1900, a group of men interested in shooting with the revolver gathered in New York City, and the result of their deliberations was a national organization by and for revolver shooters.

Its objects are to foster and develop revolver and pistol shooting; to encourage and conduct friendly matches between members and clubs in the United States, as well as with shooters abroad.

The association is financially self-supporting. The money to pay necessary expenses is derived from the annual dues of the members, and from the entry fees in the championship matches.

Before the U. S. R. A. assumed control, there was an utter lack of uniformity in the conditions under which the revolver shooters of the country held their matches.

Some clubs permitted the use of weapons having barrels of any length that seemed to suit the fancy of the individual, and there were no restrictions as to the type of sight that could be used.

Now, thanks to the governing body, a club in any sections of the country can compete on even terms with any other club, with the assurance that the conditions under which their competitors will shoot will be the same as the ones under which they themselves make their scores.

Another important work which has been accomplished, is the recording of all high scores, so that you can find out at any time just what is the best score that has ever been made under any of the different sets of standard conditions.

It behooves every citizen who is interested in the future of revolver and pistol shooting, to help the brotherhood of short arm experts by joining the United States Revolver Association.

Outlook in South.—The light rains last week did wonders for the trout fishermen in Southern California. Before these rains there were no large fish seen in the streams, but since the little downpour large steelheads have been seen in most of the small rivers.

In the Ventura river especially have these large fish been seen during the past few days. Freddie Kennard of the Cline-Cline company made a trip to a few of the Southland streams the latter part of the week and reported the trout conditions as being the best ever.

The early hot weather this year has hatched thousands of insects, according to Kennard, and the fish are already jumping out of the water to get these bugs and flies.

By the time the season opens on May 1 the trout will be in fighting shape and the angling should be good from the very first day of the season. The indications are that the trout this year will be much larger than those landed last season. There have been no floods and as a result the fish have not been disturbed.

Reports received by Kennard from Big Bear lake during the past week were that the resorts at the popular fishing haunt were preparing for a record crowd for the opening of the season. The first of May will fall on Tuesday this year and as a result many anglers are expected to travel to Big Bear on Sunday and remain over for the opening. All the camps have been fixed up for the record crowd expected.

All reports from the Sespe are that the angling is going to be at its best there during the coming season. Roy Haslett and Johnny Burke visited the stream last week and found conditions to be better than ever before. The stream is as clear as possible, there is not the least bit of oil on the water and the river is very low. The two fishing enthusiasts saw just thousands of trout on their trip.—[Los Angeles, Cal.

One-Buck Law.—The California Assembly has passed a bill putting the limit on the number of deer to be killed during a season to one per hunter, instead of the regulation two that has been in force for years. Advices from the Legislature are to the effect that the measure has a good chance to pass the Senate. It is pointed out that the game is being exterminated.

Other changes in the laws are permitting the shipping of game into a closed season and permitting Civil War veterans to hunt and fish without a license.

It is now unlawful to discharge firearms from automobiles or other vehicles. Hunters are prohibited from running more than one dog after a deer, and a misdemeanor charge will be lodged if the dogs are caught chasing deer in the closed season.

Portland Club.—James W. Seavey made a noise like a Grand American handicapper April 15th at the Portland Gun Club traps when he broke 97 out of 100 bluerocks.

C. C. Kelly took a leg on the Bristol 20-gauge trophy by busting 22 out of 25, with Frank Templeton one bird behind. Seavey, Henry B. Everding, A. L. Zachrisson and A. Woelm broke 20, while other scores were: E. H. Keller 18, A. W. Strowger 16, John G. Clemson and J. C. Morris 15 each. Scores i nthe regular events:

Astoria, Ore.—The Astoria Gun Club had a practice meet April 15, as follows: Dick Fulton 24, Allen Metcalfe 21, Oscar Wirkkala 19, E. W. Burlingame 19, and Charles Arnet 17.

* * *

Albany, Ore.—Scores at the traps on April 15 follow: Mark A. Rickard 24, J. A. Neely 22, P. Dodele 21, H. A. Ieininger 20, W. E. Parker 20.

* * *

Woodburn, Ore.—Trapshooting scores made April 15 were: Charles Leith 25, the "possible", E. R. Riches 24, Peter Whitney 23, Charles Feller and E. G .Hawman each with 21.

Your Dog.—You'll miss him. His past companionship justifies mourning his loss, for a friend has passed from your life, a friend both tried and true. His death is a calamity to you.

You may never replace him, and there will always be something missing when evening comes. The children may meet you with happy smiles, dear friends may greet you with kindly eyes, but there comes a time when children go to other interests; the housewife is busy; friends grow cold, and life is dreary. Then it is that the old dog comes with tender eyes and true and wags his tail at you to let you know he loves you.

"Only a dog,' 'they say, "what difference!" Well, it counts to the master who loves him.

Whether your home be a palace or a hovel; whether your friends are many and influential, or a few tramp companions of misfortune, it's all the same to him. Your dog loves you, so mourn his loss! He was your friend, and friends are few.—[Mrs. C. B. Shepard, in Our Dumb Animals.

Kennels On Roofs.—The pets of society need not worry nowadays for comfortable lodgings when traveling to New York City, for the management of the Biltmore has just caused to be constructed kennels on the roof of the hotel—for dogs are the pets of society—where every comfort and attention is given them. It may sound strange, but men and women frequently when traveling to New York City bring along their pets. Some are bulldogs, some are chow dogs—indeed, dogs of every breed—and when they arrive at the Biltmore naturally their pets have to be placed in safekeeping. It was a perplexing problem for the management to know just how to take care of the traveling dogs. Frequently they were sent to the baggage room, chained up, and at frequent intervals during the day were fed. Then the question arose as to giving the dogs airing.

To be brief, the problem was finally solved by building the kennels on the roof, where they have plenty of airing and good food.

MANY YELLOWSTONE ELK DYING.

Deep Snows Cause Starvation of Thousands in the Herds; Reports Received Here.

Alarming reports of conditions which threaten decimation of the Yellowstone elk herds are beginning to reach the Department of Agriculture, both from the Jackson's Hole region and from Gardiner, Montana. The danger is said to be due to an exceptionally heavy winter snowfall and late oncoming of spring. Deep crusted snow is preventing the elk from obtaining their usual feed and the weakened animals, especially the calves, are reported to be dying rapidly in spite of the large supply of hay provided by the Federal Government for such emergencies. This supply, however, has been exhausted.

The elk which winter around Jackson's Hole, in Wyoming, are known as the southern or Jackson's Hole herd and number more than 20,000. The northern or Park herd is estimated by the Park authorities to contain over 30,000 animals. According to the reports received by the Forest Service the losses in the southern herd may reach even as high a figure as one-third of the entire number, with practically an entire loss of last year's calves. In the northern herd conditions appear to be less critical, but an immediate spring break-up is eagerly hoped for by those interested in seeing the elk preserved.

"When I left Gardner about three weeks ago," said Charles Sheldon, the explorer and naturalist who was selected by the Government to represent the sportsmen in the elk census attempted this spring, "the elk that I saw seemed on the whole not in bad condition for this time of year except the calves, many of which were pretty weak. But the snow was unusually deep and the elk widely scattered in search of food. I understand it has been snowing since I left and that considerable losses are thought probable. The winter has been extremely severe and both elk and domestic livestock are bound to suffer under such exceptional conditions. Because of the depth of the snow it was impossible to make the elk census that we had planned.

"Ordinarily there isn't enough snow to prevent the elk from getting at their feed. This winter, however, a succession of storms has piled the snow up, with the result that the animals have become weakened by prolonged starvation. At Jackson's Hole the Biological Survey had over 600 tons of hay available for feeding the elk, but I understand the supply is now exhausted.

"In most places feeding the elk is out of the question. Hay costs around $40 a ton and it is almost impossible to get hold of any at that price. The cattle and sheep men are unable to secure enough to feed their stock and will, I am told, probably suffer heavy losses. Even if unlimited amounts of hay could be had there would be no way to get it to the elk, since the roads are impassable. In many places in the Yellowstone Park region the mails are being carried by men on snowshoes and skiis.

"Elk preservation is a matter that presents many difficulties. It involves problems which can't be solved without careful study. It would be neither a wise nor a possible policy to attempt exclusion of honest homesteaders and stockmen from the natural range of the elk to the extent that would be required to insure adequate natural feeding grounds in a year like this. At the same time nearly everybody now recognizes that something should be done to guard the elk against recurring years of starvation.

"The solution is evidently some form of carefully thought-out control, under which there will be provision of a sufficient amount of both summer and winter range for a reasonable number and also some provision for utilizing the normal increment of the herds instead of letting the elk alternately multiply and starve off.

"To provide feed for elk the Forest Service has either prohibited or greatly restricted grazing on about two million acres of the National Forests of the Yellowstone region. This, according to the forestry people, includes by far the larger part of the remaining available winter elk range on these forests, which can be reached by the elk. The most serious feature of the situation is that in the past the elk have been in the habit of wintering largely in open country outside the National Forests and the Yellowstone Park, on land which is now in homesteads. Working out the right policy calls for expert study of the whole subject along the lines already undertaken by the officials in charge.

"The entire elk question is now being thus studied, and very carefully, by the Forest Service, National Park Service, and Biological Survey. I believe that outsiders should await the formulation of a plan by these bureaus, which will soon be in possession of the information necessary to solve the problem correctly. First of all the present size of the elk herds must be accurately determined. It must then be found out how many the available range will support. This will fix the maximum size of the herd to be conserved.

"As the animals multiply above this maximum, some of the surplus should be used to restock areas in other States which are suited to the elk. What method should be adopted for the disposal of the further surplus remains to be decided."

Officials of the Department of Agriculture point out that, deplorable as are the losses which the elk herds are now suffering, the situation is not essentially different from that created among domestic livestock by seasons of unusual severity. The natural increase will, they say, gradually bring the herds back to their former size if they are properly protected. Both the Forest Service and the National Park Service are deeply interested in the perpetuatio nof the elk, and are working together in an effort to find a consistent, workable conservation policy.

Organized Trap Leagues.—Competition in one form or another has done more to popularize sport than any other one factor. It is the spirit of competition that adds zest to a contest and makes it more interesting to participants and spectators alike. This applies both to contests between individuals and between teams.

A college football squad at practice attracts very little attention, but on the day of a big game, for instance the annual Yale-Harvard scrimmage, it is almost impossible to buy a seat for the game. It is the desire to see the strength and strategy of one team matched against that of the other which attracts the crowd.

The same principle applies to baseball. It is the big league games that attract the people, because in them competition is the keenest. The result of one game may or may not place the club nearer the coveted pennant. Although the clubs competing in the World's Series are usually of the East, just as much interest is evidenced in th result throughout the West, as in the home towns of the teams battling for the baseball crown.

Trapshooters realizing that their sport could be made more popular by introducing the element of competition among gun clubs, organized trapshooting leagues, consisting of anywhere from three to twelve clubs each. The result has been that the club members are now deriving more pleasure and a greater incentive for concentrated effort through the medium of friendly competition.

A few years ago the trapshooting leagues in existence could be counted on the fingers of two hands, but through the promotive efforts of the sport's exponents the desire for inter-club matches has increased to such an extent that new leagues are being organized weekly.

Trapshooting leagues are not only beneficial to the sport as a whole, but also to every club and to every club member belonging to a league.

Among the most successful Leagues in the country may be mentioned the Central Ohio Trapshooters' League, the Central Pennsylvania and Western Pennsylvania Trapshooters' League, the Central Illinois Trapshooters' League, the Northwest Washington Trapshooters' League, and the Inland Empire League of Gun Clubs.

The last named League is being conducted by the Spokesman Review of Spokane, Washington. It has been in operation only a few weeks, but nevertheless the competition among the twelve clubs comprising the League is very keen and the members' enthusiasm is at fever heat. Matches are held every Sunday and the scores are sent to the Spokesman-Review, which paper is handling the contest exactly as though it were a struggle for baseball honors. Opposite each club is shown the number of organization.

The Trapshooting League has come to stay. It is a form of competition that appeals to all shooters. It will be a matter of a short time only before nearly every club in the United States will be affiliated with some Trapshooting League.

Vallejo Club.—Andy Flickinger established a long run of 103 in the trap shoot at the Vallejo Club last Sunday. The well-known shot was in fine fettle as he went on and pulled down the honors of the 100-bird program by busting 97 out of 100. Barney Worthen of San Francisco was second with 94. Dick Reed topped the pros with 94. The club has made a number of improvements to its grounds and the visiting shooters were impressed with new conditions. The scores were:

	Events				
Shooter	25	25	25	25	T'l.
*R. C. Reed	23	23	24	24	94
B. Worthen	24	24	23	23	94
W. J. Terry	23	19	22	22	86
*O. Feudner	22	21	23	24	90
W. E. Cooley	22	21	24	21	88
*J. W. F. Moore	18	14	..	11	43
L. L. Fuller	17	15	16	14	62
J. Peckham	19	20	20	19	78
A. G. Flickinger	25	25	25	22	97
H. J. Yocom	24	21	22	20	87
*O. N. Jones	20	22	22	23	87

*H. J. Truscott	18	14	18	13	63
W. E. Mann	18	11	21	19	69
D. Humphrey	19	17	17	19	72

At 25 targets—Magistrini 20, Saxton 18, MacPherson 22, H. Herbert 21, Tesdale 17.

A. A. T. A. Honors in March.—In March 104 prominent trapshooters in the United States and Canada were awarded medals by the American Amateur Trapshooters' Association. In the 1500 target race O .N. Ford of San Jose, California, was awarded a solid gold medal for his score of 1427. In the 1000 target race the following were awarded gold medals for scoring better than 90 per cent: Geo. H. Anderson of San Jose, Cal., 935; F. D. Stoop of Kalispell, Montana, 931; J. H. Trumbull of Plainville, Conn., 930; Sharon Hall of Albony, N. Y., 925; Frank Gosnell Jr. of Baltimore, Md., 924; F. A. Seibert of New York City, 919.

In the 50 0target competition for the sterling silver medal, Paul R. Burger of Catawissa, Penn., was high gun with a score of 485 and William M. Bowman of Denver, Colo., second with 470. G. W. Fish of Los Angeles, Cal., and F. E. Watkins of Hartford, Conn., were tied for third place with 466 breaks.

Twenty-six shooters were awarded medals for breaking better than 80 per cent. For first place in this class R. C. Reed of Berkeley, Cal., was tied with B. F. Simon of Garden City, Kansas, with a score of 464; and Gus Peret of Spokane, Wash., was second with 461.

Forty-four shooters received bronze medals, high score of 478 being made by G. A. Burt of Denver, Colo., with H. Pfirrrmann of Los Angeles, Cal., second with 475 and C. H. Reilley, Jr., of Salt Lake City, Utah, third with 467.

Miss Harriet D. Hammond of Wilmington, Del., and Mrs. F. A. Johnson of Philadelphia, Pa., were awarded sterling silver medals for scores of 205x225 and 197x225, respectively.

Patterson Club.—The Patterson Trapshooting Club held its regular bi-weekly shoot on the 15th, and though the weather was threatening and a number of the regulars had gone to Stevison for the rabbit drive, three full squads of shooters faced the traps. The scores turned in were not up to the average, probably due to the strong wind, which caused the skimmers to curve and dip in a perplexing manner.

The club meets so far this season have been well attended, and the club membership is now thirty-nine. The Newman Gun Club having been disbanded a number of the members are shooting at Patterson. The scores turned in were as follows:

	10	10	5	Total
Meisner	7	8	3	18
Edwards	88	9	4	21
Harrison	7	8	4	19
Knutson	7	6	5	18
Sesna	4	5	5	14
Ralston	4	8	3	15
O. J. Smith	9	8	5	22
R. A. Smith	6	6	4	16
Totman	5	6	3	14
Hoffman	4	4	2	10
Bowers	8	7	3	18
Torrison	4	7	3	14
Fink	6	6	2	14
Bowie	4	6	1	11
Rogers	8	5	1	14

A handicap event of twenty-five targets for a silver spoon was also run off, and the spoon won by B. F. Bowers.

Yours,
T. HARRISON, Sec'y.

Green Lake Club.—A large crowd of Seattle marksmen were out at the Green Lake traps both Saturday and Sunday, limbering up for the big state tournament, to be held in two weeks.

The Sunday weather on April 15th proved to be everything but conducive to good scores, a drizzling rain and overhanging fog making the targets extremely hard to locate. L. H. Reid, however, turned in his usual score of 49. Forty-seven was high among the amateurs, top honors falling to Hi Follrich and C. E. McKelvey, and George Hambright, professional.

The Saturday scores were: C. E. McKelvey 99, L. H. Reid 94, Hi Follrich 87, C. L. Templeton 86, Hugh Fleming 86, J. B. Lewis 84, J. H. Templeton 83, W. B. Taft 83, Harry Eddy 79, and J. H. Davis 77.

At 50 targets—*L. H. Reid 49, Hi Follrich 47, *George Hambright 47, C. E. McKelvey 47, J. H. Hopkins 46, Hugh Fleming 46, L. S. Barnes 46, R. S. Searle 44, George Scripture 44, J. B. Lewis 43, Dr. King 43, F. Landwehr 42, Dr. E. C. Lanter 42, M. A. Rosenfield 41, Dr. A. B. Kidd 41, C. B. Fitzgerald 40, H. E. Gleason 40, J. H. Jones 40, E. E. Ellis 39, J. H. Davis 39, G. B. Baker 38, R. W. Kinzer 38, D. Baker 36, G. A. Conklin 36, Dr. J. F. Hill 36, S. A. Martin 35, E. Chantrell 35, Dr. S. W. Case 34, C. C. Giffin 32, S. Burt 29, C. F .Rinehart 27, E. P. Buck 27, Dr. S. W. Giffin 26.

At 100 targets—Follrich 94, Fleming 94, Barnes 91, C. E. McKelvey 91, Hopkins 90, Searle 90, Geo. Hambright* 89, Ellis 87, Landwehr 86, Lewis 86, Conklin 84, Geo. Baker 80, Martin 78, D. Baker 73, Davis 72 .(*Professionals.)

Seattle Association.—With a cold damp day to shoot in and many of the members visiting the Green Lake club to practice for the Washington State shoot only a few more than a squad turned out to the Harbor Island traps on April 15th. Dr. C. L. Templeton furnished the high score of the day by going fifty straight. L. H. Reid, professional, broke forty-nine out of the fifty and finished second.

J. A. Fortier in extra events shot thirty-five out of fifty. Harry Eddy broke fifty-nine out of seventy-five and E. A. Stairs, a new man at the trapshooting game, shot sixteen out of twenty-five. The scores:

At 50 targets—C. L. Templeton 50, *L. H. Reid 49, Ralph Kinzer 45, C. E. McKelvey 45, C. W. Bandy 39, J. H. Davis 37.

Yours,
E. A. FRY, Sec'y.

La Grande, Ore.—Gun club scores made April 15 are: Lou Rayburn 25, H. Becker, George Young, each 23, F. C. Ryder 22, Claude Mackey 21, L. J. Johnson 21, B. W. Hughes 21, C. Becker 19, F. M. Slagel 7.

Sportsmen's Row

There are 2077 buffalo in the Wainwright Buffalo Par kat Alberta, Canada. This park has an area of 15 0square miles.

✤ ✤ ✤

Don't shoot from an automobile or any other vehicle in the future. A law has been enacted making it unlawful. The auto for a time threatened to drive the game out of the country.

✤ ✤ ✤

Regulations have been passed to govern chasing deer with dogs. A hunter can use only one dog in the chase and is guilty of a misdemeanor if his dog runs deer in the closed season.

✤ ✤ ✤

State Tourney.—Fred H. Teeple, resident manager and secretary of the Los Angeles Gun Club, has sent out proof sheets of the events to take place at the California-Nevada State Championship, at the L. A. traps on May 21, 22, 23.

✤ ✤ ✤

Civil War veterans will not be required to secure a license to hunt or fish in California. The legislature has passed a bill excluding the heroes from shouldering the extra tax when they want to enjoy a little sport out of doors.

✤ ✤ ✤

Not long ago an English breeder of Sealhams sold a terrier to a friend at the French front and the dog was transported across the Channel by one of the British aviators who was starting out for the battlefield. Both arrived in safety.

✤ ✤ ✤

Seattle and Portland have formed a "get-together club" and much interest is being displayed in the shooting game in Northwest Washington. Many women members line up at the sixteen-yard mark every Saturday and bombard the disks.

✤ ✤ ✤

Even away off in India the love of the thoroughbred dog is strong and they have some good ones there t ooffset the great army of mongrels that one sees in that country. A show was held recently at Rawai Pindi, at which there was a creditable collection.

✤ ✤ ✤

Shooters who took in the registered tournament at Lindsay last week are high in their praises of the enthusiasm that was uncorked. Secretary Charles O. Barieau, who was high gun among the amateurs, has stirred up interest among the members of the Lindsay club.

✤ ✤ ✤

Many persons assert that the Boston terrier is the real American dog, but how about the Chesapeake Bay dog? We seldom see them here except in the miscellaneous class. Up in Seattle at their recent show there were nearly a score of actual dogs benched with a full classification.

✤ ✤ ✤

"Hi" Everding, whom the coast sports swear by, is offering some dandy trophies for the scatter-gun artists these days. The "sport alluring" is taking hold with a vengeance in the Puget Sound towns, and the women are not a whit behind their male competitors in cutting down the skimming dishes. Go to it, girls, we have a bet on you!

✤ ✤ ✤

A fancier of English bulldogs is authority for the statement that the name of the dachshund is going to be changed to "Hoboken terrier." This may be true and then it may not be, but it would not be surprising in view of the fact that the Kaiserhof has taken down the old sign and has Americanized the place in a nomelclature way.

✤ ✤ ✤

One of the most promising Yorkshire terriers that has been seen in this country in a long time has succumbed before it had a chance to win a championship. It was brought out by Miss Ruth McBride at the Westminster show and won for best novice. It was a tiny little thing and had all the earmarks of a topnotcher. It was subject to fits and succumbed to this ailment. Miss McBride feels deeply the loss of her pet and is going to have her preserved by a taxidermist.

✤ ✤ ✤

Orin Ford, hustling, bustling promoter of the shooting bees, is steering the destinies of the Pacific Coast Handicap and he tells us that he is sure to have the greatest aggregation of slam-hammer artists ever assembled "under one tent" at the San Jose event, among them being the peerless Topperweins from Texas. Mr. Ford himself is one of the best shots on the west coast, and they would have to travel to the ends of the earth to find a man who could put more punch into a program.

✤ ✤ ✤

Rainbow Trout Rise Freely.—The rainbow trout are very free risers to the artificial fly, apparently less discriminating in this respect than either native or brown trout. Any of the well-known fly patterns will be successful. Generally the tackle used for brown trout is equally suitable for fly-fishing for rainbows. The rainbows always seek the swift water, grow to a larger size than the native trout, the rate o fgrowth being about the same as that of the brown trout, and reasonably strong and efficient tackle is always best for heavy fish in heavy water.

Here's Some Good Work.—Portland, Ore.—Government hunters are rapidly thinning out the predatory animals that have been raising havoc among the stockmen in eastern Oregon and Washington. The annual loss from these depredations throughout the United States aggregate millions of dollars. In time it is expected that this loss will be reduced to a minimum. The Government ,through the Forestry Department, has appropriated $125,000 for defraying the expenses incident to this destruction.

These facts were brought out at the forest supervisors' session recently by E. F. Averill, district inspector, who has charge of the slaughter in the district with Pendleton at his headquarters. There are seven other districts of a similar nature in the United States.

Young men are being trained in the work, the hunters being paid $75 a month at the start. The men are furnished with ammunition, but they must provide their own guns.

Uncle Sam places no restriction on the manner in which the animals may be slain. The use of the gun, trap or poison is permitted. Much of the work is accomplished by means of traps. The quest is commenced with vigor in the early Spring and continued throughout the Summer and Fall. It is also carried on when practicable in the Winter time.

Last year some 6,000 predatory animals were slain, it is reported. The money derived from the pelts goes to help meet the expenses of killing the wild beasts. Coyotes, bobcats, cougars and wolves are the special objects of the hunters. Coyotes are said to be the worst offenders. This beast will tackle a band of sheep for the mere pleasure there is in it, says Mr. Averill. The beast frequently contents itself with the sucking of the blood of its victim. In case of extreme hunger the carcasses are devoured.

Hunters go wherever the animals are a menace. The salary system is said to be an improvement on the county bounty plan, as it induces the men to seek out regions where there are the greatest number of the varmints.

In the Spring and Summer, when the fur of the animals is the poorest, is said to be the best time for the pursuit of the beasts. At present the crusade is confined to the protection of the stockmen, but it is planned to extend the system to include game.

Notable service in the prevention of the spread of rabies among wild animals is being rendered, says Mr. Averill.

Stockmen and forest supervisors are co-operating agreeably in the work of extermination of the foes of the stockmen and the general results obtained are said to exceed expectations.

Increase in the grazing area of more than 100 per cent has been obtained as a result of study and efficient work of the forest supervisors, and the stockmen are reaping the benefits. J. L. Peterson, grazing expert for the Government, told of the good results and exhibited maps of the areas.

GAME PROTECTIONIST.

Ready For Trout Season.—Sportsmen all over California are making ready to welcome in the trout season on May 1. There was a deal of disappointment that the change in the present laws could not be accomplished in time for an earlier opening on April 1. The new date will be in order next year.

Even so, conditions are reported much more favorable for good angling than was the case in 1916. There is more water in the small Coast streams and they are fairly well stocked with trout. Everything is in readiness, so get out the rod and reel and start preparing for the great sport.

✤ ✤ ✤

North Yakima.—E. C. Greeman, selected by the county game commission for deputy game warden, has arrived from Oregon City, Ore., and entered upon his work. He will give attention to the fishing interests of the county, while S. R. Finley, also appointed a deputy warden, will look after the propagation and protection of game animals and fowl. The game commission will not name a warden to succeed Frank Bryant, whose resignation was forced by Chief Deputy State Game Warden Wales of Spokane, for the reason, it is unofficially stated, that the state official's jurisdiction extends only to wardens ,not to deputies ,and the Yakima officers do not wish to be further interfered with by him.

✤ ✤ ✤

From a London, England, exchange we learn of the death, on March 24, of John Robertson, a well known English gunmaker, who at the time of his death was 77 years old. Mr. Robertson took an active part in business up to the end of last year, but of late he had been ailing, and following an operation for appendicitis he passed away. Mr. Robertson hailed from Haddington, says the Shooting Times, where his father was a gunmaker. Leaving his native town in 1860 he worked for the firm of Sir Joseph Whitworth of Manchester for a few years, leaving there for Birmingham; but his residence there was not of long duration, as he journeyed to the metropolis and joined the staff of Messrs. Prdey. Here he stayed with that firm about ten years, and, on resigning, he commenced business on his own account, working for the trade until about twenty-five years ago, when he became a partner in the firm of Boss & Co.

This shoot will be the club's annual registered tournament and Teeple is getting out an elaborate program in book form with the biographies and photographs of the most noted trapshooters on the Coast.

The opening day, Monday, May 21, a 200-bird program in ten events of 20 birds each will be put on, at two dollars to each event. The purses will be divided 40, 30, 20 and 10 per cent. Class shooting will count and not high gun.

An entrance fee of five dollars will be charged to compete in this event. Diamond trophies also will be up for the five high guns in this event.

The second day's program will be similar, while on the last day, the Interstate Association California-Nevada State Amateur Championship at 100 targets will be held. Following this event, a 100-bird distance handicap will be put on at five dollars' pool entrance.

✤ ✤ ✤

Los Angeles Club.—A crowd of thirty-nine shooters turned out at the Los Angeles Gun Club Sunday morning to compete on the H. R. Everding trophies in a 100-bird handicap class shoot.

High gun of the day was hung up by Owen Council. His score, achieved from 19 yards, was 97x100. This score gave him five points toward the prize up in class B. The results:

Council, 19 yds., 97x100; Dodds 22—94, Meloy 19—92, Blanchard 19—92, Melford 19—92, Famechon 18—90, Roseberg 20—90, Hart 18—90, Morse 19—89, Pfirrmann 21—89, Sargent 20—87, Knight 21—86, Tuckett 19—85, Kennedy 18—85, Mellus 22—83, Favier 16—83, Evans 19—82, Pachmayr 18—82, Cooper 16—81, Cline 18—81, Mrs. Pfirrmann 17—81, Pool 18—80, Hurst 16—78, Meek 18—77, Betz 17—73, Hall 19—73, Olwer 19—70; McCracken 16—61x75, Barto 16—49x50, Wilson 16—45x50, Teeple Sr. 16—45x50, Bauer 16—42x50, Mueller 16—39x50, Armstrong 16—21x50, Cline 16—21x50.

The point winners to date follow:

Class A—Mellus 15, Dodds 13, Pfirrmann 10, Morse 6, Evans 5, Fish 5.

Class B—Sargent 14, Council 11, Tuckett 10, Grewell 8, Pachmayr 6, White 4, Meek 3.

Class C—Melford 15, Wilson 13, Mrs. Pfirrmann 12, Hart 11, Bishop 9, Betz 5, Mandaville 3.

Class D—Kennedy 18, Pool 16, Nelson 7, Mrs. Mellon 7, Carnahan 2, Garnsey 2, Miller 2.

Gold "take home' 'trophies were won by Famechon, Evans, Melford, Kennedy; silver mementoes by Meloy, Pfirrmann, Dodds, Rosebury.

✤ ✤ ✤

Vernon Club.—Billy Mullen, clay bird exterminator from Ray, Ariz., invaded the Vernon Gun Club Sunday morning and carted away high gun in the season trophy event. He broke 57 birds out of 60.

Charlie White was second high gun. He broke 56x60. Stanton A. Bruner, secretary of the club, broke third high with a score of 55x60.

During the day's competition Bruner squelched 193 targets out of 200 shot at. He accomplished a high run of 127 from 16 yards.

Orvie Overall, the one-time great pitcher of the Cubs, was a guest of the club. Overall is just breaking into the trapshooting game. He brught a trap foom the Bruner-Kimble people and means to install it at his ranch and get onto the sport. The results:

Sliding handicap trophy shoot, 60 targets, 16 to 20 yards—S. A. Bruner 55, E. Foley 39, Ed Bohring 50, I. D. Dierdoff 49, Wm. Mullen 57, A. W. Bruner 52, Wm. Pugh 51, Knauff 45, Chas. White 56, Arthur 46, Orvie Overall 51, Bob Bole 48, C. E. Groat 54, Mrs. C. E. Groat 53, Dr. Packard 53, Van Nest 42.

✤ ✤ ✤

Quail Limit 10 Per Week—San Diego, Cal.—Senator Edgar A. Luce of this city is the author of a bill he introduced before the Legislature Saturday which would limit the number of quail to be shot by one person to 10 a week instead of 15 a day. It is said that there is a probability of the measure becoming a law. San Diego county has long since been a Mecca for quail shooters from Los Angeles and other places and the birds are becoming scarcer and scarcer.

Los Angeles shooters already are kicking. They say 10 birds is too small a bag, and they have started a movement to fight passage of Senator Luce's bill.

Officials of the State Fish and Game Commission state that no change was recommended in the quail laws governing Southern California, as their investigations indicated that a larger breeding stock had come through the 1916 shooting season than survived 1915, and that was the best year in several for quail shooting. They say that while quail always are scarce along the highways and close to the large cities, they are plentiful enough a few miles back, and last winter's rains assure this being a good breeding season.

Los Angeles shooters say that 10 birds is too small a number to warrant men in taking long trips, which they are glad to do now when able to ship 15 birds and bring back 15 with them. So many of the large ranches are posted against all hunting that long trips are needed to reach open country, but hunters feel that the decrease of open ground is protecting the quail enough without discouraging all gunning interest by needless strict laws which defeat themselves by throttling down the hunting-license income which has to pay for the extra wardens such laws make necessary to keep the violators from profiting by the absence of the conscientious sportsmen from the hunting fields.

BETTER LIVE STOCK
and Agricultural Topics

Hay is now retailing at $40 a ton in California feeding communities.

✤ ✤ ✤

The fifth annual sale of Percherons at Folly Farms, Abington, Pa., resulted in an average of $540 for the 37 head of well presented draft mares.

✤ ✤ ✤

A strong demand existed for the good Shorthorns included in the breeders' sale at So. Omaha, Neb., March 30, when 72 head averaged $261.

✤ ✤ ✤

The 49th annual meeting of the American Jersey Cattle Club will be held at the Waldorf-Astoria Hotel, Fifth Avenue and Thirty-third Street, New York, on May 2 at 11 a. m.

✤ ✤ ✤

Missouri, it is said, is better off for forage than any other state in the Union. Two splendid hay crops and open winters have resulted in plenty of feed during the winter and a liberal supply on Missouri farms and in storage.

✤ ✤ ✤

In response to a request from the Rural Society of Argentina the executive committee of the American Hereford Cattle Breeders' Association has asked R. H. Hazlett, Eldorado, Kans., the treasurer of the association, to assume the duties of judge of Herefords at the great Argentina live stock show early next September, and he has acepted the commission.

✤ ✤ ✤

Cattle Feeders' Meeting at Columbia, Mo.

An invitation is extended to cattle feeders of Missouri and other states to attend the Cattle Feeders' Meeting and inspect the steers fed by the Missouri Experiment Station at Columbia during the past winter. Friday, May 4th, at ten o'clock in the forenoon is the date set for the meeting.

✤ ✤ ✤

A number of sticks of dynamite found near the Guyton-Harrington Mule Co.'s St. Louis stable, was thought to have been placed there for the purpose of destroying the structure, which quarters thousands of horses and mules, awaiting shipment to Europe. Officials of the company, however, are not inclined to think that way. According to Kirk Harrington there were no horses or mules in that part of the barns and furthermore the explosive was not immediately near the stables or placed so as to support the suspicion that it was intended to wreck the building.

✤ ✤ ✤

In co-operation with the Food Supply Committee of the State Council for Defense, the U. S. Forest Service is making plans to stock to their very fullest capacity the National Forest ranges. If the stock can be secured and the money raised for necessary trails and water developments, an increase in the number on the ranges equivalent to 80,000 head of cattle might be made. District Forester Dubois and Assistant District Forester Rachford are now in the Sierra ranges . Their goal is to increase the number of stock on the National Forests by 80,000 head.

✤ ✤ ✤

Pay Big Prices for Nine Jacks.

Tulare, April 24.—Miller & Lux have bought nine head of jacks recently shipped here from Tennessee by Faught & Warren, the consideration being $14,000 for the nine. Part of this was in cash and the rest was taken in young mules from the Miller & Lux ranches . The deal for the purchase was made by C. K .Safford of Los Banos, head stock buyer for the Miller & Lux ranches. Mr. Safford came here with the intention of buying three or four only, but after looking at them decided to buy the entire shipment. The jacks have been shipped to Los Banos and will be distributed from that point to the various Miller & Lux ranches in California and Nevada.

✤ ✤ ✤

The quantity and very low weight of the hogs now coming to market is convincing proof that we are going into a period when hog receipts will be lighter than is generally anticipated. There is no getting away from the fact that high prices and spotted scarcity of corn in the hog belt has forced a lot of hogs to market earlier than in former years, and this may find our receipts of hogs in May and June disappointing to many who are not closely observing present conditions. A great many fall hogs which usually come to market in May and June are coming now. Therefore, we would advise those who are expecting the usual May and June run of hogs to keep an eye on hogs now coming to the different markets, and we believe they will see signs of scarcity ahead. Another item worth considering is the likelihood of the breeders holding their sows over for next fall breeding. We hear many country breeders talking along this line. The holdings of sows will cut down the usual supply of heavy hogs which come in July and August, and we may not have another good run of hogs until next winter. Our observations force us to this conclusion.

Feeding Young Stock.

Did you ever stop to realize that the cheapest and also the greatest gains of young animals are made while they are still suckling their dams? At this time the animals are small, the amount of food required to maintain them is slight and practically all they eat goes to growth. When they are older a goodly part of the ration goes into a maintenance ration to support the growth they already possess. The older an animal grows, until it reaches maturity, the more food it costs to make a pound of gain. Young animals are almost entirely fed through their mothers, and if they get a good start they do better afterwards. Hence the wisdom of proper food to the dams should be apparent to all.

✤ ✤ ✤

"Punches Cattle in Aeroplane."

Mr. Jump Cauthorn,

San Francisco, Cal.

Dear Jump: I am really ashamed of myself for not having written you and wishing you all the good things in your new venture. Old boy, it is in you to make good and I hope to see the Breeder and Sportsman the biggest paper in the United States and you at the head of it. I have been here since January and will probably not go to St. Louis before the first of next month. We have a ranch of 1400 acres here and 175 pure-bred Holstein and Jersey cows, and it is keeping me tied down pretty close; however, I expect to be up in Missouri this summer at the fairs and hope to see you. The Government has an aviation school on our ranch and about 50 or 60 students all the time, and when we lose any cattle instead of going out on a horse and hunting them we get one of the boys to go up in an aeroplane and locate them; so you see I have a progressive ranch here and sailing a little high, but always come down off the perch the first of the month when the bills come in.

Again hoping you all the success imaginable, and with very kindest regards, I remain,

Yours very truly,

JAS. H. BRIGHT.

Miami, Florida, April 11, 1917.

✤ ✤ ✤

The Boss insists that our readers shall have something special next month in the form of an Annual Spring Number of the U. S. Booster, and has just given the Editor instructions to prepare an eight-page souvenir for April to be printed in six colors on glazed paper. Have a heart, boys, and read our sentiments expressed below:

If you have a bit of news, send it in,
Or a joke that will amuse, send it in.
A story that is true,
An incident that's new,
We want to hear from you!
SEND IT IN.

Will your story make us laugh?
Send it in.
Never mind about your style,
If the story's worth the while,
And may help or cause a smile,
SEND IT IN!

—(U. S. Booster.)

Blue Grass Good Pasture For Hogs.

One of the best and earliest pasture grasses for use in pork production is blue grass, as indicated by tests for a number of years at the Missouri College of Agriculture. It can be grown on land not adapted to cultivated crops and furnishes feed over a long grazing period at a very low cost of production. It produced an average of from $9.66 to $43.36 worth of pork from each acre of blue grass during the five-year period of 1908-1912. Its averages would doubtless have been much higher if more grain had been fed for the first year when less than half as great gains were made as during any later year. With present wartime prices the value of blue grass for pasture is correspondingly increased.

Most of the hogs used in the tests weighed between 60 and 90 pounds. During 1908, poor results were obtained because too little grain was fed at the beginning and 5.1 pounds of grain were required for every pound of gain secured, as compared with an average of 4.4 during the four later years. In 1909, better results were secured when, instead of the shelled corn fed during the first two years, a mixture of 6 parts of cornmeal to 1 part of oil meal was fed and the hogs were turned on pasture April 10. During this year they were on pasture 200 days as compared with only 144 in 1908 and 1909, and it is noticeable that it was during this year that $43.36 worth of pork was produced for each acre of blue grass used, but similar methods failed to bring as good results during 1911 and 1912.

The hogs did not make economical gains during the hot dry portion of the summer, so during the later years of the tests they were taken off the pasture at these times, and all hogs were kept off until the fall rains started the grass again, when more shoats were turned in.

✤ ✤ ✤

It is a rare occasion nowadays to find any kind of rancher, farmer or stockman, who does not appreciate the value and good judgment of using pure-bred stock in their herds. Several years ago, it was supposed that the corn-belt states were the only successful places one could raise beef cattle profitably and that their herds were superior. However, it has been demonstrated recently in both sale, show and market rings that California beef cattle are not only as good, but superior to any others. That the climate, forage, feed and every other condition in this state is favorable for the production of better cattle. W. M. Carruthers owns one of the best bred and most noted herds of Shorthorns in the United States, and on Wednesday, May 2, at his farm at Mayfield, California, will sell as rare a lot of breeding and show cattle as ever went under the hammer. He has secured Col. Carey M. Jones, of Chicago, the most noted Shorthorn salesman in America, to disperse the cattle and made every other arrangement for the good of visitors. He asks us to invite every lover of good stock, whether they intend buying or not, to attend his sale and see what he has accomplished in the way of producing Shorthorns. To those who want to buy or even think of buying at some future time, we advise arriving at Mayfield early on sale day so that you will have ample opportunity to inspect these good Shorthorns in their stalls, for when they go before Carey Jones they are going to get a fast selling and you will let some bargains go before you know it. Write Mr .Carruthers now, mentioning the Breeder and Sportsman, and he will send you one of his attractive catalogues; then arrange to be on hand early Wednesday morning and select the animals you like best and be prepared to buy them at your own price when they are brought into the arena.

NEW WORLD'S CHAMPION SENIOR 4-YEAR-OLD.

FANCHER FARM MAXIE 186389, a purbred Holstein-Friesian cow, bred and owned by Senator A. T. Fancher, Salamanca, Cattaraugus County, New York. The Empire State is continually getting into the limelight with wonderful milk and butter records made by cows of the Black-and-White breed, and the friendly competitive spirit evinced by many of its prominent dairy cattle owners points conclusively to the fact that the end is not yet in sight.

THE FARM

State Dairy Cow Competition Results For March.

During the month of March, 185 cows in the State Dairy Cow Competition produced an average of 1410 pounds milk and 54.3 pounds butter fat. The highest production of butter fat for the month was 105.27 pounds, produced by the Holstein cow, Mabel Haskins Colantha Girl, owned by K. W. Abbott, Milpitas. Seven other cows produced over 90 pounds of butter fat during the month. The Pacific Rural Press prize for March was won by Mr. F. J. Kell of Stockton, for the highest average production by five grades, viz., 71.05 pounds butter fat. Mr. Kell also won the McAllister and Sons' prize for the month for the highest production by a grade cow, 84.315 pounds fat. 567 cows have been entered in the Competition to date, of which number 307 are entered for monthly and 10-months records, and the balance for yearly cow-testing association records.

Entries in the Competition will close on May 1, this year. Dairymen who wish to enter their cows and compete for some of the numerous prized offered in the Competition (92 in all, aggregating over $7500 in value) must, therefore, act promptly. Address Professor F. W. Woll, University Farm, Davis, California, for further information concerning the Competition.

Auburn (Placer Co.).—At a meeting of the Placer county farm bureau directors, vice directors and secretaries in this city Saturday, the matter of the next county farm bureau fair will be taken up and discussed. It is expected that arrangements will be made at this meeting for the fair, in order that exhibitors can begin now to prepare for their participation in it. The meeting will be attended by about sixty officials of the bureau, coming from all parts of the county. H. S. Maddox, from the office of State Horticulture Commissioner G. H. Hecke, and who has had a lot of experience in getting up fairs, will be present and will address the meeting during the afternoon.

NEVADA STOCK FARM, Inc.

RENO, NEVADA

TWO THOROUGHBRED STALLIONS

OSSARY--by Imp. Ormonde out of Imp. Countess Langdon by Kingscraft. Ossary is the sire of high class race horses and was foaled in 1896.

MONTGOMERY--by Passara out of Montgomery Cooper by Duke of Kent. Montgomery was one of the highest class stake horses in America in his day. He is the sire of Edna F. his first starter, who won four races straight. He is a grand individual and was foaled in 1904, winning in stakes and purses a total of $89,600.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 27625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

Cal. State Thoroughbred License No. 2018.

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

Superbly Bred Young Saddle and Harness Horses FOR SALE

SADDLE BRED:—
Dark Bay Gelding by Lord Denmark—Sonia.....Foaled 1914
Bay Colt by Lord Denmark—Dixie Queen.....Foaled 1915.

STANDARD BRED:—
Bay Gelding by Don Sonoma—Chula.
Black Colt by Silkworthy—Sonia.

Anyone looking for some youngsters of either breed will find these colts as attractive as it is possible to breed them. They will be sold at reasonable prices; are in good condition and may be seen at Oakridge Ranch, Sonoma Co., Cal.

The superbly bred stallion, Silkworthy, is also for sale. He has been bred to a limited number of mares and has proven himself a sure foal getter, and we have the quality of his colts to show.

Address W. G. COWAN, OAKRIDGE RANCH, KENWOOD, SONOMA CO., CAL. or BREEDER AND SPORTSMAN, SAN FRANCISCO, for further information.

THE STANDARD BRED STALL ON SILKWORTHY 58175 LICENSE NO. 2069

Son of MORGAN AXWORTHY 47430. Dam CLEAR SILK (dam of Crystal Silk 2:28¾). Silkworthy is bred in the purple. His sire, Morgan Axworthy 47430, is by Axworthy out of Kinglyne, a full sister to Bingen; and his dam by Prodigal out of Red Silk by Baron Wilkes.

He will make the season of 1917 at Kenwood, Sonoma Co., Cal.

SERVICE FEE, $25.00 WITH USUAL RETURN PRIVILEGE.

Address W. G. COWAN, Oakridge Ranch, Kenwood, Sonoma Co., Cal.

LIVESTOCK INSURANCE—

is just as important as Fire Insurance, or automobile insurance or any other form of business protection. And, here is a company that provides that protection to stock owners with assurance of prompt payments when losses occur.

Montana Livestock & Casualty Insurance Co.

DOUGLAS KEITH, General Agent Northern California, 701 Royal Insurance Bldg., San Francisco.

W. H. MILLER, General Agent Southern California, 505 Lankershim Bldg., Los Angeles.

Highland Squirrel King 1881

By the Matchless FOREST KING.

Is justly entitled to the distinction of being to California what Rex McDonald was to Missouri.

His get are winners in all company, are very elegant in form and possess all of the exquisite grace, beauty and wonderful endurance that are expected of Denmarks.

If you want to raise winners, send your mares here, if you want to buy a winner come here and if you have one you want made into a winner, send it here.

Buy a bottle of Tuttle's Elixir today. Your dealer has it—if not, send us his name and 50 cents and we will send you a large size bottle prepaid, also a copy of "Veterinary Experience."

TUTTLE'S ELIXIR CO., 19 BEVERLY STREET, BOSTON, MASS.

"Hartford" Race-horse Insurance--

ARTFORD" policies are broad and liberal in their terms and are offered at lower rates of premium than have often been charged in the past.

You race either for pleasure or profit—possibly for both. A fast horse is very valuable, the purchase price running from a few hundred to many thousands of dollars, and should be insured against death. Any race-horse is subject to the serious hazards of transportation, training, and racing, as well as the greater danger of death from fire, lightning, or disease.

If good judgment prompts you to insure your buildings against fire, you certainly will admit the necessity for race-horse insurance.

In the past it has been practically impossible for many owners to secure satisfaction and complete protection. "Hartford" policies furnish real race-horse insurance.

Write for rates and further information to

Your Club Needs New Chaps at the Traps!

BOB FOLWELL Univ. of Penn. Football Coach Instructing Intercollegiate Champion Berry in the Art of Trapshooing

Every club needs something to put "pep" into its organization. New chaps at the traps brace up the club, propose novel shooting programs and arouse greater enthusiasm amongst the older members.

Beginners Events get new chaps at the traps. Thousands joined the trapshooting clubs last year because of Beginners Events.

Hold a Beginners Event in May or June

Look for beginners in your office ,shop and neighborhood. Invite them to your club to learn to shoot. Get them to try the "sport alluring." The fascination of shooting the clay targets will win them just as it has made you a "gun bug." Round up the beginners to help your club.

TO GET THE HANDSOME TROPHY

we are giving to the club in any State or Canadian Province having the largest number of participants in a Beginners' Event. Sterling silver watch fobs and spoons will be given to clubs for presentation to beginners making highest score.

Send Us Your Club's Application To-day

Boost Beginners' Events,—they get new chaps at your traps! Pick your day and send your club's application without delay.

Dairy Preparedness.

"No program of national preparedness for the impending food crisis in the event of war is wise nor complete without sharp emphasis on conserving and increasing our national stock of dairy cows." This is the statement of M. D. Munn, Esq., President of the National Dairy Council.

"We must, of course, bend all our efforts to the prevention of a war shortage in food stuffs of all kinds," Mr. Munn continues, "but when prices for beef begins to rise, dairy cattle must not be slaughtered nor dairy feeds diverted to other uses."

The Dairy Cow is mankind's greatest friend, most serviceable food, and one of the cheapest.

The Honorable Commissioner of Agriculture, Mat S. Cohen of Kentucky, calls the attention of the breeders to the fact the country is facing the greatest famine of pure-bred horses in the history of the world, and that they should prepare themselves to meet this crisis. He said "that the breeding of pure-bred mares had decreased 60 per cent during the past three years and that it behooved the horsemen of Kentucky, which is the home of the Saddle Horse, to make up this deficit. More than 1,000,000 head of fine horses have been taken from the United States during the past thirty months, for the use of European soldiers. From Kentucky alone approximately 30,000 horses have been sent to Europe during the past thirty months, and an even greater number of mules. At the conclusion of the war the demand will be so great as to bring about a condition never before existing in the history of the industry."

YOUNG MAN, YOUR BIG CHANCE IS ON FARM.

By A. W. FOSTER,

Regent of the University of California and Former President N. P. R'y Co., and Owner of Hopland Stock Farm.

I have read Secretary Lane's notice to the public, inviting the free cultivation of government land, the offer of the railroads to permit the use of their rights of way, without charge, to those who would make use of them for agricultural purposes, and the general movement to utilize back yards and other small vacant spaces for growing vegetables. All these suggestions are good in their way, but they fail to touch the sore spot of our agricultural needs. Where is the labor coming from? There is the vital point.

Having engaged in various activities, from railroading down, my principal interest at present is in the tillage of the soil. I am engaged in poultry raising on a large scale, in stock growing and in the production of various crops, and I can speak on the subject of farm labor with the voice of bitter experience.

I have been convinced by this experience that the largest factor in the ever increasing cost of living and the reason why the development of California has been checked in recent years, is because of the abnormal numbers of consumers of food over those who produce it. The drift of population is all to the cities and away from the soil. The productive resources of the State have barely been scratched as yet. There are now millions of acres in California only half cultivated or not cultivated at all because the needful labor is not available.

Under the old rule, I can understand the lure of the city ,especially for the young. The life on the farm was narrow, wages small, conditions hard. All this has changed. Wages have nearly doubled, machinery has eliminated much of the drudgery, the telephone ,the automobile and rural mail delivery maintain a close touch between the farm and the active centers of life. My own hands sleep in as good beds as I do and eat as good food. It costs me almost a dollar a day to board them, and this is the rule, not the exception, on all well-regulated farms. It is not a matter of philanthropy. It is profitable to give good men satisfactory treatment.

Offers Opening.

If it does nothing else, I hope the present war will wake the country up to very serious conditions and direct the attention of young men to great opportunities. It is idle to say that there is no opening for our American boys. That may be true in our cities, where the struggle for petty clerkships is intense and the scale of wages constantly lowering. The great centers of population are filled with men who started life with brilliant hopes of rapid preferment and have reached middle age, hopeless failures and misfits. And they eat as much as anyone else and some producer has to feed them.

But there is an opening on the farm for every boy willing to work, and, with any kind of habits of thrift, an assured career. A young man of 18, who spends ten years of his life on a farm and is reasonably saving, will find himself in a position of great independence, able to look the future in the face with perfect complacency. He will have capital enough to set up for himself as his own boss, and an experience that makes success certain. Sometimes he is better off than his employer. Can any other pursuit promise so much?

Need Young Men.

However ,you cannot breed a race of farmers offhand. You cannot take middle-aged men or the broken-down wrecks of cities and make successful farmers of them. Youth is the essential of the raw product. More than in any other walk of life, the work must begin while the body and mind are still in the formative state—the mind open to quick perceptions and the body able to gain the necessary robustness. Given that, I know of no other occupation that holds out a surer way to a satisfactory future. But as I said before, it takes time to breed capable farmers.

We have now an organization known as the National Agricultural Society. It is a voluntary body, numbering among its members not only agriculturists, but many of the most distinguished and successful business and professional men. I feel it is an exceptional honor to have been elected a member of its directorate for California. The gentlemen comprising the society are giving to it the same energy and thought that they have devoted successfully to their own affairs. Among other things, they have contributed large sums to promote its activities. President Wilson is now addressing his appeals to farmers largely through the society. I am confident that the active propaganda it is undertaking will do much to bring the opportunities offered by the farm forcibly to the consideration of thoughtful people.

Unlimited Field.

But, after all, the most important influence must be local and social. Public schools ought to co-operate in directing a fair percentage of scholars who go no further in education than the common schools to the certainties and independence of an agricultural career. Just as our State University is doing splendid work in turning out high grade agricultural specialists. The fields of professionalism, of finance, trade and commerce are hopelessly overcrowded. Of course, there is always room on top for exceptional ability, but where one brilliant success excites the imagination of youth, scores of failures go unrecorded.

The farm alone offers an unlimited field and a secure future to youth . When this is realized and acted on, California will come to her own and enter on an era of prosperity hitherto undreamed of.

The breeders of Duroc-Jersey hogs, who attend the California State Fair this year, will be benefited by the presence here of Robert L. Hill, of Columbia, Mo., who is field man for the National Duroc Breeders' Association. Mr. Hill is the owner of the noted Adenhill Farm, near Columbia, which is one of the leading Duroc nurseries of the Middle West. He is one of the best informed young breeders in the country and will be in a position to give the breeders on the coast much valuable information.

The sincere appreciation of the livestock interests of the country is due J. Kelly Wright, Farmers' Institute Lecturer of the Missouri State Board of Agriculture, for the splendid bulletin entitled "The Value of Good Sires." Few men in Missouri are better informed than Mr. Wright on this important subject and he has treated the forceful facts compiled in such manner that the bulletin is one of the most interesting and instructive the State Board of Agriculture has ever issued. This bulletin is available to all who ask for it. Drop a card to the Secretary of the State Board of Agriculture, Columbia, Mo.

The Steel Horse an Expensive Beast.

A great deal is to be said for the real horse power on the farm, since the steel tractors of today have proven to be a non-paying proposition.

It is true that many tractors are in use in this age, especially in the Western country, perhaps because of the large tracts of land which they are capable of operating. Tractors, operated by experts, have been known to break twenty to thirty acres daily, but consider for a minute the price paid for the work. For instance, the daily cost of one plowing outfit, 45 h. p. engine, plowing a strip 10 feet wide, taking into account the initial cost of outfit, interest on investment, depreciation, fuel, supplies and engineer's and plowman's wages, brings the total running expense approximately to $31.75 daily. The average plowed per day is 20 acres, or an average cost per acre of $1.75.

Compare with this the daily cost figures on horse plowing: a gang plow, equipped with two twelve-inch plows and six horses, being used for haulage requirements. The daily cost to maintain this outfit, taking into consideration the capital invested, with liberal allowances for interest, depreciation, feed, repairs and farm hand wages, brings the daily cost of plowing by this method to $4.16 per day. The average plowed per day is 5 acres and the average cost per acre is 83c.

These figures prove in cold cash, that the horse has the tractor beaten as a unit of economy and the inventive genius of today will eventually conclude that everyone treads thin ice when they attempt to improve upon the natural methods supplied us for planting the fields and reaping the harvest.—[U. S. Booster.

Saddle Horse Futurities Increased.

Through the efforts of Judge E. A. Bridgford, president of the Pacific Coast Saddle Horse Breeders' Association, the State Board of Agriculture has agreed to add $300 to the Pacific Coast Gaited Saddle Horse Breeders' Association three-year-old futurity. This gives California the largest and most liberal saddle horse futurity of any state in the Union this year and will bring out the best horses in the State. Every breeder should begin to prepare his youngsters for these futurities. Judge Bridgford's letter which follows will interest horsemen:

"San Francisco, May 2, 1917.

"Breeder and Sportsman,—

"Dear Sirs: I am pleased to call to your attention that after considerable correspondence, I have secured from the State Agricultural Society their agreement to add $300 to the Pacific Coast Gaited Saddle Horse Association, three-year-old futurity for 1917. Our association proposes to open up the three-year-old futurity to be shown at the State Fair at Sacramento next September. The details of this futurity will be given to those interested and to the public through you as soon as we can arrange them. We hope to have at least ten entries that will show up at the time. We hope to make this one of the most interesting futurities of the kind that has yet been shown at Sacramento. This futurity together with the State Fair three-year-old futurity in which there will be $1,200, ought to bring out a field of three-year-olds yet unequaled in the State.

"Permit me to thank you on behalf of Bridgford Company, for the very fine pictures on your front page this week, showing a group of five Holsteins, and also for the reference thereto on your inner page.

"I furthermore desire to extend to you my congratulations on the constant improvement you are making in your paper.

"Yours truly,

"E. A. BRIDGFORD."

Harness Horses and Horsemen

DEATH OF McKINNEY 2:11¼.

McKinney 2:11¼, the renowned son of Alcyone 2:27 and Rosa Sprague, died at the Empire City Farm, Cuba, N. Y., on April 20. He was foaled in 1887 in Kentucky at Mr. Wilson's Abdallah Park Farm at Cynthiana but was purchased as a two-year-old by Chas. A. Durfee, who shipped him to California, developed his speed and made him nationally famous.

McKinney was brought out by C. A. Durfee as a three-year-old, in 1890, his debut as a turf performer being made at Los Angeles, Cal., Aug. 6, when he won a three-year-old event, for $250, from Alco, trotting his best heat in 2:37¾. Two days later he started there a second time, and won a $500 purse for all ages, after four heats, trotting the second one in 2:29; this being his entry into the standard list. In October he was started four times, winning three races, each for a $150 purse, but meeting defeat in his final essay, at Los Angeles, where he was third to Lucy R. and Jim Leach in a six-heat race, he winning the fourth heat in 2:27, his best three-year-old record. In these races he attracted attention as a colt of unusual promise, but nothing sensational. However, in his four-year-old form he became a champion. Starting in eight races over California tracks, mostly against aged horses, he won them all in commanding fashion, taking a record of 2:17. He was then taken to the newly-built "kite" at Stockton and started for a record, trotting in 2:12½, which was a new championship mark for a four-year-old trotting stallion. California and Stockton were that fall the magnets of the trotting world, as there the get of Electioneer, Guy Wilkes, Sidney, etc., were smashing records to atoms. Along with them McKinney's name and fame became immediately national.

The performances alluded to were made to high-wheel sulky, the pneumatic tires not making their appearance until the following season of 1892. That year McKinney, after a large stud season, raced five times, winning three times, being once second to the pacer W. Wood 2:07, in a special, and once fourth. His best heat was 2:14. He made his last campaign as a six-year-old, in 1893—or, rather, his last appearances in public, starting but twice, again after a heavy stud season. In his first race he was unplaced, for the only time in his life, at Sacramento, in the free-for-all, won by Klamath 2:07½, his positions being 4-5-6-6-ro. This was Sept. 16. The following week he was started at Stockton in the free-for-all, and there won what was the greatest and most desperately contested race ever up to that time trotted in California. It was begun Sept. 23 and concluded Sept. 25. Steve Whipple won the first heat in 2:13, McKinney second. McKinney took the second in 2:11¼ from Whipple. In the third Ottinger won from Whipple in 2:11½, McKinney fourth. In the fourth heat the son of Alcyone was again fourth, Klamath taking it from Ottinger in 2:14. Ottinger came back in the fifth heat and beat out McKinney in 2:16, but in the sixth McKinney turned the tables on him in 2:16½. In the seventh heat Klamath again loomed up, beating McKinney in 2:16¼. In the eighth and last round McKinney outgamed his rivals and won it and the race in 2:22. The first four heats of this race were trotted on Saturday and the last four the next Monday. The excitement it created was prodigious. Loud complaints were made of the starting and judging and general management of the affair—but out of it McKinney emerged with the brightest and most coveted laurels yet won by a trotting race horse on the Pacific Coast. It formed a fitting farewell for him as a performer, and one unforgettable. His heat in 2:11¼ broke the California state race record for trotters, and the prestige conferred upon him was immense. His complete racing career shows that he started in 21 races, won 17 and was once each second, third, fourth and unplaced. His money winnings were $6,865.

After the close of the racing season McKinney was retired to the stud where he immediately achieved success as a progenitor of both speed and quality. His sons and daughters which represented him on the turf, proved to be performers of the highest class and the constant increase in the number of his standard performers attracted many eastern buyers with offers to purchase. Mr. Durfee, however, declined all offers until finally, in June, 1902, Mr. Henry B. Gentry of Indiana offered $25,000 for him and the stallion finally changed hands.

McKinney made his first season in Indiana in 1903 and received matrons from many of the leading eastern breeders . In 1904 his daughter Sweet Marie appeared on the Grand Circuit ,and after a record-breaking five heat battle in which she defeated Tiverton, for the Transylvania Stake, Mr. William Simpson approached Mr. Gentry and a few moments later became the owner of McKinney at a cash price of $50,000. McKinney was soon afterwards shipped to the Simpson Breeding Farms at Cuba, N. Y., which became his permanent home.

In California, McKinney was kept entirely as a public stallion, never having had the advantage of standing at the head of a band of great matrons while owned here. More than that, he was further handicapped by the existence in this State of some very noted breeding establishments where celebrated sires were in service, and for a number of years the mares he was mated with were those not regarded as high class enough to be sent to the then more famous sires. Despite these disadvantages McKinney sired more 2:10 performers than any other stallion kept in service in California before or since, and soon after passing to Mr. Simpson's ownership he became the world's leading sire of 2:10 trotters, a position he held until dethroned by Peter the Great. To show what a factor McKinney and his family has been in the production of 2:10 speed, the performers in that list which have been contributed by himself and his sons and daughters are here presented:

McKinney was a strikingly handsome seal-brown horse with white feet behind. He stood 15¾ hands tall. and was of extreme physical elegance, being symmetrical at all points and a patrician in appearance, the even balance of his conformation serving to render less conspicuous his really robust physical endowment. His get have been remarkable for their excellent individuality and for their campaigning powers and ability to withstand wear and tear. That he ranks among the best male representatives of the standard breed, and will retain that position historically, is assured.

Arizona State Fair Program.

A letter was received at this office last week from Secretary T. D .Shaughnessy of the Arizona State Fair enclosing the program for the races to be held during Fair week, Nov. 12 to 17. It is planned to make the 1917 State Fair in every way superior to any other one ever held, and the purses, which are larger than heretofore, are deserving of special mention, and should attract a large list of entries from the horse owners. The following is the list of classes and amounts offered:

Monday, November 12.

2:20 Pace, Arizona $1,000
2:25 Trot, Arizona 1,000

Tuesday, November 13.

2:12 Trot 1,000
2:07 Pace 1,000

Wednesday, November 14.

3-Year-Old Pace, Arizona 500
Free-for-All Trot 1,000
2:15 Pace 1,000

Thursday, November 15.

2:16 Trot 1,000
Free-for-All Pace 1,000

Friday, November 16.

2:11 Pace 1,000
3-Year-Old Trot, Arizona 500
Saturday, Nov. 17—Auto Day.

State Fair of Texas.

The management of the State Fair of Texas is active for the next meet and promise something unusual. In fact, the motto has been, something better.

Mr. Will H. Stratton, secretary of the Fair, is making his plans along broad and liberal lines. From the interest being manifested by breeders and farmers as to the next fair it would seem that the meeting next fall will be another record.

Regardless of the war, Texans will patronize their great State Fair for the war, should it not be over at that time. will hardly interfere in the least with this great event.

Thoroughbred Matters

Bowie Racing Statistics.

The spring meeting of the Maryland Agricultural Association, which began on April 2, and came to an end April 14, embracing twelve days in all, was a record-breaker in point of attendance for that Maryland organization. The eagerness with which the racing public patronized the inaugural meeting in the East this year augurs well for the forthcoming meetings, both in Maryland and on the metropolitan circuit. During the twelve days of racing at Bowie, eighty-four races were decided and $52,270 distributed among the winning horsemen. The daily average distribution was $4,355, with overnight handicaps as the features, no stake racing having been provided. J. A. Strode was the leading money-winning owner with $2,150 to his credit. J. M. Booker and W. Walker were second and third respectively with $1,971 and $1,921 in stable winnings.

The race tracks at Louisville and Latonia are subject to a license tax of $500 a day, and the Lexington track must pay a license of $200 a day, under the provisions of Representative Schneider's bill, which passed the Kentucky Senate by a vote of 25 to 8 Thursday morning. The measure goes back to the House for concurrence in amendments.

The Senate adopted an amendment, proposed by Senator Helm, adding an emergency clause to the measure. The effect of this action is to make the spring race meetings, which open soon, subject to the daily tax.

An amendment seeking to increase the license to $1,000, proposed by the Committee on Revenue and Taxation, was rejected. The Senate, however, accepted another amendment, offered by the same committee, striking from the bill the provision that the tax shall be "in lieu of all other licenses." The effect of this amendment is to enable local taxing districts to exact a license, if they so desire.

An amendment placed on the bill by Senator Combs provides that the tax shall not apply to any track not under the supervision of the State Racing Commission, thus making it clear that trotting-horse meetings are exempt.

The measure was considered virtually without debate. The only spoken opposition came from Senator Frost.

Jockey Ted Rice will have the mount on one of the Thorocliffe candidates in the King's Plate at Toronto . He is under contract to ride on the Canadian Circuit for Lieut. J. K. L. Ross of Montreal.

✤ ✤ ✤

The only arrivals from outside last week at Toronto were the following nine horses belonging to the local owner, Wm. Walker, which came in from Maryland: Boxer, G. W. Kisker, Lady Spirituelle, Dolina, Inquieta, Harwood, Kyle, Ada Anne and Miss Jean.

✤ ✤ ✤

The Nevada Stock Farm of Reno last week shipped two yearling thoroughbred colts to Ecuador, S. A. The business was handled through Mr. F. W. Holbert for the Ecuadorean government; the purchases being one colt sired by Deutschland, dam Abelene by El Rio Rey from a Joe Hooker mare, and one colt sired by Star Bottle (son of Hastings) from San Francisco Maid by Yellowtail, next dam a mare imported from Australia by R. E. DeB. Lopez.

✤ ✤ ✤

Hot Springs Racing Notes.

Now for a brief review of the business features of Hot Springs, which, coming after the race meet, would seem to us rather timely. There were many doubting Thomases who predicted the Business Men's League would never be able to get away with the last meeting with two tracks to satisfy. The fact that the meeting was a success in every way; that better racing was seen here than the year before; that the number of horses taxed the capacity of the stables at Oaklawn, and that hotels and rooming houses were crowded as never before indicates that, after all, "the end of miracles" is not yet passed. Last year Hot Springs had just an inkling of what racing would do to revive and build up resort business. This year the record that was written was so convincing that no one can deny the importance of "the sport of kings" in this respect. Things broke lucky for the Spa this season. To begin with, the men having in charge the staging of this meeting were members of the board of governors of the Business Men's League, under whose auspices the meet was held and they, with others closely identified with the upbuilding of the city, worked harder and went through more to make the meeting a success than any one body of men in the history of the city. We get it from pretty good authority, too, that sections whence squalls were to be expected remained calm and serene, while from quarters that should have been heart and soul with the proposition gave the most concern. Days before the meeting opened, however, all kinks had been straightened out, and the result is a matter of municipal history.

The crowd began coming early, and it remained until the middle of the present month. A week before race meeting opened every one of the resort's hotels hung up the "S. R. O." sign. It was then that the Business Men's League issued a call to private families, asking them to co-operate and assist in caring for the thousands of other visitors who were on their way. Over 700 families, who had heretofore given no thought of "taking roomers," listed apartments with the city's leading and progressive organization, and the result was that the prosperity the races brought was shared in all quarters of the city. It was not confined to any one locality or set of hotels, but every one who so desired got his or her share. Women made "pin money" by letting visitors have "the best room," while some of the most prominent families in the city, upon receipt of substantial offers, moved out of their homes, "doubled up" with one's relatives—even endured, we are informed, "mother-inlaw"—for the thirty days' racing and let visitors take charge of their establishments. Business men who had been "just getting by" previous to the races are now smiling and ready to admit that life is worth the living after all, and notes previously reposing in the local banks have since been taken up or materially reduced.—[Morning Telegraph.

✤ ✤ ✤

Stallions Meet in Deadly Conflict.

Louisville, Ky., April 17.—Free Lance, a stallion standing at George J. Long's Bashford Manor Farm, near this city, is dead from injuries received in an encounter on Monday with Ralph, another one of the Long stallions. Through negligence on the part of the attendants the animals were allowed to come together, when they engaged in a fierce combat, that only ended when Free Lance was placed hors du combat . The infuriated animals fought fiercely, each biting and kicking the other. After the conflict it was found that Ralph had kicked in three of his antagonist's ribs and pierced his lungs. A veterinarian was hastily summoned, but the once noted racer was beyond human aid and succumbed the following morning. Ralph was pretty well battered up, but his injuries were not fatal.

Free Lance was eight years old, and prior to his retirement to the stud about three years ago, was regarded as one of the best horses racing in this country. He was the especial pride of Mr. Long, in whose colors he won many stakes and handicaps. He was also a great favorite with race-goers.. Probably his best race was the winning of the Latonia Derby in 1912. At Churchill Downs he established a new track record for one mile and seventy yards, which has not been equaled since. His owner had expected great things of him as a stallion, and the present year is to witness the racing of the first of his progeny. Three of this number, now in training, and in Mr. Long's barn at Churchill Downs, are regarded as being among the most promising of the locally-trained two-year-olds.

Ralph is now six years old and has been in the stud but a short time. His racing career was a brief one, being confined to his two-year-old year. In that short time he won eight races, including the Fort Thomas Stakes at Latonia. The following spring, during his training for the Kentucky Derby, for which he was one of the choices, he developed a "plugged artery," which necessitated his temporary retirement. Trainer Pete Coyne subsequently attempted to get him to stand training, but without success. Mr. Long then decided to place him in the stud.

An Oklahoma Thoroughbred Stud.

Hot Springs, Ark., April 17.—Campbell & McCartney, of Minco, Okla., brought a nice bunch of two-year-olds here for sale. J. J. McCartney, who had charge of the shipment, found ready buyers for the sons and daughters of Mint, a son of Rock Sand. Dick Vestal bought what appeared to be the most likely colt in the shipment.

Mint Hill, by Mint—Mary Hill, dam of several winners ,went to Tom Munford for a sum going into the four figure column.

McCartney took back to Minco several well-bred mares for the court of Mint.

Four mares have arrived at the breeding farm from Missouri and two from Colorado.

The fourth year's crop by Mint is being prepared for racing this summer.

Setback, son of Ogden, also at Minco, will be used to cross with the Mint mares.

Twenty-six mares are at the ranch.

Gotelus, Bank, Uncle Jimmie Gray and other good performers were bred at the Campbell establishment. The foals this year are from Bowling Green mares.

London, April 27.—The Times says that horse racing in England is to be cut to the narrowest limits with a view to saving foodstuffs that now are diverted to the racing stables . The proposed restrictions amount to a virtual suspension of racing for the period of the war.

✤ ✤ ✤

At the San Mateo ranch of Chas. W. Clark there is a very handsome and well grown yearling sired by Sweep from Mr. Clark's good mare Cluny, daughter of Salvation and Valencienne. Two years ago Mr. Clark shipped this mare to Mr. J. R. Keene's farm in Kentucky to be bred to Sweep and the yearling is the result of that union. Cluny has been shipped this year to Nevada to be bred to Mr. Geo. W. Wingfield's imported stallion Honeywood. Mr. Clark has another very fine yearling by Chantilly from Antioch, a full brother to those useful racehorses Aunt Liz and Wow.

Lexington Notes.

Lexington, April 21.—S. C. Nuckols, secretary of the Kentucky Racing Commission, was a visitor today. He has opened up his office in the Fayette National Bank Building and is busy receiving applications of trainers and jockeys.

The first Eastern rider to make application was Johnny McTaggart, who will ride Ticket in the Kentucky Derby.

The Kentucky Racing Commission will probably meet Friday or Saturday morning when a number of important matters will be disposed of. Johnson N. Camden is still confined to his home, but will probably be on hand to attend the meeting of the Commission the latter part of the week.

The daily distribuiton of purse money by the Kentucky Association is $4,200, which is a record for this track. The management has announced that the price of admission for ladies will be $1. It formerly was 50 cents.

✤ ✤ ✤

Havre De Grace Notes.

Havre de Grace, April 21.—Edward Soule was among the arrivals at Havre de Grace this afternoon. He came direct from California, where he spent a couple of weeks with his family at the conclusion of the Tia Juana meeting. Pullux, who will carry the Soule colors on the Eastern tracks this season, is here in charge of S. Polk.

H. D. Brown also got in. He came from New York and left tonight for Cuba, where he will spend a month or six weeks superintending the many improvements to be made to the Oriental Park course during the summer. Mr. Brown has pretentious plans for the meeting at the Marianao track next winter, and in due time announcements will be made which will please the horsemen.

Owen Pons received a wire from Lexington that Jockey Marimee would leave Kentucky tonight and would accept mounts on Monday. J. E. Madden has written for first call on the lad, but the deal has not been closed as yet.

The Maryland members of the Thoroughbred Horse Association will hold a meeting at the Suburban during the first week of the Pimlico meeting. The horsemen are working in accord with the various Maryland jockey clubs, and matters are moving along smoothly. The one or two small requests made by the horsemen have been readily granted by the different clubs.

J. L. Rhinock came over from New York to take in an afternoon of sport.

Jockey Charley Burlingame also came over from Gravesend, where he has been assisting Trainer Lawler in preparing the Quincy Stable racers. Burlingame is lighter this spring than in several seasons.

W. T. Anderson will ship direct from Tia Juana to Devonshire Park, to be on hand for the opening of the Canadian season.

✤ ✤ ✤

Louisville Notes.

Louisville, April 21.—Colonel Matt J. Winn left this morning for New York for a visit of a few days. He will stop in Cleveland en route to visit Price McKinney.

Jockey D. Connelly has been engaged to ride Skeptic, a Kentucky Derby eligible, in his races in Kentucky. W. J. Young is attempting to secure first call on the boy.

George Borkel today secured the contract on the promising lightweight rider, Joe Dominick. Borkel has been commissioned by a wealthy New Yorker to purchase six or seven likely looking two-year-olds.

E. J. O'Connell arrived today from El Paso for the purpose of picking up a few horses to be campaigned this summer on the Canadian circuit.

Gene Elrod, who is in charge of the mutuel departments at all of the Kentucky tracks, is busily engaged at Churchill Downs getting his department ready for the opening of the meeting. He is arranging for 70 ticket sellers, and a like number of cashiers to work on Derby Day, and this force will constitute the largest he has ever handled. Mr. Elrod will leave early next week for Lexington to get things in shape for that meeting.

Judge Allie W. Young, a member of the State Racing Commission, was among yesterday's visitors at Churchill Downs. He came to inspect the many improvements now being completed at the trick, and reported that the interest in the Derby throughout Kentucky was greater this year than ever.

W. A. Kirwan, a veteran horseman, and who formerly trained for Barney Schreiber, is able to be out after an illness that extended through the greater part of the winter. In recent years he has served as bookkeeper at Douglas Park and Latonia.

Among the host of racing folk to reach this city within the past few days are Charlie Ellison, Al Weinberger, Sam Henkel, and Milt Meffert.

Trowbridges Have Easter Baby.

A son was born Easter Sunday to Professor and Mrs. E. A. Trowbridge, of Columbia, Mo. Professor Trowbridge is head of the Department of Animal Industry in the Missouri College of Agriculture, and is well known in every section of the country where live stock is discussed. This is their second child.

✤ ✤ ✤

R. P. Royce, of the Animal Husbandry Department of the University of California, was congratulated by horsemen from all sections of the state as well as by Dean Hunt and members of the faculty who visited the University Farm picnic at Davis Saturday. The horses were certainly well presented and visitors lost no time in showing their approval of this splendid herd. Prof. Royce and his assistants had the heavy horses looking like the Singmaster display at the International.

✤ ✤ ✤

A mare that certainly will be troublesome in the five-gaited shows of the Middle West this season, providing she is fortunate in having a clear-headed exhibitor, is The Talent, the very attractive bay mare recently sold by Houchin & Anderson of Jefferson City, Mo., to Mr. D .Schilling of Chicago, who, by the way, is assembling one of the most formidable stables he has ever sent under his colors. The Talent is one of the most attractive daughters of that sire of beautiful gaited horses, Dandy Jim, by McDonald Chief. She has very extreme action and a lot of speed; is thoroughly educated in all five gaits and can look as much like a "million dollars" as any mare in Missouri. On account of her having been exhibited in such a formidable stable as that of Astral King, she very naturally has never had quite the opportunity she deserved.

✤ ✤ ✤

ACTIVITIES IN IOWA.

More and more Iowa is becoming a leading state in the production and distribution of saddle horses. There is hardly a week but that we are permitted the privilege of writing of the achievements of well known Iowa horsemen. There are the Hamilton Bros., of Keota, for instance, who have taken some of the best from Missouri into Iowa and have established a reputation that has grown extensively. Ralph Hamilton, of this firm, has judged at such well known exhibitions as Mexico, Sedalia and Springfield fairs, and is to be the judge of saddle horses at the forthcoming Tulsa, Okla., Mid-Continental Exposition and Horse Show, which will take place May 17, 18 and 19.

At present this firm has a stable full of top-liners; 26 head of ready to use saddle horses and show animals. Wm. Threlkeld, formerly an exhibitor in the Longview stable, is in charge of their training and one of Missouri's most noted "Gentlemen of Color," one "Hambeater" who took care of Grand McDonald, Senator Stone, Maurine Fisher and scores of others of like note, in charge of their stable. "Hambeater" knows how to feed one, primp one and send them to the ring right. "Bill" Threlkeld is one of the best riders Missouri has produced and Hamilton Bros. can be expected to have their horses ready with such a combination.

In writing the editor in regard to their horses, Ralph Hamilton says: "We have a fine 16 hand gray gelding that certainly is a storm in five gaits; a heavyweight three gaited five-year-old black mare that is simply great. She can do a lot and has the looks that go with it. She will give them all a run for their money. We also have a junior gaited mare that is preparing to surprise a lot of the 'rail birds.'

"We also have the champion trotting stallions of Iowa. Really, I do not know of a roadster that can step within a ring as fast and high as he can. He was never exhibited before last year and was a little green; however, we have him ready this year.

"We have handled a lot of big mules also this year. As you know, Iowa is also getting to be quite a mule country. I sold a pair of 22-months' old mules, 16 hands high, weighing 1,200 pounds each; not fat, for $450. We also had the best pair sold in Missouri this year. We have just received a fine jack which we bought from Hamilton Bros., of Mexico, Mo. He is 16 hands high, five years old and a popper. I think he is the best jack ever brought to Iowa. We are having many inquiries for good mannered saddle horses and anticipate the best business we have ever known."

The Honorable Commissioner of Agriculture of Kentucky, "Mat" S. Cohen, in the following letter to the editor of the Breeder and Sportsman, sets forth a plan for the staging of the World's championship saddle horse stake, which is the most liberal, fairest and sensational saddle stake ever proposed. Commissioner Cohen makes this offer in the capacity of Commissioner of Agriculture and head of the great Kentucky State Fair, where the stake will be conducted. It is in line with his every effort since he has been in office and explains to the outside world why Kentuskians elected him to this important post by such an overwhelming majority. The stake as proposed will make the greatest impetus in the breed that has ever been known. It will establish the champion of present day saddle horses for all time to come, making such horses as Astral King, My Major Dare, Richelieu King, Jack Barrymore, Kentucky's Choice and those of the coming season meet in open and fair battle.

Now, Commissioner Cohen offers to give $5,000 toward the stake. The Missouri State Board of Agriculture, the Illinois State Board of Agriculture, Iowa State Board and California State Board, all, in recognition of the progress of this popular breed in their states, should make liberal offers to assure the staging of this grand event; the American Saddle Horse Breeders' Association should give not less than $500, and an offer of $1,000 by them would be more in keeping with a live association behind a breed; every owner, breeder ,exhibitor and lover of five gaited horses in America too, should give just as much as he possibly can afford. While the owners, who are to be most benefited, should not hesitate to offer what would ordinarily be the entrance fee which has been eliminated in this stake.

If this stake is going, every publication devoted or publishing any news whatsoever pertaining to saddle horses should get busy at once and make it known wherever saddle horses are discussed; should get behind it and see how much more they can raise than I can; than the Farmers' Home Journal can or than the Show Horse Chronicle can. Read Commissioner Cohen's letter which follows and try to inhale a little of his "pep" and write or wire the editor of the Breeder and Sportsman at once how much you will give. If I were as wealthy as Col. Paul Brown, R .A. Long, Jas. Houchin and Powhattan Wooldridge, as well as a score of others I can name in about a minute I would make Commissioner Cohen come across with his $5,000 so quick it would make his head swim. If the public will do this the owners of saddle horses will have to enter or hide in the tall and uncut for the remainder of their lives.

Read This Letter Now.

DEPARTMENT OF AGRICULTURE,
LABOR AND STATISTICS.
Frankfort, Ky., April 26, 1917.

Mr. "Jump" Cauthorn,
Breeder and Sportsman,
San Francisco, Cal.—

My dear Jump: I have your good letter of April 21st and thank you very much for the kindly expression therein contained, but since I am too much rushed to do justice to the "fertilizer" justly due you, will proceed to the "cream of the cocoanut."

I would love to see a world's championship for five-gaited stallion, mare and geldings amounting to not less than $5,000 or over $10,000, this to be divided into four shows as follows:

Saddle mare any age, $2,000, divided 60%, 25% and 15%; same amount, same division, for geldings; same amount and same division, for stallions, permitting only three winners in the sex classes to compete for the grand championship amounting to $2,500 with the money divided as in the sex exhibits.

If you can get the various industries, bankers, breeders and associations to make up this $5,000, I will duplicate it, provided we can get as many as fifteen to contest in each of the sex classes, and which would leave nine to contest in the final award.

This can be made the greatest event ever thought of ,talked of ,or pulled off in America and I know of no better place than the Kentucky State Fair for the holding of such an exhibition.

My method of selecting the judges as set forth in your issue of the 21st, is absolutely equitable and should be instrumental in bringing into competition horses from Maine to California.

If you don't think the Kentucky State Fair will not make this a stellar event in all horsedom, just get the lovers of the five gaited saddle horse to give their portion and you will see how quickly the Kentucky State Fair will meet and match the money they put up.

This thing should be gotten up and decided about the first or middle of June, which would give us ample time to advertise it broadcast throughout America and which would give the exhibitors ample time to prepare their entries for the contest, which would begin September 10th, with the grand championship being held Saturday afternoon, September 15, 1917.

If there is any association in America that will offer better terms and conditions than the Kentucky State Fair, I would be most pleased to know who they are and where they are.

Now, Jump, I am going to leave this to your hustling, indefatigable energy, because right now I am so busy with this food and feed propaganda that I haven't time to wash my face or comb my hair. Not that we are starving in Kentucky, but we want to show the world that we are eager, anxious, willing and determined to supply our share, plus some, in feeding those who are fighting our battles, also those with whom we have cast our lot. Patriotism in Kentucky is away above par, and if we do not have an electric storm of such character as to check its growth and this inhuman war continues, God knows where the hot blood of these Kentuckians will carry them. We are in earnest, ready to work or fight at a moment's notice.

Let me hear from you and believe me,
Sincerely and fondly,
MAT S. COHEN,
Commissioner of Agriculture.

To the Members of the American Saddle Horse Breeders' Association, Saddle Horse Breeders, and County Fairs:

Gentlemen:

A few weeks ago you were advised that the American Saddle Horse Breeders Association would offer under certain conditions premiums to County Fairs.

On account of the probable falling off in number of registrations for the coming year, and consequent decrease in receipts, the Directors of the American Saddle Horse Breeders' Association at a meeting held April 5th, passed the following resolution:

"Resolved, That resolution passed at Directors' Meeting September 16th, 1916, authorizing the offer of $50.00 premiums at County Fairs for 1917 be rescinded, and that the Secretary make as public this resolution to rescind said offer, as he did the original offer."

This step was taken with much regret for its apparent necessity.

On account of the limited number of mares bred last year, and the indications that not so many will be so used this year, the Directors thought best to conserve the funds of the Association for the time being.

With our country at war they are of the opinion that it will be wiser to spend such money as may be available for the purpose, in demonstrating the utility of the saddle bred horse and how well in different spheres he con serve mankind.

This is to notify you that the offer to County Fairs sent out from this office under date of March 1st, 1917, is withdrawn.

In any other way this Association can assist breeders or County Fairs the service will be cheerfully rendered. Respectfully,

R. H. LILLARD, Secretary.

Was Black Squirrel a Failure in Missouri?

There recently appeared in the Show Horse Chronicle and the Lexington Herald, the History of Black Squirrel, perhaps the best thought of saddle stallion and sire of all time. T. C. McCown, who is in a better position to write of old Squirrel than most any other man, is the author of these interesting columns, which, I am sure, are of great interest to the old-timers who remember so well this great stallion, and to present day horsemen, who, like myself, have come here since the passing of this equine wonder.

In fact, the writer was born after Black Squirrel died, and I do not intend to criticise Mr. McCown's article. He says: "As a Missouri horse, Black Squirrel was a failure as a breeder. Our idea was because of the cold blooded mares. They had no fine mares in that statte. He was bred to coarse mares there and got coarse colts." Will my esteemed friends in Kentucky never cease to criticise Missouri whenever opportunity is afforded? Listen: If Black Squirrel was a failure as a breeding horse in Missouri—Missouri breeders have been failures as breeders. Black Squirrel did more good to the horse interest of Missouri than he did to Kentucky, if such a thing is possible. He is the sire, grandsire, great-grandsire or something of every great saddle horse in Missouri; and Missouri saddle horses have demonstrated their equality, if not superiority, in the show rings of the world alongside those of Kentucky. Didn't he sire Lucy Mack; and she in turn produce Rex McDonald, one Missouri horse which Kentucky really admitted was the peer of anything they possessed? Didn't he sire scores of good mares, which in turn have produced what is today the greatest colony of saddle horses in the world? If Mr. McCown will go through the "brush" in Missouri he will find scores of mares and stallions which have sired or produced a world's winner and which trace their greatness to Black Squirrel 58.

Missouri does not boast of any Chester Dares or Highland Denmarks by Black Squirrel; but Black Squirrel did more for their saddle horse industry than any horse that ever stood for service there. I wouldn't say he was a failure after reviewing the progress his Missouri blood has made.

Black Squirrel was widely criticised by some of Missouri's then leading horsemen, and through their "knocking" did not get the choice of mares in that state; but got better colts from those he did serve than the other stallions doing service at that time did from the choice ones.

It will no doubt be of great interest to old friends of Black Squirrel to know that Lan B. Morris, who bought him and took him to Missouri, is now affiliated with the Campbell and Reid & Western Sales Co., of the National Stock Yards, Ill., and is considered one of the leading mule men of America. Dr. Crowley also is still living in St. Louis and is a regular patron at the fairs and horse shows of Missouri.

Notes and News

A. B. Kinney, of North Yakima, Wash., has traded his Hal B. mare, Daisy D., to a Northwest horseman for a "bale" of money and a right good trotter which he will campaign this year.

✤ ✤ ✤

J. B. Stetson, of Midway Stock Farm, Kearney, Nebraska, writes that C. A. Harrison's young gelding, Grey Hal, is making splendid progress since he has taken him back to the Corn-Belt.

✤ ✤ ✤

Al McKinney, the Californian, is wearing the hopples and does not seem to mind them this year. Last fall, when they were put on him, he did not take to them very readily, but this spring he has acted all right in them.

✤ ✤ ✤

A new grand stand will be erected at a cost of $30,000 at the Washington State Fair grounds at North Yakima in time for this year's entertainment. The basement and pillars to support the superstructure will be of cement, the balance of the building will be of wood.

✤ ✤ ✤

The dates for the Hay Palace Fair at Mabton, Wash., have been set for September 11-15. This fair is managed by a board of seven directors composed of R. E. Crow, W. T. Livingston, N. E. Glass, A. J. Bush, J. W. Humphrey, E. J. Lutz and T. W. Howell. R. E. Crow has been elected president; W. T. Livingston, vice-president; A. J. Bush, treasurer; T. W. Howell, secretary, and J. W. Humphrey, finance committee.

✤ ✤ ✤

Dr. Rae Felt, Eureka physician, brother of T. Dwight Felt of Stockton, died from pneumonia in a San Francisco hospital Wednesday. He is survived by a widow and two other brothers, Delos and Guy Felt ,and a sister, Mrs. Kellogg, all of Eureka. Dr. Felt was a well known breeder of trotting horses and raced the mare Telltale, and others, successfully on the California Circuit a few years ago. He was well liked and very popular among the friends that he became acquainted with on that occasion.

✤ ✤ ✤

Anselila, whose record of 2:17½ as a yearling is the fastest to the credit of a filly of that age, is among the three-year-olds entered at Parkway, Monroe, Goshen and Middletown, in races worth $5,000, and knowing horsemen think she is likely to be a factor in every one of them. Louis Titus, of Stony Ford, paid $5,000 for her shortly after her fast performance as a yearling, but she failed to start last season. She is now owned by the Longacre Stable, of which Peter Goode is the trainer.

✤ ✤ ✤

Horses in Training.

The Hemet Stock Farm is a busy place these days. Al lthe horses that are expected to race the coming season are being worked out, with the result that the entire force at the farm is busy from morning until night. Some excellent time is being made by the horses, although they have been in training but a few weeks. Last year was a banner year for the Hemet Stock Farm and, according to present indications, even better results will be shown the coming season.

✤ ✤ ✤

Although there has been extensive talk about free-for-all pacing events, as features of the season's half mile tracks, yet Race Secretary Al Saunders of the Trenton (N. J.) Fair, is the first to announce a list of entries for a race of that kind. The event, which is worth $2,500, has received eight of the fastest pacers perhaps ever before named in an event over a half mile track. They are Single G. 2:00; Russell Boy 2:00¼; Roan Hal 2:00¾; Peter Stevens 2:01½; Judge Ormonde 2:01½; Braden Direct 2:01¼; Sellers D. 2:06¼, and Lady Aubrey 2:12¼.

✤ ✤ ✤

The Dunklin County Fair at Kennett, Mo., will be held for the twenty-seventh annual time this year, its dates being October 2-6. During this long period it has not missed a meeting and has been under the same family management. Twenty-seven years ago R. H. Jones, with others, organized the fair and until his death, in April, 1911, he was secretary. At his death his two sons, L. R. Jones and R. Irl Jones, assumed the responsibilities he laid down, and from that time to the present the former has acted as secretary and the latter as president.

✤ ✤ ✤

Governor Gunter has appointed a new racing commission which means that an attempt will be made to revive the summer meetings in Colorado. The members of the commission include Wellington H. Gates, formerly livestock trader and who is active in Democratic politics; A. L. Simonson of Denver, real estate man and prominent in the Gentlemen's Driving and Riding Club, and D. W. Thomas of Longmont, secretary of the Northern Colorado Fair Circuit. The board will act on applications to conduct race meetings over the state . The law was passed as a subterfuge to permit gambling by the pari-mutuel system but it never cut much of a swath in this direction.

Gebhard Wempe, local horseman, suffered a possible fracture of the skull Tuesday afternoon when thrown from his buggy while rounding a curve near Spreckels lake, Golden Gate Park. His body and arms also were bruised. Wempe's team became frightened as he attempted to turn toward the stables near the Park Stadium. The buggy tilted on two wheels and Wempe was thrown to the ground.

✤ ✤ ✤

The San Francisco-California Driving Club held its annual meeting at Promotion Hall, Sixteenth and Valencia streets, on May 1st. The nomination of officers resulted as follows: President, A. Ottinger; vice-president, J. C. Welsh; secretary, W. J. Kenney; treasurer, F. Lauterwasser; sergeant-at-arms, W. Mallough; directors, J. M. Kidd, J. McTigue, Luke Mayrisch, J. D. West, F. Clotere; starter, J. J. Ryan. The election will be held on May 22, and it is planned to open the racing season at the Stadium May 27.

✤ ✤ ✤

The fast trotting gelding Spriggan 2:08¼, which won the big $20,000 stake at the early meeting at San Francisco in 1915, is now in the stable of Marvin Childs at the Indianapolis track and is to be trained and raced by the Omaha reinsman this year. The unsexed son of Baron McKinney wintered in the stable of Lon McDonald and is looking much better than he has since his trip across the Rockies in 1915. He is entered in some of the early closing events on the Ohio half mile tracks and will be given a chance to show his worth on the two-lappers before tackling the Grand Circuiters.

California Fair and Racing Ass'n News.

Joseph Waddell, Secretary of the California Fair and Racing Association, has just returned from a two weeks' trip through the southern part of the State. He reports things looking very favorable for a banner circuit in California this year.

The Kings County Fair Association at Hanford agreed at its meeting to put on a fair and race meeting the week following the State Fair and to raise their purses considerably over and above what they offered last year.

The Fresno County Agricultural Association is contemplating putting on two $2000 purses and two $1000 purses, and the remaining classes will be for purses of about $800 each.

The Kern County Fair Association decided to raise the purses over what they gave last year and are now at work on their program. Regarding the condition of their track, they have a very competent man in charge who knows how to handle it, and they will have a very fair track for the horsemen to race over this fall.

At a meeting held at Riverside on Monday, April 30th, it was unanimously voted that Riverside become a member of this circuit and also to take some of the stock in the California Fair and Racing Association. They will offer two $800 purses, several $500 and $400 stakes, for harness horses, and purses for runners the same as the other associations in the circuit.

The Los Angeles association asked for a racing committee to submit them a program and suggest something about the amounts to be offered, and the program submitted amounts to between $18,000 and $20,000, including $2,500 for a 2:12 trot, $2,500 for a 2:08 pace, $1,500 for a free-for-all pace and nine additional $1000 purses for trotters and pacers, together with $800 for three-year-old trotters and pacers, and some purses for two amateur races. There will be a Los Angeles Derby for runners for $300, together with a number of other purses for runners.

At a meeting at Santa Maria on May first, they agreed upon uniform purses for $500 each for harness horses, the purses for runners to be the same as at the other meetings.

Frank P. Kinney, of Chicago, has been engaged by E. D. Gold, of the Midway Farm, Kearney, Neb., to prepare an elaborately illustrated catalogue of the farm and stock.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

May 6—Coalinga, Cal.—Coalinga Gun Club. E. N. Ayers, President.

May 6—Bingham, Utah—Utah State Sportsmen's Association. A. R. Bain, Secretary.

May 7, 8—Salem, Oregon—Oregon State Tournament, under the auspices of the Capital City Rod & Gun Club. Mark Siddall, Secretary.

May 13—Everett, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Everett Gun Club. C. E. French, Secretary.

May 13—Eureka, Cal.—Eureka Blue Rock Club. W. E. Innes, Secretary.

May 13, 14, 15—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary.

May 14, 15, 16—Spokane, Wash.—Spokane Gun Club. "Old Policy." Chas. A. O'Connor, President.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden, Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. L Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

✣ ✣ ✣

Fresno Shoot.—One of the features of the two-day registered tournament held in conjunction with the Raisin Day celebration at Fresno last Saturday and Sunday was the remarkable performance of Joe Gotelli of Stockton. Although he is a beginner in the sport alluring and was attending his first tournament, the novice established the marvelous run of 130 without a miss. It was the longest run of the tourney. Gotelli finished out his string of 200 with a score of 193.

H .Lorenson of Newman was high gun. He broke 195 on Saturday and 198 on Sunday for a grand total of 393. He was very consistent throughout the two days. B. Worthen, C. Barieau and S. A. Bruner tied at 191 for second honors opening day. On Sunday Harry Ogilvie was second with 195 and D .C. Davison third with 194.

Dick Reed topped the pros with 191 the first day and followed it up by busting 199 on Sunday. The shoot was well attended and the visitors were profuse in their praise of the way affairs were conducted.

The scores for those who participated in the two-day events follow: Toney Prior 180, 181—361; Barney Worthen 181, 191—372; *L. S. Hawxhurst 192, 189—381; *Al Cook 189, 183—372; *C. A. Haight 180, 177—357; *R. C. Reed 199, 191—390; Mullen 190, 181—371; S. A. Bruner 190, 191—381; J. F. Dodds 189, 185—374; Lovelace 180, 184—364; *Fred Willet 180, 176—356; Adams 181, 183—364; Slocum 187, 181 368; W. E. Eilert 190, 179—369; Dr. Martin 181, 178—359; Harry Ogilvie 195, 189—384; .R. Ostendorf 184, 186—370; C. Barieau 190, 191—381; Dr. R. N. Fuller 186, 185—371; Ed Garratt 184, 176—360; C. F. Meloy 185, 187—372; Blanchard 177, 179—356; Small 178, 174—352; Favier 182, 165—347; Yocum 176, 176—352; *Bill Ellis 181, 175—456; *C. H. Knight 188, 187—375; H. Lorenson 198, 195—393.

*Professionals.

Those who shot the 200 targets in one day's events follow:—Ayers 167, Smith 135, Orval Overall 163, Stoner 168, Hawkins 165, McNeil 172, Hudelson 156, Jackson 183, Gotelli 193, Dr. Falk 189, Hastings 172, Garrison 181, Hemmett 174, D. C. Davison 194, Arthur 178, Mook 157.

Other scores were:—Fred Oppling 67x80, Harry Bundt 27x40, Miss Meyers 65x100, Rutherford 93x100, Mook 89x100, McCabe 53x75, George Warrenburg 43x75.

New N. W. League.—Following are the Columbia-Willamette trapshooting standings:

	W.	L.	P.C.	Shot at	B'ke
Woodburn	1	0	1000	125	121
Salem	1	0	1000	125	114
Astoria	1	0	1000	125	117
Pendleton	0	1	.000	125	109
La Grande	0	1	.000	125	112
Oregon City	0	1	.000	125	95

Results on April 22—Woodburn 121, LaGrande 112; Salem 114, Oregon City 95; Astoria 117, Pendleton 109; Albany remaining idle.

Individual results—Charles Leith, Woodburn, 25; Peter Whitney, Woodburn, 25.

The opening matches of the Columbia-Willamette Trapshooters' Association were shot April 22nd and some mighty good scores were turned in. The Woodburn Gun Club led the field with 121 bluerocks out of a possible 125, and in making the record La Grande was defeated, 121 to 112.

Astoria's representatives who are battling for one of The Oregonian trophies surprised the wiseacres by breaking 117, and by so doing the Round-Up Gun Club men of Pendleton were forced to accept their first defeat of the 1917 season by eight birds. Very little opposition was afforded in the Capital Gun Club, of Salem, in trimming the Canemah Gun Club, of Oregon City, 114 to 95.

The Oregon City delegation has not been able to get going as yet. Albany, the seventh member of the Columbia-Willamette Trapshooters' Association, was idle, but the schedule calls for Astoria as the opposition next time.

Individual honors went to two Woodburn Gun Club members. Charley Leith, who says that he has seven perfect scores left in his gun, and Peter Whitney, a team mate, each smashed 25 out of the 25 presented to them. All the bluerocks were difficult ones and the two nimrod expect to do just as well in registered tournaments this season

The schedule for Sunday calls for Oregon City meeting at La Grande, Woodburn vs. Salem and Astoria vs. Albany, with Pendleton remaining idle.

Shoot at Tacoma.—The Northwest Washington Trapshooters' League has the favor of the weather gods from the break in the rainy season and a fine day experienced at the Tacoma shoot on April 22. Forty-five shooters turned out to the beautiful grounds at Manitou grove and enjoyed fine shooting.

The Seattle delegation furnished the bulk of the shooters in numbers, about ten machine loads going over.

Seattle Trapshooters' Association finished first in the team race, with 230 points, the members being Searle, McKelvey, Scripture, Fleming and Ruppe.

The Green Lake Gun Club ,with Barnes, Van Vleck, Carstens, Call and Follrich, finished second, with 221 points.

The Tacoma Gun Club stood third, using Campbell, Cooper, Coons, Dague and Smith, with 207 points.

R. S. Searle, stood high man in the interstate program, with 98 out of 100. C. E. McKelvey went second with 95. George Miller of Bellingham was third, taking the shoot-off between himself and Hi Follrich on a score of 94.

L. H. Reid stood high professional, with a score of 96 out of the 100. Matt Grossman won the Tacoma Gun Club trophy by shooting 47 out of the 50-bird handicap from the 17-yard line. The scores:

E. E. Ellis 92, R. Kinzer 90, F. Landwehr 92, H. Fleming 88, J. Ruppe 88, W. G. Taft 82, H. O. Scofield 89, F. B. Baker 84, *Geo. Hambright 94, Fred Edwards 83, Geo. Scripture 92, H. Follrich 94, Vance Thompson 93, R. S. Searle 98, J. H. Hopkins 88, *Geo. Garrison 95, George Miller 94. *I. Fisher 95, C. E. McKelvey 95, S. L. Blair 70, *F. C. Riehl 93, F. Campbell 85, A. G. Smith 68, Carl Coons 79, J. A. Dague 90, *L. H. Reid 96, L. S. Mellinger 76, Jim Davies 73, C. F. Reinhart 79, A. A. Benson 81, W. H. Carstens 87, L. S. Barnes 90, G. B. York 87, E. Callich 87, G. B. Baker 81, M. Grossman 87, Kienast 84, Fortier 67, D. Reid 91, Hill 85, S. W. Case 75, R. Tyler 74, C. W. Bandy 86. A. A. Riehl 92, E. W. Cooper 87.

PROGRAM FOR PACIFIC COAST HANDICAP.

Attractive Events Outlined For Big Shoot at San Jos on May 28, 29 and 30.

The Interstate Association's Twelfth Annual P cific Coast Handicap Trapshooting Tournament wi be held at San Jose, California, May 28, 29 and 3 1917, under the auspices of the San Jose Gun Club.

Nowhere in the Golden State are the condition more favorable for the holding of a successful tou nament with accessories of climate ,scenery an other attractions that appeal to lovers of all kind of outdoor sports and recreations, and the local gu club and the citizens of San Jose therefore con dently look forward to a large and representativ gathering of genuine sportsmen from all sections the Pacific Coast.

Transportation facilities here are unexcelled, th city being on the direct Southern Pacific line betwee San Francisco and Los Angeles and also to the sout by way of the San Joaquin Valley and to the nort by way of the Sacramento Valley. In addition, th State Highway runs the entire length of the valle placing the city on the great highway up and dow the coast and through the entire central portion the State. San Jose is only 47 miles from San Fra cisco by steam line and highway; 40 miles from Oa land by rail and highway, and 35 miles from Sant Cruz and the coast, also by rail and a branch of th State Highway.

The program for this year's Pacific Coast Hand cap Tournament is designed, as are all of The Inte state Association programs, to furnish the greates amount of enjoyment to the greatest number of co testants at a minimum of expense.

The regular program events have been arrange for the special benefit of the beginner and mediocr shot. With the low entrance fees and the losses pai back each day under the Squier Money-Back Syste it is not possible for the expert shot to enrich himsel in these events at the expense of the less skillfu contestant.

The Optional Sweeps on each Regular Progra Event, divided on the High Gun System, provide com petition for the more skillful shot who wants to tak a chance of winning larger amounts than called fo by the regular division.

The Optional Sweeps on The Pacific Coast Intro ductory, The Pacific Coast Special, The Pacific Coas Overture, the First Day's Program and the Thre Days' Program ,all divided on the High Gun System provide competition for the expert shot who is will ing to take a chance with contestants his equal i skill.

In addition, each contestant who competes in th Regular Program has a chance to win a part of th possible surplus from the Special Fund created b the Squier Money-Back System.

The two Handicap Events are arranged on a basi of entry fees as low as is consistent with the equit of the events and the material values which shoul reward good performances, and which are essentia to it.

Special competition has been arranged for women and a cordial invitation extended to them to tak part in the tournament. A trophy has been provide for their exclusive benefit.

The daily entrance fees will be:—

First day—Entrance in regular program, $15; spe cial event at double targets, $2; optional sweeps o regular program, $7; option sweep on the Pacifi Coast Introductory, $3; optional sweep on the 14 targets, $5; optional sweep on the three days' pro gram, $5. Total, $37.00

Second day—Entrance in regular program, $11; preliminary handicap, $8; optional sweeps on regula program, $4; optional sweep on the Pacific Coas Special, $5. Total, $28.00.

Third day—Entrance in regular program, $11; Pa cific Coast Handicap, $11; optional sweeps on regula program, $4; option sweep on the Pacific Coast Over ture, $5. Total, $31.00.

Contestants may shoot for "targets only" in any o all events and be eligible to win any of the trophies.

Golden Gate Club.—Although no scheduled events were carded last week about the Bay, a number of local shooters turned out at the Alameda grounds to practice up for the big events to come this month. The scores on Saturday were:

At 25 targets—Dr. Topham 18, J. S. French 24, Dr. Topham 20, J. S. French 19, Dr. Topham 25, J. S. French 23, Frank Blum 19, J. S. French 20, Frank Blum 21, J. S. French 21, Bray Thorning 20, Al Durney 24, J. W. F. Moore 19, H. J. Truscott 20, Bray Thorning 22, Al Durney 20, J. W. F. Moore 18, Bray Thorning 22, Al Durney 20.

The scores on Sunday, at 25 targets, were as follows: Waldie 20, H .A. Ray 17, J. B. Nichols 21, Pop. Merrill 24, Waldie 23, Ray 21, Nichols 24, Vesper 21, Pop Merrill 21, Ray 18, Nichols 22, Griese 19, Webber 19, Vesper 24, Griese 16, Ray 21, C. Linderman 24, A. J. Williams 17, Webber 19, Vesper 24, Griese 21, Dr. O. D. Hamlin 19, Linderman 24, Williams 23, Vesper 21, Craft 21, Dr. Hamlin 22, Webber 19, Vesper 23.

Screen Inspector Culver of the state fish cultural department looked over the Gibraltar dam fishway on the Santa Ynez river last week, following report that it was ineffective, and reported that the fishway was in excellent shape.

THE ART OF TROUT FISHING.

Veteran Angler Gives Some Pointers to Parties Out For the Opening.

[By George T. Cline.]

In trout fishing, as in many other things, it is a good plan to make haste slowly. One can never tell with certainty just where the fish may be lying. Until you have arrived at some reasonable conclusion on this point, fish all the water. Try the little shallow ripplies near the banks. Wet the flies in every part of the riffles and rapids. When you come to a pool fish all of it from the head, then go around and fish all of it from below. Do not neglect the little eddies around boulders and half-submerged trees. Many times the best fish are taken in the most unlikely places.

Where the stream has fretted away the soil so as to form a hiding place beneath the overhanging bank, watch out for the "big one." Proceeding in this manner, you will soon discover the nature of the places where the majority of the fish are lying, and if your time is limited you can pass by those which seem least productive. On some days most of the trout will be found in riffles; on others the riffles are deserted by all save the smallest fry and you will strike most of your trout in the deeper rapids and pools.

In the experimental stage of the day's fishing it is well also to determine as quickly as possible which method of presenting the flies seems to be the most popular with the fish. If the customary method of casting, that is, keeping the flies well up on the surface, does not produce sufficiently satisfactory results, try the submerged fly. A variation in the method frequently spells the difference between success and failure.

Sometimes the lightest touch of the net will revive a played-out fish and he is off again like a flash. In view of this it is advisable before using the net to have a fair amount of slack line off the reel which should be held between the fingers of the rod hand so that it can be released immediately. Thus prepared, a final rally of the fish is not apt to result in his escape. Unless the trout was originally hooked very hard after a more or less protracted siege of playing, the hook often "hangs by a thread," in which case if the trout is snubbed in the least the hook will tear away, and frequently if any slack is given, it will drop out.

Occasionally examine, and if doubtful, test every inch of tackle from reel to flies. Anything which cannot be absolutely trusted is worse than useless. Either repair it as strong as new, or chuck it away. Hanging on to frayed, weakened stuff is poor business. It surely will play false at the worst possible time. The biggest fish has a peculiar habit of laying hold of the rottenest tackle.

The trout lie with their heads up-stream, eagerly watching for what the water may bring, and a bait moving with the current looks natural, and, in addition, keeps the line taut and ready for instant action. A trout seldom hesitates over a bait, but either ignores it altogether or lays hold with a vim; hence one cannot well strike too soon after a nibble is felt. In case the sun casts too pronounced a shadow ahead when working directly down stream, move along whichever bank will enable you to work across and down stream.

Angling, like every other sport that requires the co-operation of the hand and the eye, is most enjoyed and most effective when one is "in form." The observation of a few fundamental rules, coupled with frequent practice, will enable any lover of the out-of-doors to become proficient in a pastime that is most inexpensive and yet the finest nerve tonic known.

Rule 1. Be sure your rod is securely jointed with the ferrules in line, the reel properly attached, the line strong, with moistened leader and fly correctly attached. Any sporting goods salesman will gladly show you how to do these things.

Rule 2. Begin slowly with the whole body relaxed and poised, making short casts of fifteen or twenty feet until you get "the knack." Overambitious beginners often attempt to make long casts at the start in very crude style, thus acquiring bad habits that must later be unlearned.

Rule 3. Take a firm hold of rod with one hand at just the point on the hand hold where it will balance across your finger when fully equipped for work. You may add slight weight to your rod at the proper place to make it balance at exactly the point on the hand hold that you desire.

Rule 4. Draw out from the reel just enough line so that the fly will hang about a foot above the reel when the rod is perpendicular. Then begin a gentle whipping motion with the forearm and wrist, at the same time stripping (drawing from the reel) line with the other hand. Strip the line only as fast as the slack is being taken up by the motion of your cast.

Rule 5. As you are able to lengthen your cast you will find the full arm motion necessary for distance and accuracy will come to you easily and unconsciously if you have up to that point developed your casting slowly and patiently.

Rule 6. Always glance at the ground behind you before casting, remembering that your fly must go nearly as far behind you as it will go forward.

Rule 7. Be sure to let your line straighten out in the back cast before you bring it forward, thus avoiding the "pop" that snaps the fly from the leader.

Rule 8. "Keep your eye on the ball." That is to say, keep your eye on the certain spot on the water at which you are casting. Do not try to look at your rod or fly.

Rule 9. When your fish is hooked do not jerk him out of the water, but play him until you are sure he is not too big for the strength of your rod before lifting him out. Never let the fish get any slack line, but keep a steaddy pull on his mouth by properly working the reel.

What They'll Weigh.—

CURTAILING SPORT NOT A WISE MOVE.

Eastern Colleges Should Continue Athletics as Preparedness Course.—Trapshooting Will Continue.

[By Peter P. Carney.]

When the United States was drawn into the international conflict the athletic authorities of several of our best-known Eastern colleges stampeded and discontinued all forms of athletics.

These grave men took the situation too seriously. There was no such hysteria in the West. The action was not only unwise but uncalled for. It would have been best for all of these institutions if they had permitted the athletic teams to continue as before the severance of friendly relations with the foreign foe—for the young man who is in good physical condition is of benefit to his country. Without competitive athletics it will be difficult for the collegian to keep in trim.

The Military and Naval Academies, the institutions most seriously affected by the severing of diplomatic ties between the United States and the Central Powers, are continuing athletics and advise all others to do the same. Every one cannot go in the trenches or join the Navy, therefore there must be recreation and amusement.

The Lawn Tennis Association announces it will continue all tournaments unless the War Department counsels otherwise. The United States Golf Association will follow a like course. Polo and horse racing will be continued as before, and the war will, no doubt, stimulate interest in the horses. These sports, however, can be discontinued at any time without serious inconvenience.

There is one sport, however, that is doing a wealth of good for the United States in the way of preparedness and that sport will have its banner year because of the complications. That sport is trapshooting. One tournament has been canceled—the one for the championship of the U. S. N. Atlantic Fleet which was scheduled for the last of March and the first of April at Guantanamo Bay, Cuba. This tournament will not be held until after the end of the war.

This, however, will be the only trapshooting tournament postponed by the conflict. Every one of the other 500 or more will be carried tthrough as scheduled. In making this decision, President T. E. Doremus, of the Interstate Association for the Encouragement of Trapshooting, said:

"Trapshooting is real preparedness. By holding all of the tournaments we will be doing a good thing for the United States. All young men should know how to shoot. Many are now learning. The trapshooting clubs are doing their share to encourage them.

"If we make 15,000 additional trapshooters this year it will mean 15,000 more men who can go to the aid of the United States in a great measure prepared. Young men are being encouraged to come to the traps and learn how to shoot and the war will bring them out even more numerous than in other years. Trapshooting is real preparedness and we will go right along getting youth of the United States ready for whatever may come."

Quite a number of trapshooting clubs have announced that members will be at the clubs on certain days each week to give instruction to those who wish to learn how to handle a gun, etc.

Trapshooting tournaments have been registered in Cuba, Hawaii, Canal Zone and the Philippines. At this time last year, 412 tournaments were sanctioned—now there are 472 on the list, which is evidence that more people are interested than ever before.

Thirty-six States have announced the dates for their State Championship Tournaments and the others will be along shortly.

Trade Notes.—Dr. E. H. Buie carried off high honors at a recent shoot of the Gilliard Sporting Club, Natchez, Miss., with a score of 96x100. Dr. G. S. Handy won second honors and J. N. Stone third honors, breaking 94x100 and 91x100 respectively. All three of these men shot Remington Pump Guns and Nitro Club Speed Shells.

At a recent shoot of the Sea Cliff Gun Club, Leamington, Ont., James Hartwick and W. Hart took first and second honors respectively. Both men shot Remington Pump Guns and Nitro Club Speed Shells.

The Glen Willow Gun Club, of Rexborough, Philadelphia, Penn., held an interesting shoot recently at which 72 followers of the clay saucers faced the traps. Harry Sloan of Philadelphia won high honors, breaking 47 out o fhis quota of 50 targets. H. Bartolet was second with a score of 45x50 and W. Williams took third honors, breaking 45x50. All three of these men shot Remington Pump guns.

The S .S. White Gun Club, of Holmesburg Junction, Penn., had a good turnout at one of their recent shoots at which 95 shooters faced the traps. High honors were taken by W. B. Severn, of Philadelphia, who broke 48 out of 50 targets. H. Hoffman and E. W. Budd tied for second honors, each breaking 45x50 targets. All three men shot Remington UMC Shot shells.

Chas. Hummel, of the Des Moines, Iowa, Gun Club, won high honors at their recent registered shoot. Shooting the perfect combination of a Remington Pump gun and Nitro Club shells, he scored 142x150, defeating a field of 70 shooters.

W. E. Butler won high honors at a recent shoot of the Riverside Gun Club of Rochester, N. Y. Shooting a Remington Pump gun and Nitro Club Speed shells, he broke 95 out of 100 targets.

Sportsmen's Row

The Golden Gate Kennel Cluub opened its sixth annual exhibition at the Exposition Auditoriuum on Wednesday. Announcement was made that 600 dogs were benched during the three days, ending Friday.

✤ ✤ ✤

The Alameda Elks' Club will stage its monthly tournament at the Alameda grounds tomorrow. The club officials are getting the program for the registered tournament next month in shape for announcement.

✤ ✤ ✤

H. E. Bacon of El Paso, Texas, has purchased from James S. Fielder the Airedale bitch, Cactus Winnie No. 217781 (Ch. Rickley Ooorang—Ex Coine Modeste). She is in whelp to Cactus Maitre Labori, No. 211547 (Abrecon Coldedge—Ex Empost Briarsweet).

✤ ✤ ✤

Mr. and Mrs. A. G. Wilkes are on another visit to the East, and while in New York are attending the weekly shoots of the New York Athletic Club. Wilkes broke 84 out of 100 at a recent shoot and with his handicap of ten was up among the leaders. Mrs. Wilkes got 77.

✤ ✤ ✤

The county game warden recently took 24,000 silver trout fry from the state salmon hatchery in Sultan, Wash., to Lake Ballinger and Lake Cochran. Of this amount 15,000 fish were planted in Lake Ballinger and the remainder in Lake Cochran. The fry were turned over to the county by the state.

✤ ✤ ✤

Utah Association.—The Utah State Association held a registered tournament at Springville, Col., on April 16. The scores on 150 targets were:

H. W. Heagren 129, H. A. Luff 132, A. B. Bain 128, Mark Cook 139, C. H. Reilley Jr. 144, Glenn Bishop 100, L. E. Riter 141, W. H. Mitchell 119, H. N. Welch 131, D. R. Wightman 128, Jos. Vane Jr. 113.

Professionals—F. J. McGanney 133, C. A. Anderson 126.

✤ ✤ ✤

Telegraphic dispatches state that Frank Troeh, Vancouver, Wash., national amateur trapshooting champion, and holder of the Washington State championship, lost his state honors in the twenty-third annual championship of the state, at Seattle on Sunday. J. H. Hopkins, Seattle, wrested the honors from him by breaking a Coast record for consecutive hits ,breaking 284 targets without a miss.

✤ ✤ ✤

The place where next year's Pacific Coast Handicap Tournament will be held will be decided upon at the Interstate Association's annual meeting scheduled for Thursday, November 8, 1917. Gun Clubs that intend applying for said event should file their applications by October 15. Applications will be received conditional on the association continuing its present policy of giving the Pacific Coast Handicap Tournament. Send all applications to The Interstate Association, 219 Coltart Avenue, Pittsburg, Pa.

✤ ✤ ✤

All opening day records were broken when the California trout season for 1917 started. Headed by Hal E. Roach and Dwight Whiting, the advance army at Los Angeles moved in on "Dad" Skinner at Pine Knot Lodge. The Big Bear roads via Victorville are reported to be in first class condition and every cabin at Pine Knot has been reserved. Thousands of anglers are headed for the various streams. The Fish and Game Commission report that over 7,500 licenses have been taken out in Los Angeles county up to last Saturday as against 4790 for the same date last year.

✤ ✤ ✤

Clubs Feature Trapshooting—Many people are under the impression that the only place they can enjoy trapshooting is at a gun or trapshooting club. This is surely a wrong idea. Many prominent athletic, boat, country, golf and yacht clubs have installed trapshooting paraphernalia and the members take as much interest in target shooting as they do in the other facilities.

This is true in all localities, for just recently the Du Pont Company of Wilmington, Delaware, issued a booklet showing a list of clubs at which trapshooting is regularly installed as a part of these clubs' sporting features.

✤ ✤ ✤

W. J. Morrill, State Forester of Colorado, is pushing a propaganda for the trading of the scattered school sections within the National Forests back to the federal government in lieu of an equal acreage of timber and pasture land in one or two compact bodies. Roughly, there are about 125,000 acres of State lands included within the National Forests of Colorado, mostly Sections 16 and 36. It is about as impracticable to handle these scattered sections satisfactorily as it would be for a farmer to cultivate acre-plots scattered all over a whole county. With this acreage blocked up as a State Forest, the land can be protected and utilized much more efficiently; forestry principles may then be applied to its management, and the State will eventually derive more revenue from its timbered holdings.

Los Angeles Club.—Pounding away at over 6,000 targets with their twelve-gauge guns, forty-five members of the Los Angeles Gun Club contended for the H. R. Everding trophies Sunday in a 100-bird class handicap trapshooting tournament.

R. O. Pool, shooting from eighteen yards, broke high gun. His score was 95x100. C. W. Fish was second high with a score of 94x100, achieved from sixteen yards.

Possibly some of the most wonderful shooting ever seen around Los Angeles was put up by Frank H. Mellus from twenty-two yards. He broke ninety-three birds.

Gold "take home" trophies were won by Sargent, Cornelius, Pool and Dougherty. Silver "take home" trophies were won by Mellus, Pfirrmann, Evans and Tuckett.

The point winners to date in the Everding competition, according to their classes follow:

Class A—Mellus 20, Prrmann 14, Dodds 13, Evans 8, Cornelius 6, Morse 6, Mellon 6, Fish 5.

Class B—Sargent 18, Council 16, Tuckett 13, Grewell 10, Pachmayr 6, White 4, Famechon 4.

Class C—Melford 20, Wilson 17, Mrs. Pfirrmann 15, Hart 13, Bishop 9, Betz 5, Dougherty 4, Peterson 4.

Class D—Kennedy 21, Pool 21, Nelson 9, Mrs. Mellon 7, Carnahan 6.

The scores follow:

Pool, 18 yards, 94x100; Fish 16—94, Mellus 22—93, Council 20—91, Mitchell 19—91, Pfirrmann 22—90, Famechon 18—90, Hoyt 17—90, Sargent 20—89, Evans 19—89, Melford 19—89, Cline 18—88, Dougherty 17—88, Teeple 17—88, Tuckett 19—87, Cornelius 20—86, Carnahan 16—86, Kennedy 18—85, Nelson 18—84, L. Mellus 18—84, Grewell 19—83, Mohler 16—83, Mrs. Pfirrmann 17—82, Oliver 19—81, Hall 19—80, Hart 19—79, Claypool 16—62, Schaffer 16—60, Ross 16—60, Ross 16—53, Pedersen 16—53; Mueller 16—41x50, Bauer 16—37x50, Lockhart 16—32x50, Stoney 16—20x50, W. Ross 16—4x50, Crossman 16—24x25, Mrs. Crossman 16—18x25, A. Nelson 16—15x25, Ekdale 16—14x25, Mackay 16—10x25, Holmes 16—1x25; Pfirrmann 196x200, Mitchell 187x200, Mohler 115x125, Dodds 96x100, Famechon 94x100, Cline 94x100, Cornelius 94x100, Oliver 94x100, Mullen 93x100, Melford 92x100, Kennedy 90x100, Hart 72x75, Carnahan 60x75, Groat 50x50, Pachmayr 48x50, Mrs. Pfirrmann 46x50, Mellus 44x50, Hall 40x50.

✤ ✤ ✤

Vernon Club.—Bob Bole, "shooting oil man of Vernon," had his shooting eye with him on Sunday and bombarded his way to victory in General Haig style in the sixty-bird handicap trap shoot held by the Vernon Gun Club. He blasted 59 out of the targets in the trophy competition and broke 40 straight at practice, a splendid day's work.

Dr. L. M. Packard and J. D. Dierdoff were the runners-up. Each contender broke 58x60. Dierdoff squelched 96x100 during the day.

According to Secretary Bruner, Bole shot as he never shot before. He was centering his targets, and blew them into dust. The results:

Nauff	18	31x40	18	16	17	51x60
Foley	19	34x40	18	14	17	49x60
C. E. Groat	18	37x40	18	18	18	54x60
Mrs. Groat	18	38x40	19	15	20	54x60
A. W. Bruner	19	38x40	18	19	20	57x60
Wm. Pugh	18	35x40	16	18	17	51x60
Meennzhuber	18	35x40	..	..	..	..x..
Dr. Packard	19	34x40	18	20	20	58x60

✤ ✤ ✤

Patterson Club.—The Patterson Trapshooting Club claims the honor of being the most wide-awake organization of its kind in Stanislaus county. At the bi-weekly shoot on April 29 a ten bird event for ladies only was staged and nine of the fair sex participated. And while the number of mud hens smashed was not large, it made the old-timers feel good to thing of the interest manifested.

The club proposes trying out a Beginners' event on the 30th of May and each member is pledged to bring a novice. A number of prizes are offered, including the Du Pont spoon and watch fob.

The shoot last Sunday included the final event in the trophy cup race which was won by F. S. Harrison, the club secretary. The score in this event was as follows:

B. F. Bowers, handicap 18 yds, broke 19x25; R. Edwards 19—22, F. S. Harrison 19—24, W. T. Ralston 17—18, W. F. Brye 16—19, F. Everett 17—20, M. R. Berlin 18—19, C. Meisner 16—17, F. Conners 16—19, M. Knutson 17—20.

If the manufacturers of powder, shot and shells would adopt the policy of sending their representatives to the bush league shooting clubs instead of letting them run to all the Big Time shoots they would work up a lot more business. Gun clubs in many small towns are disbanding due to the lack o fencouragement and a little stimulated enthusiasm.

Yours,

F. S. HARRISON, Secretary.

BIG CROWD OUT FOR OPENING.

Anglers As a Rule Experience but Fair Luck in Luring the Elusive Trout.

The trout season came in around San Francisco Bay and Northern California with a representative band of anglers out on the streams. The main army of rodsters, however, waited until the week-end so that we will have to wait a few days longer before we receive the inside information of the big ones that got away and hard luck tales of that variety.

The anglers who did fish on Tuesday reported indifferent success as a rule. Over at the Paper Mill and other favorite streams in Marin county the fish were small and catches few. There is no doubt but that the April 1 opening is the proper date to usher in the sport.

Down by San Mateo way and further south better reports were made.

In Alameda and Sonoma county the fish were small in size and plentiful only in spots. The anglers who pushed north by Napa and Calistoga, however, had excellent sport, some of the best fishing of the day developing in that territory.

The western part of the Lagunitas and the Big and Little Carson are closed to public fishing this season. Land companies have secured control of the property and watchmen have been stationed to keep the anglers off. A. E. Lang of San Francisco and a few other fishermen, however, were given the privileges of the Carson and came back with little to show as far as results went. Lang took forty fish of fair size, while his companions got only a few small specimens.

The biggest fish reported taken in Marin county was sixteen inches. Bob Cranston got this prize in the Paper Mill.

W. S. Hill and Russell Ford of Alameda each took a limit in the Paper Mill, the fish being small in size. Both reported that catfish and suckers are doing a great deal of the biting in the vicinity of Camp Taylor and Tocaloma.

✤ ✤ ✤

Telegraphic Rifle Shoot.—Reports from J. B. Crabtree, secretary of the United States Revolver Association, indicate the final results of the last telegraphic shoot, in which the Portland team won the championship, and also gives the list of entrants in the indoor championships, which have but recently been shot.

The report and standings are as follows:

Class A—Portland Revolver Club, won 20, lost 0; Olympic Club, won 18, lost 2; Boston Rifle & Revolver Club, won 18, lost 2; Springfield Revolver Club, won 17, lost 3.

Class B—Spokane Rifle & Revolver Club, won 17, lost 3; Seattle Rifle & Revolver Association, won 15, lost 5; Manhattan Rifle & Revolver Association, won 12, lost 8; Rifle & Revolver Club of New York, won 12, lost 8.

Class C—Cincinnati Revolver Federation, won 12, lost 8; St. Louis Colonial Revolver Club, won 11, lost 9; Providence Revolver Club, won 9, lost 11; Chicago Revolver Club, won 9, lost 11.

Class D—Columbus Revolver Club, won 8, lost 12; Youngstown Rifle & Revolver Club, won 7, lost 13; Dallas Rifle & Revolver Club, won 6, lost 14; Manito Pistol & Rifle Club, won 6, lost 14.

Class E—Aspinwall Revolver Club, won 6, lost 14; Quinnepiac Rifle & Revolver Club, won 3, lost 17; Citizens Revolver Club, won 2, lost 18; Toledo Rifle & Pistol Club, won 2, lost 18.

✤ ✤ ✤

Division of Trapshooters.—Every year at the close of the trapshooting season after official averages are published, there is quite some discussion as to which section of the United States, the East or the West, contains the best clay target shots. There has never been an official division of the country which might enable statisticians to satisfy their friends with compilations of such averages. In order that said statisticians may have something official upon which to base their compilations, Mr. T. E. Doremus, President of The Interstate Association, has made a ruling placing in the East the states of:

Maine, New Hampshire, Vermont ,Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Kentucky, Indiana, Ohio, Michigan.

And in the West the states of:

Wisconsin, Illinois, Minnesota, Iowa, Missouri, Arkansas, Louisiana, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Montana, Wyoming, Colorado, New Mexico, Washington, Oregon, Idaho, Utah, Arizona, Nevada, California.

THE INTERSTATE ASSOCIATION,
Pittsburgh, Pa. E. REED SHANER, Sec'y.

NIVERSITY FARM PICNIC ATTRACTS RECORD CROWD

There have been crowds and crowds t the University Farm Picnic, at avis, in former years, but never the rowd like last Saturday. There has een enthusiasm, but never the enhusiasm of Saturday, April 28. There ave been good talks, demonstrations nd much accomplished at former picics, but nothing to equal the events f last Saturday which establish a new ecord for University Farm picnics. t was stated by conservative officials f the University that there were 0,000 persons present; think of it—wenty thousand cheering, applauding armer-ranchmen and stock growers of California—every one of them glad hey came, every one going forth to is respective neighborhood, district nd county as a personal representaive and advertiser of California's reat state farm.

The excellence of the program arranged by the faculty and students of University Farm was in keeping with he excellent attendance. The only lrawback of the otherwise perfectly successful day was the strong wind, but the interesting program even offset that, and, as the sun was shining brilliantly all the day, it was an easy matter to forget the blustery wind. More than $50,000 in live stock, the prize-winning, blue blooded horses, cattle, sheep and swine now maintained and being bred at the farm made the parade the most spectacular and interesting event of the entire day. Attractive floats representing various methods of better farming, stock growing and farm life added to this, made the parade one that will long be remembered by the thousands, as the real feature of the day.

Bread bullets will win the war," declared former Assemblyman B. B. Meek of Oroville, a member of the state council of defense, in addressing the large audience. "All the great authorities abroad and at home agree our greatest contribution to the cause is food. Today our chief concern has to do with the field covered by the committee of resources and food supply."

The ninth annual picnic of the University Farm had an added significance to those of past years in the showing of the work of the school and providing a meeting place for farmers of California. The great topics were food conservation and how to increase our production.

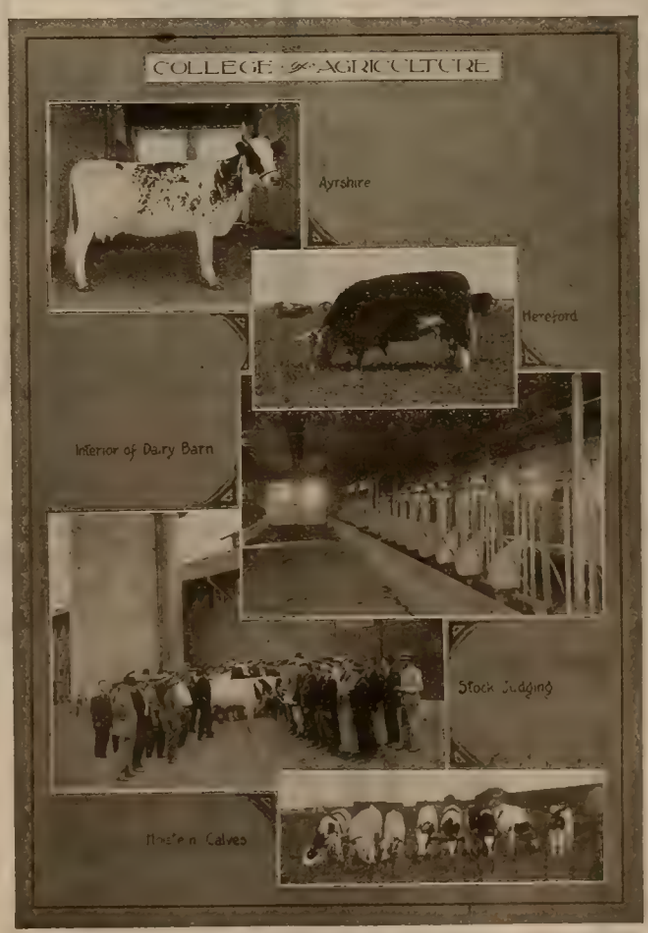
Early in the forenoon there were tennis games, junior track meet and demonstrations of animal husbandry, irrigation, horticulture, creamery work and in the veterinary building. Stock judging by young men under 21 years, without previous college or school training, was an interesting feature.

Professor D. N. Morgan, one of the food experts of the council of defense, who has been collecting statistics on the quantity of food available, urged the farmers to produce more summer forage crops as there is a great shortage of food for stock. On this account the forest service has declared it will be necessary to market thousands of sheep and cattle which are usually carried over to the following year.

CARRUTHERS' SHORTHORN SALE AVERAGES $370.

The public sale of Scotch Shorthorns conducted by W. M. Carruthers, at Carruthers Farms, Mayfield, Cal., Wednesday ,May 2, resulted in the magnificent average of $370 for the 40 head sold. The attendance included a strong representation of Western breeders and new buyers and was remarkable in the fact that the new buyers either bought or were the contending bidders on the offerings up to the last bid. Another remarkable feature was that this sale, one of the first ever conducted in California by one individual, made a better average than many herds in the leading nurseries in the Cornbelt this year. It brings California into prominence as a great distributing point for pure bred stock and is evidence that the breeders and feeders here intend to have more and better beef on less hoofs. That California was absorbing much of the best blood in the country was the statement of Col. Carey M. Jones, of Chicago, who did the selling and who was amazed at the quality of the offering.

The top of the sale was the three-year-old heifer, White Brier, by the noted sire and show bull, Ringmaster. She went to T. M. Miller of Los Angeles at $2,000, who also got many other high priced and attractive offerings. White Brier is one of the remarkable productions of the Shorthorn breed and attracted much attention. In fact, the better the quality the more lively was the sale and it was demonstrated that the West wants the best. Whenever an offering of lower quality was offered, which was a rarity in this good sale, the bidding lagged awfully and it took a lot of work to find buyers for them. The sale was a gratifying success and will be an annual affair. Official list of the sales will be published next week.



Lively Herefords Average $470.

Taking into consideration the fact that it was the first pure-bred Hereford sale of note in California and that Herefords are a new breed to Californians, the first annual sale conducted by Dan O. Lively, at his farm near Mayfield, California, Thursday, May 3, was the most remarkable achievement this great breed has made in years. True, for the quality of the offering $470, which was the average of the sale, was not so large as some of the $1,000 and $1,200 averages; and will not cause quite the stir that those averages do, however, as the top offering only brought $900, one can readily see what a cleanly conducted and profitable sale it was. A number of the offerings being calves, also, prevented the average from running further up in figures.

Col. Fred Reppert, of Decatur, Ind., the leading Hereford auctioneer of the country, opened and conducted the sale. In his opening address he commended California for having a live wire like Dan Lively interested in Herefords and gave many interesting figures and facts which gave the buyers faith in the seller and the offerings . Col. Reppert is a high priced salesman; it's a long way to come and an expensive trip from Indiana, but, as I heard one well known buyer remark: "It was certainly worth the money and his services could not come too high."

The top of the sale was the two-year old bull, Satin, one of the best products of the breed, which sold to W. D. Newhall, of San Francisco, for $900; the top female was Marion, a three-year-old which sold to W. J. Bemmerly, of Woodland, for $800; Chas. Rule, of Jenner; W. D. Duke, of Likely, and others got many of the top-notchers. Bulls here were better sold ,in my opinion, than cows, and there were some real bargains in the females sold; however, those conducting the sale were anxious to get this grand offering well distributed at this sort of price and there was no "yelping" on the prices at any time. The sale was an unqualified success. The attendance was good, the offering well presented and assures progress for the Hereford in California. One of the most highly pleased men at the sale was R. J .Kinzer, of Kansas City, secretary of the American Hereford Breeders' Association. Col. Carey Jones, of Chicago, and "Jump" Cauthorn, editor of the Breeder and Sportsman, did the ring work. Official list of the sales will be published next week.

Colusa (Colusa Co.), April 28.—One of the largest sales of land made in the Sacramento valley for many years was closed today, when 12,000 acres of what is known as the Moulton ranch in this county, on the east side of the Sacramento river, became the property of a San Francisco syndicate for about $1,000,000.

INTERESTING VIEWS, UNIVERSITY FARM, DAVIS, CALIFORNIA.

THE FARM

A Tax That Should Not Be Paid.

There are many ways that flies cost stock raisers money. The tax demanded from the stockman through flies amounts to a great deal annually. The form which this tax may assume is greatly varied. First, it must be realized that flies largely breed in dirty places—places that are themselves sources of infection and germ life. As the flies breed and live in these germ infested places they continually carry germ life on their bodies. Because of this they carry possible infection with them continually.

A few years ago a corn belt breeder had a very valuable pure bred mare. This mare was not only a valuable proven producer, having produced one colt that sold under two years for $1,450, but was also a show mare and had taken the grand championship ribbon in one of America's largest shows. This man's farm was infested with flies and the filth in which they grew. The mare in question received a wire cut on the leg just above the hoof. With proper treatment and no flies this cut would have healed rapidly and would not have materially affected the value of the mare. Instead of this, however, flies carried infection to the wound. Not only did the wound fail to heal but the infection spread throughout the system. With her entire system infected this mare lived, without reproducing, for about three years and then died. What flies cost this man in this one instance cannot be figured in dollars and cents.

In Iowa there is a breeder of pure bred horses who took the precaution to have a small pasture that was as near clean as it was possible to make it for his mares to foal in. This was done to guard against infection of the colt with navel ill at the time of birth. He did not recognize the fact, however, that within a few hundred yards of this clean pasture there were large piles of manure harboring germs without number and also the source of flies. As the colts foaled the flies did their work of carrying infection from the manure piles to the open navel and this man paid the tax that flies demand—a tax that for him could not be figured in dollars and cents.

A jack breeder in the State of Missouri had a farm that was filthy with manure and the accompanying germs and flies. Each year before he learned his lesson and cleaned up the farm flies demanded a great annual tax from him in the way of jack sores which made his jacks demand more feed and return less in the way of flesh and service, to say nothing of several jacks that were permanently crippled or killed as the result of the sores.

Fly troubles often take many forms that are baffling. When the government moved some of their northern cavalry to Arizona in the spring of 1912 there was one such incident. The geldings which came with this detachment were fine animals and in perfect health. Almost without notice and soon after their arrival they commenced to swell in the sheath. The farriers in charge thought this due to a foul sheath or change in feed and climate. Repeated flushings and physics, however, did not relieve the condition. More horses became infected and the former cases took on a bad odor. Then along came a cowpuncher who was familiar with the country. After one look he said those northern horses had dropped out their penis long enough for flies to lay eggs and breed screw worms in their sheath. Again the fly had laid a tax in the form of lost time and lost flesh that was paid in full.—Amer. Breeder.

By this season of the year the pigs that were farrowed early in March are almost ready to wean ,and are old enough to go on pasture with their mothers. This brings up the question of pasture management during the spring and summer months. On this subject there are a number of varied opinions. Some breeders who raise their hogs with the emphasis on the cheapness of the ration rather than on the quality of the pigs produced, figure on feeding no grain whatever with their summer forage. Others go to the opposite extreme and give the pigs constant access to a self-feeder in their pasture. Others vary in the amount of grain fed. If pigs have but a small pasture they will not do well unless some grain is fed. Where the pasture is extensive, as is the case with farmers who turn their hogs into their clover and alfalfa meadows, the pigs undoubtedly do better, probably because of the more varied selection of tender feed that the large pasture furnishes. Where pigs have constant access to a self-feeder they need little additional finishing to put them on the market ,but the grain cost is high for pigs so run will eat close to five per cent ration of grain. In such a case the pigs are fat from the time they are a few weeks old and carry an excess of fat that could easily be dispensed with in favor of more growth at the start.

Perhaps the best method is to give the pigs a good sized pasture of either clover, alfalfa, rape or some other green stuff, and to feed either a two or a three per cent grain ration. This is enough grain to keep the pigs growing well, yet there is not enough grain to satisfy their hunger and they make most of their gains on the alfalfa, which of course is the cheapest form of food that can be provided. Where thus fed the pigs make a good growth of frame, are longer bodied and more rangy than pigs with an abundance of grain, but when the time comes to finish they take on flesh readily and cheaply and the same number of pork, of first class quality, can be turned out cheaper than where the pigs have constant access to all the grain they desire.

The legume pastures, alfalfa, clove swee tclover and kindred plants a generally the favorites for hog pa ture, though rape has been succes fully used in many parts of the stat In some instances the native gra pasture of lowland meadows has be used, but here the pigs have not ma the gains that the cultivated pastur have produced. Hogs turned into hay meadow in moderate numbers w gain their pasturing from the crop a not appreciably lower the yield of ha

When You See

these blemishes on your horse, remember we have shown and proven for over twenty years that Save-The-Horse positively cures them.

FROM THE "TOMMY MURPHY" OF THE HALF-MILE TRACKS

Complete Training Plant. New Half-Mile Track.

PITMAN FARM STABLE
"HAS THE WINNING HABIT"

Trotters and Pacers Wintered, Trained and Campaigned.

Trenton, New Jersey, Dec. 3, 1916.

Troy Chemical Co., Binghamton, N. Y.

Last winter I purchased half-dozen bottles of Save-The Horse. I have had most satisfactory results with it and wish the same number of bottles again. Your early shipment will greatly oblige. Yours very truly, C. E. PITMAN.

Save-the-Horse Does Not Blister, Does Not Discolor or Destroy the Hair Nor Leave a Scar. Horse Works as Usual.

$5.00 Every bottle is sold with a binding contract to refund money or cure any case of BONE and BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND-PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDON and OTHER LAMENESS.

TROY CHEMICAL CO., Binghamton, N. Y.

D. E. NEWELL, Agent, 80 Bayo Vista Ave., OAKLAND, CAL.

SAVE-THE-HORSE is sold with Contract by Druggists and Dealers Everywhere or Promptly Sent by Us.

A BLUE RIBBON WINNER.

The Type of Colt Raised at SAN VICENTE RANCHO.

Why not have one like it? It costs no more to raise than the colt you have to leave at home, and it has an earning capacity, as well as commanding better prices, and raising the standard of saddle horses.

Don Castano and Highland Monarch at stud, $50.00 each. No more mares will be accepted for San Vicente as his books are filled for this season.

We will pay the freight, to and from our Ranch, on mares sent from any part of California, but will not assume responsibility for accidents.

SAN VICENTE RANCHO
1023 Investment Building
Los Angeles, Cal.,

AN OPPORTUNITY

to get an ASTRAL KING, a beauty,
at the price of one by any other stallion.

There has been placed in our hands to sell, a beautiful five-year-old mare sired by the world's greatest stallion, Astral King. She is a bay mare with heavy mane and tail, 16 hands high, five gaited and absolutely safe for a lady to ride or drive. Broken to all city sights and serviceably sound. This is a mare that any one should feel proud to own. The first check for $250 gets her.

JAS. HOUCHIN, Jefferson City, Mo.

HEMET STOCK FARM

F. E. WARD MGR.

COLTS AND FILLIES BY WILBUR LOU ALWAYS ON SALE

HEMET, CAL.

Offers for service the best grandson of McKinney 2:11¼

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion Two-Year-Old Race Trotter of the Pacific Coast.

ZETA LUCILE (2) 2:12½

Champion Two-Year-Old Filly of the Pacific Coast.

HEMET QUEEN (1) 2:16¼

Champion Pacing Filly of the World.

KINSMAN LOU (2) 2:23½.
MATILDA LOU (2) 2:22½.
FIESTA LOU (p) (1) 2:25, (2) 2:22½.
GOLDSMITH LOU (2) 2:29.
BILLIE BOYD (2) 2:30.

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of Louise Carter (3) 2:24, the only mare to produce two yearlings to trot in 2:20 or better:

WILBUR LOU (1) 2:19½,
EDITH CARTER (1) 2:18¼.

Breed to him for colts that will race. Fee for 1917, fifty dollars, with usual return privilege, or money refunded at our option. Mares kept, $60.00 per year. All information gladly furnished.—Licensed Pure Bred Cert. 23.

Superbly Bred Young Saddle and Harness Horse
FOR SALE

SADDLE BRED:—
Dark Bay Gelding by Lord Denmark—Sonia.....Foaled 1
Bay Colt by Lord Denmark—Dixie Queen.....Foaled 1

STANDARD BRED:—
Bay Gelding by Don Sonoma—Chula.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent. Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

P. O. DRAWER 447. SAN FRANCISCO, CAL.

"Hartford" Race-horse Insurance--

"HARTFORD" policies are broad and liberal in their terms and are offered at lower rates of premium than have often been charged in the past.

You race either for pleasure or profit—possibly for both. A fast horse is very valuable, the purchase price running from a few hundred to many thousands of dollars, and should be insured against death. Any race-horse is subject to the serious hazards of transportation, training, and racing, as well as the greater danger of death from fire, lightning, or disease.

If good judgment prompts you to insure your buildings against fire, you certainly will admit the necessity for race-horse insurance.

In the past it has been practically impossible for many owners to secure satisfaction and complete protection. "Hartford" policies furnish real race-horse insurance.

Write for rates and further information to

ROLAND C. DRAKE, Asst. Gen. Agent,

Your Club Needs New Chaps at the Traps!

ROB FOLWELL Univ. of Penn. Football Coach Instructing Intercollegiate Champion Berry in the Art of Trapshooting

Every club needs something to put "pep" into its organization. New chaps at the traps brace up the club, propose novel shooting programs and arouse greater enthusiasm amongst the older members.

Beginners Events get new chaps at the traps. Thousands joined the trapshooting clubs last year because of Beginners Events.

Hold a Beginners Event in May or June

Look for beginners in your office, shop and neighborhood. Invite them to your club to learn to shoot. Get them to try the "sport alluring." The fascination of shooting the clay targets will win them just as it has made you a "gun bug." Round up the beginners to help your club.

TO GET THE HANDSOME TROPHY

we are giving to the club in any State or Canadian Province having the largest number of participants in a Beginners' Event. Sterling silver watch fobs and spoons will be given to clubs for presentation to beginners making highest score.

Send Us Your Club's Application To-Day

Boost Beginners' Events,—they get new chaps at your traps! Pick your day and send your club's application without delay.

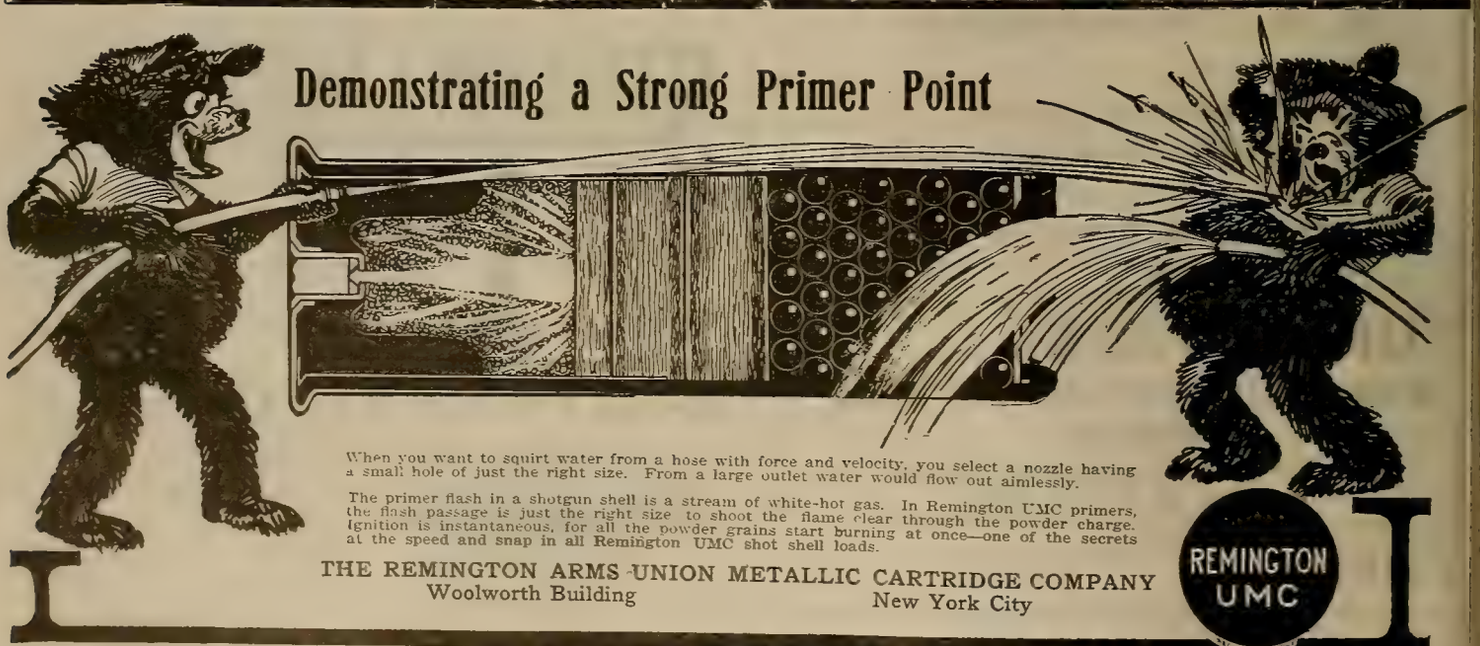
TEACH YOUR BOY TO SHOOT---

Every Boy instinctively loves a gun. Most fathers have had to listen to the plaintive appeal: "Dad! I want a gun!"

WHEN YOU TEACH YOUR BOY TO SHOOT, YOU WILL GET CLOSER TO HIM THAN EVER BEFORE. NOT ONLY WILL THE YOUNG FELLOW ACQUIRE MANLY HABITS AND SELF-CONTROL, BUT HE WILL LEARN TO HANDLE FIREARMS WITH SAFETY TO HIMSELF AND OTHERS.

WHEN YOUR SON ASKS FOR A RIFLE, HE WILL NATURALLY EXPECT A WINCHESTER. HIS BOY FRIENDS WILL SURELY ASK WHAT KIND OF A RIFLE HIS FATHER SELECTED. FIX IT SO HE CAN PROUDLY ANSWER, "A WINCHESTER, OF COURSE!" EVERY MAN AND BOY KNOWS THAT THE WINCHESTER IS THE BEST—THE MOST ACCURATE AND RELIABLE.



A FATHER SHOULD WELCOME THE CHANCE TO BECOME HIS BOY'S "PAL" BY TEACHING HIM HOW TO SHOOT. IT MAY BE VERY VALUABLE KNOWLEDGE SOME DAY.

ASK YOUR DEALER TO SHOW YOU THE COMPLETE LINE OF WINCHESTER .22 CALIBER RIFLES, REPEATERS, SINGLE SHOT AND AUTOMATIC.

All Styles and prices to suit all tastes and pocket books.

Winchester Repeating Arms Co.,

Demonstrating a Strong Primer Point

When you want to squirt water from a hose with force and velocity, you select a nozzle having a small hole of just the right size. From a large outlet water would flow out aimlessly.

The primer flash in a shotgun shell is a stream of white-hot gas. In Remington UMC primers, the flash passage is just the right size to shoot the flame clear through the powder charge. Ignition is instantaneous, for all the powder grains start burning at once—one of the secrets of the speed and snap in all Remington UMC shot shell loads.

HELP WIN THE WAR.

Through the press, through proclamations, through letters to individuals, in every posible manner the Government of this country has recently emphasized the need of food production this season. It is no longer a matter to be decided upon by any individual farmer, not a question of dollars and cents; the situation resolves itself into a problem of patriotism and humanity. The world is short of food. Statisticians have delved into the world's granaries and found them nearly empty. We have used up the reserve supply; in this season's crop lies our only hope to avoid more or less hunger during the next twelve months. And so the men in authority in this country, the men whose business it is to keep abreast of all agrarian affairs, urge us to plant heavily.

The United States is at war, at war with one of the mightiest powers on the face of the earth. We have no trained troops, no means with which to enter into active hostilities at once; the greatest thing we can do during the next six months, besides training and equipping an army, is to raise food, both for ourselves and for the Allies. The food shortage is not confined to this country alone. It is more serious than that. It is a world shortage. That means that our allies will also be in need of food, and that the greatest way in which we can help them is to feed them.

Owing to an adverse winter for the wheat in the Middle Western states there has been much winter wheat killing. The government crop report gives the condition at 63 per cent normal. Mobilize all your resources for the country's good. It is more than a matter of personal gain, it is your way to help win the war.

THE INTEREST manifested by both horsemen and vsitors in the races at Dixon last Saturday was very gratifying to every one. It is unmistakable evidence that this season will witness a revival in harness racing in California; that there will be banner crowds at every meeting and old-fashioned horse racing to keep this interest up to the present high pitch.

ARIZONA STATE FAIR PROGRESS.

In all America, no fair association is making more rapid progress than the Arizona State Fair at Phoenix. The officials and directors are alive to the needs and possibilities of a great state fair, and what started as a small untalked-of institution has now attained heights which are attracting the attention of fair managers everywhere. This year's fair offers, in addition to their general display of the progress of the Southwest, one of the most attractive programs for race horses which will be offered this season, and their live stock program also is greatly improved over former years. The live stock of California, New Mexico and Arizona which will be exhibited there this year will serve as an eye-opener and astonisher to the thousands who attend.

A novel plan of financing the fair has been adopted by the Arizona Legislature at the suggestion of Secretary T. D. Shaughnessy. In lieu of $20,000 per year and the receipts of the fair from all sources, the appropriation for the ensuing two years as fixed by the State Legislature, provides: $25,000 and an amount equal to the total receipts of the last State Fair, from all sources other than State. By this arrangement the receipts of the current fair are not available for immediate use, but are deposited with the State Treasurer. This plan will be watched by fair managers generally with considerable interest.

The total appropriation for the fair is made available at the beginning of the fiscal year, July 1, thus placing the fair on a cash basis, and puts the fair management on their metal to increase the receipts from every available source, as the receipts of the current year are deposited with the State Treasurer and become part of the appropriation for maintenance for the succeeding year.

Under this plan the appropriation for this year will be $75,000, which is ample for the present needs. In addition to this Mr. Shaughnessy secured an appropriation of $30,000 for the construction of a new Mineral Exhibit Building of fireproof, concrete construction.

A plan is under way at this time to get the large producing mines of the State to contribute a like amount for the construction of a miniature mine underneath the proposed building. While only thirty feet deep, the mine will be complete with double and single compartment shaft, hoists, timbering, tunnels, drifts, stopes, equipped with modern mining appliances. Since Arizona produces practically every known metal of value, which will be displayed advantageously ,this will prove the most interesting addition to Arizona's modern fair plant.

Dr. Winslow Anderson Is Dead.

Dr. Winslow Anderson, one of the organizers of the College of Physicians and Surgeons and for many years a prominent San Francisco practitioner, died Monday in New York, at the age of 57 years.

Dr. Anderson was graduated from the medical department of the University of California in 1884, and a few years later took degrees from the Royal College of Surgeons and the Royal College of Physicians, London. He returned to San Francisco in 1892. Dr. Anderson was surgeon-general of the National Guard of California from 1907 to 1911, and was editor of the Pacific Medical Journal.

Dr. Anderson was one of the prominent horse enthusiasts and breeders of California. He was married March 24 of this year to Miss Ethel B. Davie, also prominent in California horse shows, and they were in the East on a wedding trip when Dr. Anderson's death occurred. Besides his wife he is survived by his mother and a brother.

New Award For Blackhawk Farm.

Easton & Ward, proprietors of Blackhawk Stock Farm of which E. Lovell is the manager, have just been notified that they were granted the Panama-Pacific International Exposition special award for the finest display of Shire horses exhibited during the exposition. This reward has just been made by the Jury of Awards.

Lovell is busy establishing the Blackhawk Ranch stock at the new headquarters, near Diablo, Contra Costa county.

The Blackhawk Shires will be exhibited at the Butte County Spring Festival at Chico, May 21 to 25, inclusive . Blackhawk Chessie, the grand champion mare at the last State Fair, will be exhibited with her foal, born recently.

THE ARMY'S REQUIREMENTS IN HORSES AND MULES.

[By Wayne Dinsmore.]

The passage of the Selective Draft measure by Congress makes certain the immediate preparation and equipment of an army of at least a million men in 1917. All preparations are being made for a war that will last three years, for regardless of what civilians may think, army officials do not expect an early ending to the war into which the United States has been drawn.

The requirements of cavalry, infantry and artillery regiments in horses and mules are set forth in a letter just received by the writer from the War Department, Washington, D. C., to be as follows:

Cavalry Regiment	Infantry Regiment	Artillery Regiment
1541 horses	69 riding horses	1097 hurses
152 draft mules	112 draft mules	88 draft mules
29 pack mules	25 pack mules	4 riding mules
6 riding mules	6 riding mules	

These are minimum requirements, and do not take into account transportation trains required to forward supplies from terminal points to field bases. In other words, the number of animals specified above refer only to those actually needed with the troops.

The war strength of a regiment of infantry is approximately 1500 men; of a regiment of cavalry approximately 1300 men; of a regiment of artillery consisting of six batteries of four guns each, approximately 1146 men. While definite information as to the proportion of infantry, cavalry, and artillery to be included in the new army is not yet forthcoming, it is generally understood among army officials that an artillery battery of four guns will be allowed for each 1000 infantry. It seems probable, therefore, that the first one million men placed under arms by the United States will be composed of 500 regiments of infantry totaling 750,000 men, 125 regiments of artillery totaling 143,250 men, and 100 regiments of cavalry totaling 130,000 men, making a grand total of a little over 1,000,000 men. The proportion of artillery certainly will not be less, and may be more, as actual warfare on European battlefields has demonstrated that overwhelming superiority in the artillery branch of the service is essential to efficient operation by the infantry.

It may be argued that there is no probability that the United States will prepare 100 regiments of cavalry, but in view of the danger from the Mexican situation, it appears to be the belief of well informed army officers that at least that many cavalry regiments will be provided for in this year's mobilization.

To equip 500 regiments of infantry will re quire 34,500 riding horses, 56,000 draft mules, 12,500 pack mules, and 3,000 riding mules. 125 regiments of artillery will require 137,025 horses, 10,000 draft mules, and 500 riding mules. The equipment of 100 regiments of cavalry will necessitate 154,100 horses, 15,200 draft mules, 2,900 pack mules, and 600 riding mules. The total number therefore required for the equipment of 500 regiments of infantry, 125 of artillery, and 100 of cavalry, will amount to 325,625 horses and 100,700 mules.

The Army has at present only 70,000 head of horses and mules. This means that approximately 350,000 head of horses and mules must be bought within the next six months. No information has yet been received from the army authorities in regard to how the purchase of these horses and mules will be made. In the judgment of experienced horsemen, however, the purchase of so large a number of horses and mules within the limited time available can best be accomplished by setting a definite price to be paid by the army for the different animals that will pass inspection for their respective classes, and by establishing ten or fifteen inspection points where horses and mules may be tendered for inspection. This will permit dealers, large or small, or even farmers to consign their horses directly to inspection points with definite information in regard to what they will obtain for them if they pass inspection. There seems to be no good reason why the producers of horses should not be permitted to sell them directly to the Government, if they pass inspection, instead of being obliged to sell them through some intervening contractor. It is earnestly to be hoped that the army officials will decide on some general plan.

It must not be forgotten that the allied nations are still in the market, and will continue to be. Their need for horses and mules is as great as for guns and ammunition; indeed, even more so, because they can manufacture the guns and ammunition in their own countries, but their resources in horses and mules have already been exhausted, and the United States is the only source from which they can obtain additional supplies. 853,116 head of horses and 289,062 head of mules have been exported, practically all of them for war purposes, during the 30 months ending March 1, 1917. In spite of the shortage of ships, 40,000 head of horses and mules were shipped in January, 1917, and more than 27,000 head in February ,1917.

Recent accounts from the battlefront relating the loss of hundreds of pieces of artillery by the Germans in recent operations state that the loss of these pieces was due principally to the lack of artillery horses.

It is fortunate that the United States is well supplied with both horses and mules at the present time, but it is incumbent upon us, if we are to maintain our resources so as to effectually back up our armies and maintain maximum production on our farms, to see that every good mare is bred to a first class stallion this season, and that every effort is made to save the foals that will be coming within the next six weeks. The war may yet be decided by the number of horses available to the respective belligerents, for on the far-flung battle lines and in the reserve made up of our farm forces, the horse is the most important single factor aside from man.

Harness Horses and Horsemen

DIXON'S MAY DAY PICNIC.—RACES ATTRACT RECORD CROWDS.

That California's love for good horses and high-class racing has not diminished in any way during the last few years was brilliantly demonstrated at Dixon's annual May Day picnic Saturday, May 5, when fully 5,000 interested persons crowded the small grand stand, the bleachers, and rail about the home stretch to see the three races scheduled contested. It was the formal ushering-in of California's 1917 racing and horsemen and fair officials present declared it meant banner crowds throughout the year. Interest in the horses was intense at all times and the crowd stayed until the last heat of the free-for-all, which was not contested until after five o'clock in the afternoon.

Even the weather man helped to make the initial race program of 1917 a brilliant success; a more ideal day to start the ball a-rolling could not have prevailed. The horsemen were determined to make good the "hot stove" arguments and predictions they have been making several months, the crowds were in fine humor ,the horses on their toes, and—well, the track could have been a lot better. The races were half mile heats, three in five, and the matinee purses were $100 in each instance. There have been stakes for $1,000 which did not bring out such quality in entries and such regular gee-whiz racing. It was old-time racing; the horsemen who were entered did not care for the purse. They were there for the sport and the glory and every heat was for blood. If these races are to be taken as an example of what is to be seen in California this year there will be sensations a-plenty and records will be smashed to smithereens.

The appearance of and winning by the noted Teddy Bear, perhaps the hero of more battles than any horse racing on the Coast at this time, was the feature of the day and every time he scored he received great applause. He was masterly driven by Lon Daniels.

The first race for 2:20 pacers brought out four entries and was full of interest at all times. They got the word after a few scores with Directress Mc, getting a beautiful teaming by Al Swartz taking the lead at the first turn and setting a pace which she maintained in all three heats. On the back stretch in first heat Wm. Ivey, driving Donald, was beautifully spilled in the center of the bunch and the spectators held their breath while the pacers went by him. Donald, of course, was left in the rear but paced the heat without a bobble and was caught by ring marshal Parker in front of the grand stand in a manner that would make the latest movie thriller sick in comparison. The accident was unavoidable and as the horse showed lame, at Ivey's request he was withdrawn from the second heat.

Walker, driving Alton S., made a clean fight in every heat and this good looking pacer was right after Swartz at all times. Summary:

First race—2:20 pace:

Directress Mc	(Schwartz)	1	1	1
Alton S.	(Walker)	2	2	2
Gertie D.	(Smith)	3	3	3
Donald	(Ivey)	4	dr	

Time—1:07, 1:04½, 1:04¼.

The second race might have been styled "Montgomery's Special," as this well known driver lost no time in demonstrating he and Hal Logan were there to win every heat and to demonstrate their ability. Hal was the favorite with the crowd and won three straight heats in this race in beautiful fashion. It was nip and tuck, however, at all times and there were five other horses of great class entered who saw to it that Montgomery and Hal would have to give the crowds the best there was in them. Ivey handled his pacer, Billy Bounce, well and in the first heat was at Montgomery's heels when they went under the wire. The good pacing of Dorothy M., driven by Greame in every heat was taken by some horsemen present as an indication that she will be one of the good pacers in the California circuit this year. She was alive to her possibilities, too, as were J. C. Simpson, Glenwood Mc and Lady Silverthorn, and it was well that Hal Logan was primed as he was.

Second race—2:20 pace:

Hal Logan	(Montgomery)	1	1	1
Dorothy M.	(Greame)	3	3	2
Billy Bounce	(Ivey)	2	4	4
J. C. Simpson	(Machado)	5	2	5
Glenwood Mc	(Ryan)	6	5	3
Lady Silverthorn	(Daniels)	4	6	6

Time—1:05½, 1:04¼, 1:05.

While the first two races were full of interest, the free-for-all pace was of extreme brilliancy and was full of keen sensations at all times. Teddy Bear, Vera Hal, Bold Harry Aerolite and Lock Logan were the starters and four more popular pacers have not scored in California for many days. Every one was strong for Teddy Bear; but after his losing the first heat to the attractive Vera, some of his friends began to take water and fear that the champion had lost some of his pep; however, he demonstrated in the second and third heats that he was in condition and would be right clear down the circuit. Vera Hal and Bold Harry found many favorites in the rail birds and the race seemed to be anybody's for the first two or three heats. Lock Logan, one of the best looking pacers on the Coast and whose way of going is about as handsome as any horse ever gets, has been making wonderfully fast miles at the Woodland track and this, his friends say, will be his best year. He is going sound, is game and primed to win. However, he didn't like the Dixon track and was on edge; breaking at the turns and scoring bad. He finished in fourth position in the first four heats, when Montgomery withdrew him. Despite his bad manners here he was a popular entry with the horsemen and when they get to the good mile tracks he will make the fur fly. Bold Harry made more friends the longer he worked and the fifth heat was to untie him and Vera Hal for second place, Vera winning by a slight margin. The summary:

Free-for-all pace:

Teddy Bear	(Daniels)	2	1	1	2	3
Vera Hal	(Cohen)	1	2	3	3	1
Bold Harry Aerolite	(Machado)	3	3	2	1	2

Time—1:02½, 1:01½, 1:03½, 1:03, 1:04.

Notes of Dixon Picnic.

Joseph Waddell, secretary of the California Fair and Racing Association, was starter. Dell Dudley, prominent horse breeder and rancher of Dixon, was clerk; Mr. Sutherland, Chas. Silva and Walter Tryon were timers and Jos. Stadtfeldt, Sam Hoy and J. W. Marshall, judges. Harry McFadyn of Dixon, one of the most enthusiastic fair and racing men in the state and a prominent rancher, was in charge of the racing program.

* * *

One of the most interesting parties at the picnic were members of the San Francisco Driving Club, who motored down; spending the day and having a rip-roaring good time. Members who were in the party were: Pres. A. Ottinger, Secretary Wm. Kenney, past president Geo. Giannini, whose good horse Bold Harry Aerolite was one of the feature entries of the day; Luke Marisch, Jas. Ryan, Ed. Ayres, Wm. Higginbottom, Chas. Becker and J. Ginnochio. All are prominent sportsmen and the owners of some of the best horses in the state. They are arranging to give the best season of matinees San Francisco has had in many years.

* * *

Joe Ryan, of Sonoma, raced his Gill Russel against an automobile in three two-hundred-yard dashes. The car won in all "heats."

* * *

L. L. Cannon, of Santa Rosa ,was an interested visitor.

* * *

It was picnic day for such fellows as Chas. Silva, Walter Tryon, W. S. Harkey and others, who were satisfied by being mere "rail birds" and letting the other fellow do the work.

* * *

Dr. E. J. Weldon, of Sacramento, was boosting the Galt picnic, which takes place May 19. He secured the entries of the majority of the horsemen present and from every indication Galt's races will equal those at Dixon last week.

HERE AND THERE, WITH C. A. HARRISON.

Observations at Tacoma, Washington.

Every once in a while I pay a visit to Tacoma, and when I do I look up the harness horse fans. On my last visit I called up Al. J. Boyle, superintendent of transportation of the St. Paul & Tacoma Lumber Co. Mr. Boyle said: "Just wait there; I will be over soon with a horse and buggy." In a few minutes he drove up to the hotel door behind the nice bay pacer, Uncle H. 2:14¼, hooked to a natty Bailey buggy; we were off for a ride, and believe me, I was happy not only in the association of my friend of twenty-five years, but also, because I was being entertained behind a good horse, and every person on the streets and in Wright Park turned around to look at us. Had we been riding in a Pierce-Arrow they would not have noticed us, except possibly a traffic copper. To me no vehicle or conveyance is so beautiful as a well equipped buggy drawn by a first class roadster, and I assure you Albert J. Boyle, of Tacoma, one of the nicest and best looking, best hearted men who ever left Ireland, knows how to hook and drive a good horse. He has an even twenty head of choicely bred and fast stepping standard and registered horses. Mr. Boyle has them of many fashionable families, such as Zombro, McKinney, Barongale, Almaden D., Zolock, Alcone, Jay Bird, Bon Voyage, and many others.

Geo. Stevenson has a two-year-old beautiful gray filly sired by Mr. Boyle's stallion, Burion, dam by Norther 2:13, by Onward; 2d dam Lucy Altamont by Altamont 2:26; 3d dam Lucy Goldust by Dorsey's Goldust.

Joe Meyers has the good looking and fast pacer, Duke, by Garvin Wilkes. Duke is a full brother to Uncle H. 2:14¼ and is a really fast pacer.

J. Whittenson has a grand bay pacing mare by Garvin Wilkes; dam by William C., son of William L.

Jas. McCormack has Admiral 2:14¼, by Garvin Wilkes.

Charles Cook ,the Tacoma trainer, is at the Olympia half mile track with a nice lot of horses. ... that is particularly attractive is Ed Bonnell's ... mare, by Hal B. 2:04; dam by Electioneer. Mr. ... nell is not only one of Tacoma's wealthiest and ... influential citizens, but is a genuine harness h... fan; loves them, and enjoys them.

I could name twenty good horses owned by Tac... men. The talk of building a half mile track ... fair grounds, at Tacoma, is very strong. Tacom... a very prosperous city and at no point in the No... Pacific country would a track and well equipped ... grounds be more welcome and successful.

Tacoma is properly situated for the holding o... successful fair and race meeting, and I believ... track will be built during the coming summer, ... such men as Ed Bonnell, Ed Brady, Al. J. Boyle, ... McCormack and other successful men are strong ... the proposition. No man on earth will be m... pleased than myself if the good standard-bred ho... fans of Tacoma get busy and build a race track.

A Pendleton Visit.

It had been 16 years since I last visited Pendle... when I dropped in this week. On my last visi... visited Frank Frazier; this time I enjoyed the sa... privilege. I was surprised, but pleased, to find ... as hale and hearty as in the days when he raced C... halis 2:04¼ and he enjoys life just as much as ... the old days. While Mr. Frazier is amply able ... own several of the best motor cars on the market, ... has refused ,so far, to pass up King Horse. ... Frazier declares his love for good horses will ... permit of his keeping an automobile.

The Frazier place is just one mile from Pendle... and I have never had the pleasure of visiting a m... beautiful, perfectly appointed or better equip... country place and home ,and the hospitality of ... Fraziers is above par.

A large picture of Chehalis has the place of ho... in the attractive Frazier collection of artistic ... expensive paintings. Mr. and Mrs. Frazier use t... fast pacing mares for their personal use; both ma... being daughters of Umahalis, the beautiful daugh... of Chehalis that Frank raised and raced so succe... fully. All the farm horses used by Mr. Frazier ... this magnificent big estate are Standard-breds ... are sired by such noted horses as McKinney, We... field, Bonnie Mack, etc., and all from similarly b... mothers. Mr. Frazier declares these horses are ga... and pleasant workers and can put cold blooded hor... and chunks in the scrap heap when it comes to ha... work and long hours, and no one is better inform... than Frank Frazier. I failed to find any other hor... men here, but enjoyed my visit with Chehalis. Fra... Frazier is now a wheat baron and always ... ALL WAYS one of the best fellows that ever lived.

At Eugene, Oregon.

Arriving at Eugene, I found quite a bit of "ho... interest," and the fair board meets this week ... arrange for a big fair and racing program. Here ... found the great horse, Razzle Patch 53039, by D... Patch, dam Daisy D. Dickson 2:27¼, dam of Min... haha Patch and a score of other good ones. S... is by Razzle Dazzle by Strathway, by Strathmo... sire of 89 and dams of Citation 2:01¾, etc. This ... one of the nicest pacers I have seen for some tin... He is owned by Robert Smith and is being trained ... D. A. V. West, a nephew of the late George We... of Tommy Britton 2:06 and Directly 2:03¼ fame.

That well known attorney and sportsman, Walt... B. Jones, is secretary of the fair and is one of t... most capable officials in the country. The track ... a dandy for a half mile course and is kept in to... notch order at all times. Eugene is one of t... wealthiest towns in Oregon; is a live spot with va... agricultural and live stock resources adjacent, a... will have a splendid live stock fair in years to con... as well as a good race meeting. They always attra... the best stables racing here, because of their reput... tion for giving liberal programs and square trea... ment to the horsemen.

The Need to Breed.

The Uhlans, the Chasseurs, the Dragoons on t... West; the Cossacks and steeds of the desert in t... East, are all hurrying and scurrying for victor... Uncle Sam must horse more than a hundred thousa... cavalrymen and the horse has come into his ow... again. The best experts of all nations concede t... American trotter and his grades pre-eminence f... actual war. He has substance, endurance, spee... courage and tractability.

In 1863 the stout trotter I was plowing corn wi... to a double shovel was unhitched and went to war ... $240. Thousands like him carried Sheridan, Wilso... Custer, Kilpatrick, Pleasanton and their troopers ... victory. General Bryant, who bravely rode an... fought astride splendid American trotters, proclaime... many a time and oft that they put down the rebe... lion. Without them we would have been impoten... Now we must have them to defend against invasio... by the treacherous greasers on the South or dodgin... by the bi gguns on long coast lines of vandals ... burn, outrage and destroy . For lack of efficient ca... alry our Capitol at Washington was burned in sig... of thousands of helpless militia infantry. The ca... alry horse is indispensable to effective defensiv... preparedness and it is our patriotic duty as Ame... icans to breed the American trotter in sufficien... numbers so that we will not again be impotent ... the face of an enemy as we were before the Britis... in 1812.—[M. T. Grattan in Trotter and Pacer.

Thoroughbred Matters

xington Notes.

Lexington, April 28.

The Kentucky spring racing was inaugurated at e Lexington track today under conditions that re anything but ideal for an opening. The weather oke threateningly and before the day was a few urs old it began to rain and continued at intervals during the afternoon. The track was in real good ape for the opening event, but after that it was ddy.

The inclement weather had no effect on the attendce, however, and the largest crowd that ever went rough the gates was on hand when the bugle unded for the first race . Just before the race and en the bugle sounded a big American flag was n up on a flagpole in the infield, while the band ayed "The Star Spangled Banner."

The rain ruined what appeared to be an excellent rd and the Derby trial at a mile and a sixteenth, which Omar Khayyam was carded to start. He s withdrawn, as he was not partial to the muddy ing. Ticket, from the stable of Andrew Miller, oved an easy winner. Ticket lay close to Opportnity, the early pacemaker to the far turn, and then cing into the lead easily held his field safe, to win a couple of lengths. His race was very impressive d he more than has a good chance to land the erby.

Harry Kelly was another Derby candidate to start, t second to Embroidery was the best he could do. arry Kelly had all of his early speed and soon ened up a good lead, but when the mare Embroidy challenged he flattened out badly.

Westy Hogan experienced a tough time in landing e opening event from a good field, but he came in llant style and got up in the last jump.

There was a big delegation from Louisville this orning to witness the opening. John Hachmeister d Harvey Meyers of the Latonia Jockey Club were so on hand.

Johnny Loftus made a special trip from Louisville Lexington to ride Ticket.

Jockeys Murphy and Morys were suspended for ree days by the starter.

✤ ✤ ✤

avre de Grace Notes.

Havre de Grace, April 29.

Bub May arrived today at Pimlico in charge of a rge string of horses. There were fourteen in all, e property of J. C. Greener, Swartz Brothers, and me to race in the colors of the astute Kentuckian imself.

W. A. Burtchell has purchased at private terms om H. P. Whitney the two-year-old Sincerity for . T. Zollicoffer.

In view of the overflow of horses in Maryland is spring Manager Burke of the Havre de Grace rack has decided to keep his course open until after he close of the local season.

The new selling rule has no prohibition against he starting of two horses in the same interest, and . M. Zimmer sent both Preston Lynn and Kilts to he post in the fourth race. The prohibition against stable starting two in a selling race was one that as framed by W. S. Vosburgh in 1892 to eliminate anipulation of selling races at Monmouth Park. he rule was one of The Jockey Club until the reent revision of the rules in which there were several hanges made in the selling race conditions. In this evision no prohibition is made against the starting f two or more horses from the same stable.

Fred Williams today received a cablegram from .D. Cohn offering him a contract to ride steeplehase for him in Chantilly from May 7 to July 15. Williams is under contract to ride for Edward B. McLean and had to refuse the French offer. A like offer was made Vincent Powers, but he, too, had to decline.

Dorcris had only been one turn of the field previous o his winning effort in the steeplechase, and his performance, when that is taken into consideration, was a remarkable one.

✤ ✤ ✤

Montreal, April 24.—That owners of race horses will be asked not to give their support to or race over any tracks in Canada where anything but the pari-mutuel system of betting is used, and not to race over half mile tracks in Canada where the minimum purse is less than $400, was the result of the initial meeting of the committee of the Canadian Branch of the Thoroughbred Horse Association, held at the Windsor Hotel. The resolution regarding the minimum purse of $400, and the usage of the pari-mutuel system of betting, was passed in the best interests of the sport in Canada. In the opinion of the members of the committee this is a step in the direction of stamping out the syndicate ring in Ontario as it has been in the Province of Quebec, through the heavy and extra tax placed by the government on books and bookmakers.

✤ ✤ ✤

The five-year-old brown gelding, Conning Tower, by Yankee—Okitau ,died at the Kentucky Association course this week, as the result of fever contracted en route from Tijuana . This horse was owned by Mrs. Carroll Shilling.

NUMEROUS PARTNERSHIPS REGISTERED.

New York, April 25—Numerous partnerships in the more fashionable stables of race horses have been registered with the Jockey Club of late. Early in the season August Belmont registered Mrs. August Belmont as a partner in many of his horses, and his son Raymond in others. Following this registration came that of Schuyler L. Parsons, who gave his son an interest in all his horses. In this month's Racing Calendar R. T. Wilson has turned over an interest in all his horses in training and otherwise, to his wife, Mrs. Marion S. Wilson. In the band are eighty-two head ,twenty-three of which are being trained for this year's campaign, thirty-two broodmares and stallions and twenty-seven colts and fillies of 1916 and 1917.

To have the wives and families of such horsemen and sportsmen interested in turf affairs, is commendable and reflects the ideas of perpetuation of thoroughbred interest in the leading families of the American turf world. Already several leaders of society are represented in turf circles, notably Mrs. Payne Whitney, who owns the Greentree Stable.

Mrs. Whitney is an enthusiastic sportswoman, devoting much of her time and money to turf affairs. "A most adorable woman" is the term used by horsemen, from the highest to the lowly rubber, when referring to Mrs. Payne Whitney. She rarely misses a day's racing, and thoroughly enjoys the outdoor sport and exercise.

It is unquestionably gratifying to Mrs. Whitney and pleasing to the patrons of racing, to see practically all the club members and many others look towards Mrs. Whitney and her party, for she is generally well surrounded by her hosts of friends after the victory of one of her horses, all raising their hats in a congratulatory acknowledgment of what her horse has accomplished . She no doubt considers it sufficient remuneration, judging from her always-pleasing smile of recognition.

Now that other women of the exclusive set are owners or part owners of horses, more acknowledgments will be in order. Both Mrs. Belmont and Mrs. Wilson will be tendered congratulations when their horses are victorious. Sympathies too, can be expressed when they are defeated. It is good for the turf to have such women as Mrs. Belmont, Mrs. Whitney, Mrs. Wilson and others as owners or part owners of horses.

Another registration of ownership will be greeted with pleasure by the older school of owners. It is the return to racing of Francis C. Bishop, who at one time was associated with Andrew Miller in the Newcastle Stable. Mr. Bishop never lost interest in turf affairs, but it is only recently that his name appeared in the Racing Calendar as part owner in the two-year-old Nepperhan, along with Gifford A. Cochran. The horse will run in the name of Mr. Cochran, but it may eventually bring about a further interest in racing for Mr. Bishop, who always was and will be a welcome addition to the ranks of owners.

J. S. Cosden has joined hands with Ral Parr, a half interest having been taken in all Mr. Parr's horses. There are nineteen in the stable. Mr. Cosden came into prominence last year when he purchased the English horse Crimper, by Maintenon—Frizzette, through Mr. Parr's suggestion and influence. Since that time there has been a closer turf affiliation between Mr. Cosden and Mr. Parr, judging from their recent registration of ownership. Many of the stable are jumpers, but there are also ten two-year-olds and four three-year-olds. Crimper naturally is the star of the collection, and will no doubt be seen in many handicaps this year. All the horses will run in the name and colors of Mr. Parr.

———o———

Montreal, April 25.—The decision of the Canadian Thoroughbred Horsemen's Association to refuse to race on any tracks on this side of the border where purses of less than $400 are offered is likely to meet with stiff opposition from the managements of the local half mile tracks. The owners take exception to being dictated to, and it is likely that a meeting will be held here shortly to go fully into the matter of purses and the demands made by the Canadian Thoroughbred Horsemen's Association. It is felt by the track owners that the introduction of the pari-mutuel system of betting at the half-mile plants is largely an experiment, and that an increase of purses might have disastrous results. The half-mile track owners do not feel that they should be called upon to shoulder all the burdens. They point out that the new provincial tax and the pari-mutuel system is more than enough for them to shoulder without the purses being raised.

The Montreal Driving Club (Delorimier Park) was held up by the horsemen just before the start of their second meeting last year and forced to raise their purses to $400, although a couple of the tracks racing later on in the season were only called upon to provide purses of $350. This action on the part of the horsemen stands against them, and it is likely that there will be a real merry time at a meeting of the owners to be held here shortly.

The demand made by the horsemen's association that all tracks must install the pari-mutuel system of betting if they wish to secure the support of the association is not bothering the track owners, for they had already decided to use the "iron men" this season.

Shortage of Oats Menace to Racing.

London, April 24.—Since the outbreak of war horse racing has been continued in England, the supporters o fthe turf maintaining that it was necessary for the preservation of the all-important horse breeding industry, of which they declared racing to be an indisputable branch. Kennedy Jones, director of food economy and founder of the London Daily Mail, who was a well-known racehorse owner before the war, today gave the Associated Press the following statement in answer to the foregoing claim:

"Most people agree that the horse-breeding industry, in which we are pre-eminent, must be maintained. But to insure this it is only necessary to allow oats for broodmares, for horses at breeding farms and for yearlings. These classes are not affected by racing, which is only essential in a year such as this for the twenty or thirty first-class three-year-olds, so that their degree of value as prospective stallions and mares may be decided.

"This would be achieved if the five classic races only or substitutes for the five classic races were run at Newmarket. Thus the 4,000 horses now in training would be cut down at once to about thirty or forty horses and the saving in oats would be, if not large, at all events, of real value in the present circumstances. Broodmares, stallions and yearlings and the thirty or forty horses which might be entered for these five races, ought to be strictly rationed and the other horses should either be turned out to grass or killed.

"In view of the fact that our stock of oats at the present rate of consumption may be completely exhausted by the middle of June, it would appear to me ,even in the interest of horse breeding, that the course I suggest is urgently advisable.

"May I add that I have not raced a horse this year, and that I do not intend to do so."

✤ ✤ ✤

Without horse racing, what would have become of the British thoroughbred any time during the last fifty year, or, in other words, since the anti-gambling, for which read anti-racing, faddists first started in earnest to try and ruin one of the greatest industries of the kingdom? That the horse-breeding industry is fully entitled to be so termed does not admit of question, for every year that passes finds the foreigners spending vast sums in the purchase of thoroughbred mares and stallions, not to mention young stock, half-breds, and horses of other breeds. Had it not been for the race-course test establishing its merit it goes without saying that the demand by the foreigners for British bloodstock would never have arisen, for the simple reason that it would have been, if not altogether non-existent, bred on a very small scale and with nothing beyond looks to vouch for its worth. That looks alone are valueless is shown by the long prices often given in the past for yearlings which turned out to be soft-legged, worthless animals, even though, like all latter-day thoroughbreds, they traced back to Eclipse and his rivals, Herod and Matchem.—[Vigilant, in London Sportsman.

✤ ✤ ✤

Lexington, April 28.—The Kentucky State Racing Commission at its meeting this morning ,elected John B. McLaughlin supervisor of pari-mutuels, the position formerly filled by the late W. H. Laudeman, adopted the amendment to the selling race rules recommended by the Thoroughbred Horse Association, dismissed the charges against William Perkins, refused to reinstate Tom Brown of Newport, and voted $500 as a fee to Attorneys Fred Forcht and John T. Shelby, who appeared for the commission in the suit of the Douglas Park Jockey Club to abrogate the commission's right to fix the amount of purses.

The commission refused licenses to Trainer Tom Hodge and Jockeys Joe Kederis and Charles E. Gross, approved the licenses of all other applicants, with the exception of three, which are being held pending investigation, and adjourned to meet at Louisville in General W. B. Haldeman's office at 10 o'clock on Derby Day.

Vice Chairman T. H. Talbot, in the absence of Chairman J. N. Camden, who is ill, presided. Messrs. W. B. Halderman, Charles F. Grainger and Allie W. Young, other members of the commission, were present and expressed their regrets at the illness of the chairman.

✤ ✤ ✤

The veteran trainer, Matt Allen, was appointed timer for the Jockey Club of New York as successor to the late W. H. Barretto.

✤ ✤ ✤

Arthur Redfern, one of the best known jockeys on the American turf a few years ago, died in a New York hospital from injuries received last Friday in an automobile accident at Coney Island. His wife, who was injured in the accident, is in a serious condition . Arthur Redfern made his first appearance as a jockey at the Emeryville race track; he was under contract to Atkin & Lattridge and speedily developed into a star rider.

✤ ✤ ✤

Mr. W. H. Lucas of Honolulu, T. H., who has been spending some time in San Francisco, has purchased four thoroughbred two and three-year-olds from S. S. Eakle of Williams, Cal . These colts and fillies are a fine lot, sired by Enfield, Montgomery and David Tenny and from producing matrons from the Flambeau and Wildidle families. They will be shipped to the Hawaiian Islands and given preparation for the coming races this season.

SADDLE and SHOW HORSES

The mare recently purchased by Longview Farm from Langhorne Tabb Anderson, of Maysville, Ky., is being gaited. The new owners believe her to be of even better material for a five-gaited animal than for the walk-trot classes.

✤ ✤ ✤

Judge E. A. Bridgford is arranging to take his good stallion Le Grand McDonald to his ranch at Knightsen. Judge Bridgford announces in this issue that he has for immediate sale five splendid young geldings, well broke to three and five gaits and ready to go into immediate service. They are royally bred and will be sold well worth the money. They may be seen at the Bridgford Company's ranch at Knightsen, Contra Costa county, and further information will be furnished on request to Judge E. A. Bridgford, 519 California street, San Francisco.

✤ ✤ ✤

LONGVIEW THROWS "HAT" IN RING.

In a message to the Breeder and Sportsman, Longview Farm, Lee's Summit, Mo., announces they have decided to star My Major Dare again this year. Kentucky's Best, the handsome black stallion, receiving a slight injury which will not permit of his being prepared. "The champion," writes John T. Hook, "never looked better, worked better or was better in his life and besides, we want it strictly understood that 'our hat' is in the ring for this stake for champions which you are getting up. We are for it and will show."

———o———

Langhorne Tabb Anderson, Point-au-View Farms, Maysville, Ky., last week shipped the chestnut gelding, Sport King, to Myron H. Oppenheim, of New York and the bay three-gaited gelding, Dapper Man, to Miss Clara S. Peck, of Brooklyn. Both of them are outstanding show horses and are expected to do as all the Anderson horses have done, go out and continue to spread the fame of Point-au-View Farms. Mr. Anderson has been selling a few using horses and has a few good ones left which he expects to dispose of by June 1, after which time he will give his entire time to his show stable. In speaking of some of them he writes: "I have three in my stable, which have been standing off to themselves in an old log barn six months 'under cover,' and the fellow who beats them will get the change; but he will have a right busy time before he takes their measure, unless I am seeing things through colored glasses."

———o———

C. G. Bridgford, of Kansas City, has sold through the agency of Jas. Buford, of Paris, Mo., the good gelding Brick Fry, to E. D. Davis of Oklahoma City. He was purchased by Mr. Davis for citizens of Oklahoma to be presented to an army officer. Buford recently purchased in Chicago a black five-gaited mare which is an ideal ladies' mare, and unless she is sold by June 1, will show her in his stable this season . In speaking of the celebrated young My Major Dare filly, Katherine Farmer, which is owned by W. W. Crosswhite of Clark, Mo., Buford says: "Katherine Farmer has improved faster than any mare I know and the junior horses had better take a little notice. She can do five gaits as nearly right as any of them and is better looking than ever. That is saying a whole lot. I think she will repeat her baby shows this year by cleaning the platter."

———o———

Horse Show Season Opens.

The Tulsa Horse Show, this month, takes the place of the Commencement Horse Show at Columbia, Mo., in mid-western affairs. The Commencement show, which is the best ever given in Missouri and which has always paid well, was discontinued on account of affairs at the University of Missouri, where it was conducted, being such as to prevent those in charge giving the proper attention and support. At Tulsa, however, all the leading stables will gather and it will bring into competition all the "hot-stove" battles which have prevailed through the winter. It is safe to say that there will be more new material shown at Tulsa this year than has started a show season in more than ten years. The stable of Houchin & Anrecalling to mind, of course, the famed trotting bred "Devil's Deputy" which was awarded a prize as a hackney at one of our leading horse shows. It is as adaptable in its gaits as in its type. Francis M. derson, of Jefferson City, Mo., will show many new stars; Longview Farm, Lee's Summit, Mo., will show the best stable they have ever taken out and it will be headed by magnificent My Major Dare. In writing the Breeder and Sportsman Manager Hook of the saddle horse department says: "When you get the Tulsa awards you will see that we continue as the leading winners."

Jas. Buford, of Paris, Mo., probably will present one of the real surprises of the show, while the stable of that splendid sportsman, D. Schilling of Chicago, will be one of the stellar attractions. In his stable is the gelding, Top-Notch, which Mr. Schilling recently sold to E. J. Lehmann, of The Fair, Chicago's big department store. He is a chestnut and a wonderfully good one, according to experts. He also will show the three-gaited marvel, Garrard Hunt, and in speaking of him this well informed judge says the horse that beats him will be the 1917 Garden champion. He has a trot which is said has seldom been seen and his perfect walk, canter, conformation and manners will make him the idol of the show. Mr. Schilling, one of the most expert amateur drivers of trotters in the country, has been driving Garrard to a cart and it is said he has given him this gait in incomparable quality. He also will be represented with the Rasmussen jumpers and hunters, and Rasmussen will exhibit some of Schilling's three-gaited horses.

The judges will be Ralph Hamilton, of Keota, Iowa, saddle horses; and Geo. A. Heyl, of Washington, Ill., harness evnets.

———o———

WHAT IS A SADDLE HORSE?

[By John McE. Bowman, in The Spur.]

Note.—Mr. Bowman is widely known as an exceedingly well informed man on the subject of saddle horses and so he has judged at the National and other leading exhibitions of this country and Canada. He is now breeding, on a limited scale, for his personal use, saddle horses which, whether accepted as standard type or not, will at all events illustrate the kind of horse he himself favors for general utility. Mr. Bowman, who, by the way, is president of the Hotel Biltmore, the largest and best hotel in New York, is a big factor in amateur hunt clubs, racing, and horse shows. As a judge his success is possibly unparalleled and he has made himself widely loved by youthful exhibitors by presenting three cups instead of one, just so three happy "kids" shall leave the ring. He is owner of the noted prize winning saddle horses, Beeswing, Sundance and others.

When one is choosing a saddle horse the qualification which must be insisted upon is the ability to "give one a ride." If this capacity be not in evidence the animal should be passed along as unsuited to rank as a saddle horse. Where it has the desired conformation to "give one a ride," other matters of carriage, action and quality may be considered. Thus, at the very start, it is made clear that it is the horse that is looked for without any consideration of, or leaning to, a particular type.

At the present time, not taking into consideration the multitudinous "crosses," there are three distinct varieties constantly appearing before the judges at horse shows. These are the thoroughbred, the standard bred trotter and the Registered Saddle Horse. And as we have no accepted type of saddle horse such as is found in England, France, Germany, Belgium and Holland, it is naturally often difficult to arrive at a conclusion that pleases every one who is especially interested in the matter.

For some reason or other, not very clearly demonstrated ,the thoroughbred has been branded by some people as too pronounced and unreliable; but in my opinion this all depends upon how much the individual thoroughbred stock for the past generation or two has been raced and also how it was handled during the training period. If not raced too much, and intelligently as well as humanely handled—as is the case in several American establishments—I do not think there is any reasonable ground for discrimination in strictly blood lines.

Nevertheless, except when carefully selected, the thoroughbred—as a thoroughbred—is seldom entirely satisfactory under saddle . In certain cases the action is not desirable, the neck is sometimes too rigid and does not flex into good form. With these trifling defects, however, it has a certain quality, as "the dominant blood," which is difficult to explain in words. It also has the ability to transmit its quality. In other words, the thoroughbred blood improves any cross into which it is infused. These minor defects, without exception, can be, and at several establishments are, eradicated by scientific equine physical culture that is commenced on the three-year-old youngsters and which actually "makes" the ultimate mature horse. It may be remarked in passing that the thoroughbred saddle horse is steadily increasing in popularity in all sections where there is hunting and polo or where the country clubs are affiliated with a drag hunt club. This fact is shown by the entries in the saddle classes at such horse shows as are held in those sections.

An American product is the standardbred trotting horse, so far as its ability to travel marvelously fast at the trot is concerned. It is also famed as the most versatile division of the horse world. I mean by this that by careful selection as to the type of sire and dam one can produce almost any given conformation, even that of the hackney—a statement Ware once stated that the best snaffle hunter he ever rode was a trotter by Smuggler 2:15½ out of Ella Ellwood (2:29 to a road wagon and a world's record at that time). This animal could gallop and ju but could not trot or pace; it was up to two hund and fifty pounds, and was sold for sixteen hund dollars. Possibly the greatest drawback to a trot forming an acceptable saddle horse is that so m lack a good neck. When standing at rest this t has a trick of stretching the neck out almost h zontal to the body in a semi-somnolent way, there is entirely lacking the alert, notice-taking that distinguishes the blood horse. It also lacks exquisite finish of the thoroughbred ,excepting isolated cases where, to some extent, it has b acquired. This is the more surprising when remembers that the standardbred trotter is a trott thoroughbred tracing from the foundation stock imported Messenger which sired the great Abdall the sire of the great Hambletonian, whose dam a mare by imported Bellfounder.

What is known as "the Registered Saddle Ho of Kentucky" is widely famed and is claimed to h sprung mainly from an original thoroughbred sour Some years ago Colonel I. B. Nall, the secretary the American Saddle Horse Breeders' Associati compiled the blood line averages of one thousa horses entered in The Saddle Horse Stud Book. records showed three of clear thoroughbred blo fifty with fifty per cent, two hundred and ninety- with twenty-five per cent, three hundred and for three with twelve and one-half per cent, one hund and fifty-two with six and one-half per cent, thirty- with three per cent and the remainder unknov This is roundly 45-50 per cent of thoroughbred blo in the gross. Colonel Nall also said: "We find tod a trotting cross in the pedigrees of many fashional bred saddle horses. Sometimes it is well; sometim it produces a coarseness altogether unsuitable to purposes, as a saddler for the show ring must abo all things be handsome and stylish. Breeders ha found out where these experiments have proved d appointing and now get away from them." Th this type of horse has been partially supplanted others is due to several things. Perhaps the m important is that the "gaited" horse needs an exp to ride it and retain it in perfect condition. It is marvelously attractive product when seen in t show ring, but, if ridden by one of the many pa or bridle path habitues, it would deteriorate in val about seventy-five per cent within a month, whe the walk, trot and canter horse of the same quali would not suffer to anything approaching the sa extent.

In the South and some parts of the West even n many of the conditions of the past obtain as regar distances, roads and the lack of intercommunicati other than on horseback or on foot. These conditio explain in a measure the intense conservatism many people in upholding the American saddle hor with its clean-cut schooling, easy motion, varied ga and wonderful carriage. The fact remains, howev that in most metropolitan gatherings there will found only a very limited percentage of the on typical Southern horse and this, I think, is large because the three-gaited horse with its walk, tr and canter, is much easier to learn to ride.

It is plain that the American saddle horse is st in a state of evolution; it has passed from the ma nificent Kentucky and Virginia horses of the ve early days to the hardy little animals of French i portation, which came down from Canada. The developed pacers were bred to thoroughbred st lions and thus was produced a number of our fou dation saddle horses. On through the era of the i ported Hedgeford, sire of the great Denmark in 183 and from that time by careful selection, rose the wo derful "gaited horse" which antedates the railroa in the South.

Quite naturally the Civil War arrested the deve opment of the American saddle horse. After peac was declared the Southern breeders were excusabl dispirited and inert for a long time; then the newl introduced standardbred trotting stock was boome as never a type was boomed before or since. Man extremely good saddle mares were bred to trotter thus producing some very fast horses, but, in th opinion of many capable judges ,seriously undermi ing the most wonderful breed of saddle horses th world has ever seen. For then was first precipitate the host of nondescripts from which, to a certai extent, we are still suffering so far as a decided an recognized clarity of type is concerned. The buyin public was totally ignorant of what a saddle hors should be, the dealer was not particularly intereste so long as sales were consummated and every ma claimed the "right to his own opinion."

While few long journeys today are made unde saddle there is a great deal of road, bridle path an park riding. As some of the distances covered dur ing the day are much greater than would be sup posed, it is not astonishing to find that the deman for horses suitable for such work is swinging alon these lines. What is needed is a "blood" horse—no necessarily a clean thoroughbred, remember—whic shall have good shoulders, bone and substance; i shall be well balanced ,carrying a good head an tail, and shall have three good paces, the walk, tro and canter. It shall be high couraged, yet temperate well broken and well schooled.

All the quibbling in the world will not change the demand. It is idle to engage in a wordy war o types. The only thing to do is to educate the public by demonstrations of the best specimens at horse shows in every section of the country, remembering always that the first imperative qualification for a saddle horse is that it shall "give one a ride."

Notes and News

Santa Maria will give $500 purses for harness horses in all classes at their 1917 fair.

✤ ✤ ✤

Joseph Waddell, secretary of the California Fair and Racing Circuit, made his first appearance as a starter in California at Dixon's May Day races.

✤ ✤ ✤

That Los Angeles will have a meeting is now almost a certainty. W. G. Durfee is on the job and does not intend to give up until a good program is assured.

✤ ✤ ✤

Horsemen who are to race in the California races this year are pleased over the results made by those live wire horsemen of Hemet; who, by their untiring efforts, have assured a meeting on that good track, October 16 to 20, the week following Riverside.

✤ ✤ ✤

C .A. Durfee, the veteran reinsman of the Coast, has taken charge of the training of I. L. Borden's horses. It is said this well known San Francisco capitalist-sportsman has never had so many brilliant prospects and with Mr. Durfee at the helm some good results are expected.

✤ ✤ ✤

At Galt, May 19, 1917, the following races will be offered: Free-for-all pace; 2:20 pace; 2:17 trot. Purses will be $100 each. Half mile heats, two in three, except that where there are over six entries to race. The horses will be divided into two classes and race first and second heats, and the horses placed first and second in preliminary heats will race the final heat.

✤ ✤ ✤

This office has received a supply of the programs and entry blanks of the Wisconsin State Fair, which, as announced in the advertising columns of this issue, will be conducted September 10 to 13 inclusive and offers the largest purses and most liberal opportunities to harness horsemen of any association outside of the Grand Circuit this season. There are 16 harness races advertised; $25,700 in stakes and purses. The seven early closing events entries will close Monday, May 28. Be sure and get your entries in now and assure the game of the continuance of this liberal offer in future years, as well as of its adoption by other big fairs.

✤ ✤ ✤

WISCONSIN STATE FAIR RACING.

State Fair racing officials are eagerly watching the result of the attractive program of harness events arranged by the Wisconsin State Fair this year, and which appears on the advertising pages of this issue. If horsemen show their appreciation of the Wisconsin program by liberal entries, there is no doubt but what other state fairs next year will follow the Wisconsin idea and offer more attractive programs.

R. J. White, superintendent of speed of the Wisconsin State Fair, discussing his program of events this year ,says:

"We believe that patrons of the Wisconsin State Fair, and other state fairs, want harness racing. It is logical, therefore, to assume that they not only want harness racing but the best harness racing that can be provided. I suppose we could have announced the same programs we have had for three years and conducted another successful meeting this year . But we want to advance, and that is why we have induced business men of Milwaukee to assist us in offering a Grand Circuit program of events.

"For three years we have shown the horsemen that our policy is fair treatment of them in every respect. Knowing this, we anticipate that horsemen will show their appreciation of our efforts by doing what they can to make our improved racing program successful. If this appreciation is shown, we probably will add more big stakes in 1917.

"Therefore, it can be said with truth that the future of racing at other state fairs, as well as at the Wisconsin State Fair, will depend in no small way upon the patronage the Wisconsin program receives this year."

✤ ✤ ✤

SATISFIED CUSTOMERS HOUGHTON'S BEST AD.

Lebanon, N. H., April 23, 1917.

The repainted sulkies got here today and they are all O. K. Think you did a mighty nice job on them and I want to thank you very kindly for it.

E. A. SUNDERLIN.

Florence, S. C., April 20, 1917.

My Houghton No. 8 cart is the best running cart I ever had. I wouldn't take ten of the carts I had before for this one. (MAJOR) TOM GREGG.

Northville, Mich., April 12, 1917.

Please ship me C. O. D. one pair bolted on tires for one of your light speed carts, size 26x1½. The last pair I bought from you nearly three years ago were the best I ever saw.

J. B. TINHAM, Trainer,
Starkweather Stock Farm.

Make Classes For Trotters Same as Pacers.

In Mr. Harrison's splendid article of March 24, he says: "Bonnie Cres is out of Silk Cres, full sister to Bon Cres 2:10¼, etc." Silk Cres is a full sister to Kate Kopje, dam of Bon Cres 2:10¼ and Baron C. McGregor (3) 2:25. Messrs. Sutherland and Chadbourne are preparing Bon Cres and Baron C. McGregor for the 1917 California races; both are doing nicely at this time. I would like very much if the proposed classes for trotters would be the same as pacers, as outlined in your paper of April seventh, page nine. I think it would be a better classification of races. According to Futurity announcements the trotters are getting the attention of the promoters and I believe the trotter should be encouraged all the way through. I may say this suggestion of mine is both personal and for the encouragement of the man with the trotter.

We all want to breed trotters if we can but we want a chance to race them or sell them to a man that will race them, and this condition can be helped by having a good arrangement of classes. I would like to know what other breeders think of it. I am breeding Kate Kopje to The Anvil 2:02¾ this year and expect to get a real trotter.

Pasadena. J. J. CAMPBELL.

✤ ✤ ✤

The local sulky season will open with a race program at the Park Stadium on May 17, according to plans of the San Francisco Driving Club, which held its organization meeting at Promotion Hall, Sixteenth and Valencia streets.

✤ ✤ ✤

The money winning of the get of the deceased McKinney 2:11¼, headed by Sweet Marie 2:02, that is credited with 31 wins, 7 seconds and 2 fourths, total $45.500, is 602 firsts, 438 seconds, 353½ thirds and 245½ fourths, with $388,615.50.

✤ ✤ ✤

George H. Estabrook is still in the game and has his string working nicely at the Overland Park in the hands of Ollie Graves. Colorado Range (3) 2:08½ and E. Colorado, the three-year-old son of Colorado E., are working satisfactorily. Besides these are some promising young things by Colorado E., two two-year-old pacers by Peter O'Donna 2:08 and Direct Pointer, a young son of Baron Direct.

✤ ✤ ✤

Fred Chadbourne is going along easy with the horses under his care at Pleasanton, and while no sensational time has been made they are all working well and doing well. A. B. C. has been a mile in 2:12½, half in 1:04; Verna McKinney mile in 2:16, half 1:05; Zoetrix mile in 2:15, half in 1:04; Bon Cres mile in 2:16, half in 1:05; El Paso (3) mile in 2:17, half in 1:06; Howard's Comet mile in 2:14¾, half in 1:05; Beretta D. mile in 2:22, quarter in :31; The Lie (3) mile in 2:16, half in 1:05; Baron McGregor, mile in 2:20, quarter in :32½; Donnello mile in 2:17 ,half in 1:05; Proof colt (3) mile in 2:26, half in 1:09; Jake Logan mile in 2:18 ,half in 1:07.

✤ ✤ ✤

RIVERSIDE COUNTY FAIR.

At an informal meeting of the directors of the Riverside County Fair held on April 30 it was unanimously decided to recommend to the board at its next regular meeting that the Riverside fair association join the racing circuit.

The Riverside fair, which is four years old next fall, has always had a strong program of races. This is the only county fair in the southern part of the state and naturally the races draw large crowds of followers of the track from all parts of Southern California. The half mile track at Riverside is one of the best in the state. All of the fast horses in the west in past years have appeared at the Riverside fair. It is an assumed fact that this year there will be more than ever.

At the Riverside County Fair and Race Meeting, October 9 to 13, inclusive, the following program of harness races will be staged:

Tuesday, October 9.

1. 2:30 class trot $400
2. 2:18 class pace 400

Matinee Events.
⅜ Mile Run.
¼ Mile Run.

Wednesday, October 10.

3. 2:23 pace $400
4. 2:14 trot 800

Matinee Events.
¾ Mile Run.
¼ Mile Run.

Thursday, October 11.

This day will again be devoted to a program of Indian sports and pleasures. Students of Sherman Institute and visitors from the nearby reservations will offer a program of interest and excitement.

Friday, October 12.

5. 2:20 trot $500
6. Free-for-all pace 500

Matinee Events.
1 Mile Run.
¼ Mile Run.

Saturday, October 13.

7. 2:14 class pace $800
8. Free-for-all trot 500

Special Harness Events.
Matinee Events.
¾ Mile Run.
½ Mile Run.

BOARD OF REVIEW MEETING.

The Board of Review of the National Trotting Association conducted its semi-annual session at the Murray Hill Hotel, New York, on Tuesday and Wednesday afternoons of last week. Practically all of the deliberations of the Board were upon matters of minor importance, and, with the exception of one "ringing" case, all others were the result of horses being protested during the 1916 racing season.

The ringing case was against Sarah D. 2:12, and her driver, C. A. Hammond, of North Vernon, Ind. The mare was raced under the name of Nellie H. at Tuscaloosa and Greensboro last year, and won upwards of $300 in purse money. The Board of Review ruled that both horse and owner be expelled, but that if the amount of the mare's winnings is returned for distribution among the lawful winners Sarah D. can be reinstated. Her owner, who raced her out of her class and under a false name, however, remains expelled until the Board rules otherwise at some future date.

The application of A. E. Richardson for reinstatement was denied. Richardson, it will be remembered, was suspended in 1911 for racing Jack London as Professor Sphinx.

Because Charles Goodman, of Grand Marais, Mich., and Charles J. Root, alias Edward J. Rock, were unable to convince the Board that the mare, raced as Princess, by Electriant ,was not the real mare, but masqueraded under the name, they were suspended until such time as they can furnish evidence to offset the charges filed against them. The protestants claimed that the horse known as the Princess was sold at Madison Square Garden. The suspended horsemen must also return more than $200 won by the Princess.

Among those present were John C. Welty, president; Pierre Lorillard, Jr.; Reese Blizzard, A. P. Sandles, P. H. Wall and W. H. Gocher.

✤ ✤ ✤

Teddy Bear "came back" at Dixon. If a horse ever showed he was on his toes this game pacer did it last Saturday. While he lost the first heat of the free-for-all, had it been a mile heat he undoubtedly would have been in the lead at the finish.

✤ ✤ ✤

T. M. Barstow advertises for sale the McKinney stallion Nearest McKinney 2:14½, sire of All McKinnew 2:04 and several other standard performers. Nearest McKinney was a good race horse and a successful sire and should prove a bargain at the extremely easy terms of sale offered.

✤ ✤ ✤

What is regarded as two days of the best matinee racing to be seen in the state this year is going on at Lockeford, San Joaquin county, Cal. There are five trotting and pacing races scheduled with running races winding up both days' events. The purses for the harness horses are for $150 each and a good lot of horses are entered.

✤ ✤ ✤

Gebhard Wempe, who was seriously injured last week when he was thrown from his buggy in Golden Gate Park, is slowly improving. Mr. Wempe is still suffering severely from the injury to his right limb and it will be some time before he will be able to be out. He expects, however, to be in condition and "ready for the word" when the bell taps at California's first race meeting.

✤ ✤ ✤

James J. and Thos. Ryan have purchased Yoncalla from A. Giovanetti and announced their intention of entering Yoncalla in the matinee races as well as on the circuit this summer. Yoncalla is a six-year-old trotter sired by Bon Voyage 2:08 from Birdie by Jay Bird, dam of Bodaker 2:13, one of the gamest and fastest trotters ever seen on the California Circuit. Yoncalla was one of the stars of the Stadium races last season, and under the able training of Al Schwartz should be a prominent contender in this year's circuit.

✤ ✤ ✤

Planning for Fresno District Fair Purses.

Although there was not a quorum of directors at the meeting of the Fresno District Fair last Saturday, the expression of those present was that they would offer in the neighborhood of $8,000 premiums for four days' racing, Sept. 24 to 27 inclusive; purses are as follows:

2 purses of $2,000 each;
2 purses of $1,00 0each;
4 purses of $500 each.

This amount may not pass the board, but this is in the neighborhood of the amount that will be offered.

✤ ✤ ✤

Taking over the Nashville race track as a training camp for soldiers is a reminder of what happened in England when the war broke out, and of what may happen in many places here when Uncle Sam gets down to business in training an army of a million men. The larger race tracks, with their stables, grand stands, club houses and level fields, afford admirable quarters for the troops, but it is to be hoped that if the War Department decides to utilize them it will do so in a way that will not interfere with meetings of short duration but of great importance to the owners and breeders of horses. Trotting meetings seldom last more than one week, and it should be possible for the army men to clear the tracks for this length of time when the dates are known far in advance.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

May 13—Everett, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Everett Gun Club. C. E. French, Secretary.

May 13—Eureka, Cal.—Eureka Blue Rock Club. W. E. Innes, Secretary.

May 13, 14, 15—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary.

May 14, 15, 16—Spokane, Wash.—Spokane Gun Club. "Old Policy." Chas. A. O'Connor, President.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden, Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

✤ ✤ ✤

San Francisco Fly Casting Club—The San Francisco Flycasting Club has arranged the following schedule of club medal contests to be held at Stow Lake during the season of 1917: May 12-13, May 26-27 and June 9-10: Delicacy and accuracy fly, half-ounce accuracy bait, heavy tackle distance fly and half-ounce distance bait. June 23-24, July 14-15, July 28-29 and August 11-12: Delicacy and accuracy fly, dry fly accuracy, half-ounce accuracy bait, light tackle distance fly and salmon fly. August 25-26, September 8-9, September 22-23 and October 6-7: Delicacy and accuracy fly, quarter-ounce accuracy bait, light tackle accuracy fly ,salmon fly and dry fly accuracy. There will also be special team events. June 9-10 and August 11-12 are make-up dates.

The season for 1917 will be divided into three divisions. Medals will be awarded for the highest score ,and in duplicate events medals will be awarded for highest scores in one division only. There are two classes in each event—champion and expert. A gold bar will be awarded in the first-named class and a silver bar in the second.

About Fishing Tackle.—Tackle and Time—Correct fishing tackle is as necessary in the hands of the tyro as well as with the practical angler, but the beginner mustn't expect tackle, however, appropriate, to be all that is required to make toward perfection in angling; experience and practice are equally important. As an apprentice in carpentry who may have all the tools of his master still needs experience and actual practice, so the young angler fully equipped with good tackle must serve an apprenticeship on the waters.

Buy your tackle.—The old anglers tied their flies themselves, and in fact, made all their rods and tackle, save perhaps, lines. Today few anglers think of tying flies or preparing any tackle owing to the expertness and moderate terms on the part of the dealers. It is much cheaper to buy tackle outright, as it is to buy gun shells ready loaded.

To remove a ferrule.—Hold it over the flame of a spirit lamp or any flame until the cement is softened. If it has been pinned on, take a large needle, break it off squarely, put it on the pin and strike just hard enough to set the pin below the ferrule, then warm and remove.

The joints.—If your rod joints go together harshly or do not come apart with ease, oil them lightly. See that no sand or any dirt gets in the ferrules. To take the joints apart easily when they are tightly set, gently warm the metal.

Killing the trout.—Kill your trout the instant they are landed; don't let them suffer slow death. The game deserves humane treatment and the meat tastes better by quick killing.

All season flies.—Alder, Gray Palmer, Green Palmer, Ginger Palmer, March Brown, Reuben Wood, Professor, White Miller, Coachman, Royal Coachman, Dark Coachman, Ibis, Brown Palmer, Red Palmer, Grizzly King, Queen of the Water, King of the Water, Black Gnat. Early in the season use hooks No. 6 to 8, later 8 to 12. Use the small patterns on streams, and large patterns on lakes and rough waters; and as repeatedly suggested, when the day is bright and the water is clear, use the small flies of plain colors; on dark days and in the evenings, use the large bright flies.

Up and down stream.—English anglers wade up stream and some anglers in America do the same. There is good reason in this manner of wading on the part of the old country's anglers, because where they practice it the water is quiet and not altogether shallow . In America, where our trout waters are rapid and foaming as they rush along, it is not practical as a general rule to wade up stream. The walking is difficult, you become wet ,the trout see you notwithstanding they lie face up stream, your flies drift toward you, it is hard to keep the line from being slack all the time, the flies sink too often, and altogether you spoil the chances of creeling whatever is takable in the stream. On still, barely flowing waters a line may be cast up or down stream.

Position of the reel.—The reel of a rod should be on the under side of the rod, in front of the handle; that of a fly rod on the under side below the handle. Reels on the upper side of the rod are wrongly placed, as they put the line's strain on the rod joints when the strain should be on the guides, not on the rod itself.

Cork handle.—To avoid blisters on the hand, have the handle of your rod covered with cork instead of cane, twine or rubber. It will prevent the hand from slipping, is pleasant to touch and very light in weight.

To extract hooks.—Cut the snell free and push the hook through, depressing the upper end so as to bring the point out as near as possible to where it went in. Don't try to pull the hook back.

Care of the rod.—See that your rod case is properly dry before you put yor rod in it and always tie the case strings loosely or you will have bent tips and joints.

Columbia-Willamette League—

	W.	L.	Pct.	Shot at.	Broke.
Woodburn	2	0	1000	250	224
Albany	1	0	1000	125	117
Salem	1	1	.500	250	216
Astoria	1	1	.500	250	211
Oregon City	0	1	.000	250	208
La Grande	0	1	.000	250	225
Pendleton	0	1	.000	125	209

Results on April 29th:

Oregon City 113, La Grande 113.
Woodburn 103, Salem 94.
Albany 117, Astoria 94.
Pendleton remaining idle.

The first tie match of the 1917 season in the first annual Columbia-Willamette Trapshooters' Association tournament occurred on April 29th, when the Canemah Gun Club of Oregon City and the La Grande Gun Club each broke 113 out of a possible 125 targets.

Woodburn Gun Club won from Salem, 103 to 102, and Albany won from Astoria, 117 to 94. The Round-up Gun Club of Pendleton, Ore., the seventh member of the circuit battling for The Oregonian trophies, did not contest. Last Sunday Pendleton met La Grande.

Every club of the association had much difficulty shooting because of the wind, according to the reports received, but the worst wind of all hampered the Astoria Gun Club representatives. But six of the Astoria club's members were able to get out to the traps and their score of 94 out of 125 is considered commendable in the fact of such adverse shooting conditions.

None of the nimrods of the six clubs competing was able to make a possible, but several annexed 24's.

BEGINNERS' DAY EVENTS DEVELOP SHOOTERS

[By Peter P. Carney.]

About the best piece of promotive work for the sport of trapshooting in recent years was the inauguration of the "Beginners' Day" 'idea. Tried for the first time in 1915—during the month of May—678 men and 522 women appeared at 520 gun clubs and shot at clay targets for the first time.

The scope of the idea was broadened somewhat the last year in allowing the shoots to take place during May and June and allowing men and women who had not shot at more than 500 targets to participate for the Beginners' Day trophies. In 1916 these events were conducted by 773 clubs and 11,625 persons participated.

In order to make these beginners' days attractive trophies are given—a silver watch fob to the man and a silver spoon to the woman making the best score. To interest the clubs two trophies are given in each state—one to the club that gets out the greatest number of beginners and another to the club which gets out the second highest total. Two trophies are also given in each of the Canadian provinces.

Records are maintained to show how the clubs fare. The Pahquioquo Rod and Gun Club, of Danbury, Conn., got out the greatest number of shooters in 1915, with the Portland (Ore.) Club second. Last year the Hawthorne Club of Chicago was high, with the Brookville (Mass.) Club second. Illinois got out the largest number of beginners—688, with 58 of them women. Pennsylvania got out the greatest number of men—628—and the Keystone State also conducted the greatest number o fshoots—86.

The 1917 beginners' day events should outclass those of the past two years. The same provisions are made for the club trophies and to the men and women shooters. According to the announcement a beginner is one who has not shot at more than 500 targets before April 1. The shoots will be held during May and June. Many clubs will conduct more than one shoot so as to give attention to people who wish to shoot, but cannot make their time suit the one particular date.

It is suggested that beginners' day events be at 25 targets, in strings of five, and that the targets be thrown straightaway and not more than 35 yards. As beginners' day events are club boosters and builders as well as aids to trapshooting, clubs are asked not to put on any other events the day they have beginners' shoots. This will allow the veteran trapshooters to give attention to the novice and instruct him—or her—in the proper method of shooting.

These beginners' day events have put an end to that oft-repeated saying of years ago, "I would like to shoot, but I do not care to make a show of myself." Every one is on eual terms in the beginners' day events, and the experienced amateurs and professionals are only too glad to give the beginners every attention.

These are the days when we all should know how to handle firearms—and no better chance was ever given Americans than beginners' days. Accept the opportunity while it is here.

Framing New Laws.—Now that the smoke of incessant battle in their behalf is beginning to blow away from the "firing line" at Sacramento, sportsmen are taking quite lively interest in learning what the Fish and Game Commission has been able to save for them out of the threatened wreck.

New laws mostly will not become effective until August, but a list of the various measures will be compiled as soon as possible. The new laws represent, according to Executive Secretary Carl Westerfeld of the State board, "an enormous amount of work, most of which was done by Frank Newbert * * * and finally succeeded in suppressing a large number of vicious bills, also succeeding in passing most of those advocated in behalf of fish and game, which on the whole has not much to complain of."

Country Lad Improves As Shooter.—The wholesomeness of life in the country with its attendant hard work in the open air is never more manifest than at the traps when the country boy, fresh from the farm, pits his nerve and clear sightedness at the big trapshooting tournaments against that of the topnotchers.

In the ranks of the aforesaid top-notchers are to be found a majority who shoot once or twice a week throughout the season until, when the big tournament is on, their muscles and nerves are trained to a mechanical perfection. The country boy, however, has no such training and many of them let six months or more slip by before they find an opportunity to face the traps for a little practice.

Nevertheless, it is these same bronzed and brawny Americans who offer constant surprises to the gallery and contestants at the State trapshooting classics and the old-timer cannot but wonder what the result would be if the farmer lad in connection with his clean, homely life had his weekly issue with the animated targets.

It is true that the hand trap is fast finding its place on the farm, and who knows but that this combination—the farmer boy and the hand trap—will develop in this counttry a shooting talent that will make present-day scores seem mediocre.—[By Trapshooter.

J. H. HOPKINS WASHINGTON CHAMPION.

Outsider Beats Out Frank Troeh in State Tournament at Green Lake Grounds.

Frank Troeh, of Vancouver, Wash., national amateur trapshooting champion and holder of the Washington state title, lost his state honors Monday, April 30, in the twenty-third annual championship of the state, contested at the Green Lake Gun Club. J. H. Hopkins, a member of both Seattle clubs, an outsider, wrested the honors from the Vancouver crack by breaking 97 out of the 100 targets. Hopkins' performance was a surprise to every one of the eighty-one shooters who competed for the big honors, as Troeh was expected to win without difficulty.

Although he lost the title, Troeh established a coast record for consecutive hits, breaking 284 targets without a miss.

The other events of the day were won by Fred Call, of Seattle, who took the L. C. Smith cup, and George Miller, of Bellingham, who took the Rainier trophy. Call broke 25 straight and Miller won in a shoot-off with Conklin and Adams.

Troeh's defeat is attributed to the strain of breaking the record number of birds. Troeh lost two targets in his first event, and he was plainly nervous as he continued shooting. He lost five more in the 100 and finished with 95.

C. E. McKelvey, of Seattle, was the runner-up in the big event. McKelvey won the right to compete in the East if Hopkins fails to go to the Grand American after shooting off a tie with C. E. O'Connor, of Spokane. Both had broken 96 targets. Other high men were J. B. Adams, of Leavenworth; L. S. Barnes of Seattle, and George Gregory of Spokane.

Miss Gladys Reid, of Spokane, the only woman shooter to compete, shot the full program and finished in the state event with a score of 128 out of 150, which is below her usual form. Tom Wilkes, who came up from San Francisco to compete, got 143. Hi Everding, of Portland, known as the prince of sportsmen in the trapshooting fraternity of the Northwest, turned in a good score of 145.

The three professionals, L. R. Reid, of Seattle; H. E. Poston, of San Francisco, and F. C. Riehl, of Tacoma, tied for high honors in their class of 147 each.

The meet was a big success ,and Secretary G. A. Conklin, M. A. Rosenfield, H. Gleason and L. S. Barnes are given much credit for the business-like manner in which the shoot was run off. It was the biggest state shoot ever held in Washington.

During the shoot C. E. McKelvey, of Seattle, was elected president of the association; Hugh Fleming, of Seattle, secretary-treasurer. Next year's shoot was awarded to Tacoma. The scores, April 30th, with the 100 target event for the State championship follow:—

O'Connor 43x50, 96x100; March 46, 86; Ware 46, 93; Fleet, 45, 92; Geesey 44, 83; *Poston 48, 99; Owens 45, 93; Ovender 47, 90; Browne 48, 92; *Riehl 48, 99; *Reid 48, 99; Wilkes 49, 92; McKelvey 50, 96; Stacey 43, 86; Scott 47, 94; McIntyre 47, 87; Field 45, 82; Knickerbocker 40, 78; Bowers 47, 88; McLean 46, 90; Gregory 41, 95; Chingrin 43, 93; McElroy 48, 92; Egbers 46, 94; Boultbee 39, 77; 'Holohan 45, 91; *Rhodes 46, 96; Blair 48, 94; Spratley 44, 87; Cooper 44, 86; Kienast 44, 88; Brackney 46, 90; Converse 49, 89; Anderson 45, 93; Everding 48, 97; Templeton 48, 90, Keller 47, 98; Friedlander 27, 57; Clemson 28, 55; Ellis 45, 93; Kinzer 49, 84; Landwehr 47, 94; Fleming 46, 94; Ruppe 47, 92; Hambright 46, 96; Taft 43, 89; Miss Reid 44, 84; Mann 41, 90; Reid 46, 93; *Garrison 42, 97; Eisenbeis 50, 89; Dague 47, 94; Rice 48, 93; Patison 28, 66; Templeton 45, 90; Follrich 45, 93; Miller 45, 91; Searle 46, 78; Hopkins 46, 97; Bacher 45, 80; Merrill 45, 78; Brown 35, 69; Fortier 40, 82; Newland 40, 53; Davis 39, 79; Griffith 42, 85; Kidd 42, 83; Case 34, 49; Geltz 45, 84; Conklin 47, 90; Care 45, 89; Martin 19, 90; Carsten 47, 92; Lewis 40, 70; Fisher 45, 93; Adams 48, 96; Van Vleck 47, 89; Barnes 47, 95; Baker 40, 88; Cramer —, 74. (*Professionals.)

First Day.

Frank M. Troeh, champion amateur trapshot of the state, got off to a good start on the first day, April 29th, when he turned in a perfect score of 150 straight breaks, which, with an uncompleted run of 81 scored in a practice shoot, gave him an unfinished mark of 231 straight.

Troeh's shooting was easily the stellar feature of the first day, which was enthusiastically enjoyed by the scatter-gun artists from all parts of the state, who were none the least abashed by the torrents of rain.

Guy Browne, of Wenatchee, shooting from the 20-yard line, broke 25 straight clays and captured the Post-Intelligencer handicap shoot medal, which trophy he will retain until the next year's competition, when he will be called upon to defend his honors.

Jack Connors, of Bellingham, and Fred Call, of Seattle, tied for the Spokesman-Review trophy, and the former forfeited by leaving the field without shooting off the tie.

Except for the rain, which did not materially bother the shooters, it was an ideal day at the traps. Hugh McElroy, of Spokane, was second high gun among the amateurs with a score of 146, while the high professional honors went to Frank C. Riehl, the Tacoma veteran. Besides Troeh's straight run for the day's shoot, the following hung up excellent straight scores as follows: Les Reid, Seattle, 92, 57, 100; F. C. Riehl, Tacoma, 88; C. E. McKelvey, 52, 60; Abner Blair, Portland, 88; George E. Stacey, North Yakima, 54; Sumner Scott, North Yakima, 60; J. E. Rice, Bellingham, 55, 53; J. H. Templeton, 57; Deskin Reid, 75; E. J. Chingren, Spokane, 52. The scores were:

C. L. Templeton 138, H. Rollrich 141, J. H. Templeton 140, Searle 137, Hopkins 135, *L. H. Reid 149, Wilkes 143, McKelvey 142, Stacey 138, E. Scott 138, Ellis 1441, Kinzer 137, Landwehr 133, Fleming 139, Ruppe 140, *Poston 144, Owens 140, Ovendon 139, Browne 139, *Riehl 149, *Holohan 141, *Rhodes 136, Troeh 150, Blair 138, Sprattley 134, Cooper 1441, Kienast 132, Brockway 139, Converse 139, Anderson 142, Daly 132, Bandy 134, Grossman 137, Bocher 126, Campbell 126, Everding 136, F. Templeton 142, Keller 141, Friedlander 90, Clemson 89, *Hambright 141, Taft 136, G. Reid 137, Mann 131, D. Reid 144, Gregory 145, Chingren 142, McElroy 146, Egbers 139, Feurell 90, *Garrison 140, Eisenbeis 137, Dague 134, Rice 144, Smith 117, Conklin 133, D. Baker 127, Martin 127, Carstens 138, Lewis 132, *Fisher 146, Adams 140, Van Vleck 141, Barnes 144, George Baker 126, Davis 116, Griffin 120, Kidd 118, Gate 84, Geltz 130, McIntyre 128, Field 141, Knickerbocker 113, Bowers 139, McLean 137, O'Connor 136, Marsh 140, Ware 140, Miles 109, Gusey 135, McConnell 132, Fred Call 139, Hill 91, Gleason 115, Dr. Lanter 112.

Alameda Elks' Club.—W. A. Joslyn, the Eastern professional who has been making his headquarters in San Francisco for the past six months, provided the feature of the monthly tournament of the Alameda Elks' Club on Sunday when he smashed fifty straight in the regular program and continued on to establish a straight run of 125 without dropping a bird. This is said to be a record for San Francisco and vicinity.

Henry Stelling led the amateurs with a score of 49 out of 50 and Ted Handman, Charles Linderman and Dr. Topham had a pretty race for second honors with 48 apiece. "Onion" Jones came along to land second to Joslyn with 46.

A side feature was the long-anticipated race between that squad of rival professionals, E. Stressler, Harry Truscott, Larry Middleton, J. W. F. Moore and Frank Blum. They have been in a controversy for months over their respective abilities to make the smoke fly. Well, sir, they got together on Sunday and bet money and marbles on the result. O. N. Jones was a brave man to undertake the job of referee. There were no casualties because E. Stressler went out in front at the start and stayed there with a score of 45 at the finish . Frank Blum sort of surprised the gang by coming in second with 43 and Larry Middleton got the "show." Moore and Truscott brought up the rear. There was some rivalry and excitement when they were settling the honors. The scores of the forty-one gunners at the traps were:—

Fifty targets—R. G. Boyd 43, H. Meinecke 46, H. C. Peet 43, W. G. Becktell 47, H. A. Ray 42, W. H. Price 46, H. Stelling 49, H. R. Phinney 47, W. L. Koch 42, B. Worthen 46.

A. M. Gearhart 42, Pop Merrill 46, Jack Walter 26, E .A. Bean 46, F. E. Hillyer 38, N. A. Howard 44, F. W. Parsons 48, Ted Handman 448, H. Vallejo 45, A. W. Aitkin 38.

*E. Stressler 45, *H .Truscott 36, *J. W. F. Moore 38, *L. Middleton 42, *F. Blum 43, B. R. Hart 39, Al Durney 43, *C. H. Knight 44, *W. A. Joslyn 50, C. Carman 42.

Charles Linderman 48, J. B. Brady 42, Dr. E. Topham 48, George Wesper 42, H. Martine 44, *O. N. Jones 46, L. Fuller 39, T. H. Haskins 35, P. G. Herrlein 34, O. D. Hamlin 43, E. J. Croll 43.

Portland Club.—Missing but 6 out of 50 targets, Dr. A. K. Downs led the amateurs in the Sunday practice shoot on the Everding Park traps of the Portland Gun Club on April 29th. Ed Morris topped the professionals with 45 per cent, and Jim Reid was one bird behind Morris. The scores:—

Ed Morris 45, J. Reid 44, A. L. Zachrisson 35, H. O. Joy 34, Dr. Thornton 39, F. E. Brooks 24, Dr. A. K. Downs 44, F. Jackson 29, J. G. Kamm 33.

Prize Trout.—There was one grand rush of fishermen into Los Angeles on the opening day of the trout season, to see who would land the prizes for the first and largest fish. Sporting goods stores put up a number of handsome prizes for the first and biggest trout.

S. H. Christie was the first angler to arrive in the city with the limit of fish. He pulled up at exactly 7:10 o'clock, and, as a result, captured the handsome prize for the first limit of fish. He caught the limit near the Foothill boulevard bridge along the San Gabriel river. The fish averaged 6 to 10 inches in length.

Lonnie Garwood arrived with the first limit of real large fish. He drew up at 7:20 o'clock. Garwood caught his limit, which consisted of three large fish, along the Malibu, and won a rod.

Bert Reynolds of Venice was the first angler to arrive with a limit of trout. Reynolds arrived at 7:27 o'clock with a fine string of trout which he caught along the Malibu. John P. Conley arrived at 7:50 with a limit, which he caught in the Arroyo Seco. He won the second prize.

Frank Reynolds won the third prize and L. C. Ashton the fourth.

STATE SHOOT IN SOUTH DRAWING NEAR.

Attractive Program Is Announced For Big Doings at Los Angeles, May 21, 22 and 23.

The California-Nevada State shoot opens on Monday, May 21, this being the first gun fired in the regular competition, but the preliminary joy starts on Saturday, the 19th.

Trophies and money amounting to just a bit under $1200 are hung up for this big shoot, the cash being 1000 pieces-of-eight—plus 125 in the form of dimes and pins and other such articles of frippery.

Starting at the start, which is the opening of the Monday shoot, the program calls for ten events of twenty birds each, or 200 for the day's toll of the slain. The entrance is $2.50 per event, including the birds, or 50 cents per event for the birds alone, which same is a term denoting the man who doesn't care to buck the game to the extent of betting $2 on his skill. Said cautious man shoots merely for the fun and a show for the trophies, and pays 2½ cents for the birds.

The kitty, made up of the $2 paid in to enter each event, is to be split thusly: 40, 30, 20 and 10 per cent, class shooting, which means that in each event the twenty straight scores would split among them 40 per cent of the purse—six gents, then the purse is split six ways, and so on. If there be, say in event No. 1, a 20, a 19, an 18 and a 17, then all those breaking 20 split 40 per cent of the kitty among them, those with 19, 30 per cent; 19, 20 per cent, and 17, 10 per cent, which means splitting about $5.50 among sixteen gents. The able mathematician may be able to calculate from this the fact that it pays to break as many as possible.

Also at the end of the day there is a sum of 200 bucks to be split up as average money for the high guns, high man getting $30, next $25, third 20, $15 for the fourth and $10 each for the next eleven men. Also the five high places on this day draw down a handsome diamond pin per each.

As a sop to the poor shooter, $10 each will be awarded to the five lowest places in the total for the day.

The second day, Tuesday, sees a repetition of the program, with the following old and historic California-Nevada Association trophies hung up. First events, twenty-five birds, Hunter Arms Company trophy; second event, Sorenson trophy; third event, Peters trophy; fourth event, the California-Nevada trophy; fifth event, the same; sixth event, the Roos trophy ,and seventh event, the Hunter trophy, number two. Each of these will go on the 25-bird event listed.

The same system for splitting the purse, and the same high average money applies, with the addition of $140 for high average for the two days, split $14 for each place of the first ten places, class shooting, not high gun. Also there are five more diamond pins for the five high places Tuesday, and $10 each for the five lowest places.

The third day is the grand show-down. Starting at 9 a. m. sharp, there will be staged the California-Nevada State championship at 100 targets, sixteen yards, entry, $7.50 including the birds. The rewards for valor will be 15 per cent of the kitty to the first place, 12 per cent to the second, 10 per cent to the third, 8 per cent to the fourth, and 5 per cent each all the way down to the fifteenth place. Also there will be split $200 high average money, $20 going to each one of the places down to tenth, class shooting. Also there are seven Interstate trophies for the seven high men—not high places—in this event, and the winner will be given $50 if he attends the Grand American Handicap in August, at Chicago ,as part of his expense money for representing California and Nevada.

Following the grand State shoot before described, there will be a hundred-bird handicap race with $7.50 entrance, with the kitty split a bit more stiff-necked than in the straight cut-throat, 16-yard, 100-bird race for the State championship. A diamond pin will go to the shooter making the high score from each distance, pin for high man standing at sixteen yards, another for seventeen, and so on to the 22-yard distance.

Saturday and Sunday ,although not scheduled as part of the regular registered shoot, include some nice little cut-throat events for the ambitious, and plenty of practice for those playing the cards out closer to their vests.

Going to National Casting.—The Southern California Rod and Reel Club has voted to send three representatives to the tournament of the National Association of Scientific Angling Clubs to be held in Chicago August 31, September 1, 2 and 3. The team has not been chosen as yet, but will be selected soon. Interest in fly and bait vasting is increasing very rapidly here and our membership is constantly being added to. The club has an average of twenty applications on every meeting night, which is the first monday night of each month. Indications are that both the fresh and salt water fishing in this locality will exceed that of all past seasons.

Los Angeles, Cal. OSCAR LANE.

E. E. Harriman, an enthusiastic rifleman of the City of Angels, has suggested that the city dads of the California town establish a municipal rifle range. Which isn't a half bad idea and is an entirely feasible one.

Sportsmen's Row

Bill Price got going the last frame when he knocked out twenty straight . Bill has been practicing up on the checker board and has his moves down to a nicety.

✤ ✤ ✤

W .A. Joslyn showed his class on the firing line when he ran 125 straight. The professionals will have to watch this entry in the State championship and Pacific Coast handicap.

✤ ✤ ✤

A number of the trap shots were down at Coalinga for the registered tournament, and others were out on their favorite stream to take advantage of the opening of the trout season.

✤ ✤ ✤

George Melford and his new gun are going to make all the boys step some from now on . This was his second try with the new arm and his 92 out of 100 was the result from 19 yards.

✤ ✤ ✤

Al Durney passed up a fishing trip for he says he does not want to spoil his form at the traps. Al has been coming along nicely for a fellow who is only sighting the bluerocks for his second season.

✤ ✤ ✤

The Vernon Club is going to open a two-day event with an attractive program. The southern gunners will turn out in force in order to practice up for the California-Nevada championship later on in the month.

✤ ✤ ✤

Tomorrow, May 13th, is going to be a busy day for trapshooters up and down the Coast. No events are scheduled for the Alameda traps but a number of the boys will go to Eureka to take in the registered tournament.

✤ ✤ ✤

The Northwest Washington Trap League will stage another o fits successful shoots at Everett tomorrow. The leagues are flourishing up in the northwest and it seems a pity that clubs in California have not the enterprise to launch a circuit of shoots.

✤ ✤ ✤

R. H. Morse of Chicago brought with him a blue print of the ground plans of the South Shore Country Club of that city, showing the lay-out for the 1917 Grand American Handicap. It was tacked up on the Los Angeles club house and drew the attention of all present.

✤ ✤ ✤

Down in Georgia a setter kept falling into ditches and tripping over her feet in general. It was found that she suffered from astigmatism. She was fitted with a pair of spectacles and they say now that she not only never trips up, but can see a hare or any other sort of game a mile off.

✤ ✤ ✤

Mr. C. T. Meloy, that cracking good shot from Shullsburg, Wis., was on the firing line at Los Angeles and tied for one of the silver trophies. In the shoot-off he broke 19 out of 20 from 19 yards and won. He now has a gold and silver trophy to show for his prowess at these traps.

✤ ✤ ✤

Mr. F. U. Rosebery, president of the American Amateur Trapshooters' Association, of Baltimore, Md., was a very welcome visitor at the Los Angeles club a week ago, and from 20 yards shot into the 90 class. Incidentally he tied for one of the silver trophies and after the shoot-off succeeded in winning the beautiful offering.

✤ ✤ ✤

Trapshooting tournaments have been scheduled for the states of Massachusetts and Idaho, according to announcement by the Interstate Association for the encouragement of trapshooting. The Massachusetts tournament will be held at Boston, June 29 and 30, and the Idaho trapshooters will compete at Twin Falls June 11 and 12.

✤ ✤ ✤

Lindsay was practically depopulated Sunday because of the "fishing fever" induced by a couple of loca langlers who exhibited a bass weighing ten pounds which they say was caught in the Woodlake reservoir. In addition to the big fish they also caught about twenty pounds of bass of various sizes. It is estimated that over two hundred journeyed to Springville Sunday to try for trout in the mountain streams.—W. J. C., Lindsay.
